You Must Fight Thrips

WITH

To-Bak-Ine

To-Bak-Ine Liquid
45% Solution of Pure Nicotine
Kills
THRIPS
White Fly
Green Fly
Black Fly
Red Spider, etc.

If you want to save your crops.

In the first hot days of spring—with a good south wind blowing—you open the ventilators, and then the fight with Thrips begins, the hardest battle of the year. **You'll lose the fight if you are not prepared.** Don't wait until the pests come—get ready to give them a warm reception. Every spring we receive mail rush orders, telegraph and telephone messages from growers who must fight Thrips and have neglected to keep

To-Bak-Ine Products

on hand. Don't wait—have your To-Bak-Ine ready. "An ounce of prevention is worth a pound of cure." Keep the Thrips in control and save money, time, labor and worry. Paint the heating pipes with To-Bak-Ine Fumigating Compound. After fires are out, vaporize it over alcohol lamps. Spray To-Bak-Ine Liquid. Any of these methods will control Thrips and other greenhouse pests—but **it's easier to keep them out than to get them out.** Fumigate regularly, before you see the pests—especially just before you open the ventilators, and just after closing them, these warm spring days. Don't fail to have a can of **To-Bak-Ine** on hand—and use it.

To-Bak-Ine Compound
For Fumigation Only
Its Fumes Kill
THRIPS
Green Fly
Black Fly
White Fly
and other Insects

A. F. J. BAUR. P. S. SMITH.

Baur & Smith Florists
Indianapolis, Ind. May 27, 1907

E. H. Hunt,
Chicago, Ill.
Dear Sir:-
Please forward at once one (1) gallon of To-Bak-Ine Liquid. We find it still the best article a going to fight Thrip, Aphis etc., with.
Yours truly,
Baur & Smith.

Wietor Brothers,
Wholesale Growers of Cut Flowers,
STORE: 51 & 53 WABASH AVE.
GREENHOUSES: HIGHBRIDGE, ILLS.
P. O. STATION, ROGERS PARK.
Chicago, May 31, 1907.

E. H. Hunt,
Chicago, Ill.
Dear Sir:-
We have used your To-Bak-Ine Fumigating Compound and find it to be the best Insecticide on the market. We paint it on our steam pipes just before the steam is turned on. We are also using your To-Bak-Ine Liquid as a spray, diluted with water and find it does all the work you claim for it.
Yours respectfully,
Wietor Bros

TO-BAK-INE LIQUID—¼ pint, 60c; ½ pint, $1.10; 1 pint, $2.00; ½ gal., $7.75; 1 gal., $15.00; 5 gals., $67 50. New Winter-Flowering BEGONIA

PRESIDENT TAFT

Awarded Certificate of Merit by Pittsburg and Allegheny Florists' and Gardeners' Club; Newport, R. I., Horticultural Society, and New York Florists' and Gardeners' Club.

This beautiful winter-flowering Begonia originated in our Nurseries about two years ago; it is stronger, sturdier and more beautiful than any of its predecessors. In color it is similar to Begonia Agatha; it is free and continuous flowering from November to April, each flower the size of a silver dollar. Young plants ready for distribution in June. **$4.00 per dozen; $25.00 per 100.** Orders filled in rotation.

Cash with order from unknown correspondents

THE RETAIL FLORIST.....

MEMORIAL DAY.

The Cut Flower Growers' Own.

Have you heard that "it was a plant Memorial day?" It is the cut flower growers' little monopoly.

However the plant trade may have cut into cut flower sales at Christmas and Easter, the plantsmen do not figure appreciably in the Memorial day business. Of course bedding out is at its height in many places and the cemeteries that have greenhouses, and the florists who do cemetery trade, are busy planting on the graves, but no matter how much grave-planting has been done, the demand for cut flowers May 30 is there just the same.

There was a time, not so many years ago, that Memorial day was considered a little private affair of the old soldiers. It is not so any more. In the last few years Memorial day has become the day for the general decoration of the cemeteries, and with this widening observance has come an immense increase in the demand for cut flowers. There is hardly a family anywhere in the country that has no interest in the cemeteries that day. In many northern cities, where Memorial day is still more generally observed than in the south, it is now said a greater quantity of cut stock is required May 30 than for any other one day in the year.

The Range of Demand.

There is as great a range of demand for Memorial day as for any other holiday. In certain sections of the country the metallic wreath is the popular article, while in other places the 50-cent bouquet is the standard item. In the first-class stores wreaths of galax or boxwood with flowers and ribbon are sold, and flat bunches of flowers similar to casket sprays are made up in large numbers.

Although the business has grown to such large proportions, it has been almost wholly without the assistance of the florist. Hardly any florist has done more to increase the Memorial day business than simply to provide stock for sale. Indeed, there is no class of merchants which does so little as florists do to exploit the merchandise. The attention of ninety-nine florists out of a hundred has been given solely to providing the stock and executing the orders, with never a thought toward the selling end of the business. And at no time has less been done in reaching out for orders than at Memorial day.

How to Bid for Orders.

The advertising of flowers in a way to bring orders is exceedingly simple, and any florist who gives his thought to selling can devise a number of ways of bringing in the buyers. For instance, one florist who has had access to the cemetery records has a list of all the lot owners. That part of the list which contains the names of non-residents is particularly valuable. Once each year, in mid-May, he sends a neatly printed letter to each name, calling attention to his facilities for placing bouquets on cemetery lots on the morning of May 30. He quotes the prices at which he can supply two or three different kinds of bunches, and also quotes prices on some suitable designs, wreaths, crosses, etc. A surprisingly large number respond with orders.

Another florist who has done a little toward increasing his Memorial day business sends out a folder showing halftone cuts of flat sprays of roses, carnations and peonies. He prints the prices at which he will on the morning of May 30 deliver at the customer's home any one of these sprays ready to take to the cemetery. Lots of people order; they don't know what to do with loose flowers when they get them to the cemetery and welcome the suggestion of something all made up which can simply be laid on the grave. But the circular also contains prices of cemetery vases and of cut flowers by the dozen.

Such efforts to increase business are as legitimate as special window decorations and hardly ever does any such advertising fail to bring profitable returns.

THE ANCHOR.

The anchor of ivy leaves is a beautiful design of rich simplicity, the workmanship showing artistic skill of no mean order. Designs of this nature frequently appeal to those who wish to make an unostentatious offering. It is one of those by Charles Henry Fox, of the Sign of the Rose, Philadelphia.

PHIL.

JAPANESE AIR PLANT.

The Japanese air plant, or sea moss, which has become such a good seller in flower stores, was originally imported by the millinery supply houses for use in trimming ladies' hats. Peculiarly enough, it did not prove acceptable for this purpose, and the millinery people found themselves with dead stock on hand until the florists took it up, when it made an immediate hit for their trade. And still more curiously, this year it

The Ivy Anchor, Plain and Neat.

goes quite well on hats and the milliners are handling it in considerable quantity.

There probably never has been a better selling novelty than the Japanese air plant, used as a filling for small birchbark baskets and other hanging receptacles. The birchbark seems specially adapted to the purpose, but many china, brass and even glass receptacles are used, though of course anything for this purpose must be small. Filled with moss and with the air plant gracefully pendulous, these arrangements have been splendid sellers, and everyone expects that during the approaching summer they will go specially well. The public likes them and many who have bought have asserted that they have grown thriftily, only when the arrangement was pulled apart out of curiosity to see where the wheels go 'round, there proved to be only toothpicks for roots.

ROTT'S UPRIGHT WREATH.

The accompanying illustration shows a large standing wreath made with the every-day material ordinarily available in any place where design work is done. The flowers are Easter lilies, Bride roses and carnations. The green is leucothoe sprays and fancy ferns in the base, and ferns for background and adiantum for trimming in the wreath itself. This is another of the designs of Albert C. Rott, Joliet, Ill., and, like all of Mr. Rott's work, where the customer leaves him a choice in the matter, is made up with the flowers rather loosely set on a background of green. Mr. Rott does not believe in the common practice of first making a solid background of white carnations, or asters, if in season, but makes up his work so that each flower has at least some slight opportunity to show for itself.

Rott's Upright Wreath.

DESIGNS FOR MEMORIAL DAY.

Any Good Flowers Are Suitable.

Since Memorial day has become a family as well as a national day, its opportunities for pretty designing are limited only by the time required for execution. Anything in the shape of good flowers is welcome. In the demand for greens, Memorial day is second only to Christmas, while a green wreath with flowers is perhaps the most sought of all.

Laurel in its many varieties, boxwood, asparagus and smilax are all good for this purpose. Wreaths of solid green, with a cluster of flowers on one side, are sure to sell. The addition of a flag tie or drapery is the taker for a soldier's grave. For an average customer who has several graves to decorate, besides the above wreath there are galax, ivy and other out-of-door native foliage, almost any of which, if of woody stock and well matured, makes a good, lasting wreath, either on a frame or set in wreath form and stiffened with heavy wire. To this can be added flowers or ribbon, or both.

For the Sake of Variety.

For the sake of variety, on some place a tapering cluster of roses, the point of which lies well around the wreath. On another tie a knot of peas, with a cord to match either the foliage or the flowers. On one side of another fasten a cluster, fan-shaped, of short-stemmed stock. Make another an all-foliage wreath, by constructing the wreath itself of all green and the decoration of colored foliage.

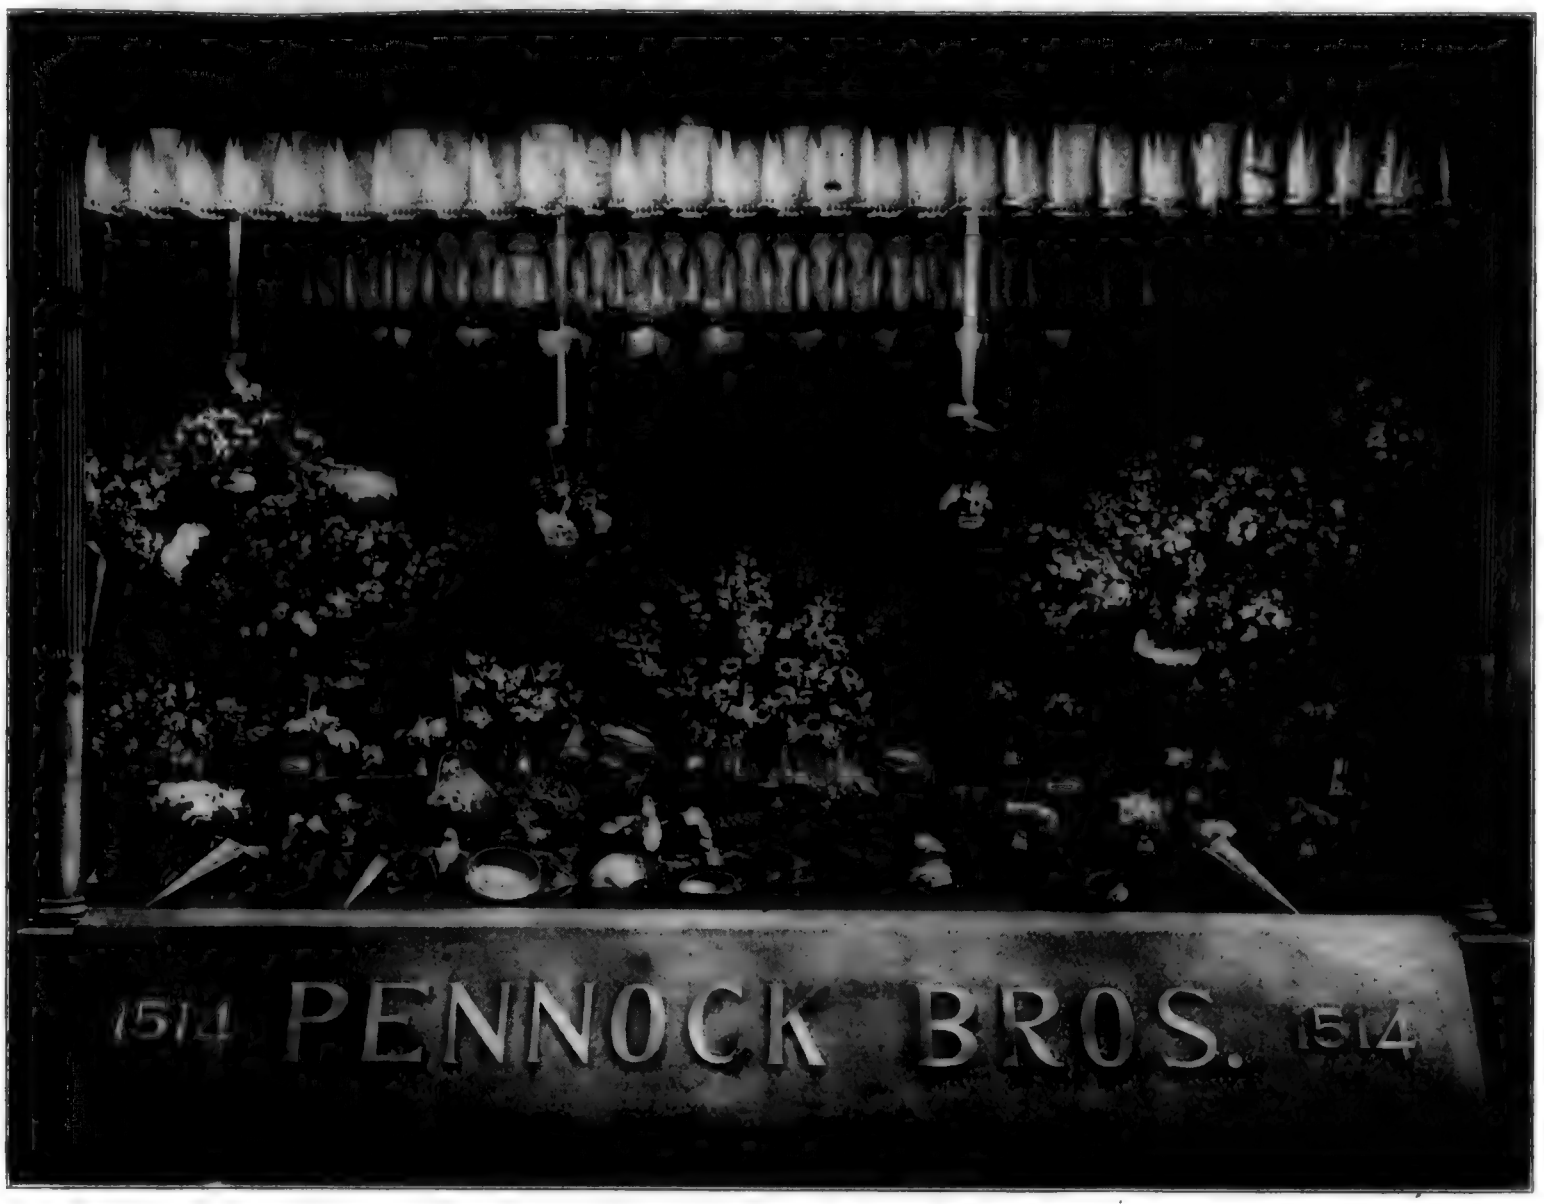
For a mixed wreath, dot the flowers here and there all around the green form. Then one can be arranged with knots of small flowers, with loops of narrow ribbon connecting. This scheme presupposes a solid green wreath as a background.

A Crescent Wreath.

How about a crescent wreath for the next? After covering the frame solid with green, on sides and top, cross two clusters of flowers on the narrow side. Tie with a tight knot of wide ribbon. Throw a cluster of ferns over the knot. Carry the ends of the ribbon in and out, through the flowers and stems, toward the wide part of the design, and when the center of the widest part is reached, spread the ribbon and let the ends fly inside of the center space.

Numberless styles of arrangement and coloring can be shown in one kind of flowers; for example, pansies of one solid color touched with a cluster of another, like purple and yellow, brown and yellow, blue and white, etc.

Leaving a thousand other conceptions of the wreath to the interested designer, we turn to the consideration of a few other designs appropriate for this occasion.



A Use for Small Plaques.

Small plaques, such as are used for table centerpieces, and which are perhaps not used quite fast enough for that purpose, may be tastefully filled with good effect. Fill the plaque solidly with sphagnum. Spread on a green covering of moss, fern leaves or other inexpensive green. Stem and use some medium and short-stemmed flowers, and plant them erectly and well separated, as in basket filling. Place ferns and other soft foliage among the flowers and around the edge, and you have a small flower bed ready for immediate use. These are easily and quickly arranged, and ought to sell well. If price permits, add a dove perched well up on a stout stem, or somewhere on the edge of the basket.

The National Colors.

For a show piece or a more elaborate order, drape a broken column with the national colors, or make a floral urn and catch a silk flag through the handles and across the front of the piece. A flag worked into a pillow of white is a good design. A portrait set into the center of the pillow, or a shield on a pillow on a panel background, will admit of a distinct piece with a liberal decoration.

In working out the national colors, the

Window of a Leading Philadelphia Firm, Hammered Brass Receptacles Employed Throughout.

true colors, as well as the most artistic combinations, are obtained by the employment of blue cornflowers with Roosevelt or Harlowarden carnations and white.

Plants With Basket Covers.

Potted plants in bloom are good for cemetery decorations, as decorative pieces as well as flower arrangements. If used as such, the pots ought to be sensibly and plainly decorated, not with flimsy paper covers, which a shower will ruin, but with plain basket covers. Some of those which have become a little shop-worn could be scrubbed and repainted or stained, and a price put upon the plant which would include the cover.

The better class of trade will take to a well-chosen group of plants, with the addition of a fern, in a basket cover. Leave off ribbons or chiffon bows, and give these baskets an out-of-door, rustic effect.

There is scarcely a limit to the demand for loose sprays for Memorial day. These should differ from the funeral article in being of almost any available color and more loosely arranged. Garlands for monuments, of both green and flowers, are pretty and effective.

GERTRUDE BLAIR.

MOTHERS' DAY.

We Must Push It Along.

From all parts of the country come further reports of the success of Mothers' day—where any effort was made to push it along. The only ones who complain are those who took no steps to see that the day was observed in their town; in some cases they felt no special demand, simply because the day was overlooked. Next year all florists must see that the churches and societies in their locality observe the day. The result this year shows it will be comparatively easy to make this one of the big flower days of the year.

In London, Canada.

We want to express our appreciation of the article which appeared in the REVIEW April 29, regarding Mothers' day. The press cheerfully came to our aid and exploited the sentiment expressed, to such an extent that it was taken up by nearly all the religious bodies in the city and, with but few exceptions, it was the theme of discourse at either morning or evening services. In several of the churches the members of the choir all wore white flowers.

From a business standpoint, it was an unqualified success. Although preparation had been made in anticipation, by four o'clock on Saturday afternoon not a white carnation was to be had in the city, and before eight o'clock not a white flower of any description could be obtained. Hundreds of customers had to be turned away after the supply ran out.

Up to the present time we have had a disagreeable season; what with high winds, cold rains and frosty nights, there has been little or no outdoor work done. On the night of May 5 there was an unprecedented fall of snow, many of the establishments losing a considerable quantity of glass from its weight.

Generally speaking, business conditions are improving. While the retail trade, owing to the weather, has not been what it probably otherwise would have been, the wholesale business has shown a marked improvement over last season.

J. GAMMAGE & SONS.

PENNOCKS' WINDOW.

One of the most attractive retail flower store windows in Philadelphia is that of Pennock Bros. It always receives more than a passing glance. The accompanying illustration is reproduced from a photograph taken of the window when filled with the new hammered brass flower holders, which recently have come into such popularity for use with air plants and small cut flowers; indeed, Pennock Bros. have in this window employed these receptacles in larger sizes, and with longer-stemmed stock, than ordinarily is seen, and with their usual excellent effect.

PORCH BOXES OFFERED FREE.

The Thomas Chapman Floral Co., at Denver, is making a big push this spring for porch box work, and writes as follows: "Noting the illustrations in the REVIEW about porch box planting, we take the liberty of sending you a copy of our circular for this spring. Although somewhat expensive, our plan is proving a strong winner, and already is a money-maker, with the season only just beginning. You will notice we do not mention any price. The object is to get the public to our greenhouses. We mailed out 10,000 of these circulars, well scattered. The boxes and baskets were made by the night firemen during the winter, so there was no expense except for lumber. If you think the idea of any benefit to the trade, you may publish it."

The circular is 14x16, printed on good

goes quite well on hats and the milliners are handling it in considerable quantity.

There probably never has been a better selling novelty than the Japanese air plant, used as a filling for small birch bark baskets and other hanging receptacles. The birchbark seems specially adapted to the purpose, but many china, brass and even glass receptacles are used, though of course anything for this purpose must be small. Filled with moss and with the air plant gracefully pendulous, these arrangements have been splendid sellers, and everyone expects that during the approaching summer they will go specially well. The public likes them and many who have bought have asserted that they have grown thriftily, only when the arrangement was pulled apart out of curiosity to see where the wheels go 'round, there proved to be only toothpicks for roots.

ROTT'S UPRIGHT WREATH.

Generally speaking, business conditions are improving. While the retail trade, owing to the weather, has not been what it probably otherwise would have been, the wholesale business has shown a marked improvement over last season.

J. GAMMAGE & SONS.

PENNOCKS' WINDOW.

One of the most attractive retail flower store windows in Philadelphia is that of Pennock Bros. It always receives more than a passing glance. The accompanying illustration is reproduced from a photograph taken of the window when filled with the new hammered brass flower holders, which recently have come into such popularity for use with air plants and small cut flowers; indeed, Pennock Bros. have in this window employed these receptacles in larger sizes, and with longer stemmed stock, than ordinarily is seen, and with their usual excellent effect.

PORCH BOXES OFFERED FREE.

The Thomas Chapman Floral Co., at Denver, is making a big push this spring for porch box work, and writes as follows: "Noting the illustrations in the REVIEW about porch box planting, we take the liberty of sending you a copy of our circular for this spring. Although somewhat expensive, our plan is proving a strong winner, and already is a money maker, with the season only just beginning. You will notice we do not mention any price. The object is to get the public to our greenhouses. We mailed out 10,000 of these circulars, well scattered. The boxes and baskets were made by the night firemen during the winter, so there was no expense except for lumber. If you think the idea of any benefit to the trade, you may publish it."

The circular is 11x16, printed on good

paper, and at the top shows a large cut of a porch with a number of well-filled boxes. There also are two illustrations showing the value of vines in such work. The principal offer, printed in good, readable type, is as follows:

"Something for nothing, and we each profit by it! At great expense we have had made hundreds of rustic porch boxes, lawn boxes and rustic hanging baskets. These serviceable as well as beautiful porch boxes we give absolutely free, with only one condition: They must be well filled with plants bought from us. How can we do it? Stop and think of the standing advertisement we get for years by this method, although the first cost is great. We have them in all sizes, to fit any porch. The quality of our plants was never better. We have an abundance of vines, which are the beauty of all boxes and baskets. The unsightly red, white, green and blue board boxes can now be relegated to the past by this advance move in rustic work, at no cost to you. If you are not our customer, why not be? Do not forget we have special box plants for east, west, north or south exposure. If you tell us the location we will help you out in selection."

This is followed by a list and description of plants suitable for boxes and for bedding out. One corner of the circular contains a cut of a hanging basket, with the explanation that the free offer does not apply to these because of the small quantity of plants necessary to fill them. The remaining corner of the circular shows an illustration of a funeral design, with the invitation to "Try us and prove our ability."

The plan of the Chapman Co. is somewhat radical, and most florists would prefer to make a charge for their window boxes, but anyone who sends out 10,000 copies of an attractive advertisement of such boxes can count on an encouraging increase in his business.

Fairport, Ia.—George E. Feustel lost his home and adjacent building by fire Tuesday, May 11, entailing a money loss of about $4,000 above the insurance. The flower pot factory was not touched, and business will not be interrupted.

LINDACHER'S CEMETERY VASES.

In the illustration of Charles Lindacher's place, cemetery vases, planted, ready for delivery, occupy almost the entire front lawn. With reference to these vases, Mr. Lindacher says:

"I am located near a beautiful cemetery, in which stands the McKinley monument. These vases are for use in the cemetery, and are delivered two or three days before Decoration day. They are filled principally with red geraniums, coleus and variegated vincas, and belong to different parties owning lots all over the grounds. After placing the vases, our responsibility ceases. As a rule, they are watered by the owners and the cemetery association. The prices for filling them are $1.50 to $3, according to the size of the vase."

COLOR IN FANCY BEDDING.

Beware of Discords.

When the bedding stock is at its best in development of foliage and flower, combinations of color, fearfully and wonderfully made, frequently thrust themselves upon the passerby. Some of these reckless violations of color law may be observed in the following lists of stock seen last season in many different beds:

Outside border of Lobelia compacta, backed by a row of scarlet and crimson geraniums, alternated; center, a gorgeous display of varicolored dahlias, orange crimson, purple, salmon pink and brilliant crimson. All this is professional work.

Another: Oval bed; outside border of miniature yellow calceolarias, and a second border of brilliant scarlet geraniums, and again the center of dahlias, crimson, purple and lemon colored. This was the next bed on the same grounds, done with fine, well kept stock, loaded with bloom, amid perfect architectural surroundings.

A Caricature of Nature.

Yet once more: A border of crimson-pink, magenta, white, cream, purple and rich red gillyflowers; behind, a lobelia border, with the same allotment of dahlias mentioned above, and the whole flanked on one side by a Japanese maple and on the other by a holly tree, with the berries well colored. Nature, as though joining in the caricature of herself, threw a dandelion into the border. All this was tolerated amid broad, winding walks and low ivy-covered walls, pretentious entrances, beautiful lighting and an ideal water-front site.

The wildest imagination could scarcely picture such a riot in the salubrious English air. Infinitely better had it been if the gardener had planted a hay field, interspersing a few daisies. But we need not throw too many stones at our Canadian cousins, for scenes like this often meet the eye within our own broad borders.

Nature's Object Lesson.

Boarding a steamer a few hours after this, I sighed for a picture of the wealth of color spread by the sunset over sky and water. What a fine object lesson such a picture would be! A few hours before there were colors so glaringly misused; now there was an example of the most exquisite toning and blending. What yellow and blue do we see there! Not the dark lobelia blue and the brilliant calceolaria yellow in rows, but horizontal tiger stripes of coppery yellow thrown against blotches of steel blue, while a receding line of the most delicate sky blue foam cut the trembling drapery of color into two parts. Overhead, the crimson purple sky veiled its heavy splendor with a tinge of the blue-green of the water, until it looked down at the receding world with an azure eye.

Only look, friends; open your eyes and see, and you will learn how to blend colors.

Suggested Combinations.

Why not have had the lobelias and calceolarias in low beds by themselves, or the lobelia with sweet alyssum or candytuft, or the white or cream gillyflower, or the lobelia with ivy, segregating the dahlias in clumps, according to color? A better attempt at combining the lobelia and calceolaria would have been made by choosing a light lobelia and an orange calceolaria. The old gold dahlia would have looked beautiful against the Japanese maple, and the rich crimsons would have made a striking group by themselves. The scarlet gera-

Cemetery Vases at Charles Lindacher's, Canton, O., Ready for Delivery.

Well-Kept Grounds Should Be Characteristic of Florists' Establishments.

niums could have been banked on one sunny side of the building and the crimson on another, and nothing could have been daintier than the white and crimson pink gillyflowers back in the grounds, with the purple and cream on the opposite side, while the crimson purple might hold sway in some remote corner of the extensive landscape.

Indifference to these details in this day of the world is inexcusable, and ignorance can be remedied. There is scarcely a little city without an artist, and anyone can take lessons in color without any great outlay. The trouble with too many of us is that we "know it all." GERTRUDE BLAIR.

THE FLORISTS' OWN GROUNDS.

Why is it so many florists appear to care so little for the appearance of their premises?

It was one of the favorite remarks of the late William Scott that every florist, and especially the young ones just starting in the business, should "Wash all you got and hang out all you wash," which was just a shorter and more expressive way of saying that it is the florist's business to make his place look as well as it possibly can and that appearances count for a great deal in attracting trade.

It is proverbial that the cobbler's children go with their toes on the ground, while other children's shoes are being mended, but this does not account for the indifference many florists show for the surroundings of their establishments. Growers who deal with the trade and not with the public are notably lax in the care of their grounds, but even if pride does not impel them to have the place look as well as it can, they ought to be interested in the fact that weeds and dirt harbor and breed their greatest enemies. Keep the grass close clipped around the greenhouses and there will be fewer thrips, grasshoppers and other pests to fight. One who deals with the public should make his grounds his best advertisement. No florist whose own place is slovenly should expect the confidence of customers who want up-to-date service.

Such grounds as those shown in the accompanying illustration should be a pleasure to every florist, and in ninety-nine cases out of a hundred they also will bring him a profit. It is especially seasonable to call attention to this fact now, for the florist may well set an example to his neighbors at the beginning of the bedding season.

The establishment at which the photograph was made is that of the Clyde Floral Co., Clyde, O. It consists of six greenhouses, containing about 15,000 feet of glass, built several years ago with material furnished by the Foley Mfg. Co., Chicago. The firm name then was Arlin & Arlin, the owners being R. C. Arlin and his wife. Later the concern was incorporated, with Mr. Arlin as president and manager and his wife vice-president and secretary. They are outside the town and have seven and one-half acres of land that they keep in neatest order. They are located on the electric line from Toledo to Cleveland and figure that it is the best of business, as well as a matter of personal satisfaction, to have the grounds attractive, not only to visitors but to those who ride by on the cars.

THE WEEKLY FLORISTS' REVIEW

As experience is the best teacher, so do we learn fastest by an exchange of experiences. Many valuable points are brought out by discussion.

Good penmanship, spelling and grammar, though desirable, are not necessary. Write as you would talk when doing your best.

WE SHALL BE GLAD TO HEAR FROM YOU.

SWEET PEA BUDS BLIGHTING.

We have sweet peas in the house that are thrifty vines seven feet high, but no buds started until they were over six feet high, and now all the buds turn yellow as fast as they appear. The peas were put in cow manure compost, and have had two or three feeds of phosphate and plenty of water and fresh air when advisable. Can you tell us why these buds blast, and give us a remedy, if any?

W. H. K.

If your peas were planted in compost containing a good proportion of cow manure, they should have had no feeding until they were in flower. I am afraid the two or three feeds of phosphate are responsible for the trouble. You have probably given overdoses of this food, which the plants could simply not assimilate. Give plenty of water, but forego the further use of chemical stimulants until the plants are flowering freely. Doses of cow or sheep manure, water or top dressings of these, or fine bone lightly forked in, will be found beneficial, but should not be applied until the plants show signs of exhaustion.

C. W.

paper, and at the top shows a large cut of a porch with a number of well-filled boxes. There also are two illustrations showing the value of vines in such work. The principal offer, printed in good, readable type, is as follows:

"Something for nothing, and we each profit by it! At great expense we have had made hundreds of rustic porch boxes, lawn boxes and rustic hanging baskets. These serviceable as well as beautiful porch boxes we give absolutely free, with only one condition: They must be well filled with plants bought from us. How can we do it? Stop and think of the standing advertisement we get for years by this method, although the first cost is great. We have them in all sizes, to fit any porch. The quality of our plants was never better. We have an abundance of vines, which are the beauty of all boxes and baskets. The unsightly red, white, green and blue board boxes can now be relegated to the past by this advance move in rustic work, at no cost to you. If you are not our customer, why not be? W. H. K.

If your peas were planted in compost containing a good proportion of cow manure, they should have had no feeding until they were in flower. I am afraid the two or three feeds of phosphate are responsible for the trouble. You have probably given overdoses of this food, which the plants could simply not assimilate. Give plenty of water, but forego the further use of chemical stimulants until the plants are flowering freely. Doses of cow or sheep manure, water or top dressings of these, or fine bone lightly forked in, will be found beneficial, but should not be applied until the plants show signs of exhaustion.

C. W.

A WILTED BOSTON FERN.

I have a large Boston fern that has been repotted by another florist. He washed the soil all off the roots with a hose. The old leaves have all died. New ones are starting, but are not making the growth they should. What can I do for it? What kind of soil is best and what would be a good sort of fertilizer?

C. D. M.

The best way to get the fern in question into growth again would be to put it in a partly shaded place in the greenhouse and be careful in watering. Keep the soil just moist until the plant has a chance to make some new roots, after which it will be able to take up more water. A plant in the condition you describe may easily be killed by overwatering.

Such soil as that used for carnations or chrysanthemums will answer well for Boston ferns, and well rotted old stable manure is the safest fertilizer to use.

W. H. T.

MILLEPEDS.

Please give us the name of the inclosed insects. These are quite numerous in our lath houses under pots and flats. Are they harmful and in what way? If so, how can we exerminate them? Our Sprengeri ferns, tomato plants, smilax and a few other plants are eaten by these insects or by cutworms, and we must check them soon.

A. N.

The insects in question are millepeds or thousand-legs, and are frequently found under pots and about the edges of the benches. They seldom do harm to growing plants, the food of these insects being usually confined to decayed vegetable matter. When they become unusually numerous in a fern house I have found them feeding on the unexpanded fern fronds, but this is not common. A spraying with nicotine solution would dispose of many of these insects, or a strong fumigation with one of the nicotine preparations will answer the purpose in the greenhouse, but the latter course could not readily be followed with a lath structure. W. H. T.

BLUING HYDRANGEAS.

An English grower of market plants recently has been conducting experiments for the purpose of producing blue flowers on hydrangeas and reports that he has found that alum ammoniac would have a bluing action in some soils; again, under other conditions, iron sulphate, finely ground and applied in solution, also had the same effect, the proportion used in each case being from one-half to one ounce per gallon, at intervals of a fortnight, increasing the frequency of feeding to once a week, but not the quantity. Another trial was made of above compounds, mixing them together, as one-fourth to one-half ounce of the alum ammoniac and an equal amount of the iron sulphate, this quantity to one gallon of water. While this proved even more satisfactory than the use of either ingredient singly, by far the best results were gained by the use of a mixture of nitrate of potash two parts, iron sulphate one part, alum ammoniac one part. It could be worked out as follows: A heaped-up teaspoon weighs roughly one-half ounce; then use one full spoonful of nitrate of potash, or nitrate of lime would be equally good, to half-spoonful each of the other ingredients per gallon of water.

Experiment has shown one gallon of the above formula to be sufficient for one application on nine 7½-inch pot plants, eight 8½-inch plants or seven 9½-inch plants.

The above recipes are given to the trade through the Horticultural Advertiser simply for trial, and it must be understood that feeding should take place at least two months before bloom appears; and, moreover, the frequency of the dose should be increased when buds are formed. When bloom is fully open, no further dressings will be required. A little addition occasionally of one-half ounce per gallon of dried blood will improve the effectiveness. The quantities of the materials can be altered, but that is a matter for the grower's own experiments.

PHLOX DRUMMONDI.

What is the best way for growing Phlox Drummondi in pots for spring trade? Should it be stopped? If so, how long before wanted in bloom?

D. W. E.

Phlox Drummondi, for selling in late May or early June, need not be sown before the end of March. Pot off into 2½-inch or 3-inch pots of light, rich soil when of sufficient size to handle. Use some spent hotbed manure in the compost, if you have it, the kind which has been in a couple of years and will crumble up in your fingers. If the plants are given a light bench in a house kept about 50 degrees at night, they should be in nice shape for Memorial day. The plants should not require any stopping at all.

C. W.

NAMES OF PLANTS.

We would be pleased to have you inform us whether the enclosed plants are named properly or not, as per slips attached thereto. A. N.

Neither of the leaf samples is of the Boston ivy, Ampelopsis Veitchii. Each is a variety of A. hederacea (A. quinquefolia), as the Virginia creeper is commonly called. The Boston ivy has three-lobed leaves, which are remotely toothed. The foliage is very shiny on both sides.

BEAUTIES AT NEW ORLEANS.

Reference frequently has been made in the Review to the success which has attended the Metairie Ridge Nursery Co., New Orleans, in its pioneer efforts at growing roses under glass in the south. In this connection the accompanying illustration and the following letter from the company will be of interest:

"We are mailing you under separate cover an original photograph of our American Beauties with stems nine to twelve feet long, grown by us in solid beds. These plants are three years old and were planted on benches the first year and transplanted to solid beds two years ago.

"We find, after several years' trial of roses on benches, that the solid beds are the best for our climate, and so we are now planting all our roses in solid beds for next year.

"We simply wish to show that long stem roses, especially American Beauties, can be grown here as well as elsewhere. Years ago it was always contended that roses, especially Beauties, could not be grown under glass in this climate."

CARDINAL.

Not many growers have taken up the Cardinal rose, but it nevertheless is a splendid thing, and if some day a cultural treatment is devised which will keep it going through the winter, it will become one of the most popular varieties. In the spring those who are growing it get a fine crop, but one point seems to be misunderstood. That is, growers seem in many cases to fail to appreciate that it does not open, as will Killarney, for example, and that it must be permitted to develop quite fully before cutting. On the other hand, where growers have found out the necessity for letting the

blooms expand fully, buyers have been known to refuse them as too open, figuring that they would be past their prime when wanted for use. This is not the case. The flower must be cut open and will stand much longer than any other of the cut flower varieties, without passing beyond its most salable shape.

CHATENAY.

A year and a half ago the Chatenay rose was possibly more abundant than any other in the Chicago wholesale cut flower market. This was in the autumn of 1907. All that fall Chatenay was overabundant and its selling price lower than that of any other rose offered in quantity. Chatenay fell from grace with the growers that season, and last spring, when time for replanting came around, only a few retained the variety; the great majority gave its space to Killarney, although some fell back on the old standbys, Maid and Bride. In the season now drawing toward a close few Chatenay have been seen in the Chicago market and there has been no special call for the small numbers that were available; hardly ever is an order received that calls specifically for Chatenay. The result has been that the price realized has been low.

In preparations for replanting for the season of 1909-10 Chatenay is being dropped by almost all the growers who have not already discarded it. Its sun is set, although so good a judge as August Poehlmann says it will rise again. But for cut flower purposes, so far as the present is concerned, it is about to go the way of Meteor and Liberty.

STERILIZING SOIL.

Since good soil is so difficult to obtain here, I had thought of getting pipe and having a sterilizer made, and keeping the same soil in another year, adding manure. What do you think of it? Has it been proven that the productiveness of the soil is not interfered with by sterilizing? Our roses have some eel worms every season, and I thought by the above process it could be prevented. Our soil here is of a firm, retentive nature, and fine for roses if eel worms could be prevented. J. W. P.

There is some conflict of testimony in regard to the effect of sterilization on the productivity of soil. Many of the leading vegetable growers would not think to plant cucumber or lettuce crops without sterilization. One prominent grower lately told me that it made his soil as good as new. While there is practical unanimity of opinion concerning its beneficent effects on soils to be used for indoor vegetable culture, some rose men fight shy of it, for some reason. Speaking for myself, I would unhesitatingly recommend its use for clearing out eel worms and other soil pests. I have tried it on composts used for many varieties, and have never seen any ill effects from its use, but always the reverse.

The question of whether sterilization and the addition of manure will be as satisfactory as new soil, I must, however, answer in the negative. Better go to the additional cost of securing fresh loam. It will pay you in the end. Spread your old loam on grass land. This can be plowed up and used again a couple of years hence, when it has made some good fiber. Use new soil, by all means, and do not be afraid to sterilize it before planting. C.

American Beauties Grown Under Glass at New Orleans.

ALLAMANDAS.

These Are Splendid Climbers.

Allamandas are among the most beautiful of exotic climbers. What more charming picture can be imagined than a big conservatory with pillars and roof festooned with the lovely yellow flowers carried by these popular stove plants? While commonly classed as exotics, allamandas will thrive and flower beautifully in an ordinary greenhouse, and either planted out or in tubs they yield a wealth of bloom for several months. The flowers are useful for table decorations and can be effectively used in floral designs, if carefully wired.

The most useful allamanda for pot culture is the dwarf A. Williamsi, introduced by the late B. S. Williams, at one time a noted dealer in exotics at Upper Holloway, London, at whose establishment many good present-day gardeners and florists have had some training. This allamanda carries smaller flowers than the climbing varieties, but blooms when small, and a plant in an 8-inch or 10-inch pot, which has been carefully pinched and well grown, makes a splendid decorative subject, far too seldom seen in our high-class stores.

There is no special difficulty in rooting and growing allamandas. In a brisk bottom heat they will root as readily as crotons or dracænas. Keep them moving in a warm, moist house, and after the middle of June place them in a frame, where they can be plunged, and in common with crotons, dracænas, caladiums and other warmth-loving subjects, they will make rapid growth if they are syringed over each afternoon and a good, moist heat bottled up.

A Reason for Failure.

Many fail with allamandas through not allowing them to become well ripened in winter. The water supply should be gradually reduced after November, and by the early part of January the plants should be kept nearly dry. The pruning and repotting is to be done early in March and careful watering is necessary until the plants break freely. At present the plants are growing strongly and are already coming into flower. A light shade will be beneficial, but give the plants a place well up to the light. An ample water supply and liquid manure twice a week will be needed when the pots are filled with roots. Plants in boxes, tubs or the ground should have a liberal top-dressing, if this has not yet been given. There is no better variety for climbing than the old A. Heudersoni, with its large, golden yellow flowers.

A few years ago we planted out some allamandas. The summer was a specially warm one and they flowered profusely, being occasionally watered. The flowers in the full sun took on a slightly bronzy hue, which, however, was pleasing. It will pay any retail florist to grow one or two allamandas. They flower when really choice flowers are scarce and will be found extremely useful.

A WILTED BOSTON FERN.

I have a large Boston fern that has been repotted by another florist. He washed the soil all off the roots with a hose. The old leaves have all died. New ones are starting, but are not making the growth they should. What can I do for it? What kind of soil is best and what would be a good sort of fertilizer?

C. D. M.

W. H. T.

BLUING HYDRANGEAS.

An English grower of market plants recently has been conducting experiments for the purpose of producing blue flowers on hydrangeas and reports that he has found that alum ammoniac would have a bluing action in some soils; again, under other conditions, iron sulphate, finely ground and applied in solution, also had the same effect, the proportion used in each case being from one-half to one ounce per gallon, at intervals of a fortnight, increasing the frequency of feeding to once a week, but not the quantity. Another trial was made of above compounds, mixing them together, as one fourth to one-half ounce of the alum ammoniac and an equal amount of the iron sulphate, this quantity to one gallon of water. While this proved even more satisfactory than the use of either ingredient singly, by far the best results were gained by the use of a mixture of nitrate of potash two parts, iron sulphate one part, alum ammoniac one part. It could be worked out as follows: A heaped-up teaspoon weighs roughly one-half ounce; then use one full spoonful of nitrate of potash, or nitrate of lime would be equally good, to half-spoonful each of the other ingredients per gallon of water.

Experiment has shown one gallon of the above formula to be sufficient for one application on nine 7½-inch pot plants, eight 8½-inch plants or seven 9½-inch plants.

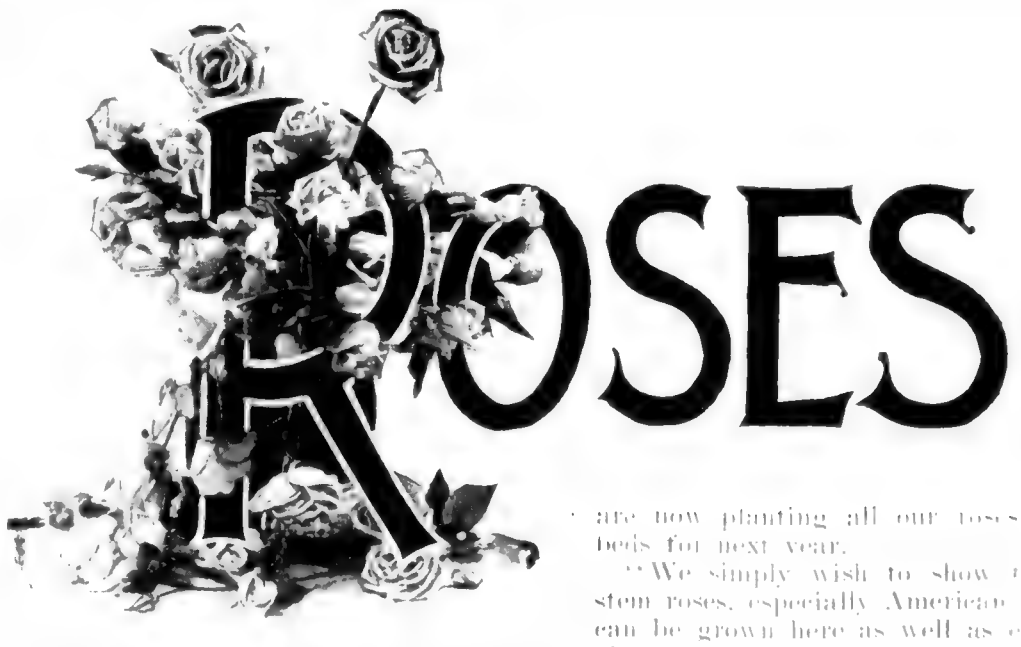
The above recipes are given to the trade through the Horticultural Advertiser simply for trial, and it must be understood that feeding should take place at least two months before bloom appears; and, moreover, the frequency of the dose should be increased when buds are formed. When bloom is fully open, no further dressings will be required. A little addition occasionally of one-half ounce per gallon of dried blood will improve the effectiveness. The quantities of the materials can be altered, but that is a matter for the grower's own experiments.

PHLOX DRUMMONDI.

What is the best way for growing Phlox Drummondi in pots for spring trade? Should it be stopped? If so, how long before wanted in bloom?

D. W. E.

Phlox Drummondi, for selling in late May or early June, need not be sown before the end of March. Pot off into 2½-inch or 3-inch pots of light, rich soil when of sufficient size to handle. Use some spent hotbed manure in the compost, if you have it, the kind which has been in a couple of years and will crumble up in your fingers. If the plants are given a light bench in a house kept about 50 degrees at night, they should be in nice shape for Memorial day. The plants should not require any stopping at all.



C. W.

NAMES OF PLANTS.

We would be pleased to have you inform us whether the enclosed plants are named properly or not, as per slips attached thereto.

A. N.

Neither of the leaf samples is of the Boston ivy, Ampelopsis Veitchii. Each is a variety of A. hederacea (A. quinquefolia), as the Virginia creeper is commonly called. The Boston ivy has three-lobed leaves, which are remotely toothed. The foliage is very shiny on both sides.

BEAUTIES AT NEW ORLEANS.

Reference frequently has been made in the REVIEW to the success which has attended the Metairie Ridge Nursery Co., New Orleans, in its pioneer efforts at growing roses under glass in the south. In this connection the accompanying illustration and the following letter from the company will be of interest:

"We are mailing you under separate cover an original photograph of our American Beauties with stems nine to twelve feet long, grown by us in solid beds. These plants are three years old and were planted on benches the first year and transplanted to solid beds two years ago.

"We find, after several years' trial of roses on benches, that the solid beds are the best for our climate, and so we are now planting all our roses in solid beds for next year.

"We simply wish to show that long stem roses, especially American Beauties, can be grown here as well as elsewhere. Years ago it was always contended that roses, especially Beauties, could not be grown under glass in this climate."

CARDINAL.

Not many growers have taken up the Cardinal rose, but it nevertheless is a splendid thing, and if some day a cultural treatment is devised which will keep it going through the winter, it will become one of the most popular varieties. In the spring those who are growing it get a fine crop, but one point seems to be misunderstood. That is, growers seem in many cases to fail to appreciate that it does not open, as will Killarney, for example, and that it must be permitted to develop quite fully before cutting. On the other hand, where growers have found out the necessity for letting the

blooms expand fully, buyers have been known to refuse them as too open, figuring that they would be past their prime when wanted for use. This is not the case. The flower must be cut open and will stand much longer than any other of the cut flower varieties, without passing beyond its most salable shape.

CHATENAY.

A year and a half ago the Chatenay rose was possibly more abundant than any other in the Chicago wholesale cut flower market. This was in the autumn of 1907. All that fall Chatenay was overabundant and its selling price lower than that of any other rose offered in quantity. Chatenay fell from grace with the growers that season, and last spring, when time for replanting came around, only a few retained the variety; the great majority gave its space to Killarney, although some fell back on the old standbys, Maid and Bride. In the season now drawing toward a close few Chatenay have been seen in the Chicago market and there has been no special call for the small numbers that were available; hardly ever is an order received that calls specifically for Chatenay. The result has been that the price realized has been low.

In preparations for replanting for the season of 1909-10 Chatenay is being dropped by almost all the growers who have not already discarded it. Its sun is set, although so good a judge as August Poehlmann says it will rise again. But for cut flower purposes, so far as the present is concerned, it is about to go the way of Meteor and Liberty.

STERILIZING SOIL.

Since good soil is so difficult to obtain here, I had thought of getting pipe and having a sterilizer made, and keeping the same soil in another year, adding manure. What do you think of it? Has it been proven that the productiveness of the soil is not interfered with by sterilizing? Our roses have some eel worms every season, and I thought by the above process it could be prevented. Our soil here is of a firm, retentive nature, and fine for roses if eel worms could be prevented. J. W. P.

There is some conflict of testimony in regard to the effect of sterilization on the productivity of soil. Many of the leading vegetable growers would not think to plant cucumber or lettuce crops without sterilization. One prominent grower lately told me that it made his soil as good as new. While there is practical unanimity of opinion concerning its beneficent effects on soils to be used for indoor vegetable culture, some rose men fight shy of it, for some reason. Speaking for myself, I would unhesitatingly recommend its use for clearing out eel worms and other soil pests. I have tried it on composts used for many varieties, and have never seen any ill effects from its use, but always the reverse.

The question of whether sterilization and the addition of manure will be as satisfactory as new soil, I must, however, answer in the negative. Better go to the additional cost of securing fresh loam. It will pay you in the end. Spread your old loam on grass land. This can be plowed up and used again a couple of years hence, when it has made some good fiber. Use new soil, by all means, and do not be afraid to sterilize it before planting. C.

American Beauties Grown Under Glass at New Orleans.

ALLAMANDAS.

These Are Splendid Climbers.

Allamandas are among the most beautiful of exotic climbers. What more charming picture can be imagined than a big conservatory with pillars and roof festooned with the lovely yellow flowers carried by these popular stove plants? While commonly classed as exotics, allamandas will thrive and flower beautifully in an ordinary greenhouse, and either planted out or in tubs they yield a wealth of bloom for several months. The flowers are useful for table decorations and can be effectively used in floral designs, if carefully wired.

The most useful allamanda for pot culture is the dwarf A. Williamsi, introduced by the late B. S. Williams, at one time a noted dealer in exotics at Upper Holloway, London, at whose establishment many good present day gardeners and florists have had some training. This allamanda carries smaller flowers than the climbing varieties, but blooms when small, and a plant in an 8-inch or 10 inch pot, which has been carefully pinched and well grown, makes a splendid decorative subject, far too seldom seen in our high-class stores.

There is no special difficulty in rooting and growing allamandas. In a brisk bottom heat they will root as readily as crotons or dracaenas. Keep them moving in a warm, moist house, and after the middle of June place them in a frame, where they can be plunged, and in common with crotons, dracaenas, caladuums and other warmth loving subjects, they will make rapid growth if they are syringed over each afternoon and a good, moist heat bottled up.

A Reason for Failure.

Many fail with allamandas through not allowing them to become well ripened in winter. The water supply should be gradually reduced after November, and by the early part of January the plants should be kept nearly dry. The pruning and repotting is to be done early in March and careful watering is necessary until the plants break freely. At present the plants are growing strongly and are already coming into flower. A light shade will be beneficial, but give the plants a place well up to the light. An ample water supply and liquid manure twice a week will be needed when the pots are filled with roots. Plants in boxes, tubs or the ground should have a liberal top dressing, if this has not yet been given. There is no better variety for climbing than the old A. Hendersoni, with its large, golden yellow flowers.

A few years ago we planted out some allamandas. The summer was a specially warm one and they flowered profusely, being occasionally watered. The flowers in the full sun took on a slightly bronzy hue, which, however, was pleasing. It will pay any retail florist to grow one or two allamandas. They flower when really choice flowers are scarce and will be found extremely useful.

SEASONABLE SUGGESTIONS

Cemetery Vases.

About every florist doing any retail business has a certain amount of cemetery work. It pays well and is well worthy of increased attention from those who are growers of bedding and decorative plants. Memorial day is drawing near and calls to have vases nicely filled for that occasion will be common during the next few days. Strive as far as possible to satisfy every customer and do not promise to fill an order for Memorial day and then fail to do it; far better turn the order down than make promises you have grave doubts about being able to fill.

Some cemetery vases are heavy and it is not possible to move all of them to the greenhouse to fill, but it will certainly pay to haul as many there as can be comfortably handled. It will pay you much better than sending a miscellaneous load of plants and another of compost and then not having some things you need. At your own establishment you can fill the vases to suit your taste and the work will suit both you and your customers better than if filled at the cemetery. Be sure you use a soil well enriched, as the plants will have but a limited root run and will soon have a starved appearance if the soil is poor.

As a general thing there is a pleasing breaking away from the vases containing a centerpiece of Dracæna indivisa or phœnix and a miscellaneous mixture of other plants around them. Solid vases of red, pink, salmon and white geraniums are in excellent taste, also such dwarf cannas as Tarrytown, Crozy, Queen Charlotte, Express and others. Other flowering plants include about everything which can be bedded out, such as petunias, verbenas, abutilons, begonias, ageratums, etc. The trailing plants embrace a large variety, including, among others, nasturtiums, English and German ivy, Asparagus Sprengeri, vincas (still perhaps the best of all), Abutilon vexillarium, ivy geraniums, petunias, alyssums and others.

Points to remember in filling cemetery vases are: See that there is good drainage. Provide rich soil, containing some bone as well as cow manure. Do not plant too thickly. Do not run too much on one shade of color. One shade to a vase is preferable to a riot of colors, as we too often see. Firm the soil well about the balls of the plants. Only use ferns, palms, fuchsias, show pelargoniums and tuberous begonias where the vases are shaded.

Bedding Out.

While bedding out is not usually in full swing in the colder and more northerly states much before the end of May, many of our florists farther south are now busy with this work, some having already completed it. We are often tempted sorely by premature hot waves to get things out too early, a late frost usually paying us for our temerity, but if plants are well hardened some of the hardier kinds can now be started, geraniums being included in this class. Always be sure that the balls of all bedding plants are moist when planted. To set out plants with dry roots, trusting in Providence to provide rains speedily to soak them, is a poor policy.

The soil in all beds and borders should be carefully prepared and well loosened up. It is, of course, necessary to firm the soil well about the roots of all plants, but always leave the surface soil loose as a mulch. Tell your customers it is not necessary to ply the hose or watering pot over their beds every night. Tell them to water thoroughly, stir up the surface soil when the ground has dried up, and then wait two or three days, at least, before watering again.

Tender Nymphaeas.

The more tender varieties of nymphæas are not usually planted much before the beginning of June, at which time we are, as a rule, favored with settled weather. The varieties, Zanzibariensis, Devoniensis and others, belong to the tender class. Many beginners in the culture of pond lilies err in neglecting to properly provide them with sufficient root run. A generous compost, comprising three parts strong loam to one part cow manure, will grow good aquatics. It is hardly possible to have a basin or pond of pellucid water and vigorous aquatics. The adding of the compost provides means for the discoloration of the water, and at the same time much greater vigor in the plants.

Spray Persistently.

The advance of the season, with the accompanying bursts of torrid heat, brings us one of its legacies, a swarm of insect pests, to properly combat which, we must wage a relentless war. For aphis on trees and shrubs, either whale oil soap or kerosene emulsion is suitable. To make the latter, take one-half pound of any good hard soap, one gallon of boiling water and two gallons kerosene. Dissolve the soap in the water; add kerosene and churn with a pump for ten minutes. Dilute twenty to twenty-eight times before applying. Do not wait for shrubs to be smothered with

The Crabapple in Easter Attire.

aphis before applying this remedy. This mixture is useful for keeping black fly down on chrysanthemums, but be sure to keep the liquid well agitated in the case of this and all other poisons.

Bordeaux mixture is the sovereign remedy for mold, mildew and all fungous diseases. It is much cheaper to make, rather than buy the mixture. For fifty gallons, dissolve six pounds copper sulphate placed in a coarse bag in an earthen or wooden dish containing five gallons of water. Slake four pounds of lime in a similar way, then pour the copper sulphate and lime together into one barrel; mix these thoroughly and they are ready for use at once or will keep almost indefinitely.

For all leaf-eating insects, arsenate of lead at the rate of four pounds to fifty gallons of water is a superior remedy to Paris green. The latter poison, if carelessly used, will cause much foliage to become badly burned. Arsenate of lead, having some glucose in its make-up, will stick on the foliage practically all summer, while Paris green is washed away with the first showers. In using Paris green, one pound to 200 gallons is as strong as we dare to use. It is always safe to add a little lime before applying Paris green, to lessen danger from burning the foliage. Paris green and arsenate of lead may each be added to Bordeaux mixture, the action of neither of the former poisons being weakened.

EASTER PLANTS.

In this issue there are reproductions of photographs showing two of the plants offered at Easter by Jacob Schulz, at Louisville. In a great many first-class stores this year it was noted that single plants sold better than the so-called plant arrangements, those made up with several plants of one or different varieties in baskets, hampers, etc. The popular taste seemed to run to well grown specimens in unique receptacles. The subjects illustrated include a forced crab-apple and a forced lilac. Flowering shrubs are not the easiest of subjects to improve by the addition of ribbons and other "decorations," and in the case of the crab-apple nothing of this sort was attempted; merely the pot was covered and the cover brought well up around the bare stem of the plant. The lilac was planted in an entirely different receptacle and the addition of the ribbon was a distinct improvement. As a general thing, less embellishment is desirable with single plants than with combinations of them; indeed, a well grown plant needs little else than a pot cover.

Forced Lilac as an Easter Plant.

DESIRABLE HARDY PERENNIALS.

Lupinus Polyphyllus Roseus.

The white and blue flowered forms of Lupinus polyphyllus are too well known to require any exploitation, but the newer variety, roseus, of which there are already several distinct types with beautiful rosy pink flowers, is a decided acquisition. No hardy flower garden is complete without a few clumps or masses of hardy lupines, and in early June they are always striking objects in the herbaceous garden. L. polyphyllus roseus is as hardy as the blue and white varieties. It comes readily from seed and, if sown early under glass, many of the seedlings will flower the same year. The hardy lupines are liable to be heaved out of the ground with continued freezings and thawings, unless mulched with hay or leaves. This was especially noticeable after the late comparatively mild winter.

Aconitum Wilsoni.

Introduced by Mr. Wilson for James Veitch & Son, of London, the new aconite, Aconitum Wilsoni, has become decidedly popular. Like the rest of the genus, it is a late bloomer, being at its best in September. It is of vigorous habit, attaining a height of five to six feet, but I have seen it nearly eight feet high in rich ground. The flowers are of a violet blue color, and are produced during the whole of September and October, the side racemes following the terminal one. Propagation from seed or root division are the usual methods for increasing stock. For the back row in the herbaceous border, A. Wilsoni is a fine subject.

Astilbe Davidii.

While commonly called the blue spiræa, the color of Astilbe Davidii is considerably removed from the cerulean hue, being in reality violet rose. The plant has surprising vigor, and has proved perfectly hardy in New England. Plants noted in flower at the Mount Desert Nurseries, Bar Harbor, Me., in late August last year were striking objects, having in an unusually dry season attained a height of six feet. This is another of Veitch's recent introductions from western China, and has undoubtedly come to stay. Propagation by either seed or root division is possible, the latter process giving strong plants earlier.

Gypsophila Paniculata Flore Pleno.

The common baby's breath, or G. paniculata, is well known to about every florist, being specially serviceable in summer for use in funeral work. The double form, whenever shown, has attracted great attention, and it is certainly a splendid subject for florists to handle. Unlike the single variety, the double one must be raised from root division only. The flower panicles are numerously produced and much branched. This is the best novelty in hardy flowering plants for commercial use introduced of late years.

Montbretia George Davison.

The new varieties of montbretia show an immense advance over the old varieties, such as Pottsii, crocosmæflora, Gerbe d'Or and Rayon d'Or, the flower stalks being longer and stronger and the individual flowers much larger. On M. George Davison the flowers are orange yellow in color and arranged so that each bloom is seen at once. The montbretias are usually treated as tender bulbs, like the gladioli. This is entirely wrong. They are perfectly hardy in well drained ground, but

if planted where water will stand in winter the bulbs will rot. By lifting and dividing the roots about the last of October, I have always had excellent success, giving the plants a good mulching of leaves when the ground is frozen. Bulbs lifted and stored over winter in a cool cellar and planted out in April will make a good succession to the fall planted bulbs. The montbretias are all excellent for cutting and we see no reason why they should not become more popular commercially.

Trollius Asiaticus Excelsior.

Of the various globe flowers in cultivation, none catches the popular eye as quickly as Trollius Asiaticus excelsior. The deep orange colored flowers, which are produced during May and to some extent during the later summer months, are of a color which is always immensely popular. It succeeds well in the full sun, but does better where it can be shaded partially from the hot summer sun. It does not require a damp location, like T. Europæus, but grows well in light, well drained garden soil. Division of the roots is the best method of propagation, early fall being the best time for this work. Any florist having a row or bed of this striking trollius will have no difficulty in selling it, once customers have seen it.

Phlox Divaricata Laphami.

Phlox divaricata is a beautiful plant for the herbaceous or rock garden, growing well in almost any location. The variety Laphami possesses greater vigor than the type, with flowers of larger size and of a rich plumbago blue color.

While popular for outdoor spring effects, it is not generally known what a fine subject Phlox divaricata is in pots or pans for greenhouse purposes. I venture to predict that any wide-awake florist, who works up a stock of this in pans and flowers it in March or early April, as is easily done, would sell his plants on sight, for there is nothing to at all compare with it in color, and any purchasers can use the plants in their hardy border and get a nice floral display another season. For pot culture the plants should be lifted in September and brought into gentle heat in January. W. N. Craig.

BOYS' GARDENS IN DAYTON, O.

What N. C. R. Co. Has Done for the City.

Several years ago the neighborhood in which the National Cash Register Co. is located was one of the "toughest" and most dilapidated sections in Dayton, O. No person of standing cared to rent or buy property there, and those who did inhabit it cared little about the appearance of the neighborhood. John H. Patterson, president of the National Cash Register Co., became much concerned and was anxious to see rapid improvements.

J. H. Patterson.

(Whose services to horticulture have been of utmost value to the trade.)

The beautifying of the factory premises was the first step taken. The effort began with a general cleaning up. Fences were removed, walks were repaired and grass, trees, flowers and shrubbery were planted.

The A-B-C Principle.

Mr. Patterson secured the services of J. C. Olmsted, of Brookline, Mass., to lay out the grounds surrounding the factory. The following rules were followed, and called the A-B-C principle of landscape gardening: A, "Keep center of lawn open"; B, "Plant in masses"; C, "Avoid straight lines." These principles were afterward adopted by the people of the N. C. R. neighborhood and marvelous improvements took place, until today the N. C. R. neighborhood is one of Dayton's beauty spots.

Keeping Boys Out of Mischief.

After this movement was well under way, Mr. Patterson's attention was attracted by three small boys, who, by their pranks, had cost the neighborhood $30,000. Mr. Patterson estimated that each boy had done $10,000 worth of damage. He tried to discover the cause and furnish a remedy. The cause, he found, was idleness; the remedy, healthful work. So he decided to give them something to do.

Mr. Patterson had spent his boyhood on a farm, and realized the value of such training for a boy. It was impossible to take them all to a farm, so he had two acres of ground plowed up and laid out into fifty individual gardens, each 10x100 feet in extent. The tools, seeds and all equipments were furnished by the company and a head gardener was hired to direct the work of instruction. The age of the lads was set at 10 to 14 years.

The Boys Get Interested.

At first the boys jeered at Mr. Patterson's efforts. Then a few took hold, and when the seed began to grow and the vegetables came, others joined them, and before the first season ended there were forty boys working systematically in the gardens. Prizes amounting to $50 were awarded the boys, and, besides, they were allowed to sell their vegetables on the market.

This movement was started in 1897, and each year the interest increases. Each boy strives to produce better vegetables than his neighbor. The results have been, an improvement in the character of the neighborhood, a remedy for the idleness of the boys, the formation of their own character and the successful adoption of the boys' gardens in various parts of America.

A part of the N. C. R. gardens at Dayton, with the boys at work, is shown in the accompanying illustration.

Methods and Results.

The course of instruction covers two years. Diplomas are awarded at an annual banquet given by President Patterson. Many more applications are received than there are gardens to assign. In such cases, seeds, bulbs and tools are given the boys who wish to start gardens at home.

This year fifty boys began work April 10. The gardens were prepared and the first planting was done April 20. Much of the teaching is done by example. The instructor and more competent boys offer suggestions to the less experienced gardeners.

All ground is used to the best advantage and several crops are taken from the gardens each season. Last year three crops of lettuce, three crops of beans and 6,000 pounds of radishes were a part of the output. Ten tons of vegetables constituted the season's yield. This year eight new gardens were opened.

Stimulating Competition.

Uniformity is required in the working hours and in the products of the garden.

Partial View of the Boys' Garden at the National Cash Register Co., Dayton, O.

In order to stimulate competition, the same vegetables are cultivated by each boy. System is important. The morning hours are from 6:30 to 7:30 and the evening hours from 4 to 5:15. If any boy wishes to work overtime, he must stop when the rest do and get permission from the head gardener to continue.

A committee of judges inspects the vegetables during the progress of their growth and when they are ready for the market. The judging is done without knowledge as to the ownership of the different gardens.

Awarding the Prizes.

The prizes awarded for the best all-around records are as follows: First prize, $12; second, $10; third, $6; fourth, $4; fifth, sixth, seventh and eighth, $2 each; ninth, tenth, eleventh and twelfth, $1 each.

Each gardener is credited on five special counts: First, value of products from his garden; second, condition of garden and tools; third, regularity of attendance; fourth, deportment; fifth, condition of account book.

In awarding the prizes these five points are credited in the following ratio: Thirty per cent for value of product, twenty per cent for condition of garden and tools, twenty per cent for attendance, twenty per cent for deportment and ten per cent for account book.

Technical subjects, such as seed germination, the relation of water and air, roots, buds, and the process of fertilization, are explained to the young gardeners. R. A. B.

Altoona, Pa.—Karl Kuny says business is brightening up and he expects a big Memorial day.

SCOTCH BROOM.

Please let us know if the enclosed sample is Scotch or Spanish broom. A. N.

As near as I can tell from rather dried sample received, the plant is Cytisus scoparius, the common broom, often called Scotch broom. W. N. C.

TIMELY ATTENTION.

Stock Plants for Winter.

This is, of course, one of the busiest times of the year, and the time, therefore, when one often finds it perplexing to know which way to turn next. Yet it is well to bear in mind that some things are better neglected than others. For instance, your stock plants, which you are depending on for next winter's business, be it violets, carnations or what not, should stand ahead of stock for transient purposes. Not that I would argue neglect of any, but there is, as you might say, good attention and fair attention, and stock for winter dependence should stand first.

In this busy planting time, one of the troubles quite likely to arrive is the red spider pest. Hurried watering, neglect of spraying and carelessness in ventilation all help them to multiply with amazing rapidity when once they get a foothold. Therefore, as in many other things, an ounce of prevention is worth a pound of cure, to say nothing about the added cost of labor and time later, as well as the weakened stock, or stock that is entirely spoiled for all practical purposes.

The Grower Who Succeeds.

Everything that in any way tends to lower the vitality of the stock means the lowering of the high quality of the product that you send out, and success, which all are supposed to be aiming for, is every day more and more restricted to the grower that puts the best on the market—absolutely the best. Such a grower is sure of a market, and at the best prices that obtain. All other growers are at the mercy of the market demand. If there is a shortage they will realize fair prices, but if, on the contrary, the call is slow, they are at the mercy of the buyer, who gets his flowers at practically his own price and this price is not one of profit for the grower.

Hence, to come back to our text, which might be put in two words as "Timely Attention," do not, for the sake of minor duties, allow permanent stock to be neglected, as this represents dollars where other kinds represent cents.

This also applies to planting outdoor stock; also to the timely cleaning up of houses and planting them. A delay of a few days when things should be attended to means frequently a great deficiency in results, out of all proportion to the seemingly slight neglect.

Avoiding a Shortage.

Judging from personal experience, as well as observation of other growers,

if planted where water will stand in winter the bulbs will rot. By lifting and dividing the roots about the last of October, I have always had excellent success, giving the plants a good mulching of leaves when the ground is frozen. Bulbs lifted and stored over winter in a cool cellar and planted out in April will make a good succession to the fall planted bulbs. The montbretias are all excellent for cutting and we see no reason why they should not become more popular commercially.

Trollius Asiaticus Excelsior.

Of the various globe flowers in cultivation, none catches the popular eye as quickly as Trollius Asiaticus excelsior. The deep orange colored flowers, which are produced during May and to some extent during the later summer months, are of a color which is always immensely popular. It succeeds well in the full sun, but does better where it can be shaded partially from the hot summer sun. It does not require a damp location, like T. Europæus, but grows well in light, well drained garden soil. Division of the roots is the best method of propagation, early fall being the best time for this work. Any florist having a row or bed of this striking trollius will have no difficulty in selling it, once customers have seen it.

Phlox Divaricata Laphami.

Phlox divaricata is a beautiful plant for the herbaceous or rock garden, growing well in almost any location. The variety Laphami possesses greater vigor than the type, with flowers of larger size and of a rich plumbago blue color.

While popular for outdoor spring effects, it is not generally known what a fine subject Phlox divaricata is in pots or pans for greenhouse purposes. I venture to predict that any wide-awake florist, who works up a stock of this in pans and flowers it in March or early April, as is easily done, would sell his plants on sight, for there is nothing to at all compare with it in color, and any purchasers can use the plants in their hardy border and get a nice floral display another season. For pot culture the plants should be lifted in September and brought into gentle heat in January. W. N. Craig.

BOYS' GARDENS IN DAYTON, O.

What N. C. R. Co. Has Done for the City.

Several years ago the neighborhood in which the National Cash Register Co. is located was one of the "toughest" and most dilapidated sections in Dayton, O. No person of standing cared to rent or buy property there, and those who did inhabit it cared little about the appearance of the neighborhood. John H. Patterson, president of the National Cash Register Co., became much concerned and was anxious to see rapid improvements.

J. H. Patterson.

(Whose services to horticulture have been of utmost value to the trade.)

The beautifying of the factory premises was the first step taken. The effort began with a general cleaning up. Fences were removed, walks were repaired and grass, trees, flowers and shrubbery were planted.

The A-B-C Principle.

Mr. Patterson secured the services of J. C. Olmsted, of Brookline, Mass., to lay out the grounds surrounding the factory. The following rules were followed, and called the A-B-C principle of landscape gardening: A, "Keep center of lawn open"; B, "Plant in masses"; C, "Avoid straight lines." These principles were afterward adopted by the people of the N. C. R. neighborhood and marvelous improvements took place, until today the N. C. R. neighborhood is one of Dayton's beauty spots.

Keeping Boys Out of Mischief.

After this movement was well under way, Mr. Patterson's attention was attracted by three small boys, who, by their pranks, had cost the neighborhood $30,000. Mr. Patterson estimated that each boy had done $10,000 worth of damage. He tried to discover the cause and furnish a remedy. The cause, he found, was idleness; the remedy, healthful work. So he decided to give them something to do.

Mr. Patterson had spent his boyhood on a farm, and realized the value of such training for a boy. It was impossible to take them all to a farm, so he had two acres of ground plowed up and laid out into fifty individual gardens, each 10x100 feet in extent. The tools, seeds and all equipments were furnished by the company and a head gardener was hired to direct the work of instruction. The age of the lads was set at 10 to 14 years.

The Boys Get Interested.

At first the boys jeered at Mr. Patterson's efforts. Then a few took hold, and when the seed began to grow and the vegetables came, others joined them, and before the first season ended there were forty boys working systematically in the gardens. Prizes amounting to $50 were awarded the boys, and, besides, they were allowed to sell their vegetables on the market.

This movement was started in 1897, and each year the interest increases. Each boy strives to produce better vegetables than his neighbor. The results have been, an improvement in the character of the neighborhood, a remedy for the idleness of the boys, the formation of their own character and the successful adoption of the boys' gardens in various parts of America.

A part of the N. C. R. gardens at Dayton, with the boys at work, is shown in the accompanying illustration.

Methods and Results.

The course of instruction covers two years. Diplomas are awarded at an annual banquet given by President Patterson. Many more applications are received than there are gardens to assign. In such cases, seeds, bulbs and tools are given the boys who wish to start gardens at home.

This year fifty boys began work April 10. The gardens were prepared and the first planting was done April 20. Much of the teaching is done by example. The instructor and more competent boys offer suggestions to the less experienced gardeners.

All ground is used to the best advantage and several crops are taken from the gardens each season. Last year three crops of lettuce, three crops of beans and 6,000 pounds of radishes were a part of the output. Ten tons of vegetables constituted the season's yield. This year eight new gardens were opened.

Stimulating Competition.

Uniformity is required in the working hours and in the products of the garden.

Partial View of the Boys' Garden at the National Cash Register Co., Dayton, O.

In order to stimulate competition, the same vegetables are cultivated by each boy. System is important. The morning hours are from 6:30 to 7:30 and the evening hours from 4 to 5:15. If any boy wishes to work overtime, he must stop when the rest do and get permission from the head gardener to continue.

A committee of judges inspects the vegetables during the progress of their growth and when they are ready for the market. The judging is done without knowledge as to the ownership of the different gardens.

Awarding the Prizes.

The prizes awarded for the best all around records are as follows: First prize, $12; second, $10; third, $6; fourth, $4; fifth, sixth, seventh and eighth, $2 each; ninth, tenth, eleventh and twelfth, $1 each.

Each gardener is credited on five special counts: First, value of products from his garden; second, condition of garden and tools; third, regularity of attendance; fourth, deportment; fifth, condition of account book.

In awarding the prizes these five points are credited in the following ratio: Thirty per cent for value of product, twenty per cent for condition of garden and tools, twenty per cent for attendance, twenty per cent for deportment and ten per cent for account book.

Technical subjects, such as seed germination, the relation of water and air, roots, buds, and the process of fertilization, are explained to the young gardeners. R. A. B.

ALTOONA, PA.—Karl Kuny says business is brightening up and he expects a big Memorial day.

SCOTCH BROOM.

Please let us know if the enclosed sample is Scotch or Spanish broom. A. N.

As near as I can tell from rather dried sample received, the plant is Cytisus scoparius, the common broom, often called Scotch broom. W. N. C.

TIMELY ATTENTION.

Stock Plants for Winter.

This is, of course, one of the busiest times of the year, and the time, therefore, when one often finds it perplexing to know which way to turn next. Yet it is well to bear in mind that some things are better neglected than others. For instance, your stock plants, which you are depending on for next winter's business, be it violets, carnations or what not, should stand ahead of stock for transient purposes. Not that I would argue neglect of any, but there is, as you might say, good attention and fair attention, and stock for winter dependence should stand first.

In this busy planting time, one of the troubles quite likely to arrive is the red spider pest. Hurried watering, neglect of spraying and carelessness in ventilation all help them to multiply with amazing rapidity when once they get a foothold. Therefore, as in many other things, an ounce of prevention is worth a pound of cure, to say nothing about the added cost of labor and time later, as well as the weakened stock, or stock that is entirely spoiled for all practical purposes.

The Grower Who Succeeds.

Everything that in any way tends to lower the vitality of the stock means the lowering of the high quality of the product that you send out, and success, which all are supposed to be aiming for, is every day more and more restricted to the grower that puts the best on the market absolutely the best. Such a grower is sure of a market, and at the best prices that obtain. All other growers are at the mercy of the market demand. If there is a shortage they will realize fair prices, but if, on the contrary, the call is slow, they are at the mercy of the buyer, who gets his flowers at practically his own price and this price is not one of profit for the grower.

Hence, to come back to our text, which might be put in two words as "Timely Attention," do not, for the sake of minor duties, allow permanent stock to be neglected, as this represents dollars where other kinds represent cents.

This also applies to planting outdoor stock; also to the timely cleaning up of houses and planting them. A delay of a few days when things should be attended to means frequently a great deficiency in results, out of all proportion to the seemingly slight neglect.

Avoiding a Shortage.

Judging from personal experience, as well as observation of other growers,

there is likely to be a shortage of stock for the coming year in many kinds of bedding plants, like geraniums, petunias, etc. Unless you carefully set aside plenty of stock plants of each kind before the bedding rush is on, you are likely to find when it is over that you are all out of certain kinds (and of course these are always the popular kinds), or you have only a few culls left, which no good grower wishes to utilize for stock plants.

These notes have been written hurriedly, as it is a hurried time; yet, if I have succeeded in jogging your memory on something that you have thought to do, but have failed to do up to the present moment, why, it is never too late to reform, and I would suggest that you go and do it now.

One thing more: When planting plants in the field, do not fail to have the balls of earth thoroughly wet, even if the ground is in good, moist condition. Disturbing the soil in planting makes it dry out, and if rain does not follow quickly after planting, the neglect to wet the plants may mean the loss of quite a large per cent of the stock, or at least a greatly retarded growth. So again I say, take care. R. E. Shuphelt.

CHRYSANTHEMUMS

SEASONABLE SUGGESTIONS.

Planting.

It is time that the stock which is expected to produce the exhibition flowers should be planted out in the benches or pots. One sees occasionally some fine flowers produced from later planted stock, but they are the exception that proves the rule. The longer season of growth will give the flower depth and solidity, as well as mere spread, and in present-day competitions there is no room for anything but the best. The size of some of the flowers staged today was hardly dreamed of ten years ago, and if the present keen rivalry continues we may see even greater results in the immediate future.

Some of our best growers now keep their plants continuously in pots, claiming, with good reason, that a potbound plant can be more heavily fed than the same plant in a bench, thus giving greater depth to the flower. My only objection to that system is the cost of production. Plants in pots need far more care than in a bench, as they need more watering. Personally, I shall continue to grow my plants in a bench, recognizing, at the same time, that I am somewhat handicapped by so doing.

The Soil.

The soil for planting should be in good shape mechanically, as well as rich in plant food. The mum loves a live soil; that is, a soil that has lots of fibrous sod in its composition. Anyone who has ever noted the roots of his plants has observed how they bunch themselves in a piece of fiber, thereby showing how they like it.

The old way of making a compost heap in the fall, of three or four parts of sod to one of manure, seems to be falling into disuse in some sections, but while there are quicker ways of preparing soil, there is no better way. Such a compost heap, chopped down now and having bone mixed with it, furnishes a soil that is ideal for planting mums in. The plants root into it quickly and it will not sour in the benches, as the particles of sod keep the soil open and overwatering is almost impossible.

In filling the benches, fill just level full, and then, after the plants are set out and the soil made firm, there is about half an inch or so of room between the soil and the top of the bench, to allow of ample waterings. I always consider four and one-half inches of soil ample to grow mums in.

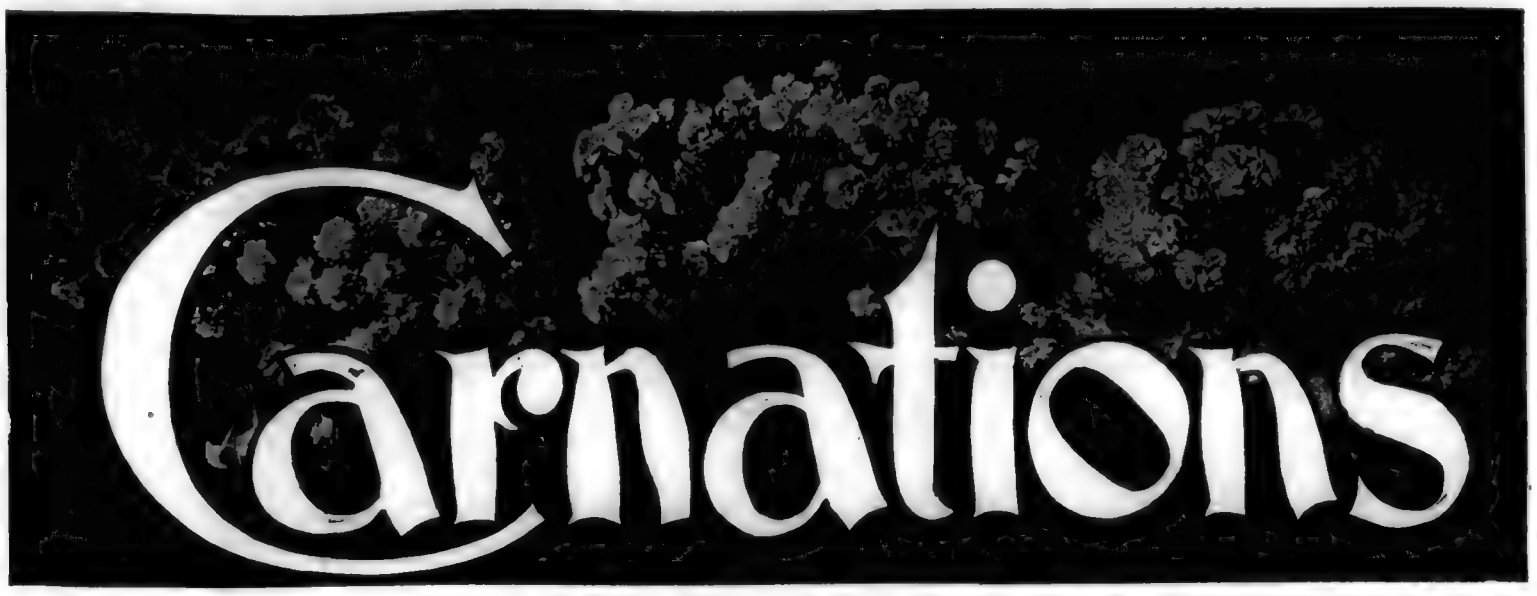
The distance apart to set out the plants is a question governed somewhat by the habit of the plant itself. About 10x9 is the distance we plant most of our kinds to grow single stems, and that is none too much room for the average variety. Miriam Hankey makes heavy foliage, and this foliage is prone to mildew in the fall. Give this variety more room and it will repay you. Other kinds, like Mrs. H. Partridge, that droop the leaves to the stem, may be planted closer and not suffer for it. The chief idea in the mind of the planter should be not to get the foliage so dense that the sun cannot penetrate to the bed after the plants have made a good growth. When planted too closely the plants draw each other up, and hard, short-jointed wood is impossible. It is far better to grow half as many plants and have them all perfect.

A Florists' Representative.

Plants Making Buds.

The usual complaints regarding plants running to bud, instead of going ahead and making growth, are coming in. As we have many times explained in these notes, some varieties are apt to run to bud at this season, but they eventually grow out of it by keeping the buds closely pinched off, and the plant finally throws up a sucker and comes away.

Where buds show in all the kinds in the same way, it may be taken for granted that the stock has been neglected, not kept sufficiently watered and allowed to get potbound. In the parlance of the craft, young plants must be kept "soft"; that is to say, in a growing condition, without check of any kind. It is the hardening of the tissues consequent on an insufficient supply of food and water that throws the plant into bud. So the remedy is obvious.



Early varieties should be planted in May, if possible, because it must be remembered that in eight to ten weeks buds must be taken and the plant must have time to make a long enough stem to be salable.

October Frost and Rosiere run up quickly, but Pacific, Polly Rose, Monrovia and Golden Glow are slower and need the time to grow in. By all indications, everybody will plant Golden Glow. Do not forget to have some pink and white to keep it company. It is possible to have too much of even a good thing.

Charles H. Totty.

THE CARNIVAL COSTUME.

The business men of East Palestine, O., recently held a carnival and J. N. Spanabel made use of the opportunity for good advertising. Throughout the carnival he was represented by Miss Ethel Stooksberry in the costume shown in the accompanying illustration. What she called her "harness" was of Enchantress carnations with wired stems, so that each flower would retain its position.

CARNATION NOTES.—WEST.

Care of the Stock in Bloom.

In the rush of spring work I hope you have not neglected your blooming stock too much. If you were wise, you got it into shape to run with little attention for a while, before the planting out commenced. Even during this busy time there are occasional rainy spells when the outside work must be suspended for a day or two. On all such occasions, all hands should be put to work to keep the stock in trim. You will want to cut from these plants at least six weeks yet, and on the care you give them now will depend the quality of the blooms you will cut. At this time of the year it is impossible to improve the quality much, if once they are allowed to deteriorate. The warm weather and dry winds tax the plants heavily to hold their own, even when given every encouragement.

If you had been feeding regularly with liquid manure during the spring and you cannot spare the time now, you should provide some other means of supplying the plants with their accustomed nourishment. A good mulch of cattle manure is about the best thing obtainable, and put it on thick enough so it will prevent too rapid evaporation. If this is not on hand, then put on a liberal mulch of rotted stable manure and add to it pulverized sheep manure at the rate of 100 pounds to 500 square feet of bench space. This will run the plants nicely for several weeks and, if plenty of water is given, the blooms should be of good quality for a long time yet. It is scarcely necessary to add that disbudding must be kept up just as closely as in winter. Also, the stems must be kept growing straight.

Shade for the Colored Varieties.

Have you put any shade on the glass yet? Most of the colored varieties will now be benefited by a light shade. Especially is this true of about all the flesh-pink and the rose-pink sorts. Rose-pink Enchantress takes on a lovely shade of shell-pink from now on if there is just enough shade to prevent bleaching. Of all the pink varieties, about the best one to hold its color under strong sunlight is Aristocrat. While the color of this variety is far from ideal in winter, yet it sells well, and at this time of the year it is just as even in color as in winter.

There are a number of ways of applying the shade. All are effective, though there is a wide difference between them in the amount of work involved. Perhaps the oldest and the most laborious is to brush it on with a common whitewash brush, running a strip down the center of the glass. There are those who declare this to be the only proper way. Others, ourselves included, spray the shading material on with an ordinary hand syringe. This way is quick and does a good job, covering the entire roof with countless spots that average about the size of a nickel.

Don't Do Too Good a Job.

When putting shade on carnation houses, don't do too good a job. That is, don't put it on so that only a brush and lye water will take it off. Rubbing shade off the glass is a big job and, moreover, it is a needless one in most cases. Remember that you will want your roof quite clean again by early September. Would it not pay better to put it on two or three times, if necessary, than to have to rub it off in the fall? Instead of using fresh lime slaked with hot water and adding salt to make it stick, we consider it better to let the lime slake slowly in a damp place and add enough water to make the proper mixture. It will take several hard rains to wash this off, and, by renewing it where it is washed off most, the shade can be kept just right all summer. Then, if found necessary to remove it in the fall, it will come off easily. When we shaded heavily during planting time, it was just as well to put it on more permanently, as it had to be rubbed off anyway, but conditions are different now.

Potted Stock versus Bench Stock.

While it is yet fresh in our memory, I want to say that we do not expect ever again to plant carnations except from pots. Last year we benched a large part of our young plants. The plants grew nicely and were strong young plants when transferred to the field, but, unless a good rain fell within a day or two after planting, they suffered considerably. This year we handled all our young stock in pots, and while the plants are not quite so large, they are firm and full of breaks where they were topped, and—oh, how much better they are to handle! We think there is no comparison between the two methods.

Are you cultivating the young plants in the field right along now? Now is the time to get the ground into good condition, or rather to keep it so. A few hard rains without cultivating between will beat the ground down hard, and make it almost impervious to the cultivator. So do not neglect the cultivating under any circumstances; the more, the better.

A. F. J. BAUR.

FIGURES FROM A GARDENER.

I have read with much interest the articles which have appeared in the REVIEW from time to time on the different cuts of carnations by growers in different localities. I would like to give my experience as a private gardener, with only 150 plants, in six different varieties, namely, Beacon, Harlowarden, Enchantress, Britannia, White Perfection and Winsor. Unfortunately, I did not keep separate count of the different varieties cut, but Harlowarden, Britannia and Enchantress have given the most perfect flowers and Winsor has been the poorest.

I started to cut October 1, and up to April 30 I had altogether 3,350 blooms, all of good size and a great majority of them extra good, with few splits in the lot. You will see by the above figures that I had an average for the seven months of 22⅓ blooms per plant. The cut by months was as follows:

October	253
November	753
December	768
January	411
February	327
March	368
April	470

The largest cut for one day was in December, namely, 155 flowers. The plants are still in good condition and look as if they might give us lots of bloom for four or five weeks yet.

PETER B. ROBB.

JAMESTOWN, N. D.—A fire which is supposed to have originated in the boiler room of the Wheeler Floral Co., in the rear of the Daily Capital building, recently destroyed property to the value of $2,000.

NEWARK, N. J.—The Prudential Insurance building, at Broad and Bank streets, in the basement of which Peter Penek has a flower store, is being torn down, in spite of the fact that no agreement has yet been reached with Mr. Penek in regard to the compensation for his lease, which has a year yet to run. All the other tenants in the building have accepted the insurance company's terms and have secured other quarters, but there is said to be a difference of several thousand dollars between the Prudential offer and the amount that Mr. Penek wants in lieu of his lease. The work of tearing down can continue for some time without molesting Mr. Penek's store. A later report, however, states that Mr. Penek has compromised with the insurance company and consented to move out.

CINCINNATI.

The Market.

Business was only fair last week. The demand was no more than medium, and the buyers were not particular whether they got anything or not. A large amount of stock was moved out, but it could only be done by cutting the price until it had reached rock bottom. Only a little really high-grade stock is coming in at present, and that little brought good prices, but the bulk was of medium to poor quality, and much of it sold at job lot prices. With the advent of clear and cool weather, we can look for stock of a little better quality, and it ought to bring out a better demand. Some first-class Beauties are selling right up to quoted prices, but the majority of roses of all varieties are of poor quality. Carnations average fair only. Some of the better grades sell well, but there are so many of the poorer grades that the average price is away down.

The market is well supplied with the various spring flowers. Some fine irises are seen. Outdoor valley is in, and the demand for it is only fair. There are a few peonies on the market. The main crop will not be in for a week or two yet. Sweet peas are coming pretty strong, and sell fairly well. Fancy fern leaves have been scarce this spring, and the price has been higher than for many years. A few of the new crop are coming in now, but as yet they are a little soft and not of much account. Another week ought to put them into better condition. Smilax and asparagus are in good demand.

Decoration day will soon be upon us, and the prospects for a rattling good business have never been better. With anything like good weather, there ought to be a good supply of first-class stock, and of just the kind that the buyers want for that day. The last few years have taught us that Decoration day business is good business, and that it is wise to be prepared for it just as well as for Easter and Christmas. Each year this business has grown, till now it usually cleans out everything that comes into the market. Owing to the dry weather last fall, the peony crop will not be as good this year as usual, but we hope to have enough to take care of the business if we have anything like good business in the meantime.

C. J. Ohmer.

A FLORIST FLIMFLAMMED.

By means of an ancient and well tried form of "flimflam," a stranger recently secured $20 from Miss Clara Forbes, of the firm of Misses Forbes & Donahey, Wheeling, W. Va.

The man went to the flower store and, exhibiting a number of one-dollar bills, asked if he could exchange them for a $20 bill. The bill was passed over to the man, who tendered the ones in exchange. Upon counting them, but eighteen bills were found in the lot. The man stated that he had been given the money in change by a merchant, and that a mistake had been made. In the meantime he had sealed up the $20 bill in an envelope, which he put in his pocket.

Asking Miss Forbes to take charge of the envelope while he went out to have the mistake rectified, the stranger vanished, and upon examination the envelope which he had turned over was found to contain nothing but paper.

OBITUARY.

Mrs. S. S. Skidelsky.

Mrs. S. S. Skidelsky died at her home in Philadelphia May 13. Mr. Skidelsky has many friends all over the United States who will sympathize deeply with him in his great loss.

Mrs. John Galvin.

Mrs. John Galvin, widow of the late superintendent of the Boston public grounds and mother of Thomas F. Galvin, died at her home, 511 Washington street, Dorchester, Mass., May 16, at the age of 90 years. Mrs. Galvin's husband planned much of the present Boston Public Garden and the deceased lady was herself a great lover of floriculture and arboriculture. Funeral services were held May 18 and were largely attended.

Peter Bauscher.

Peter Bauscher, pioneer resident, gardener and florist, of Freeport, Ill., succumbed to the infirmities of old age, Saturday, May 15.

Peter Bauscher was born in Frankfort-on-the-Main, Germany, August 15, 1829, and as a young man spent six years in the employ of Herr Renz, at that time the largest florist and nurseryman at Frankfort. He came to America with his mother and two brothers at the age of 24. The trip across the water took fifty-two days. After the landing of Mrs. Bauscher and her two sons they started at once for the west, where they intended to make their home. The family got as far as Roekford, Ill., and since there were no railroads running into Freeport at that time they made the trip across country in a wagon to Freeport, arriving there in 1853. Two years after, in 1855, Mr. Bauscher was united in marriage to Miss Elizabeth Stephan, who died May 26, 1897. The courtship was begun in Germany, and after Mr. Bauscher had accumulated enough means he sent for his fiance, and they were married in Freeport.

Six children were born, three having died and three survived. Among the latter is the florist and former alderman, Louis Bauscher.

For a man of his age Mr. Bauscher possessed a remarkable memory. He was present at the great Lincoln-Douglas debate held in Freeport, August 27, 1858. His description of the first railroad train which entered Freeport was a vivid one. He was the owner of fourteen acres of land in the third ward. He had resided in the home in which he died since 1873. Funeral services were held Tuesday, May 18.

Christopher Rossmann.

Christopher Rossmann, a native of Germany, died of Bright's disease May 13 at the home of his sister, Mrs. Carrie Wilkins, 704 West Oak street, Louisville, Ky. Mr. Rossmann had been in Louisville only two weeks, having come from Illinois, where he was engaged in the nursery business. He is survived by two sisters, Mrs. Edward Zwigard and Mrs. Carrie Wilkins. Three brothers also survive.

Gasport, N. Y.—White Bros. are building another greenhouse.

Concord, N. H.—Charles H. Barrett recently visited York Beach, and from there went to Dover to attend the annual meeting of the grand encampment, P. M., I. O. O. F.

BOSTON.

The Market.

Business has been poor during the last week. Hot weather brought in a flood of flowers, for which there was no demand. Conditions now show a slight improvement, and rather better trade may be expected from now until after Memorial day. Roses are abundant and down in price; 15 cents is now top price on Beauties. Killarneys and Richmonds continue of good quality. Some good Kaiserins and Carnots are also arriving.

Carnations continue of fair quality, but the call for these is poorer, many preferring sweet peas and other spring flowers. Violets are over. Valley will in a few days be abundant, as the outdoor crop is nearly in. Sweet peas are plentiful, but getting shorter stemmed.

Bulbous stock is on the wane. Another week will practically clean up all narcissi but poeticus, and all tulips except the late section. Spanish iris and gladioli are plentiful; the former sells the best. There is a poor call for such flowers as mignonette, antirrhinum, wallflower, stocks, etc. Peonies will not be in season here for some time yet. A few of the old officinalis may be in for Memorial day.

Plant trade is improving with the advent of warmer weather. Bedding plants are now in quite active demand. There promises to be a good supply of outdoor flowers for Memorial day, such as lilacs, late tulips, early German iris, etc.

Club Meeting.

It was to be regretted that Peter Bisset, the lecturer of the evening, could not leave Washington to be at the meeting of the Gardeners' and Florists' Club, May 18, but his paper on water gardening, being forwarded, was read by J. W. Duncan and proved to be full of interest to the 130 members present, a large audience for a May meeting. The seventy-five slides, showing many pretty scenes in the water garden, helped to illustrate the speaker's remarks and an interesting discussion followed, in which Robert Cameron, W. Downs, Mr. Duncan, W. N. Craig and other members joined. A rising vote of thanks to Mr. Bisset and regret at his inability to attend were passed.

There was as usual an interesting array of exhibits on the tables, outdoor flowers predominating. In the question box were numerous queries. One referring to the relative importance of outdoor and indoor gardening to the average private gardener elicited opinions that the outdoor department was the more important and was becoming increasingly so. A discussion on Tanglefoot, a preparation much used of late years for application to tree trunks to catch moth pests, brought out the facts that this substance, when applied direct to the bark, had proved injurious and the preparation was unanimously condemned. Arsenate of lead was voted the best insecticide for all leaf-eating insects. California privet was pronounced a worthless hedge plant in Massachusetts; Ligustrum reglianum, Berberis Thunbergii and Cratægus Crusgalli were best thought of.

The question of an age limit for membership was not considered important enough to discuss, and there seemed to be no general idea as to what had caused such a slump in the popularity of mums in and around Boston of late years, but all admitted the big blooms were not popular as they used to be. Other queries

referred to the desirability of discussing more fruit and vegetable topics, suitable varieties of hardy roses and about everything in the horticultural calendar.

The coming field day at E. J. Shaylor's, the July picnic and other topics were severally referred to. One new member was elected and the May meeting of 1909 proved one of the best the club has yet held.

Various Notes.

In Lynn, Mass., May 15, carnation day was held. Fifty girls sold carnations on the streets for the benefit of a sanitarium. Over 20,000 were sold, and between $3,000 and $4,000 netted as a result. The great success attending the sale will encourage the promoters to make it an annual affair.

The Arnold Arboretum has been the Mecca for many visitors this week, the display of malus being the special attraction. A week hence the lilacs will be at their height.

John K. M. L. Farquhar expects to leave on a European trip about June 20.

H. M. Robinson & Co. are doing a good summer trade, and are planning for a heavy business at Memorial day.

Orchids are unusually abundant in the flower stores at present. Cattleya Mossiæ is mostly in evidence. C. Skinneri is seen in lesser numbers. Dendrobiums and Lælia purpurata are other sorts noted.

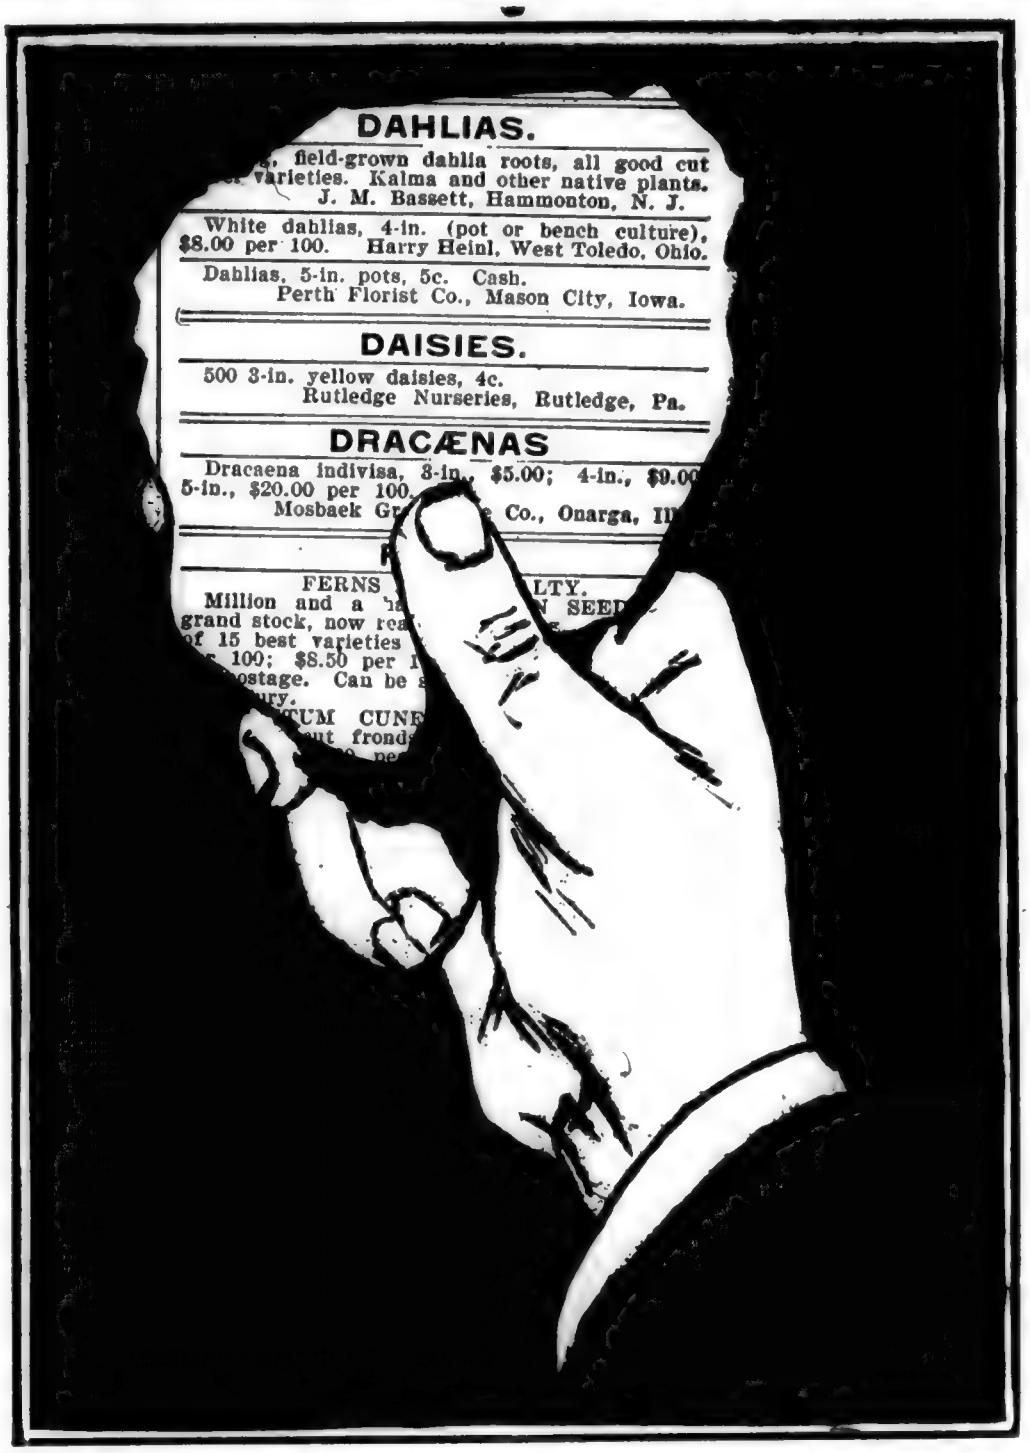
W. B. Goodenow, of Stoughton, was last in the market with double violets. He is now picking a nice lot of cucumbers and tomatoes.

Peirce Bros. have a big lot of Spiræa Japonica which will be in season for Memorial day.

The garden committee of the Massachusetts Horticultural Society visited the Langwater estate, North Easton, where W. N. Craig has charge, to look over the spring flower garden, May 18. Late tulips, narcissi and other seasonable flowers interested the visitors.

There will be an exhibition at Horticultural hall May 23, at which some interesting plants and flowers will be shown.

The Budlong Co., of Auburn, R. I., is shipping an unusually fine lot of roses to the Park street market, Richmond and Killarney being extra good.



W. N. CRAIG.

COLORAGO SPRINGS, COLO.

May 15, William Henry Evans, president of the Pikes Peak Floral Co., consummated the purchase of the greenhouse property and business of William Clark. Mr. Clark retains his nursery and will continue to operate it. The consideration is not made public, but it is in the vicinity of $25,000, and by this purchase the Pikes Peak Floral Co. becomes the largest wholesale cut flower producing firm in the state and one of the largest west of Chicago. The Pikes Peak Floral Co. has operated 85,000 square feet of glass and the Clark range includes approximately 100,000 square feet of glass. Edward Johnson will have the charge of the greenhouses and growing. William E. Crump will be in charge of the sales department and the concern will now enter the retail field locally; heretofore the Pikes Peak Floral Co. has done an exclusively wholesale business.

WASHINGTON, IND.—Christ Voyes, formerly of Merrill, Wis., is here to erect two greenhouses and go into the business.

These Are the Little Liners That Do the Business

GARDNER, MASS.

Arthur F. Johnson, of Amherst, formerly of Gardner, has petitioned the Superior Court of Worcester to allow dissolution of the corporation known as the Riverside Greenhouse, Inc., of Gardner, of which he is secretary. The corporation was organized under the Massachusetts laws July 27, 1904, and was capitalized at $8,000. The greenhouses are located below the Parker street bridge and were bought three years ago by Carl Erickson, the present owner. Some of those having shares are Carrie H. Johnson, Arthur F. Johnson, Jr., Roger Johnson, all of Amherst, and George R. Lowe, Milton A. Creed and other Gardner people. The corporation voted to dissolve at a meeting in Athol in April. There will be a hearing on the petition in the July term of the Superior Court.

FRANCOAS.

Please tell me how to grow Francoa glabrata and F. ramosa. Do you think they will be worth raising for cut flowers? Will they bloom the first year from seed and will they bear the heat of middle Georgia? S. B.

I have not grown Francoa glabrata, but F. ramosa, while not much seen in America, is a common plant in European gardens. In central Georgia it should prove perfectly hardy, it having wintered out as far north as Washington, D. C. You cannot flower francoas the same season from seed. If some is sown now in a frame or greenhouse and kept grown along in pots, it will flower in the summer of 1910. The francoas flower when choice flowers are scarce, and if you have use for these in design or table decorative work, you will find the white sprays of F. ramosa excellent. With me it grew three feet in height and flowered in July. The flowers last quite well in a shaded greenhouse. I doubt if it will pay you to raise these flowers merely for cutting, but why not plant some in your perennial ground? C. W.

ENID, OKLA.—J. R. Detwiler is erecting a neat, modern store, to be operated in connection with his greenhouses.

POUGHKEEPSIE, N. Y.—Thomas P. Logan, formerly head gardener at Alta Crest, in Coscob, Conn., has now accepted a similar position with Dr. Kinkead, in this place.

GREENVILLE, ILL.—Zbinden & Corboz, having secured a five-year lease on some property here, will erect a greenhouse and will conduct business under the name of the Greenville Floral Co.

RESULTS.
We give them. You get them.
We both have them.

WITH this issue the REVIEW begins its twenty-fourth half-yearly volume.

CARPET bedding is pretty well out of date; hardly any of it will be done this year.

MEMORIAL day this year will last three days. May 30 falling on Sunday, some communities will observe the event on Saturday, some Sunday and others Monday.

THE price of tinfoil has been advanced by manufacturers, but jobbers who loaded up last fall, when prices were at the bottom, are still giving the trade the benefit.

THE dissemination of new carnations in England has reached the stage where Hugh Low & Co. send out a color plate showing their seedling varieties Royal Purple, Lady Dainty and Black Chief.

THIS issue of the REVIEW is not so large as our Easter Number, but still 6,652 pounds of white paper—nearly three and a half tons—were consumed in printing the Memorial Day Number.

EVERY little while the REVIEW receives photographs which bear no mark to indicate what they are or whence they came. Among the unidentified now on hand are two handsome pictures of a retail store that arrived May 11.

THE Gardeners' Chronicle, London, publishes an illustration of the White Killarney rose prepared from a photograph of one of the blooms brought from America in a cut condition, in the cold room of the Mauretania, by H. A. Barnard, a representative of Hugh Low & Co.

CRITICISM of the duties on window glass in the U. S. Senate has caused the committee in charge of the tariff bill to withdraw the objectionable paragraph, reaffirming the Dingley rates, with the promise to present a new schedule that will reduce the duty on greenhouse sizes about ¼ cent a pound.

IN England there has for some time been agitation for what is known as the daylight saving bill, the object of which was to cause the beginning and ending of the day's work to be one hour earlier than now in summer. It is the spirit of America to go the other fellow one better, so the More Daylight League, recently organized in Cincinnati, purposes to begin the day two hours earlier.

ALWAYS FIRST.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

Please discontinue our classified advertisement, as we are now sold out of surplus stock. We have received many orders through advertising in your columns, and among eight papers that we are taking we always look over the Review first.—Valdesian Nurseries, Bostic, N. C., May 12, 1909.

CHICAGO.

The Great Central Market.

Last week the somewhat overdue annual spring glut put in its appearance. Practically all lines of stock became overabundant. Carnations held their own fairly well until toward the end of the week, when the prices melted away. The overstock was most serious in roses, and Beauties led the procession downward. It is noteworthy that the crops of Beauty have not been exceptionally heavy; many times one or another of the large growers has cut a much larger crop; but this time all the growers seem to bring on fair crops simultaneously, with the result that practically every house in town had a too large supply. The quality has deteriorated until only a small part are really first-class. The result was that Beauties not strictly up to requirements of the high class stores have been selling for a song. They never were lower. Other roses have been in much the same state. Killarney and Richmond are the two best roses on the market, and have done a little better than Maid and Bride, but such a small part of each day's receipts could be used by the regular stores that the average price has been exceedingly low. Indeed, there has been considerable waste, because even the special sales buyers could not use all the stock received, even though they made their own price.

This week started with carnations at a rather lower level than at any time last week, and with no improvement in the rose situation. Sweet peas also congest the market, but the better grades are selling remarkably well, when the general situation is taken into account. There are large receipts of excellent peas, and they all sell at what should be thoroughly satisfactory prices. Even the medium grades are still selling well at $5 to $6 per thousand, but for the poor grades, which, of course, are a large part of the receipts, there is little sale.

Peonies are not going any too well. With other stock so cheap as it now is, the peony houses prefer to store their good bunches against the strong demand sure to develop for Decoration day.

This week there have been large receipts of outdoor lilac, and practically every spring flower is coming in heavily. Callas and Harrisii are hard to move, and there is nothing which can be said to have a firm market, except smilax, and even this is on the downward grade. Ferns have become abundant, but good ferns still are scarce, and the price of the good stock gives no indication of falling.

It always is noted that when this market is glutted, other markets are in the same condition, and those buyers who grow part of their own stock also have large supplies, with a result of shutting off the shipping demand. But in spite of this condition, shipping has been excellent, and the salvation of the market, the last ten days. It is believed a slight reduction in crops will bring first-class business again. How others are situated is shown by the fact that Pittsburg commission houses have been reconsigning large quantities of stock to this market, although there was no possible reason for so doing, except a disinclination to accept the inevitable. Some of the growers profess to see signs of an early change in the situation, and it cannot come too soon.

Decoration Day.

All thoughts are now turned toward the Decoration day demand. Everyone agrees that supplies will be large; more flowers will be handled in Chicago May 27, 28 and 29 than in any three days in the previous history of this market. If there is a shortage of any flower, which now seems improbable, there will be something else to take its place.

Peonies

For Decoration Day

The Peony is THE flower for Decoration day. It's the big flower that makes the finest cemetery bunch—the best show for the money. Put in a good stock; you'll need them. We shall have several thousands of dozens to ship May 25 to 29. White and pink. Put up by the oldest, most experienced and most successful shipper in the United States. The same stock we have handled with such general satisfaction in previous years. There are no better Peonies. Push the Peony and order of us.

Beauties

Our cut of Beauties will be just right for Decoration Day. A big supply in all lengths, and all of splendid quality. Our summer Beauties are famous. They were never better than this big crop will be. Send along your orders.

SWEET PEAS

The fragrant Sweet Pea has been a splendid seller all spring—and never better than now. You can use them in large quantities for Decoration Day. **WE** have them in quantity—50,000 to 75,000 a day. Fancy stock, long stems—nothing like them to be had elsewhere. All colors. Order early and we pick the stock specially for you afternoon of shipment.

ROSES

We shall have a large supply of Killarney, Maid, Bride and Kaiserin for Decoration Day. Also a good cut of Richmond. Any length; good heads on all grades.

CARNATIONS

People buy flowers at Decoration Day who never buy at any other time—and most of them want Carnations. You can use thousands—orders calling for from 2000 to 5000 each are coming in every day. But don't be afraid we can't supply **you**—we shall have an enormuos cut and shall fill all advance orders; also, we expect to take care of late telegraph orders. We've got the goods—and the **QUALITY.** The regular buyers of Carnations in this market will tell you "Order of Amling if you want **GOOD** stock."

MIGNONETTE

We have a large cut of good stock.

LILIES

Harrisii and Callas in heavy supply.

MISCELLANEOUS FLOWERS

We handle enormous quantities of miscellaneous stock—Pansies, Daisies, Iris, Narcissi, Stocks, Snapdragon, Gladioli, Cape Jasmine—everything that is in season. No matter what you want, order of us and you get it if it is in this market.

HARDY CUT FERNS

Hardy Cut Ferns are reported scarce and poor. We are fortunate in having a large supply of Ferns that are exceptionally good for the season.

Fancy Valley Always on Hand

Send for our complete Price List of Cut Flowers for Memorial Day if not already received.

A. L. Randall Co.

Wholesale Florists L. D. Phone Central 1496 Private Exchange all Departments **19-21 Randolph St., Chicago**

Mention The Review when you write.

The indications all point to a tremendous demand. Inquiries are coming in asking for quotations on thousands upon thousands of carnations, and other stock in proportion. Every buyer who has sent in his order is getting more stock than last year.

Growers naturally will work forward to increase the supply for the special demand, but warning is given against holding white carnations. The lower the supply of white can be kept, the better it will be. It is a mistaken idea that white is wanted May 30. Last year the buyers would not clean up white even at their own price.

The days stock will be wanted in this market are May 27 and 28. Shipments received the afternoon of May 29 will be at the mercy of the Greeks.

Hellenic Enterprise.

None except a Greek would venture the store just opened at the southwest corner of State and Monroe streets, where the rent is $1,000 a month for a space about 12x20. A big clothing house failed there a few months ago, and the building has been remodeled into a half dozen little stores, with offices above. The Greek says his expenses are $57 a day, not counting the cost of stock. He handles candy, with a stand on the Monroe street sidewalk for fruits, but flowers occupy both show windows and are the principal line. The business all is transient, and it takes a lot of sales at 10 cents to 25 cents to make $57 for expenses every day. A two years' lease has been taken.

Incidentally, it is worth noting that a constantly increasing share of the flower business is being done in such stores, where flowers simply are merchandise, bought in quantity at the lowest possible price and retailed in their least attractive form. The business of these places does nothing directly to give the growers encouragement to improve the quality of their output—their principal value to the trade is as an alternative for the garbage wagon and they clear, at certain seasons, an enormous bulk of stock that otherwise would go to waste.

Moninger Branching Out.

It recently was reported in this column that the John C. Moninger Co., which has for some time been the Chicago sales agent for the Furman boiler, had gone into the business of jobbing pipe. The company now will erect a warehouse for these departments. The following particulars are supplied by the Moninger Co.:

"We have recently purchased a piece of property of 49,700 square feet adjoining our present place of business for additional lumber yard, and our plant now occupies frontage on Hawthorne avenue, Blackhawk street, Smith avenue and Weed street. This makes our place cover almost the entire square. The new building we are to put up will be to carry a large stock of greenhouse glass and heating pipe and fittings. It will be equipped with machinery for threading pipe up to 8-inch, and also special machinery for cutting, drilling, etc. The building will be about 24x90, and when completed will have three floors. We will also have a large sample room with model greenhouse and sample boilers. Business with us this year has been good. Our stock of lumber is now over 2,000,000 feet, and we think this is the largest stock of tank cypress anywhere in the United States outside of the mills in Louisiana."

Various Notes.

Sol Garland was in town May 14 for the first time since his serious illness with pneumonia. He is preparing to put up two new houses at his place in Des Plaines.

Kennicott Bros. Co. has added a telephone to the office equipment, so that one may now talk to either the selling force or the office by calling their number.

R. Mayer, the Riverside grower, went to New York May 15, and on Tuesday sailed to spend two or three months at his old home in Switzerland.

The Bohannon Floral Co. started May 17 its removal from 29 Monroe street to 11 Monroe street. The new store is in the new University Club building, one of the handsomest big buildings in Chicago. The store adjoins the club entrance. Business will be transacted there beginning next week.

E. H. Hunt says the business in fertilizers this spring has greatly exceeded that of previous years. So much business now is done in the state of Indiana that it has been necessary to secure a license there, and State Chemist W. J. Jones, Jr., has just granted Hunt license No. 4520. The Indiana law requires that a tag showing the formula and license number be attached to every bag of fertilizer sold in the state.

Vaughan & Sperry expect to be in their new quarters at 52 and 54 Wabash avenue before the end of the present week. A large new ice box is being in-

"Revero" Hose

stalled. The room is one of the best in the wholesale district.

E. C. Amling says the quantity of stock handled last Decoration day was greatly in excess of the receipts for Easter, and he counts on the total number of flowers received in this market next week being larger than a year ago, and consequently the greatest quantity ever sold here in one week.

C. L. Washburn says crops are easing up, and he looks for an early and sharp reversal of market conditions.

The A. L. Randall Co. reports a big call for wreaths of prepared foliage and for other Memorial day supplies. They have no men on the road at present; the supply business is all mail orders.

Percy Jones sounds a note of warning for Memorial day. "Don't let the white accumulate; absolutely nobody wants white flowers Decoration day."

John Kruchten says he has taken on three or four new shippers this week, not that they are needed at the moment, but that he looks forward to a day when conditions will be different. He is an opportunist.

E. E. Pieser, of Kennicott Bros. Co., says the southern peonies this year are of better quality than for several seasons, and, while orders are being booked at the same prices as other years, the buyers will get better value for their money. The quality of the stock is due partly to favorable weather conditions and partly to the large new plantations being now at an age to give perfect flowers.

The Benthey-Coatsworth Co. reports that at New Castle, Otto Benthey has organized the Frederick J. Benthey Co. to handle the interests there. It is planned, while not losing sight of the cut flower end, to largely extend the local retail business in plants and in garden work.

Peter Reinberg voices the general report when he says that the first full week of May was much better than last year, but that the gain has been lost during the glut. Leonard Kill thinks the last week of the month will be better than ever before, and A. C. Spencer says it will only take a little reduction in supply and increase in demand to put the Beauty market back on its feet.

Frederick Sperry, of Vaughan & Sperry, has been receiving congratulations over the arrival of a son May 13.

Wietor Bros. are busy planting carnations in the field. Practically all the growers north of town were later than usual this year in starting planting out.

Ice, which has been costing the wholesalers 15 cents a hundred pounds, was boosted May 17 to 22½ cents.

Bruno Kennicott, brother of the late Flint Kennicott and Amaza Kennicott, and uncle of Walter and Robert Kennicott, died May 15 in the Presbyterian hospital, after an operation for appendicitis. He was 63 years of age, and was born at the Kennicott home farm at the Grove.

Jens Jensen has opened a downtown office for practice as a landscape architect.

At Morton Grove, Poehlmann Bros. Co. is planting a part of its new range with roses for an early crop, and is pushing work on the other new place. The big new tile chimney is about finished. Field planting of carnations is nearly completed. Quite a few will be grown indoors all summer.

Weiland & Risch are cutting one of the largest crops of Killarney in the history of the firm, which was the first to grow Killarney in quantity for this market.

The Winterson Seed Store is as busy

Niessen's News Column SPECIALS for Decoration Day

Peonies

We will have a good supply of them, including all the best varieties. They will be in the right condition when you get them, and a shipment from us will be sure to please you.

Short Beauties, fine flowers—

12-in. stems.....$6.00 per 100

6-in. to 8-in. stems..... 4.00 per 100

CAN FURNISH IN ANY QUANTITY

Choice Peonies and **Carnations,** all colors, in quantity, for Memorial Day.

W. E. McKISSICK & BROS.

WHOLESALE FLORISTS

1619-21 Ranstead St., PHILADELPHIA, PA.

Mention The Review when you write.

as it is possible to be with counter sales of seeds and plants.

N. C. Moore & Co. have gone some little way toward restoring their place since the lightning and wind struck it. Bedding stock is reported selling well.

C. W. McKellar says cattleyas, long so hard to come at, have joined the ranks of the unemployed.

Arnold Ringier, of the W. W. Barnard Co., is home from a short trip to St. Louis. He recently returned from an especially successful trip to the Pacific coast.

Hawery Wojtkiewicz, proprietor of the greenhouses of St. Adalbert's cemetery at Niles, and Mrs. Mary Stefanski were married May 12. Mrs. Stefanski is the widow of Pavel Stefanski, who about two months ago was killed in an accident, falling off a tree wagon near Irving Park boulevard and Milwaukee avenue. Mr. Stefanski was employed by Mr. Wojtkiewicz and also boarded Mr. Wojtkiewicz and his men. During the recent storm one whole hotbed, frame and all, blew into one of the houses at St. Adalbert's, doing considerable damage to glass, as well as to stock. Spring stock on this place is in an excellent condition, and a rushing business is being done.

Among the week's visitors were D. J. Murphy, Manistee, Mich.; A. L. Treman, Oswego, Ill.

Bowling.

There was an attendance of twenty bowlers at Bensinger's alleys May 14. John Zech is the champion. Following are the scores:

PHILADELPHIA.

The Rising Eastern Market.

The duty of reporting the cut flower market is hardly a cheerful matter this week. A careful survey of the field leads one to wonder why so many cut flowers are produced. And as one wonders, the answer comes forward naturally: In order to get enough during the dark days of winter. So we must be cheerful about it, and admit as pleasantly as possible that there are entirely too many cut flowers coming into the market today, perhaps twice as many as necessary to meet all requirements. The second half are carted away in the rubbish heap, or, far, far better, go to the hospitals, or in some cases they are sold at so low a price as to deserve the name of being given away.

There is a fair amount of business, the best flowers being used to fill the orders. Everybody likes to put his best foot foremost. The overproduction in Beauties is marked. Most of the plants did less than usual last winter and, in order to make it up, they are doing decidedly more than usual now, with the result that Beauties are a little lower in price than for many years during the third week in May. The hot weather of May 15 and 16 did something toward knocking out the roses that are grown in low houses, and where the growers are overworked. The same is true of carnations to an even greater degree, and of many other varieties of cut flowers.

The carnation market has relapsed since

In effect Thursday, May 27, 1909

Mothers' day. White are selling as poorly now as red were then. All prices have retrograded. Everybody is looking forward to Memorial day and hoping that the carnations can be kept in shape for the certain demand then. Peonies have made their appearance and the much mooted question whether they would be in for May 30 is settled. Only the red variety is in full swing yet, but there are some pink and some fine white. Lælia purpurata has reinforced the cattleyas. Gardenias are waning. Valley has sold extraordinarily badly. Easter lilies are decidedly scarce. Outdoor stock from the south is not in demand, and locally grown fares little better.

Founders' Day.

Founders' day at Girard College falls May 20, the day when the REVIEW is published this week. Now, it is well known to all lovers of flowers that Edwin Lonsdale, horticultural chief at the college, is a plantsman of no mean ability. And, as it behooves the most progressive paper to inform its readers of all that is best in the floral world, Phil was dispatched to the college for advance information regarding the treat to be prepared for Founders' day. The college dignitary who holds the keys and decides whether you shall or shall not enter, he who accused Robert Kift of being a clergyman, solemnly remarked that Mr. Lonsdale was not within the grounds, and as solemnly winked his eye when his visitor exclaimed in disappointment. A cheery laugh from behind the custodian of the keys showed that Mr. Lonsdale was right there, not in the grounds at all, and he proceeded forthwith to do the honors.

The beds in front of the main hall are tastefully planted with foliage and flowering plants, the beds on each side being an exact counterpart of those on the other side. The geraniums, usually with edging, were John Dryden, S. A. Nutt, Swan, I believe, and Marquis de Castellane, recommended by E. Gurney Hill, with which Mr. Lonsdale is pleased, the large trusses of bright scarlet standing up strongly above the vigorous plants.

The geranium beds are alternated with pansy beds, Yellow Gem, white with dark eye, Lord Beaconsfield, and Emperor William being planted in solid beds, usually with Bellis perennis as an edging, the daisy being in one instance planted solidly. The tulips and Narcissus Barri conspicuus had passed their glory.

A most beautiful bed of the hardy phlox, divaricata, was in its glory. Mr. Lonsdale gives this phlox a floral medal when he says that it can be lifted, heeled in, and replanted with excellent results. In fact, it can be replanted while in full bloom, making it invaluable as a florist's flower.

The college colors, steel and garnet, are represented by Achyranthes Lindenii and Artemesia Stellariana, as edging on prominent beds. But the chief glory of Founders' day will lie in the superb blooming plants prepared to place on the shrine of the great Stephen Girard, a set of blooming plants that it would be difficult to duplicate in this city. They include some beautiful English fuchsias, brought over last summer by Ernest Thomas, Mr. Lonsdale's secretary of state, if I may use the diplomatic term. Mr. Thomas visited England for pleasure,

it was given out, but like most visits made by energetic and enterprising men, this pleasure trip was productive of good results. Among them was a most beautiful collection of fuchsias. They include Lady Heylesbury, white sepals, rosy pink corolla, the freest blooming fuchsia I ever saw; Display, better known to American growers as Black Prince, under which name it has been grown here for many years (Mr. Lonsdale is inclined to believe the English name to be the correct one); Ida, red sepals, white corolla, showy; and Lord Byron, red sepals, purple corolla. This variety is already known to many growers here.

The fuchsias were reinforced by a superb collection of calceolarias, of both the hybrida and rugosa type, and some crosses between them, giving bronze effects that harmonize beautifully with the bright yellows and large flowers of the one type and the russet brown smaller flowers of the other. Last, but by no means least, were the Schizanthus Wisetonensis and the compacta form made famous by Mr. Lonsdale in his talk before the Florists' Club of this city a year ago. There were also some striking plants of salpiglossis, a new subject for pot treatment. They were full of flowers and all exceptionally pleasing. I would like to go on and talk about the crotons, but lack of time forbids, so we will say, "Continued in Our Next."

Various Notes.

S. S. Skidelsky, of Skidelsky & Irwin, has the sympathy of his many friends all over the United States in the loss of his wife. Mrs. Skidelsky died May 13.

H. Bayersdorfer arrived in Hamburg May 13.

The partnership between Charles Henry Fox and Joseph Hirsch was dissolved May 15, the business being continued by Mr. Fox.

Charles W. Morby and Wallace Faust, formerly with Charles M. Keegan, are expecting to open a flower store about the end of this month at the northeast corner of Thirteenth and Walnut streets, Hotel Edouard.

Nearly 300 persons gathered to listen to the talk given by Walter P. Stokes in Harrisburg, May 11.

The Robert Craig Co. has been growing its own strain of cyclamen from its own seed for the last fifteen years. Some plants in 6-inch pots sent out at Christmas had fifty to sixty flowers each, while others, in 6½-inch and 7-inch pots, saved for seed, averaged between eighty and ninety flowers each.

When Phil called to see the new crop Beauties of W. E. McKissick & Bros. he was invited, or more correctly, dared to climb up two or three steps and look over the shelves. There was a whole shelfful of as pretty a lot of flowers as one could wish to see at any season of the year. "Part of a shipment," Mr. McKissick modestly said.

Miss Bauer, formerly bookkeeper for Charles M. Keegan, is now with S. S. Pennock-Meehan Co.

Fred J. Michell, Jr., was, as he himself graphically described it, lost in the rush. Still, it is not improbable that you can find him at Ten Eighteen.

D. T. Connor, representing Lord & Burnham Co., has just closed a contract with the Robert Craig Co. for heating the new greenhouse plant at Norwood, Delaware county. The system which will be installed under Mr. Connor's supervision is the new circulating hot water system, which is now gaining in favor with the most progressive growers of the day. They believe it more economical than

steam and fully as satisfactory. In fact, several growers with large places, who have steam plants in successful operation, are this season tearing them out and replacing them with circulating hot water systems. PHIL.

The receiver of J. Stern & Co. has appraised the stock at $824 and has received an offer of $650 for it, which he recommends be accepted.

NEW YORK.

The Market.

The New York cut flower market is sick and needs a physician; down and out, one of the violet experts expresses it, and he is not talking about violets. There is not a branch of the cut flower section that does not suffer. Roses are an overflow, and one can buy them in thousand lots for $10, not No. 2, but as they run in the boxes. Beauties are not much better off; $6 per hundred was buying the best of them Saturday, May 15. Even the streets were crowded with them. This condition cannot last. The crop must lessen and, though the week opens discouragingly, it should improve and values rise as Memorial day approaches. Great hopes are entertained for a record-breaking Decoration week, and the plantsmen are making large preparations for the anticipated demand. The decrease in the supply of roses by that time, and carnations also, will surely bring up prices to a better average again.

Carnations last week, the best of them, sold at times as low as $10 per thousand. The extremely hot spell put them to sleep rapidly, and the inferior stock could not be moved at any price. Some wholesalers with accurate memories say last year was just as bad, and take this slump philosophically.

Lilac seems to dominate the market. It is everywhere in enormous quantity, and the price of it is now unmentionable. Sweet peas are abundant, and even orchids have joined the procession, with gardenias. As to bulbous stock, its name is legion. Peonies are splendid now in quality, and already the market grows top-heavy with the shipments.

The promise of many June wedding bookings is the one bright spot. Every bon ton retailer has his quiver full of them. The weather is cooler as the week opens. Last week was marked by midsummer temperature, that helped to wilt the business and emphasize its demoralization. Definite quotations on anything are impossible. Even with local conditions appalling, growers and dispensers from other cities seem to think New York is the receiving end for any local surplus, and you can imagine the difficulties of proper digestion. It is a great mistake to overfeed a patient, and the New York market is sick and sore and needs to be left alone.

The retail windows are filled with dogwood, apple blossoms and flowering shrubs from the country gardens. The effects are charming, and all the tokens of spring are here, including a Coney opening Sunday, May 16, of a quarter million people. All the big resorts are devoting greater space and money to floral decorations, fancy bedding and bay and box tree embellishments. The parks, too, are now in their best spring garb, and great crowds are enjoying the unique displays.

Various Notes.

The Florists' Club's annual outing, July 1, is likely to draw a larger crowd than usual; the committee says 500. Harry Bunyard, the chairman, desires every member of the club to send his photo immediately, so none will be omitted, over 100 having been received already. Liberal amounts for prizes and advertising have been sent in, and the souvenir will be a surprise. At the great banquet of the Canadian Club, Friday, May 14, President Turner and Chairman Bunyard loyally demonstrated their love for the mother country, with 600 other Englishmen and Canadians.

Friday evenings will be devoted to bowling hereafter, instead of Monday, by the Florists' Bowling Club, and all intending to attend the Cincinnati convention are requested to be on hand and practice regularly hereafter. It is hoped there will be a special Pullman full of New Yorkers at the August reunion.

The nurserymen's convention at Rochester, June 9, will attract a goodly delegation from New York and vicinity. A most attractive program is promised, and if coming events cast their shadows, the S. A. F. will have an illustration of how well the flower city is prepared to entertain the conventionists in 1910, should the decision to accept the city's invitation be favorable.

A big shipment of bay trees and palms arrived Saturday, May 15, for the Fruit Auction Co., and John P. Cleary will cry his wares every morning of the week except Mondays.

The project looking to a permanent cut flower and plant building in the wholesale district is awaking more than a passing notice. The committee ap-

GEO. E. BRADSHAW, Manager, Plant Department
PAUL MECONI, Manager, Cut Flower Department

pointed by President Turner, of the Florists' Club, is a practical one and means business, and it is hoped that at the June meeting plans may be formulated that will meet with the club's approval, and the dream of twenty years become more than a baseless fabric. This is the time, if ever, to strike while the iron is hot.

The Sunday closing movement unfortunately died aborning. A few refused to sign the agreement that would have given principals and employees a day of much-needed rest. Once more the minority has ruled. But every wholesale and retail cut flower store in the country could close on Sundays to its own and the public's advantage. It is even now probable that the wholesalers may make the plan universal and begin next week to test its sensibleness and value.

An exhibit of tulips at the Museum of Natural History in New York, where the big flower show will be held next fall, will be seen May 20 and 21, the exhibitors being W. W. Rawson & Co., of Boston.

The manager of the Manhattan Flower Market was much pleased with his first week's patronage, and his window display and large room and conveniences commend him to all and entitle him to success in his enterprise.

Congratulations are universal on the stork's visit to Rutherford, and the nose of Julius Roehrs, Jr., is now out of joint with the accession of Julius III to the throne. The grandfather of the heir apparent is still in Europe, and the proud father is dispensing lavishly in honor of the occasion.

June 18 will see one of A. J. Guttman's popular foremen in the toils of matrimony. Mr. Guttman has been under the weather with Job's comforters for a week, but is himself again.

The funeral services in the Metropolitan Opera House in honor of Heinrich Conreid, the great musician, Thursday, May 13, and the floral decorations and tributes have never been excelled in grandeur, solemnity and beauty. The enormous stage was buried in flowers, and over 200 set pieces were artistically banked and arranged by A. Warendorff, who had charge of the decoration. Nearly all the bon ton florists of the city had their share of the orders, and some of the set pieces were of enormous size and great value. Many orchids were used. The immense pall covering the coffin and bier, composed of valley, violets and orchids, was made by Mr. Warendorff.

EVERY now and then a well pleased reader speaks the word which is the means of bringing a new advertiser to

THE WEEKLY FLORISTS' REVIEW

Such friendly assistance is thoroughly appreciated.

Give us the name of anyone from whom you are buying, not an advertiser. We especially wish to interest those selling articles of florists' use not at present advertised.

FLORISTS' PUBLISHING CO.
530-60 Caxton Bldg. Chicago

The ribbon houses all agree that the demand for Memorial day is wide and persistent, the red, white and blue conceptions and the colonial and ombre chiffons taking precedence in the call.

S. Jacobs & Sons, Brooklyn, speak optimistically of the outlook, and are rushed beyond their enlarged capacity, so that before long additional building and space must be provided.

Ordonez Bros., of Madison, make 41 West Twenty-eighth street, with Millang Bros., their New York headquarters. Their orchid importing and shipping trade is growing rapidly, and an importation of labiata and Sanderiana arrives this week.

Anton Schultheis, of College Point, has a grand stock of roses and hydrangeas for Decoration day, and a large stock of every popular palm and plant in all varieties. The new range is now in perfect shape, and building is over for the season.

The F. R. Pierson Co. reports a tremendous demand for White Killarney. From the present outlook, every rose grower in the country will have a try at it. It is exceedingly popular in New York, and so is My Maryland.

The seedsmen all seem to be at the height of the busy season. The long spell of cool weather has been of immense value to this department of the business,

and day and night the good work of necessity goes on. All agree it has been a phenomenally successful season. Nurserymen are still shipping as vigorously as weeks ago, and it will be June before the weary will have rest.

Charles Millang opened his new store in the Coogan building May 17. He has a five years' lease of it, and it is on the ground floor, where he says he catches them going and coming.

A. Herrmann is off for his annual visit to Germany, and the selection of supply novelties, as usual, after what he calls his largest year.

The Retail Association will have a banquet in June. The Greek Florists' Association will participate. Doubtless the wholesalers' combination will be cordially invited, and harmony will be on tap, as it should be always.

Lulu Allen, daughter of J. K. Allen, will be married this week to Edward Morgan, of Kearney, N. J.

The fern supply is almost exhausted. It was difficult Monday to find sufficient for current needs.

The wholesale district has formed a baseball club composed of the athletic employees of the cut flower merchants. The retailers have also a club that has challenged the wholesalers and a $25 trophy will be the reward to the victors. The day and place of the contest will be announced next week.

Alex. McConnell has a fine exhibit of hardy azaleas, Japanese maples and evergreens in tubs in front of his Arcade store, the product of his nurseries at New Rochelle. He reports a heavy landscape trade, far above other seasons to date.

Charles Thorley's house of flowers is already in the hands of the builders and will open October 1. His present quarters on Fifth avenue have a "To let" sign in the window.

In one of Thomas Young's windows on Fifth avenue is a miniature Japanese garden, with river, mountain, bridge and gold fish effects that are suggestive of the Island Kingdom. It draws the crowd and is an attractive conception.

M. A. Bowe sent, May 18, a big floral steamer to the Hamburg-American line and several baskets as a farewell to Anna Held, the actress, and seven bouquets to be delivered from the ship's refrigerator one each morning of the voyage. Mr. Bowe had also the unique Rococo decoration for the Merchants' Association at the unveiling of the bronze tablet in honor of its founder, with laurel wreaths and columns and Japanese cherry and apple blossoms.

Joseph Voecke, manager at the Cut Flower Exchange for W. H. Siebrecht, of Astoria, is ill with pneumonia.

The Bowling Club held its final Monday session on the evening of May 17, and owing to the lack of general interest and the small attendance, has about concluded to disband and make a new start, commencing Friday evening, May 28. All members of the Florists' Club, who desire to continue the organization, are requested to be at Thumm's alleys. The eight who attended regularly enjoyed the bowling thoroughly, and there is no good reason why the Florists' Club should be represented at Cincinnati by a quintette of low rollers, when there is such good material to select from.

ST. LOUIS.

The Market.

Conditions of the market last week showed little improvement over the week previous. All of the wholesalers say that the demand was light, and all have been loaded down with everything in season, but especially with roses. Good stock of Bride and Maid sold as low as $10 per thousand; others, such as Richmond, Ivory, Killarney and Carnot; commanded a little higher price, but these, too, are in oversupply.

White carnations, for once this season, have been more than the demand called for, with colored stock not so plentiful. Extra fancies did not sell for more than 2 cents. Sweet peas have been a glut, light shades in the fancy grade selling well. Outdoor bulbous stock is less abundant.

Peonies are selling well at $3 per hundred. Outdoor valley is hurting the sale of forced valley. Orders for Memorial day are being booked now. There is a good call for bedding plants, which promises well for this and next week.

Club Meeting.

The Florists' Club held its regular monthly meeting Thursday afternoon, May 13, in Bowman's hall. Owing to the busy planting season, many were kept away, as all have plenty of work to do in this line. The fact that it was the thirteenth day of the month and thirteen were present did not have any effect on the members.

President Young opened the meeting at 3 o'clock. Chairman Ostertag, of the trustees, reported that they would report on the meeting hall at the next regular meeting. The trustees were instructed to make all arrangements for the club's

Zinnia, good	1.00

annual outing, to be held sometime in July, and make a full report at the next meeting. W. C. Smith was notified by the president that he was appointed to arrange for the club members' transportation and comfort for the S. A. F. convention trip to Cincinnati.

The club's show paraphernalia, which has been in storage for the last two years, has been offered for sale, and was placed in the hands of the trustees for disposal.

A discussion of life membership in the club will be taken up at the June meeting. Treasurer Fred Weber reported that the club is in good financial condition.

The balance of the afternoon was taken up with short discussions of interest to the members. The next meeting of the club will take place Thursday afternoon, June 10. After adjournment the members were taken to a nearby cafe for lunch.

Various Notes.

Emily Zender, of Chicago, daughter of Adam Zender, joined her sister last week to spend a few days with Rose Windler.

A. J. Bentzen, of the Bentzen Floral Co., reports that they are building a store with a fine show house in the rear at Grand avenue and Herbert streets, which will be completed in August and will be one of the best appointed flower establishments in North St. Louis.

The Mullanphy Flower Co. will open a branch store in the near future on North Grand avenue near Fairground park. They will retain the present location at 2439 North Grand avenue.

W. C. Young says that they sold more moonvines and tomato plants to date than any previous year. The stock of 50,000 of these is completely sold out, and they will have to buy to fill orders.

W. C. Smith reports that a recent visit to the plants of John Steidle, Warner Bros. and A. Jablonsky showed that they

are in fine shape, and their carnations in the field never looked better. All three have been sending in all season fine stock of carnations and roses.

The St. Louis Horticultural Society has issued its preliminary list for the fall flower show. The Florists' Club at its next meeting will vote to offer a special prize for this show.

Frank A. Weber, one of our local nurserymen, will look after the St. Louis delegation which will attend the twenty-fourth annual convention of the American Association of Nurserymen, which meets at Rochester, N. Y., next month. Mr. Weber expects a good delegation from the west to meet the local men and travel in a special car from here.

Fred Ammann, of Edwardsville, Henry Johann, of Collinsville, and Edwin Denker, of St. Charles, attended the club meeting last week.

The Florists' Bowling Club has been unable to find suitable alleys. Nearly all have closed up for the season, but President Connon and Secretary Smith say that by next Monday they will find a place where the club can have its weekly bowling all summer. J. J. B.

NASHVILLE, TENN.

Florists Need License.

A new law, passed by the legislature, is of considerable interest to the florists of this state, who, with many other business men, are now to be assessed a privilege tax, as follows:

"Each person, firm or corporation dealing in cut flowers, or agent for same, conducting the business of a florist in cities, towns or taxing districts of 60,000 inhabitants or over, each, per annum, $25. In cities, towns or taxing districts of 20,000 to (and less than) 60,000 inhabitants, each, per annum, $15. In cities, towns or taxing districts of less than 20,000 inhabitants, each, per annum, $7.50."

This will be quite a hardship on Nashville firms, as they have agents in many of the smaller cities and towns.

Various Notes.

The Park Commission has petitioned the Council to levy an assessment of 5 cents on the $100 for park improvements.

Geny Bros. have had a large trade in funeral work and the orders for the school and college commencements are quite heavy. Some fine hydrangeas in tubs are shown by this firm. Stock at the old place never looked better, while the West Nashville place grows every day. Some exceptionally fine Enchantress are here and the amount of glass and lumber on the ground bears out Mr. Geny's intention to build two more houses 30x168, also a propagating house. These new houses are for carnations.

McIntyre Bros. are hustlers, getting lots of business and supplying the goods. Carnations are fine here.

L. H. Haury for years has grown a fine line of bedding and pot plants in conjunction with his lettuce and other vegetable business, and this year he will erect 30,000 feet of glass to be devoted to carnations, roses and other cut flowers.

The Joy Floral Co. is shipping quantities of peonies to the Chicago market. They have a fine collection, but plans are made to do away with one tract that is mostly of the older and cheaper varieties and replace it with some of the finest kinds to be had. The two new houses at the Gardens are now in full crop and are a credit to the place. They are 30x386 feet, making a total of thirty-eight houses in all. At the store an increased force is required to handle the large amount of funeral and commencement work.

The Leschey Nurseries have completed the planting of their new house and the stock looks fine. Mr. Browne, the proprietor, makes a specialty of boarding plants and he handles hundreds of them in fine shape, besides a healthy nursery business.

An exceptionally fine sight at present is the rose garden of the country home of J. B. D. De Bow, Hermitage, Tenn.

Over 2,000 plants are grown and nearly fifty varieties, including some of the very latest European novelties. A conservatory has been completed and a start made on the terraces, which will eventually be one of the finest Italian gardens in the south.

Mr. Fulgen, at Mt. Olivet cemetery, has had one of the best spring sales he has ever had, and if one wants to see the geranium grown at its best, a visit to this place will certainly gratify the wish.

The Lebanon Floral Co., at Lebanon, Tenn., is having a fine trade and expects to increase the glass space this summer. W. H. Anderson is sole proprietor of this place, having bought the interests of the other members of the firm. J. S.

NEW CASTLE, IND.—Weiland & Olinger fear their peonies will not be ready for Memorial day.

ASHLAND, KY.—Wm. H. Carp has for some time been one of the busiest men in the city, especially during the last few days, when he had the decorations for a number of big conclave receptions.

I SHOULD rather miss my meals than miss the REVIEW, the brightest and best trade paper I ever had. No florist, however small, should be without it.—GEORGE TAYLOR, Lethbridge, Can.

George C. Baker.

San Antonio, Tex.

PROVIDENCE, R. I.

The Butler Matter.

The first meeting of the creditors of M. Butler & Son, of Newport, was held last week by Chester W. Barrows, referee in bankruptcy, of this city, and Stewart Engel, of Newport, elected trustee with bonds of $2,500. The list of creditors includes the following: Oscar Schultz, Newport, $95.42; George A. Weaver & Co., Newport, $194; W. E. Marshall & Co., New York, $50; Wadley & Smythe, New York, $1.50; Carl Jurgens, Newport, $137.81; Ottolander & Hooftman, Boskoop, Holland, $52; Thomas Galvin, Newport, $124.50; T. J. Grootendorst, Boskoop, Holland, $44.25; Welch Bros., Boston, $67.50; V. A. Vanicek, Newport, $117.14; Newport Nursery Co., Newport, $48; Hitchings & Co., Elizabeth, N. J., $7.45; W. B. Scott & Co., Newport, $101.64; K. Phelan estate, Newport, $72.65; Wm. Maher, Newport, $30.18; H. J. Hass, Newport, $13.30. The assets include ledger accounts, considered good, estimated at $1,311.76 and ledger accounts, doubtful, $90.88. There is also a small balance in the Aquidneck National Bank and equity in real estate on the corner of Berkeley avenue and Sylvan street.

Rhode Island Greenhouses.

The Rhode Island Greenhouses, Pawtucket, were sold at auction May 15. There was a small attendance, and these appeared to be actuated by curiosity rather than a desire to buy. The property was bid in by the representative of the Industrial Trust Co., which had a mortgage for $8,000, with interest, for $6,500. The range has been a losing venture since it was first put up some fifteen or eighteen years ago, and it is

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., Watson S. Woodruff, Orange, Conn.; First Vice-pres., J. C. Robinson, Waterloo, Neb.; Sec'y and Treas., C. E. Kendel, Cleveland. Twenty-seventh annual convention, Niagara Falls, Ont., June 22 to 24, 1909.

W. W. Rawson & Co., Boston, are making a display of May-flowering tulips at the Museum of Natural History, New York, this week.

The Ohio Seed Co., Toledo, O., has made an assignment to Attorney Charles K. Friedman, giving its assets at $1,000 in personal property.

Percy W. Morse, killed at Salinas, Cal., May 14, as reported in the Associated Press dispatches, was not a relative of Lester L. Morse, of C. C. Morse & Co.

In a recent fire in the basement of a seed and agricultural implement store, the firemen found their hose playing on sixteen tons of lime in bags. The lime promptly slaked.

It is reported that Conrad Appel, Darmstadt, Germany, will send a representative to the meeting of the American Seed Trade Association at Niagara Falls June 22 to 24, primarily to meet the grass seed dealers.

The St. Louis Seed Co., of St. Louis, Mo., is continuing the plan, begun last season, of offering six packages of assorted flower seeds to every child who will take the trouble to cut out the firm's advertisement in a local paper and present it at the store.

It is stated that within thirty days work will begin on the new seed warehouse for the O. S. Jones Seed Co., which is moving to Sioux Falls from Madison, S. D. The warehouse is to be a reinforced concrete structure, costing between $30,000 and $35,000. It will be 44x142, three stories with basement, and fireproof. The plans are now in the hands of an architect, and are based on ideas secured by O. S. Jones, head of the company, after visits to various seed warehouses in different parts of the country. It is planned to have the building ready for occupancy next fall.

PEAS AND BEANS.

Alfred J. Brown, of the A. J. Brown Seed Co., Grand Rapids, Mich., says farmers are not taking hold of contract beans as they have done in the past, thereby confirming reports that have previously appeared in this department of the Review. "However," says Mr. Brown, "we expect to get our acreage out all right, but are obliged to pay higher prices. Quite a few of our peas are in the ground (May 15), but it will be two weeks or more before we begin planting beans. There seems to be a fair acreage of peas, but even if we harvest a good crop they will all be wanted, as stocks in hand are lower today than in many years past. The acreage of beans will not be as large and we need a good crop in order to supply the demand for the season of 1910."

E. M. Parmelee, president of the John H. Allan Seed Co., Sheboygan, Wis., thinks the acreage will be considerably increased, although the season is unusually backward and seeding will be much later than usual, with no very good indications apparent at present. "However," he said May 15, "we think there is no reason why we might not get good crops, providing a favorable change should come soon and continue throughout the season. But it must come soon, or else we will no doubt have very slight expectations for a good crop. We must wait further developments before we will be able to make any statement that will be of interest to the trade."

Rogers Bros., Alpena, Mich., writing May 17, say: "The season is very late with us and only a small portion of our peas had been planted Saturday, when a heavy rain fell, which will delay the seeding. We are planting about our usual acreage."

NEW ENGLAND SEED CROPS.

Arthur B. Clark, president of the Everett B. Clark Seed Co., says root crops planted for seed in New England are in good shape, while the Michigan and Wisconsin acreage of peas, though late, still has time to make the crops. Bean acreage is not easy to get out at prices the trade is accustomed to pay. Writing from Milford, Conn., May 17, Mr. Clark said:

"Regarding the seed situation in the New England growing districts, it is a little early to give anything of vital interest. All of our seed crops are in the ground and it is now up to nature. The roots of such crops as turnips, beets, carrots, etc., wintered well and, as we have had a wet spring, these have started to grow quickly and have gotten a pretty fair start. Onions were not any too sound to set out this spring but, nevertheless, the stand which we have secured is no cause for complaint. The fields of onions growing for seed have a good, dark, healthy appearance and we should say that the start for a crop was a fair

one. The crop, however, almost always looks good at this stage, for with onion seed the reckoning comes at the other end, just prior to harvest. Sweet corns have just been planted and our hopes for a good stand of this item must hang upon seed of very strong vitality, because conditions are such as not to favor the growth of corn. It has been for some little time, and is still, very wet and cold. The ground is thoroughly water-soaked and the climatic conditions are such that the entire winter wardrobe is still in use with comfort.

"The 1908 stocks of practically every item we grow are cleaned up nicely. We could never hope to start out a new growing season with the old slate cleaner than it is today.

"All of the above remarks regarding growing conditions apply to our New England crops. In Michigan and Wisconsin, of course, peas have only just been seeded, and though the season is backward there is still time to make a good crop of these. A good crop is certainly due this year and we think everybody concerned, farmer, grower and consumer, will be best pleased to see a large crop.

"Seed stocks of beans are just moving out into farmers' hands, with some acreage yet to be placed, as the farmers have persisted in their inclination to pass the garden varieties of beans in favor of the commercial varieties. Indeed, it looks doubtful now whether some of us growers secure all the acreage of beans that we would like to have grown. If the coming season is unfavorable to this crop, and the reduced acreage produces a small yield, beans will be a very interesting item next season."

IMPORTS.

The imports of seed through the port of New York for the week ending May 8 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Annatto	5	$ 73	Grass	322	$2740
Canary	550	2171	Hemp	200	688
Caraway	426	3928	Lycopod'm	10	667
Cardamom	19	795	Millet	5	104
Castor	2323	7281	Mustard	875	6339
Celery	130	1827	Rape	4	13
Coriander	67	304	Sugar beet	1	5
Fennel	34	197	Other		6827

In the same period the imports of bulbs, trees and plants were valued at $19,088.

FRENCH SEED CROPS.

France, like Germany, and from recent reports, some of the seed growing sections in America, had an extremely late spring. The winter was unusually severe and it was far into April before the weather was at all in favor of the operations of the growers of seeds. Annual crops can hardly now be spoken of, for the planting was three weeks or more late in beginning. But complaint is heard of lack of moisture for a good start. It is feared that radishes will not yield a good crop, and this is an item of constantly increasing importance. Parsley promises well and parsnips should turn out all right if a fair start counts for anything. Turnips and swedes suffered a heavy loss during winter. Carrots kept over better, but weevils did much damage in certain stocks. Beets had a bad winter and at planting time many were found unfit for use, so that plantations were much reduced and a good yield can give no more than a medium crop, at best. In fact, all important biennial crops grown for export may be said to have passed a hard winter and have started to make the 1909 crops of seeds under none too favorable circumstances. But it is notable how rapidly crops can improve under the influence of a little favorable weather and conditions almost always turn out better than we anticipate.

F. REGIS.

ONION SETS AT LOUISVILLE.

There are practically no dark red onion sets grown at Louisville. H. R. Whiteside, under whose portrait on the letter-head appears the inscription "Largest onion set dealer in the U. S.," says the acreage planted to yellow is larger than it was last year. "It was large last year, but we would estimate

Time To Plant

BODDINGTON'S QUALITY GLADIOLI

AMERICA. This beautiful new Gladiolus is likely to produce as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet." **50c per doz.; $4.00 per 100; $35.00 per 1000.**

The Grand New Giant Gladiolus, HOLLANDIA (The Pink Brenchleyensis). Flowers well arranged on a spike which attains a height of about 4 feet. Often as many as 30 blooms of a charming pink shade tinted yellow are open at one time. 40c per doz.; $2.25 per 100; $20.00 per 1000.

	Per 100	1000
Augusta. The florists' best white Gladiolus in existence. First size bulbs, 1¾ inches and up	$2.00	$18.00
Bulbs 1½ to 1¾ inches	1.75	16.00
1900. Nothing finer for florists' use. Flower is of a rich shade of red with very prominent white spots on three lower petals	$2.00	$15.00
Groff's Hybrids (originator's strain). Extra selected	1.25	10.00
May. Pure white, flaked rosy crimson, the best forcer, selected bulbs	1.75	15.00
Boddington's White and Light. Extra selected bulbs	1.25	10.00
American Hybrids. A mixture of the choicest varieties of Gladiolus in equal proportion; very fine	1.00	9.00
Striped and variegated	2.00	18.00
Pink and Rose shades	1.50	18.00
Childsii	2.00	18.00
Finest all colors mixed	.75	7.00

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th St., New York City

Mention The Review when you write.

it this year as ten per cent larger than last year. The seed came up well and is looking well, about as usual for the time of the year on an average; the stand is much better than last year. Some damage was done by frost, but we think the plant will overcome that all right. It is a different story about white sets. We do not think there is over one-half the acreage this year that we had last year; and last year was about half the average acreage; so we do not believe the acreage planted to white here is over one-quarter of the average of previous years. I think the condition of what is planted is good. We have heard some complaints, but not as many as we usually hear."

GERMAN SEED CROPS.

The German seedsmen have had a good selling season and not for several years has there been so general a cleaning up of stocks. Peas and beans were in notably strong demand. Radish is one of the few items that did not clear as well as expected.

The winter was unusually severe and long continued, lasting well along toward the end of March. At Quedlinburg the coldest weather found no snow on the ground, while at Erfurt there was at all times a blanket of snow. While the spring work was later than usual in beginning, the weather has continued favorable and at the beginning of May operations were not much behind and the growers view the situation with general satisfaction.

At Quedlinburg the principal cause of trouble is the small area planted to root crops, perennial and biennial flowers, while the supply of stock seed was inadequate for planting all the peas for which contracts were offered. Forget-me-not is one of the items that will be practically a failure. Flower seeds in general met with so good a sale last season that the annuals are being planted in anticipation of another winter of large demand.

A correspondent at Erfurt says the outlook for the standing crops of vegetables for seed might be better, while the winter appears to have hit some plantations of perennial and biennial flowers rather hard. Myosotis, bellis and pansy are patchy; digitalis is in a bad way. Asters and phlox were planted under favorable conditions, which is a source of satisfaction, for the sale for each has increased in large measure in recent years.

Aside from the winter damage, the seed trade in Germany has every reason for satisfaction with the state of affairs this spring.

Cut Dahlia Flowers Pay

If You Have the Following Varieties

After considerable consideration and observation, and "talks" with the trade, we have decided to offer the following Dahlias to florists this season. Our retail Catalogue, which will be mailed free, contains a larger collection, but few are superior to the following and all are good size, divided clumps that have been field-grown and are strong and healthy.

Price of all the below-named varieties of Dahlias, large divided clumps or roots, except where noted, 10c each, $1 per doz., $7.50 per 100, $70 per 1,000.

Jack Rose. (Decorative type.) The variety Jack Rose is rightly named and is a florist's Dahlia, "from the ground up." The color is similar to the Jacqueminot rose, and is a unique color in the Dahlia, which lights up beautifully at night. The habit of the plant is stocky, very free-flowering. Producing its blooms in great profusion, upon erect, long stiff stems, making it invaluable for cutting. You cannot afford to be without it, if you sell cut-flowers. Price, green plants, ready April 1, 1909, 50c each, $5 per doz., $35 per 100.

Decorative Dahlias

Sylvia. Best described as a Giant Nymphæa, being stronger, larger and deeper colored. Flowers 4 to 6 inches in diameter, of fine form and full to the center, which is white, shaded to soft pink on the outer petals. One of the best cut-flower varieties.
Admiral Dewey. Brilliant imperial purple.
Black Beauty. A beautiful dark velvety maroon.
Blue Oban. A sport of the Decorative Dahlia Oban, and the nearest approach to blue found in Dahlias. 25c each, $2.50 per doz.
Catherine Duer. Strong-growing, free-flowering crimson-scarlet.
Clifford W. Bruton. Best yellow; immense size; perfect form
Frank L. Bassett. Color, bright royal purple, shading to blue.
Grand Duke Alexis. Very large, white, tinted pale lavender.
Henry Patrick. Superb pure white; long stems; fine for cutting.
Lyndhurst. One of the best bright scarlet.
Maid of Kent. Cherry-red, tipped white.
Mrs. Winters. Very large; pure snow-white.
Nymphaea. Color, clear, light shrimp-pink.
Oban. Very large rosy lavender.
Orange King. Rich glowing orange; early and profuse.
Perle (Perle de la tete d' Or). The grandest white Decorative Dahlia to date; very large and of beautiful shape.
William Agnew. Rich, dazzling red; immense size.

Cactus Dahlias

Aegir. Petals are twisted and color bright rich crimson-scarlet.
Countess of Lonsdale. A pleasing blending of amber and salmon.
Dainty. The ground color is lemon-yellow, which shades lighter as the season advances, at which time the color approaches canary-yellow at the base of the petals.
Earl of Pembroke. Bright plum. 15c each, $1.50 per doz., $12 per 100.
Floradora. Color, dark velvety crimson. The best dark crimson for cutting, as the flowers are borne on long, erect stems and keep for a long time. 15c each, $1.50 per doz., $12 per 100.
General Buller. Color, deep, rich, velvety maroon, tipped white. 15c each, $1.50 per doz., $12 per 100.
Harbor Light. Flowers are of immense size, outer petals extending to 7 inches across; long, slender, twisted and incurved; color, orange-red.
Jealousy. Purest pale canary-yellow.
J. H. Jackson. The largest of the deep, rich velvety maroons.
Keynes White. One of the best white Cactus Dahlias.
Kriemhilde. One of the finest pink Cactus Dahlias.

Cactus Dahlias

Mrs. H. J. Jones. Incurved portion of the petals are deep crimson; the broad stripe of white running through the center of the petals extends almost to the center.
Standard Bearer. Brightest scarlet; profuse bloomer. 15c each, $1.50 per doz., $12 per 100.
Strahlein Krone. Intense cardinal-red.
Victor Von Scheffel. The color is a fresh, delicate pink, shading to deep rose-pink. 15c each, $1.50 per doz., $12 per 100.
Winsome. Flowers white, very large, beautiful Cactus form.

Show and Fancy Dahlias

A. D. Livoni. Beautiful soft pink; early and profuse bloomer.
A. Pefferhorn. Rosy crimson.
Arabella. Pale primrose, tipped and shaded old rose and lavender.
Camelliaflora. A fine large pure white.
Glowing Coal. Brilliant red.
Green's White. One of the best whites for cutting.
Harlequin. Brilliant crimson, striped and tipped white.
Lemon Beauty. A grand yellow.
Menheddy Beauty. Fancy buff, with crimson spots, free, long stems, large bloom. 8c each, 80c per doz., $6 per 100.
Olympia. Color is deep rose-pink, striped and penciled crimson.
Progress. The color is a clear, soft rosy lake, beautifully penciled and spotted glowing crimson. Very valuable as a cut-flower. 15c each, $1.50 per doz., $12 per 100.
Queen Victoria. Deep yellow; fine for cutting.
Red Hussar. Pure cardinal, red flower, very free bloomer, splendid for cutting.
Storm King (Blizzard). A companion for the superb pink Dahlia, A. D. Livoni. Flowers are snow-white; extremely early and a free-bloomer. This is the florist's ideal white. 15c each, $1.25 per doz., $10 per 100.
White Swan. Snow-white, with long stems.

Single Dahlias

THE 20TH CENTURY. Intense rosy crimson, with white tips and white disk around the yellow center.

Dahlias to Color

We can also furnish, without names, in mixture, all colors separate, or all colors mixed, as follows:
Mixed Pinks, Mixed Whites, Mixed Reds, Mixed Yellows. 8c each, 75c per doz., $6 per 100, $55 per 1,000.
Mixed, all colors. 60c per doz., $5 per 100, $45 per 1,000.

Mention The Review when you write.

BEDS OF HYACINTHS.

In not a few cases hyacinths are planted so far apart as to show a considerable area of the surface of the beds when they are in bloom, and when this happens the color effect is not altogether satisfactory. There is some excuse for thin planting, for, owing to the small space occupied by one plant, a large number of bulbs is required for a bed of any considerable size. The variety Priestley, a single pale blue variety producing large spikes of bloom, when closely planted has produced a fine effect in some public gardens this year. The beds of hyacinths in which several varieties have been planted are usually attractive, for in almost every instance a delightful harmony of color is produced. Especially good combinations are Alba superbissima, Gigantea and Gertrude, in equal proportions, and even more so, perhaps, are the beds in which the light blue and salmon pink varieties are in association.

COMMERCIAL FERTILIZERS.

New York, May 17.—The market for agricultural chemicals and fertilizers continues rather inactive, business being con-

fined to small limits. In default of active demand, sellers are not forcing reductions, though doubtless concessions might be obtained on large orders. Sulphate of ammonia is steady, and the recent decline has not stimulated business. Nitrate of soda is not appreciably affected by the breaking up of the combine, which should cause an increased output. Nothing new was reported in dried blood, the demand being flat. Fish scrap is in light supply, pending receipts from the new catch. Tankage is firm and quiet. Current quotations are as follows:

AMMONIATES.			
Nit. of soda, 95%, per 100 lbs..	2.15	@	....

F. Kasting Co., Buffalo, N. Y., a circular on Tree Tanglefoot, used for the protection of trees against climbing insect pests.

INDIANAPOLIS.

The Market.

Business last week was more than satisfactory, both in cut flower trade and in funeral work. The past six weeks have seen more prominent funerals than we have had all winter. Carnations are scarce, owing to the recent cloudy weather and the heavy demand. Brides and Maids are plentiful, but the quality is none too good. Beauties are coming in well. Valley, sweet peas, snapdragons and callas are enough to go around. Outdoor lilac and valley are in full blast now. We have had miserable weather for the last few weeks. Florists doing bedding work are working overtime now.

The last few years have developed a big demand for veranda boxes, which I believe are not as profitable as the filling of flower beds. For the latter you sell your plants by the dozen, while the boxes are filled by the foot. Often you have a customer who is a little hard to please, and in order to get through quickly you give her a little more than she pays for. One good thing about boxes is, that you can send your driver out and he can gather up a big lot of boxes, bring them

THE FIRST OFFER OF
"Rawson's Beauties" Cineraria
This is an entirely new strain and offered for the first time. It is dwarf in type and bears the largest heads of the best colored and finest formed flowers that we have ever seen exhibited anywhere.
It will be a great surprise to those who raise Cinerarias, and all we ask is a simple trial. Per trade package, $3.00; per ½ trade package, $1.00.

back to your place, and your experienced men can fill them and the drivers return them, while flower beds require experienced men, and it takes time to get around. Veranda boxes are filled here for 75 cents, $1 and $1.25 per lineal foot, for boxes eight to ten inches wide. Hanging fern baskets are coming into great favor here, hundreds of them being sold each year. A 12-inch basket, with a Boston fern in the center and Asparagus Sprengeri around it, sells for $2.50 and $3.

Various Notes.

A number of the florists in the vicinity of Crown Hill cemetery have raised last year's price of $3 to $5 for an 18-inch vase. One of our south side brothers has entered the field and is trying to get all he can at $3.

Fred Huckriede reports business good. His bedding stock is looking well and he is working overtime filling orders.

May 14, Alvin Schreiber completed his twenty-fifth year as head grower with the Bertermann Bros. Co., and was presented with a handsome gold watch by this firm, in honor of the event. Bertermann Bros. may consider themselves fortunate in being able to hold a man of Mr. Schreiber's ability for twenty-five years.

A. Wiegand & Sons received a carload of palms and laurels from Ghent last week. This firm is cutting some fine Cattleya Mossiæ.

A. W. Brandt has purchased the store of William Billingsly. Mr. Billingsly has had the Seattle fever for some time, and no doubt his dreams will now be realized. Seattle will have quite a colony of Hoosier florists, as T. B. Pritchard and John Chisholm, formerly with A. Wiegand & Sons, are with the Graff Floral Co.

John Rieman has the annual order for the wreaths which the Elks place on their dead brothers' graves each Memorial day. H. L. W.

PALISADES NURSERIES, Inc., Growers of Hardy Plants Sparkill, N. Y.

GLEN COVE, N. Y.

The Nassau County Horticultural Society held its regular monthly meeting Wednesday evening, May 14. President Everett occupied the chair. The attendance was good, about fifty members being present. Messrs. Duthie, Johnston and Mackenzie acted as judges. Their awards were as follows: P. Reul, antirrhinums, 90 points; G. Wilson, carnations, 80; H. Gaut, culinary peas, 86⅔; B. Cleres, Asparagus Sprengeri, 83⅓. A. Reidenbach, B. Cleres and H. Gaut were awarded a cultural certificate for sweet peas, cauliflower and lima beans, respectively.

A. Mackenzie read an able paper on chrysanthemums for exhibition.

A. Johnston, who a few weeks ago returned from a three months' visit to Scotland, has promised to give an account of his travels at the June meeting. The society holds its rose show on June 23. W. H. M.

Phoenix, Ariz.—Horne & Armstrong, who have been in the florists' business here for some time, have bought a tract of irrigated land to grow all kinds of outdoor stock.

Albany, N. Y.—Eli Burke and William C. Kurth, as partners, began business May 1 in the store previously occupied by R. W. Zobel, at 518 Broadway. Messrs. Kurth and Burke were both formerly in the employ of H. G. Eyres, Mr. Kurth as a designer and Mr. Burke as manager of the flower booth at the Union station. The Zobel greenhouses, on Troy road, have been sold to Mr. Keller, of Long Island, and Mr. and Mrs. Zobel will sail for Europe.

Independence, Mo.—A. Blankenfield, who uses gas as fuel for the heating of his houses, has sued the Natural Gas Co. of Kansas for damages, on account of the company's failure to supply the gas in regular and sufficient quantity. Mr. Blankenfield alleges that each year, about the time when the plants should begin to mature, the pressure on the gas has been decreased and he has been unable to maintain the necessary heat. He asks for compensation as follows: $600 for 1906, $800 for 1907, $4,000 for 1908 and $5,400 for 1909.

For Particulars Apply

THOMAS M. LYNCH

256 Main St., POUGHKEEPSIE, N. Y.

Vegetable Forcing.

Hastings, Mich.—William Chase and J. Clyde Wilcox, of Irving township, have purchased land here, on which they intend to erect at once two large greenhouses to grow flowers and vegetables for the market. Mr. Chase is a well known farmer. Mr. Wilcox graduated from the State Agricultural College in 1907, and since that time has been assistant professor of horticulture in the State Agricultural College of New Hampshire.

GREENHOUSE VEGETABLES.

Chicago, May 18.—Cucumbers, 50c to $1.10 doz.; lettuce, 15c to 20c box; radishes, 12½c to 45c doz. bunches; mushrooms, 45c to 55c lb.

New York, May 17.—Cucumbers, 40c to 75c doz.; mushrooms, 25c to 60c lb.; mint, 30c to 35c doz. bunches; radishes, 75c to $1.25 per 100 bunches; tomatoes, 10c to 15c lb.

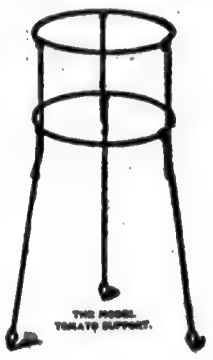
Boston, May 17.—Tomatoes, 20c to 25c lb.; cucumbers, $2 to $4 box; lettuce, $1 to $1.50 box; bunch beets, 75c to $1.50 doz. bunches; bunch carrots, 50c to 75c doz. bunches; mushrooms, $2.50 to $3 basket.

WILTING OF CUCUMBERS.

I have a fine house of cucumbers. They look healthy and are full of small cucumbers, but once in a while a plant wilts when the temperature gets to about 80 degrees; not the whole plant at once, but from one to three leaves in a day. I keep the house at about 60 degrees at night, have the roof shaded and give lots of air. I have to spray them several times a day to keep them from wilting worse. Is there anything I can do to stop it? The beds are on the ground and the soil is nearly all new. The leaves are of extra large size. J. H.

There are many causes for cucumbers wilting and it is hard to say just what causes the wilt in this particular case. The temperature is not too hot; 65 degrees at night would be better than 60 degrees. Shade is not necessary except in the hottest weather and then it should not be heavy. Full grown plants require heavy watering once every day and sometimes twice a day. The soil must be kept moist, or they will wilt. Sometimes it looks wet on top and is dry farther down. There is a disease called "bacterial wilt disease of cucumbers," but it is rare and no remedy has been found for it, other than to clean out thoroughly and start over again. Insects at the roots or main stalk, just below the soil, are the common causes of cucumbers wilting, and it is often the case that the grower thinks it a disease and never finds out differently.

J. H. might look up the article on "Manure Gnats," on page 46 of the Review of May 6. I think it highly probable that it is either the sciara there referred to, or else the striped cucumber beetle which is causing his plants to wilt. The striped beetle lays eggs at the base of the plant. The young worms hatching out of these are the cause of the wilting. They eat into the main root and can be found in there by splitting the root of an affected plant. The plants wither for a few days and finally die. Tobacco dust will help to keep the old bugs from laying eggs at the base of the plant. H. G.



One of the Dell Titus Vegetable Houses, Irondequoit, N. Y.

GARDENING AT IRONDEQUOIT.

Intensive, extensive, and expensive are words which convey to one nearly the entire thought in connection with the forcing of fancy vegetables by the gardeners at Irondequoit, N. Y. This town occupies a unique and comparatively enviable position among localities where fruits, flowers and vegetables of various kinds are grown in abundance. It is known, not alone for the great quantities that are produced, but for stock of superior excellence in appearance and quality. To give an idea of one immense farm is difficult. There are a number of large growers here. Their places are not extensive as to acres, but extensive as to yield, intensive in science, and expensive in maintaining, yet return good profits. Some growers make a business of growing mixed crops, while others specialize with one.

In the early days of gardening in this town, land could be purchased for $50 to $100 per acre, but at the present time one is fortunate to find a piece of land for $1,000 per acre. There is none to sell. The average size of a gardener's plot is ten acres. To build up a garden farm like the average in Irondequoit would require an investment of nearly $20,000. The ten acres of land would cost $10,000; three good greenhouses, $5,000; a good house, $4,000, and other equipment, $1,000. Some such establishments have been erected, and by careful planning the gardener has discovered it to his advantage to erect more greenhouses, until now some have ten or twelve houses and have built tenant houses for the help, which sometimes number ten. H. R. P.

One insertion of the advertisement brought me all the orders I need.—Geo. S. Woodruff, Independence, Ia.

NOTICE

To all American Nurserymen and Seedsmen desiring to keep in touch with commercial horticulture in England and the continent of Europe: Your best means of doing this is to take in the

Horticultural Advertiser

Our circulation covers the whole trade in Great Britain and the cream of the European firms. Impartial reports of all novelties, etc. Paper free on receipt of 75 cents, covering cost of postage yearly. As the H. A. is a purely trade medium, applicants should, with the subscription, send a copy of their catalogue or other evidence that they belong to the nursery or seed trade.

A. & C. Pearson, Lowdham, Nottingham, Eng.

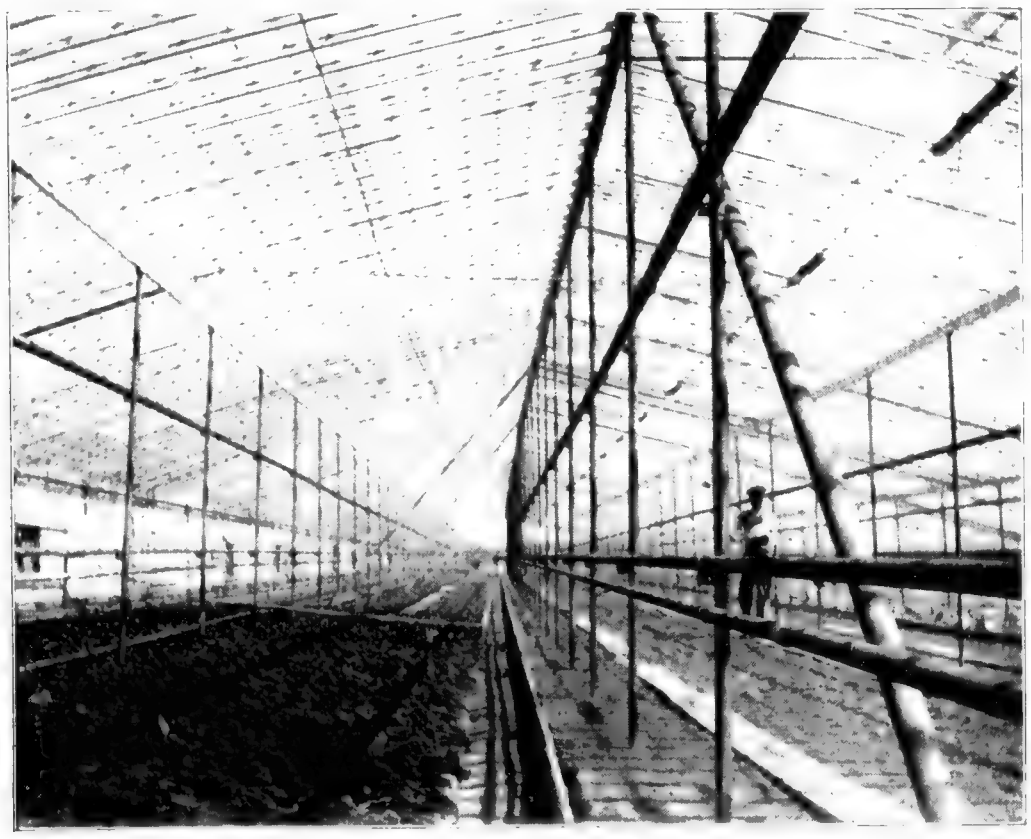
Vegetable Forcing.

Hastings, Mich.—William Chase and J. Clyde Wilcox, of Irving township, have purchased land here, on which they intend to erect at once two large greenhouses to grow flowers and vegetables for the market. Mr. Chase is a well known farmer. Mr. Wilcox graduated from the State Agricultural College in 1907, and since that time has been assistant professor of horticulture in the State Agricultural College of New Hampshire.

GREENHOUSE VEGETABLES.

Chicago, May 18.—Cucumbers, 50c to $1.10 doz.; lettuce, 15c to 20c box; radishes, 12½c to 45c doz. bunches; mushrooms, 45c to 55c lb.

New York, May 17.—Cucumbers, 40c to 75c doz.; mushrooms, 25c to 60c lb.; mint, 30c to 35c doz. bunches; radishes, 75c to $1.25 per 100 bunches; tomatoes, 10c to 15c lb.



Boston, May 17.—Tomatoes, 20c to 25c lb.; cucumbers, $2 to $4 box; lettuce, $1 to $1.50 box; bunch beets, 75c to $1.50 doz. bunches; bunch carrots, 50c to 75c doz. bunches; mushrooms, $2.50 to $3 basket.

WILTING OF CUCUMBERS.

I have a fine house of cucumbers. They look healthy and are full of small cucumbers, but once in a while a plant wilts when the temperature gets to about 80 degrees; not the whole plant at once, but from one to three leaves in a day. I keep the house at about 60 degrees at night, have the roof shaded and give lots of air. I have to spray them several times a day to keep them from wilting worse. Is there anything I can do to stop it? The beds are on the ground and the soil is nearly all new. The leaves are of extra large size. J. H.

There are many causes for cucumbers wilting and it is hard to say just what causes the wilt in this particular case. The temperature is not too hot; 65 degrees at night would be better than 60 degrees. Shade is not necessary except in the hottest weather and then it should not be heavy. Full grown plants require heavy watering once every day and sometimes twice a day. The soil must be kept moist, or they will wilt. Sometimes it looks wet on top and is dry farther down. There is a disease called "bacterial wilt disease of cucumbers," but it is rare and no remedy has been found for it, other than to clean out thoroughly and start over again. Insects at the roots or main stalk, just below the soil, are the common causes of cucumbers wilting, and it is often the case that the grower thinks it a disease and never finds out differently.

J. H. might look up the article on "Manure Gnats," on page 46 of the Review of May 6. I think it highly probable that it is either the sciara there referred to, or else the striped cucumber beetle which is causing his plants to wilt. The striped beetle lays eggs at the base of the plant. The young worms hatching out of these are the cause of the wilting. They eat into the main root and can be found in there by splitting the root of an affected plant. The plants wither for a few days and finally die. Tobacco dust will help to keep the old bugs from laying eggs at the base of the plant. H. G.

One of the Dell Titus Vegetable Houses, Irondequoit, N. Y.

GARDENING AT IRONDEQUOIT.

Intensive, extensive, and expensive are words which convey to one nearly the entire thought in connection with the forcing of fancy vegetables by the gardeners at Irondequoit, N. Y. This town occupies a unique and comparatively enviable position among localities where fruits, flowers and vegetables of various kinds are grown in abundance. It is known, not alone for the great quantities that are produced, but for stock of superior excellence in appearance and quality. To give an idea of one immense farm is difficult. There are a number of large growers here. Their places are not extensive as to acres, but extensive as to yield, intensive in science, and expensive in maintaining, yet return good profits. Some growers make a business of growing mixed crops, while others specialize with one.

In the early days of gardening in this town, land could be purchased for $50 to $100 per acre, but at the present time one is fortunate to find a piece of land for $1,000 per acre. There is none to sell. The average size of a gardener's plot is ten acres. To build up a garden farm like the average in Irondequoit would require an investment of nearly $20,000. The ten acres of land would cost $10,000; three good greenhouses, $5,000; a good house, $4,000, and other equipment, $1,000. Some such establishments have been erected, and by careful planning the gardener has discovered it to his advantage to erect more greenhouses, until now some have ten or twelve houses and have built tenant houses for the help, which sometimes number ten. H. R. P.

THE REVIEW sends the Florists' Manual, by Wm. Scott, postpaid, for $5.

PLEASE discontinue my advertisements in the REVIEW, as I am about sold out. Your paper certainly sells the stuff.—G. E. FINK, Roselle, N. J.

NOT a few subscribers save themselves the bother of annual renewal by sending the REVIEW $2, $3, or occasionally $5, instead of the dollar bill that insures fifty-two visits of the paper.

ENCLOSED you will find the money for the renewal of our subscription. We are nicely started in the violet business and cannot get along without the REVIEW.—H. W. & S. W. ALBRECHT, North Germantown, N. Y.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1908 9: Pres., Charles J. Brown, Rochester, N. Y.; Vice-Pres., C. M. Hobbs, Bridgeport, Ind.; Sec'y, Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y. The 34th annual convention will be held at Rochester, June 9 to 11, 1909.

THERE has been an unusually strong demand for strawberry plants in the east this season, due to short supply.

J. L. HAWKINS, the St. Paul nurseryman, has sold eight acres of his property for $4,000, to be used as a factory site.

WM. H. DRAKE, formerly a florist at Kenosha, Wis., has become a foreman for Klehm's Nursery, Arlington Heights, Ill.

PETERSON NURSERY, Chicago, reports much the best season in its history, largely due to the more extended operations of the landscape department.

GILBERT H. WILD, Sarcoxie, Mo., says that, while he has had little personal experience with Peony M. Jules Elie, he is of the opinion that it is a little large for cut flower purposes; that is, for shipping and as a keeper.

J. W. HILL, of Des Moines, ex-president of the American Association of Nurserymen, has sent word that owing to the death of his brother he will be unable to take a place on the program for the Rochester convention.

C. T. SHEPHERD, manager of the Joliet Nurseries, Joliet, Ill., recently received a paralytic stroke affecting his right side, and was thus unable to speak or to walk. His family were quite hopeful of his recovery. Mr. Shepherd is now 69 years of age. For some years he has been troubled with rheumatism, and lately he had a severe case of grip.

HORNE & ARMSTRONG, Phoenix, Ariz., have purchased a forty-acre tract on the Arizona canal, near the northern end of Center street, and will establish a nursery. Five acres of the tract will be entitled to water when the reservoir is completed, but the other must be irrigated by pumping. The nurserymen are now making preparations to install a modern pumping plant. The business which they established about a year ago on North Center street has proven an immense success. Their town office and greenhouse will still be maintained at that place.

SINCE the publication of the program for the nurserymen's Rochester convention in last week's REVIEW, one or two slight changes in the order of exercises have been made. The address of T. B. Wilson is now scheduled for the opening day and that of Dr. W. H. Jordan for the second day, instead of vice versa as originally announced. The roll call of state vice-presidents also is carried over from Wednesday to Thursday. The members from each state are requested to get together Wednesday and select their new vice-president, who will attend a meeting at 8 p. m. Wednesday, which will consider the question of nominations and selection of place for next meeting, in order to report on Thursday morning. In case but one representative from a state is in attendance, he is to consider himself that state's vice-president and attend the meeting.

A. N. PIERSON, Inc., Cromwell, Conn.

CATALOGUE ON APPLICATION

Mention The Review when you write.

THE Pennsylvania State College Agricultural Experiment Station has issued a pamphlet known as Bulletin No. 91, which should be of interest to nurserymen. It is descriptive of experiments in orchard fertilization.

THE Valdesian Nurseries, at Bostic, N. C., report that there have lately been some fine showers in that locality. All nursery stock is looking well. Orders for next fall delivery are already beginning to come in, and the indications are that the demand for stock will be greater than ever before. All two-year stock is putting on fine growth, and they will have over twice the quantity of stock they have had in any previous season.

CONTRACT FOR PRIVET.

I enclose herewith copy of an agreement that a party who recently moved from New York city had drawn up by an attorney, for the supplying of $16.80 worth of privet, and it took five days to complete the arrangements with one of our salesmen. The accompanying agreement was first submitted for approbation to the prospective buyer's father and mother and, it being pronounced O. K., the order was then handed to our salesman, who was requested to give it his immediate and personal attention. Nurserymen and landscape gardeners doing business within a radius of thirty miles of New York city have a lot of customers of this kind to contend with, but I think this one beats the limit.

D. D. HOWELLS.

The contract was in the following words:

Agreement by and between ————————, as party of the first part, and ————————, as party of the second part.

The party of the first part, for the sum of money hereinafter stated, agrees to install complete, along front lot line, one first-class privet hedge (not exceeding 112 feet in length). All plants in same to range between two feet and two feet six inches in height.

The party of the second part agrees to pay unto the party of the first part the sum of $16.80 (sixteen dollars and eighty cents) when above work is completed as mentioned above.

Should the party of the second part within one year from date order an additional one hundred and seventy (170) feet of privet (same height and quality) to be placed within adjacent six lots, the party of the first part agrees to furnish and plant same at a cost not to exceed 15 cents (fifteen) per lineal foot. Also to remove forty (40) feet of hedge from front of lot line of plot No. 62, care for removal hedge, and plant same at time of execution of order, without extra cost.

REAPPRAISEMENTS.

The following reappraisements of nursery stock have been announced by the customs officers:

From Louis Van Houtte Pere, Ghent, exported April 9, 1909; entered at New York. File No. 51365. Invoice No. 22911. Findings of Waite, G. A.: Standard bay trees, 15-in. diam.; entered at $1.50, advanced to $2.25 per pair. Ditto, 19-in.; entered at $1.75, advanced to $2.50 per pair. Ditto, 20-in.; entered at $2.20, advanced to $3.40 per pair. Add packing.

From H. M. Hardyzer, Boskoop, exported April 8, 1909; entered at New York. File No. 51370. Invoice No. 23339. Findings of Waite, G. A.: Box pyramids, 2 ft.; entered at .50 florin each. Cydonia Japonica; entered at .15 florin each. And similar goods. Add packing. Freight to Rotterdam and shipping included. No advance.

RAILROAD TREE PLANTING.

The Pennsylvania Railroad is planning to set out this spring more than 1,000,000 trees. This will make a total of 3,430,000 trees which have been planted in the last three years to provide for some of the company's future requirements in timber and cross ties. This constitutes the largest forestry plan yet undertaken by any private corporation.

Heretofore the company's forestry operations have been confined to a limited area between Philadelphia and Altoona. This year, however, 65,000 trees are being set out on tracts of land near Metuchen and New Brunswick, N. J. In addition there are to be planted 207,000 trees near Conewago, Pa.; 186,000 in the vicinity of Van Dyke; 334,000 at Lewiston Junction; 7,000 at Pomeroy, and 205,000 at Denholm.

The policy of encouraging reforestation on the part of the public has been actively pursued this spring. Some 151,000 trees have been furnished practically at cost to private corporations and indi-

viduals. In addition 8,000 privet hedge plants have been supplied to private individuals. Privet hedge plants to the number of 7,000 are to be set out to ornament boundary lines along the company's right of way.

Indicative of the scope of the forestry plan of the company this year is the fact that at the Morrisville nursery of the company alone approximately 1,250,000 trees have been dug, bundled and shipped to places along the railroad.

HARDY AZALEAS.

Azalea Vaseyi, also sometimes called Rhododendron Vaseyi, is a native of North Carolina. It is not yet at all common in cultivation, nurseries carrying limited stocks of it, the bulk being collected plants from its native habitats. The flowers, which vary from pure white to deep rose, usually the former color, are produced before the leaves appear and in the vicinity of Boston were fully expanded May 20 this year. This is a beautiful azalea and a profuse bloomer. It succeeds well on the edges of ponds and lakes, but will also grow nicely in drier locations. A bank on the edge of a lake, planted with this azalea, with a carpet of Narcissus poeticus below them, makes a pretty picture. Transplanting is usually done in the spring, but we have had just as good success with those set out at the end of October. The plants grow five to ten feet in height, occasionally as much as twelve to fifteen feet.

Azalea nudiflora is the cheeriest in col-

The Standard Mailing Tube

Do you do a mail order business? Would you like to be SURE your packages will arrive at destination after a long or short journey in PRIME condition? Would you like to cut down your postage bill by using the lightest possible mailing package, affording the greatest resistance to the crushing in a crowded mail sack? After two years of severe testing, the Standard Mailing Tube has proven beyond a question its efficiency and economy. If you send plants by mail, you cannot afford to be without it.

Full range of sizes and special sizes to order promptly. Samples on request.

oring of all our northern azaleas. In a wild state it is scattered over a large part of eastern North America. It flowers earlier than A. Vaseyi, being this season fully open May 10 near Boston. The flowers, which average one and one-half to one and three-fourths inches in diameter, appear before the leaves and are pink or reddish in color. Like most of the native azaleas, it succeeds specially well in a moist soil, although it can be well grown in quite high and dry ground, if kept mulched with leaves. For mass planting the wood's honeysuckle, as this plant is sometimes called, is fine on account of its brilliant color effects. A. nudiflora is a lower grower than A. Vaseyi, seldom exceeding five to six feet in height.

Azalea calendulacea, known as the flame azalea, on account of its orange yellow or flame red flowers, is one of the most showy of the family. It attains a height of five to eight feet and was opening its flowers this year May 20, being usually at its best early in June. It is a fine subject for mass planting on private estates, public parks and gardens. The flowers are almost without odor, but this is more than made up for in their brilliant colorings. There are several named forms of A. calendulacea, with flowers orange, orange red or golden yellow in color, but a mass containing a mixture of shades is most charming. Like all the azaleas and rhododendrons, these specially love leaf-mold and peat, but will grow well in good loam.

PACIFIC COAST.

A. Mitting, Santa Cruz, Cal., is ill and on a trip east for his health.

SAN FRANCISCO.

The Market.

Flowers are still plentiful, but they are not being offered at such low prices as they were for the last few weeks. Carnations have stiffened somewhat in price, and Enchantress is off crop with a majority of growers. There is little demand for the red sorts. The lighter shades sell better than anything else. The first heavy crop of roses is over and there is a scarcity of Beauties, but an abundance of Brides and Maids. A few Bride gladioli have made their appearance, and Peach Blossom has proven to be a good seller. Tulips are over for the season. But few Easter lilies are seen. Sweet peas are now in full swing and the prices are away down; 75 cents per dozen bunches is the regular rate, and many of them do not bring over 50 cents per dozen. They are mostly grown by the Chinese and Japanese.

Other kinds of hardy stock, such as coreopsis, gaillardias, cornflowers and stocks, move well, and the growers of this material seem to have much less trouble in disposing of it at lucrative prices than the greenhouse men do with their wares. A few bunches of gladioli are being shown, and are good sellers. It is evident that there will be a good demand for this flower this season. Gypsophila is getting better in quality than it has been at any time this season, and is proving to be a good and cheap substitute for more expensive greens.

Everyone is looking forward to Deco-

Buy California

ASPARAGUS PLUMOSUS NANUS

SEED

You can get the best seed grown right here in California. It is fresh, large, clean and full of vitality. The best and biggest dealers are our regular customers and their orders are increasing each year. If you are doubtful, just write me and I'll tell you the names of buyers; some of them perhaps you are personally acquainted with.

Seeds will be sold by count, with the usual guarantee as to germination, and I will again sell at my usual low, cash-with-order prices, as per following list:

1,000 seeds	$ 3.00
5,000 seeds	10.00
13,000 seeds	30.00
25,000 seeds	35.00
50,000 seeds	62.50
100,000 seeds	100.00

If you send me your order I know you will be pleased with the results.

A COMPOST HEAP.

We are located at San Bernardino, Cal., and want advice on how to make a compost heap. T. A. N.

The subscriber does not state in his letter what particular kind of compost he wishes to make, or what class of stock he expects to plant in it, so a few general directions that will apply to ordinary hardy plants will probably sufficiently answer his case.

Composts are usually mixtures of manure, loam and sand. These three ingredients can always be had, and they are all that are necessary, except in special instances. The quality of the soil used is the first consideration. It is best to select loam that is not too sticky or too sandy. A medium black soil is the best, and if there is any tendency in its composition toward adobe, it should be fairly well pulverized and an excess of sand mixed in the compost pile.

To begin with, take half the entire quantity required of black loam and put it in a pile. Work it over with a shovel and, should there be any rocks or coarse gravel in it, put it through a coarse screen; otherwise it can be broken sufficiently with a shovel. Then take a pile of manure about half the size of the loam. I refer to rotted manure, for if it is fresh use a quantity that will be equal in size to the pile of loam. It makes but little difference whether the manure be fresh or old, excepting that it will take at least three months longer before the compost is ready for use should fresh manure be used.

Sand is the next requirement, and it makes little difference whether beach or fresh-water sand is used, as long as it is clean and free from gravel. Of this take about one-quarter the quantity of loam used and pile it by itself.

Having selected a place where the compost is to be piled, first put a layer of manure about six inches thick on the ground and cover it with about four inches of sand. Over this spread about six inches of loam, and, if the manure is fresh, wet down the entire pile with the hose and continue piling as before—first the manure, then the sand and then the loam, wetting it well whenever a layer of loam has been added. The wetting down is not so important if old, well rotted manure is used.

After three layers of each have been added the pile is finished and should be allowed to stand, if fresh manure has been used, at least four months. If old manure is used a month or six weeks will be all that is necessary to blend the ingredients into a splendid mass of compost.

The purpose of allowing a space of time to elapse before using the mixture is to kill out the fungi in the manure, and also to destroy the weeds which are always so abundant in manure.

Should a compost be wanted for use immediately after mixing, greater care must be used in the selection of the manure, which should be old, dry and screened before spread in the pile.

For greenhouse plants, a mixture of one-half loam, one-sixth each of leaf-mold, sand and well rotted manure makes a splendid mixture that can be used as soon as made. For ferns and other delicate plants, a mixture of one-third each of loam, sand and leaf-mold will work nicely. Unless for some varieties of strong feeding plants, there is no necessity of mixing in bone meal, guano, potash or lime. This is occasionally done where big results are wanted for some special occasion, but for the ordinary run of plants the first method I have given will cover the points nicely. G.

DETROIT.

The Market.

Business remains about the same as reported last week. With some it is good, but others report dull times. There has been a good run of funeral work.

Stock of all kinds is quite plentiful and the quality good, with few exceptions. In roses, La Detroit and Richmond are extra fine. Carnations are excellent. Sweet peas and valley, the latter especially, were never better. Peonies, stocks, snapdragon, iris, etc., are coming in quantities. There are also any number of fine tulips to be had in assorted kinds.

Various Notes.

Robert Klagge, of Mount Clemens, is sending in some unusually fine stock these days. Mr. Klagge has just installed a most modern refrigerator. It is built entirely of cement.

Albert Pochelon was under the weather for several days last week, but is up and around again.

The Michigan Cut Flower Exchange is sending fancy ferns all over the country, the shortage elsewhere appearing to be general.

F. J. Farney, who represents M. Rice & Co., was in town last week with a broader smile than ever.

Martin Reukauf, of Bayersdorfer & Co., also passed through here last week, with the pages in his order book well filled up. H. S.

Kankakee, Ill.—Charles Schafer, the Riverview carnation specialist, has 18,000 carnations planted out in the piece of ground he recently purchased adjoining the Fair grounds. He will transplant them into the greenhouses which he will build on the new location in the fall.

Lisbon Falls, Me.—Though H. W. Blethen, when he began growing flowers and vegetables a few years ago, intended that the business should be mostly a pastime, there was an instant demand for his produce, and his trade has increased in a gratifying way. He recently built an addition, but is again crowded for room. His houses are heated with steam and supplied with water by means of a windmill.

LOUISVILLE, KY.

The Market.

The last week was a busy one for the greenhouse men. Everybody is busy planting in the cemeteries and yards. A good many more people are buying flowers for their grounds and are fixing them up for the Shriners' convention, which takes place in June. There are also a good many window boxes being planted. These are becoming exceedingly popular here.

Business for the stores has not been anything extra, but still there is no kick, as most of the stores have greenhouses of their own and are working pretty hard to keep up with planting orders. Roses, carnations and other cut flowers are plentiful. Violets are about over for this season. Some good sweet peas are to be had and are selling fairly well. Peonies are coming in and are selling nicely. Some good gladioli are offered. Fancy ferns are scarce. Other green goods are not any too plentiful.

Various Notes.

Ground has been broken for the new store to be occupied by F. Walker & Co., on Fourth avenue, between Chestnut and Broadway, a square from their present store.

Fred L. Schulz has some pretty window displays in his new store.

Jacob Schulz is sending peonies to the Chicago market. He expects to cut 10,000 blooms.

Frank Gottwald has some fine carnation plants. He will grow them inside all summer.

Wm. Walker has planted several benches of carnations. He also likes indoor culture.

Adam Heitz is cleaning things up pretty well out his way. K. R.

MENTOR, O.—F. E. Higgins has erected a greenhouse, and will engage in violet growing.

MARINETTE, WIS.—George Vatter has purchased the material for the erection of additional houses which will contain about 15,000 feet of glass. All that remains of the old section of the range will also be replaced with new houses. Mr. Vatter is planning, also, to engage in the handling of nursery stock.

NEW ROSE
WHITE KILLARNEY

Come and see White Killarney growing at our Scarborough houses, and you will say at once, as every one does who has seen it, it is

THE BEST WHITE ROSE

they have ever seen. **You need it if you want to be up to the times,** and it will pay you better than any other white rose that you can plant. You will regret it if you do not plant it this year, and you will not regret it if you do. Big-lots are being booked. Get your order in early. Send us order at once, while you think of it. Get early stock. It will not cost you any more to order today, while you think of it, than it will two months from now. Be the early bird that catches the worm.

Strong young plants, 2¼-inch pots, own root, now ready for delivery, $30 per 100, 250 for $70, 500 for $125, 1000 for $250. Grafted plants, ready now, $35 per 100, 250 for $82.50, 500 for $150, 1000 for $300.

MY MARYLAND

This new rose, which was introduced last season in a limited way, has proved to be **one of the best roses ever introduced.** Every one is enthusiastic in regard to its merits, and it will be planted very largely by the largest, most progressive aud most up-to-date growers, who have already placed large orders for it.

It is a strong, healthy and vigorous grower, producing long stems and long, pointed buds, exquisitely fragrant. The color is a soft salmon pink. This is a rose that we can recommend in the highest terms, as we are sure it will prove very, very satisfactory. It is a welcome addition to our limited list of really first-class varieties for indoor culture; and it is not only a fine midwinter rose, but is also unusually good during the summer months.

Strong plants, 2½-inch pots, own-roots, $10 per 100, $90 per 1000. Grafted plants, $20 per 100, $150 per 1000

DAYTON, OHIO.

State of Trade.

Every florist realizes that Decoration day is fast approaching and that the rush which always accompanies this day is here again. In every direction one sees gaily adorned wagons delivering the plant orders. And the florist wonders, as he views his fast disappearing stock of geraniums, etc., where they have all gone so quickly. The weather has at last settled down to be warm, so it is safe to do outdoor planting. Even the market gardeners are putting out their tomato plants.

The florists have been favored with an abundance of sunshine in the last week, so roses and carnations are in full crop, and it is expected that there will be a good supply of stock on the market for Decoration day. While the carnation crop is heavy, the demand far exceeds the call for roses, and none are consigned to the dump. Valley is in blossom on the outside; therefore, the market is not so good for those cultivated. Callas move slowly.

Various Notes.

C. V. Hiekes, of Troy, O., was in the city on business last week.

J. C. Dayton, representing the Madison Willowcraft Co., of Madison, O., was in town last week.

Miss Lucy Johnson is able to be up after an illness since Easter, but is not strong enough to resume her duties at the store.

H. H. Ritter says he is satisfied with business in general.

Henry Ehrhart, of Sidney, O., visited the Miami Floral Co. May 16.

The immense vase which the Heiss Co. has erected at the curbing in front of its store forms a great attraction to pedestrians. The vase has a large palm in the center, surrounded by araucarias, Boston ferns and vines.

The Miami Floral Co. reports a large increase in business this year. They have been obliged to increase their help in order to keep up with their business.

WEST GROVE, PA.

Thos. Baylis & Son are doing a nice business in the line of mum cuttings and vegetable plants.

D. H. Green, who recently built a greenhouse plant here, now has a profitable and prosperous place.

Benj. F. Connell, with headquarters at the Hotel Roseboro, is handling a full line of nursery stock.

The Dingee & Conard Co. has the southern branch of the business at Charlotte, N. C., pretty well advanced. The work there is in charge of E. G. Hayes, of this place.

The rush of the spring trade, although well in hand, still continues at the big nurseries. For the last five weeks the Dingee & Conard forces have been working overtime.

The Conard & Jones Co. reports a large and satisfactory volume of business.

J. Mc. L.

ORANGE, N. J.

W. A. Manda addressed the New Jersey Floricultural Society on May 14, the regular monthly meeting set apart as a special rose night. The floral contributions were from neighboring states, and were up to the usual standard. In the discussion, which was quite a feature of the evening, John Hayes, William Reid, Jos. A. Manda, Max Schneider, D. Kindsgrab, Chas. Ashmead, Jas. McManus, Walter Gray and Rev. L. H. Leghtipe, the botanist of the society, took part. In the unavoidable absence of President MacRorie and Vice-president Edwin Thomas, the secretary was called upon to preside.

J. B. D.

Dallas, Tex.—The Green Floral Co. has elected officers as follows: President, E. H. R. Green; secretary and treasurer, Eugene Corley.

Everett, Mass.—Osgood Bros., whose greenhouses are near Woodlawn cemetery, have opened a downtown office in the Everett Associates' building, in Everett square.

Heliotropes—Alyssum

I have a fine lot of **Heliotropes** and a fine strain of **Double Sweet Alyssum,** from 2-in. pots, and German Ivy from sand. Write for prices.

Vinca Minor, both varieties, 2-in. pots, $2.00 per 100.

German or Parlor Ivies, 2-in. pots, $2.00 per 100.

Osmunda roots.

WM. MATHEWS, Utica, N. Y.

PITTSBURG.

The Market.

There has not been much change in business conditions since last report, unless the increased quantity of stock and the lower prices are considered. The volume of stock moving out of the wholesale houses does not look bad, but no doubt the growers could tell you something.

The regular florists are not doing much, as there is nothing in the way of large orders, and most of the stock is being disposed of to the smaller dealers at prices that will attract their class of trade, and of course these are ridiculously low.

Various Notes.

Mrs. Schaffer, who has been known in the trade for many years, was thrown down the other evening by a car starting before she was off the steps. She was painfully but not seriously injured.

Edward Ashcroft and Miss Rena Shulmire, both employees of the Pittsburg Cut Flower Co., were married Friday evening, May 14. They are at home to friends at their new place in Avalon.

The extremely hot weather is stirring up the people who plant flowers, and the plantsmen are working overtime to keep up with the rush. Prices are about the same as in former years. Hoo-Hoo.

ALBANY, N. Y.

Plans are well advanced for the holding of the flower show of the Albany Florists' Club next November. The club hopes to secure the state armory for this purpose, but in that case it will be necessary to hold the exhibition under the auspices of some of the organizations connected with the Second battalion. The club is willing to do that. The matter is now in the hands of the adjutant-general.

At the last meeting of the club it was decided to place a wreath upon the soldiers' monument in the Rural cemetery on Memorial day.

GIRARD, O.—William Gerke has removed from his former residence on Washington avenue, and is now living in his own new house.

HELLO! Here is a chance for

BUFFALO.

Current Comment.

The regular meeting of the Florists' Club was held last week. An entertainment was arranged, and as a result a large attendance turned out. The regular meeting took place first, and was followed by boxing, wrestling and a pie-eating contest. The last mentioned afforded the most pleasure. Each contest was brisk, and everybody enjoyed the program. The evening was finished with pedro.

After many days of postponement, Mr. Stroh finally succeeded in coming to terms with his landlord, and opened elaborately May 15. Mr. Berger, who was one of the leading men for Palmer for a number of years, has been engaged to manage the store. Mr. Stroh has extensive greenhouses at Attica, which will enable him to keep up stock.

J. Benson Stafford, late of New York, has added an automobile to his equipment. Mr. Stafford has kept up a splendid show, and is doing a fine business.

Chas. Sandiford, ex-president of the club, was taken sick last week, and it was thought for a time he would have to undergo an operation. The same fate came to Alexander Scott, but fortunately both were able to ward off any serious trouble.

Decoration day is booming trade for the greenhouse men more and more as the day approaches. Light frost nearly every night prevents any extensive preparation, and consequently the busy time comes within a few days. R. A. S.

GARDNER, MASS.—As already reported in the REVIEW, the corporation known as the Riverside Greenhouses has filed a petition for its dissolution. It should perhaps be stated, in this connection, that the corporation's greenhouses, with part of the land, were purchased three years ago by Carl J. Erickson, who is now successfully conducting the business.

25,000 FIELD-GROWN

PANSIES

A Prosperous Florist is like the Bee—Never idle

We have plants to sell, so have thousands of other florists.

But we have quantity, quality and prices that few can offer.

Our immense stock of bedding plants is now ready, every hole and corner full for immediate shipment.

Geraniums, S. A. Nutt (best crimson), John Doyle and other reds, Mme. Thibaut and Jean Viaud (pink), 4-in. pots, $7.00 per 100.

Scarlet Sage (salvia). The true Clara Bedman or Bonfire variety. Ours is the true, medium tall, genuine variety, an immense bloomer, with deep red, brilliant flowers, so well-known and admired in the capitals of Europe and America. The seeds of this famous variety were gathered by me in Zurich, Switzerland, the home of Salvias. Price, 4-in. pots, in bloom, $7.00 per 100.

Ageratums, best of the blue dwarf, 4-in. pots, in bloom, $6.00 per 100.

Heliotropes, best of blue dwarf variety, 4-in. pots, in bloom, $7.00 per 100.

Begonia Vernon, newest strain, the well-known dark variety. Our own importation, the seeds having been gathered from the best specimen plants by me on my trip to Switzerland and France. It does well in either warm or cold climate and blooms profusely in July and August, even when fully exposed to the sun, and is very valuable for bedding purposes, in many instances taking the place of Geraniums and other plants. Price, 4-in. pots, in bloom, $8.00 per 100.

Begonia Erfordii, 4-in. pots, in bloom, $8.00 per 100.

Begonia Flambeau, on account of its waxy foliage (pink flowers in summer), is valuable for window boxes, vases, and makes a striking appearance, 5¼-in. pots, $2.00 per doz.; 4-in. pots, $1.00 per doz.

Fuchsias, assorted, in bud and bloom, 4-in. pots, $6.00 per 100, worth $10.00.

Petunias, double assorted, 4-in. pots, $7.00 per 100.

Lantanas, assorted, 4-in. pots, in bloom, $7.00 per 100.

Nasturtiums, dwarf, assorted, 4-in. pots, $6.00 per 100.

Stocks, German, six weeks, 4-in. pots, $7.00 per 100.

Vincas, variegata and periwinkle, 4-in. pots, $12.00 per 100.

Cobaea scandens, fine, blue, bell-shaped flowered, climbing vine, growing from 30 to 50 feet high in one summer, blooming far into November, 4-in. pots, nicely staked up, $8.00 per 100.

Cannas, 4-in. pots. Henderson, Poitevine, Bismarck, Mlle. Berat, etc., $8.00 per 100. Black Beauty, Austria, King Humbert, 4-in., $10.00.

Aster Victoria, German, 5 best sorts, $3.00 per 100.

Honeysuckle, large, 6-in., 50c; 10 plants sold at 100 rates.

Ampelopsis Veitchii, 4-in., 10c.

Dracaena indivisa, imported, broad-leaved, big plants, 50c to 75c.

SMALL PLANTS

Petunia California Giant, 3-in. pots, $4.00 per 100.

Petunia Inimitable, 2½-in. pots, $3.00 per 100.

Verbenas, assorted, in bud, 2½-in. pots, $3.00 per 100.

Coleus, Verschaffeltii, Golden Bedder and Queen Victoria, $3.00 per 100.

Coleus, fancy leaved, 2½-in. pots, $4.00 per 100.

Marigold, Tagete's or French dwarf, 3-in. pots, $3.00 per 100.

Centaurea Gymnocarpa (Dusty Miller), 2½-in. pots, $3.00 per 100.

Parlor or German Ivy, 2½-in. pots, $3.00 per 100.

Candytuft, assorted, 2½-in. pots, $3.00 per 100.

Salpiglossis, assorted, 2½-in. to 3-in. pots, $3.00 per 100.

Lobelia Crystal Palace (blue), 2½-in. pots, $3.00 per 100.

Tradescantia, green and variegated, 2½-in. pots, $3.00 per 100.

Kenilworth Ivy, 2½-in. pots, $3.00 per 100.

Thunbergia, or Black Eyed Susan, 2½-in. pots, $3.00 per 100.

Cuphea, or cigar plant, 2½-in. pots, $3.00 per 100.

Vinca variegata, 3-in., $4.00 to $5.00 per 100.

Ageratum, blue, dwarf, 3-in. pots, $4.00 per 100.

Asparagus Plumosus Nanus, 3-in. pots, $4.00 per 100.

Cosmos, 4 early varieties, separate colors, made up 3 plants in a pot, $3.00 per 100.

Summer Chrysanthemums, best varieties, 3-in. pots, $4.00 per 100; 4-in., $7.00 per 100.

Pyrethrum Aureum (Golden Feather), 2½-in. pots, $3.00 per 100.

Roses, Climbing Lady Gay, Crimson Rambler, D. Perkins, 5½-in. to 6-in. pots, 25c, 30c to 40c.

REMEMBER

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa,** and those we offer were imported the Spring of 1908.

Florists should bear in mind that no garden, lawn, etc., is complete without the Araucaria; therefore, if you wish to make money, recommend the Araucaria to your customers. Introduce this noble plant to your trade. We give you a special price, and it will pay you to handle them.

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 19th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta, specimen plants, 7 to 8-in. pots, 4 to 5 years old, 3, 4 and 5 tiers, 20, 25 and 30 inches high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 3, 4 and 5 years old, 4, 5, 6 and 7 tiers, 6-in. pots, 20, 25, 30 and 35 in. high, an Elephant for only 75c; a Jumbo for $1.00 and a Holy Terror for $1.25 to $1.50.

Araucaria Excelsa, a consignment of small sizes just in, per Steamer Manitou, 35c, 40c, 50c and 60c.

Kentia Forsteriana and Belmoreana, just arrived, per Steamer Manitou, from Antwerp. Price for good stuff, 75c, $1.00, $1.25, $1.50, $2.00 each.

O! what a sight!
Moonvines, moonvines, moonvines—
The genuine, pure white, waxy, fragrant moonvine,
With flowers as big as a saucer.

THE SECRET OF THE MOONVINE

Look! Life, Life, Life everywhere!

What is life? Yourself is a life. Your time is a life. Your porch is a life—a mass of flowers. Your home is a life. Your garden wall is a life. O! life and joy everywhere! Flowers and green everywhere—O! what a fine odor! Every spot of our home is a life. All happy.

"Mein Haeuschen steht im Gruenen."

I Am the Moonvine King of America

Grower and shipper of the so well-known Ipomoea Noctiflora, the pure white, fragrant, waxy moonvine, bearing flowers as big as a saucer, for which we have a world-wide reputation. For the last twenty years we have controlled the American market of this beautiful climbing vine, which grows 30, 40 to 50 feet high in one summer, covering every spot quickly wherever planted; 25,000 plants are raised and shipped by us every spring into every part of America. Beware of cheap stuff floating around the market. Price, 4-in. pots, nicely stocked up, $12.00 per 100; 3-in. pots, $8.00 per 100; 2½-in. pots, $5.00 per 100.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

Godfrey Aschmann, West 1012 Ontario St. **Philadelphia, Pa.**

ASTERS.

Aster plants. Queen of the Market, Victoria, Comet, Ostrich Feather and Late Branching, in separate colors, good strong plants, ready to plant out, $2.50 per 1000; in 5000 lots, $2.00 per 1000. Gustave Pitzonka, Bristol, Pa.

PLEASE MENTION THE REVIEW WHEN WRITING ANY OF THESE ADVERTISERS

Asters. Field-grown Crego, white, shell-pink and rose, mixed colors; Rosbach's Selected, purple and lavender mixed, white separate, $2.50 per 1000. We have tried most of the varieties of asters, offered the last several years, with the view of securing an ideal florists' strain. Last year we acquired the Crego and found it the most satisfactory of any we ever tried. A. & G. Rosbach, Pemberton, N. J.

Asters. Fine, large plants, ready to plant out. Queen of the Market, Giant Comet, Semple's and Carlson's, separate colors, 50c per 100; $3.50 per 1000, prepaid; $3.00, not prepaid. S. W. Pike, St. Charles, Ill.

Asters. Extra strong, twice transplanted plants, better than out of 2¼-in. pots. Vick's Daybreak and Purity, Dreer's Pink Beauty and Late Branching varieties, $10.00 per 1000.
Frank Shearer & Son, Binghamton, N. Y.

Aster Queen of the Market, Vick's seed, in separate colors, $2.50 per 1000. Purity and Daybreak, $3.00 per 1000. Upright White, $4.00 per 1000. Gustave Freytag, West Orange, N. J.

Asters, fine transplanted plants. Dreer's and Carlson's best strains, all colors, suitable for florists' use, $2.50 per 1000. Cash.
P. N. Obertin, Kenosha, Wis.

Asters. Q. Market, Giant Branching, Hohenzollern, Crego, etc.; strong, transplanted, separate colors, $5.00 1000.
Wm. S. Herzog, Morris Plains, N. J.

Potted aster plants, fine stock, four separate colors, 2-in., $1.25 per 100; $10.00 per 1000. Cash, please.
A. Relyea & Son, Poughkeepsie, N. Y.

PANSY PLANTS.

I have made a specialty of growing pansy seeds and plants for 35 yrs. and my PANSY PARK PERFECTION strain is the best in the world. The flowers are of the largest size, over 60 distinct sorts and the greatest variety of rich and rare shades and markings. Fine, short, stocky, hardy field-grown plants, well rooted, in bloom. Price, mixed or separate colors, 500, $1.75; 1000, $3.00; 3,000, $8.00; 5,000, $13.00; 10,000, $25.00. Cash with order. Orders filled promptly.

One of many reports: The Pansy Park Perfection pansies are the most beautiful I ever raised for size, substance and colors.—John Stevenson, Florist, Lynn, Mass.
L. W. Goodell, Pansy Park, Dwight P. O., Mass.

500,000 PANSIES.
Best market strain grown; grown from seed of our own raising. This strain is the result of over 25 years' careful selection, and for size, form and substance and wide range of color in clear, brilliant selfs and novel shades and markings, they will be found unsurpassed. The colors are very evenly assorted and the growth is very strong and stocky. Fall transplanted plants, ready to bud and bloom. Price, $10.00 per 1000. Large sizes, $15.00 and $20.00 per 1000. Express only. Cash with order.
I. E. Coburn, 291 Ferry St., Everett, Mass.

SUPERB STRAIN—READY NOW.
Fall-transplanted pansies, in bud and bloom. A trial order will convince you that these are the best you ever handled.
$1.25 per 100; $10.00 per 1000.
Cash with order.
LEONARD COUSINS, JR.,

TO DESTROY LILAC ROOTS.

Will you tell me what will destroy the roots of the old-fashioned lilac? I have tried saltpeter and kerosene, but it seems to thrive in it. It is almost impossible to dig them out and I would like some other method. W. S.

Much the best plan will be to dig out the roots and you will find this the cheapest method in the end. A strong laborer with a grub and shovel should soon make short work of them. Lilacs do not grow to any great size and it should not be a serious task to dig the roots out clean.
W. N. C.

RUST ON IRIS.

A number of growers have this season complained of rust on iris. Here is a recipe from a successful English grower, who says it will keep the iris rust in check: One ounce permanganate of potash to one gallon of soft water. It should be sprayed on the plants before the disease appears, if the plantation has had it before; if not, on first appearance, however minute, and then at intervals afterwards. Put spray on finely by means of a Knapsack, Vermorel or other sprayer, spraying at as high a pressure as possible, with as fine a spray as can be obtained.

THE REVIEW sends Smith's Mum Manual on receipt of 40 cents.

ROCHESTER, N. Y.

Rochester will have a flower show November 2 to 4 that is expected to be unique in so many ways that it will attract the attention of members of the trade in all parts of the country. Convention hall, where the show is to be given, will be laid out as a garden, and the exhibits will be shown on the floor. Instead of walking up and down between flower-laden tables, spectators will pass along beautiful walks, under arbors, through palm forests, and to a cascade that will have its origin back on the stage at one end of the hall, and will flow to the feet of those who enter the hall.

The show will be held under the direction of the Commercial Florists' Association of Rochester. Every florist in Rochester will have an exhibit, and, in addition to those who are in the business for the money that is in it, there will be exhibits from the gardens of prominent Rochester and neighboring amateur florists and from outside growers.

Florists and nurserymen who are interested in the show, which has been under consideration since the florists held their banquet last winter, met May 15 at James Vick's Sons' offices for the purpose of going over the floor plans for the hall and perfecting other details. Every one present was enthusiastic. The general committee in charge of the show was divided into subcommittees. Charles H. Vick is chairman of the general committee, and H. B. Stringer is secretary. The subcommittees are:

Floor and decoration—F. J. Keller, E. P. Wilson, R. G. Salter, G. B. Hart.

Finance—W. L. Keller, William C. Barry, Sidney R. Clarke, W. H. Dildine, A. H. Salter.

Exhibition and awards—J. M. Keller, Ambrose Secker, F. W. Vick, F. R. Schlegel, C. B. Ogsten.

Music—F. W. Vick.

Advertising—Sidney R. Clarke, Thomas F. Brown, A. H. Salter, William Pitkin, Charles J. Brown.

CLARKSVILLE, TENN.—M. E. Hiett, whose place is situated about four miles east of town on the Cumberland river, was the victim of an outrage Sunday night, April 18. While he and his family were sitting on his front porch, three rifle balls crashed into his greenhouses, only a few feet away. The shots were fired from a steamer which was proceeding up the river. Mr. Hiett began an investigation at once, with a view to taking legal action.

HOSE

Erie, Pa., May 11, '09.

Scranton Florist Supply Co. Scranton, Pa.

Dear Sirs: Regarding the Special Hose which we purchased of you last fall, would say that this hose has given us excellent service. We consider it by far the best Hose that we have ever used, even when paying considerably more per foot for other brands. We can highly recommend it to anyone wanting a Hose that will stand up under the adverse conditions to which Hose is subjected in the average florist establishment.

Respectfully yours.

The Best Investment Any Beginner Can Make

FLORISTS' PUBLISHING CO., Caxton Building, 334 Dearborn St., CHICAGO

Greenhouse Heating.

SUBSCRIBERS are invited to write the editor of the Heating page, describing their troubles or asking any questions regarding the heating of greenhouses, the piping or boiler room. But please do not ask us to make a choice of apparatus for you. Each boiler advertised in the REVIEW is a good boiler, and the advertisers sell them on their merits.

OIL FOR FUEL.

A subscriber in New York state requests the publication of the following inquiry:

"Florists who have made use of oil in place of coal for fuel, please advise us through this column as to the cost and character of burners, life of same, effect oil has on boilers, and relative cost of oil and coal. Have any florists used peat in place of coal? If so, what is its cost as compared with coal, and where is it to be found in New York state?"

The REVIEW will be pleased to give space to any replies.

OREGON VEGETABLE HOUSES.

I am going to build two hothouses, each 30x150 feet. The houses will be connected. They will be built on ground that slopes to the east. There is about four feet of a drop in the 150 feet. The boiler will be at the east end of the houses. The walls of the houses are six feet high and the ridge is thirteen feet from the ground. These houses are for tomatoes and cucumbers. We want a temperature of 65 degrees at night and 70 to 80 degrees in the daytime, at 4 degrees below zero. There are four beds on the floor, the full length of the house. How many 2-inch flows and returns will I need and where would you place them to get the best results? Where would you place the expansion tank? I want to use the gravity system, to help the flow of water. The supply tank will be above the houses, on the higher ground. What size of feed pipe will I need? What size of boiler? S. B. H.

Each of your houses 30x150 requires sixteen lines of 2-inch pipe to supply sufficient radiation to maintain the temperature desired. It will be advisable to use three lines in each house as risers, and the thirteen returns in as many coils as there are risers for each house; that is, two coils of four pipes each and one with five. Such a plant will require a boiler with about 400 square feet of heating surface. You can place the expansion tank in any convenient location, provided it is fifteen or twenty feet above the heating pipes and connected with the main return near the boiler.

L. C. C.

A CONCRETE SMOKESTACK.

Though there is a steady increase in the use of cement for certain parts of greenhouse construction, cement smokestacks are probably still rather rare in the trade. The smokestack shown in the illustration looks substantial and workmanlike, and one of the most interesting facts with reference to it is that it was built by the owners themselves, Van Aken Bros., of Coldwater, Mich., who thus describe the method used in doing the work:

"We commenced with a foundation twelve feet square by nine feet deep. This was made solid with cobblestones and cement grouting, using a cement mixer and running the grouting thin, so it would fill all hollows between the stones. Six feet down in this we set 1½-inch and 1¼-inch iron pipes on end, so that they extended upward as reinforcement for the stack. Above the foundation, where we set our first form for the stack, we wired old buggy tires to the pipes every ten inches, thus making a

Concrete Stack of Van Aken Bros.

complete and secure reinforcement for the stack. Our forms were three feet high and were put together in sections, which we fastened in place by wiring them to the iron pipes. We used two sets of the forms, removing the lower set each day, putting it on top and refilling it. Thus we went up three feet per day.

"The stack has a 36-inch flue. All scaffolding was placed inside, thus saving a good deal in that item of expense. The wall for the first thirty feet is eight inches thick, and the upper thirty-two feet is six inches thick. In the upper thirty-two feet we also reduced the size of the reinforcing pipes to 1-inch.

"The entire cost, including the making of the wooden forms and the excavating for the foundation, was $290. The connection to the boiler is made with a cement flue running from the boiler cellar up into the square base of the stack."

The Van Aken Bros. also erected re-

To the man who needs a Boiler

THE KROESCHELL BOILER

was installed to heat over six million (6,000,000) square feet of glass during the past three years.

Expressions from the men who know:

Used steam: was advised to change to your hot water boiler. Find it about half the work with your boiler. We would have no other.
STERNITCKE BROS., Park Ridge, Ill.

Have handled many greenhouse boilers of other makes, but Kroeschell beats them all. I get perfect circulation in 30 minutes. WM. OTTO, Oshkosh, Wis.

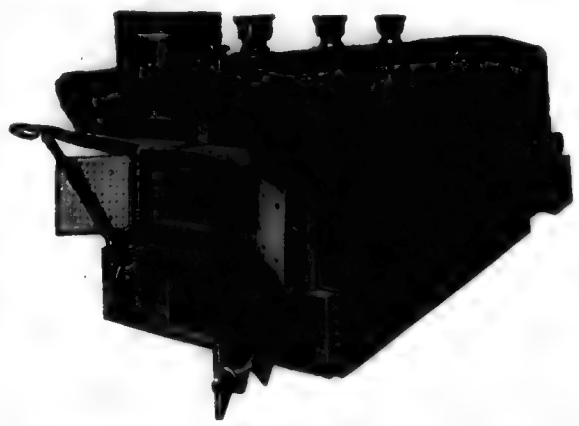
Former boiler, 16 horsepower steam; as much difference as between day and night. Your boiler does not need recommendation. Will recommend itself wherever used.
THEO. F. DAMEROW, Grosse Pointe, Mich.

Your boiler, in my estimation, is the best in use today. We have two of them.
POTTER & SONS, Waukegan, Ill.

When we rebuilt our plant, we were undecided whether to use your boiler or a cast iron boiler. We are satisfied we made no mistake in using Kroeschell.
YEATMAN & WAY, Kennett Square Pa.

Have fired greenhouse boilers since 1885 both steam and hot water. Yours suits me the best. I have two of your boilers. At one time I had two cast iron boilers working together and during a blizzard the rear section of one boiler gave out and the front section of the other sprung a crack a couple of months later. No more cast iron boilers for me. I came very close to freezing out in both instances. G. M. THOST, DeSoto, Mo.

The Kroeschell Generator



prevents boiling over, cures sluggish circulation, saves fuel, smaller mains can be used, water can be heated to 240° without boiling, increases circulation, 3 to 5 times faster; no hot water system complete without it.

HAVE YOU EVER INVESTIGATED

the one sure thing

KROESCHELL BOILERS

See the simplicity of construction. Plate material, **NOT CAST IRON.** Long fire travel, thin water ways. **The best and the most heating surface in the world for the money.**

THE KROESCHELL BOILER will give you more heat with the same piping required by other boilers, and with less fuel.

Send for our catalogue.

Kroeschell Bros. Co.

51 Erie St., CHICAGO

THE KROESCHELL BOILER

replaced 1346 cast iron boilers in 1905, 1906, 1907, and many in 1908.

Expressions from the men who know:

We are very well pleased with your boiler. I have had fourteen years' experience in heating, six with gravity steam and eight with vacuum, but give me the hot water system for all purposes. Use me for references at y time.
E. LIGHTHISER & SON, Xenia, O.

Have used upright boilers, tubular boilers, and cast iron boilers. Your boiler heats up better and easier than any boiler we have ever had anything to do with. If we ever buy another boiler, it will certainly be a Kroeschell.
POOLE & PURELLANT, Washington C. H., O.

I have fired boilers both here and in Europe for the last forty years. The Kroeschell is the best type of boiler I have ever used. I have two cast iron boilers, also a locomotive boiler coupled with yours, but did not need to use the cast iron boilers this winter. Your No 7 boiler is rated at 15,000 sq. ft. of glass and carries 25,000 sq. ft. of glass until the outside temperature goes down to 10° of frost. We have no trouble to keep temperatures in our houses with easy firing since we installed your boiler. The main flows and returns are heating our potting shed and packing room, which are not included in the amount of square feet of glass. From the boiler to the farthest end of our violet houses and return is 800 ft. and circulates very quickly.
THE SALTFORD FLOWER SHOP,
Wm. D. Saltford, Pres.
Poughkeepsie, N. Y.

The Kroeschell Piping System

is being installed by many progressive florists. 1¼, 1½ or 2-in threaded pipe, or 4-in tubing is used. Boiler can be set on level with greenhouse walks. You do not need deep boiler pits.

cently a three-story cement livery stable, which they consider one of the most up-to-date buildings for this purpose in the United States. Business, they say, has been good, both at Coldwater and at their store in Elkhart, Ind. They expect to add one greenhouse, 26x130 feet, this summer.

YOKING BOILERS.

I have two fire-box boilers, which will be bricked in, and I wish to connect them and run them together as a battery. I want to arrange them so I can run either one independently of the other. How can I make proper connections? Will I need more than one steam and water gauge?

In connecting two boilers to one smokestack, which is the better way—to run two separate smoke pipes to the stack or connect the two pipes with a Y and enter the stack with one pipe? W. K.

It is not always an easy matter to connect boilers so they will work well. The common way of arranging the smokestack when one is used for two boilers is to set the chimney or stack to one side of the boilers and connect the two by a breeching, i. e., a pipe placed horizontally, into which the gases from both boilers enter, and this is then connected with the chimney. Besides this, each boiler should be

provided with both steam and water gauges. Yoke the two together at the top, with properly valved connections with the main, to allow either to be used independently, and connect them with the common return, using a swing check between the boiler and the main return in each case, besides a gate valve. Lower the boilers just as far as possible below the pipes in the houses. The greater this distance, the less trouble will be experienced by water backing up in the heating pipes. L. C. C.

INSTALL A SEPARATE FLOW.

As we intend to build an addition to our greenhouse, we should like to know if it is necessary to install another main. The house we now have is 17x100 and is heated by hot water. We now have a 3-inch main and eleven 1¼-inch returns. We know that the boiler is capable of heating the new addition, which will be 22x100 feet. In this part of Alabama it never gets colder than 15 degrees above zero, and that is but a few nights during the winter. Will any of the Enchantress varieties, White Perfection or Beacon, stand 20 degrees above zero outdoors in the field? C. S. H.

I do not believe it will be wise or satisfactory to attempt to heat the two houses by means of a common flow. Much better satisfaction will be secured if independent flow pipes are carried from the boiler to each house.

I have no positive knowledge for the basis of my judgment, but I do not believe that any of the improved carnations used for forcing will withstand a temperature of 12 degrees of frost—20 degrees above zero. L. C. C.

A SMALL WISCONSIN HOUSE.

Will you please tell me how to pipe my greenhouse, 18x38 feet; five feet six inches high on the south side, seven feet high on the north side and fourteen feet high in the center, with glass in both ends? There will be two benches, each six feet wide, with a walk eighteen inches wide at the sides and a 3-foot walk in the center. My boiler has a capacity of 450 feet. How many 1¼-inch, 1½-inch or 2-inch pipes will be needed? What will be the best way to heat it to 70 degrees at 20 degrees below zero? The flows are 2-inch pipe. The boiler will be down about two and one-half feet below the return coil. F. G.

It is inferred from the size of your plant that hot water is the style of heating to be used. On this basis, using 1½-inch pipe with 2-inch flow pipes or risers, it will be necessary to install twenty-one lines of 1½-inch pipe to maintain a temperature of 70 degrees in this house, with water in the boiler at 180 degrees. L. C. C.

ERIE, PA.

Current Comment.

A brilliant wedding took place here May 8, when Miss Marianne Farrar became the bride of Geo. C. Russell, of Elizabeth, N. J. The decorations were elaborate, including potted orchids, gardenias and lily of the valley. The bride's table was attractive with a centerpiece of Killarney roses and deutzia, with maidenhair fern. The other tables were decorated with Murillo tulips. The bride carried valley and orchids, with a shower of valley and chiffon, while the bridesmaids and maid of honor carried swainsona and stephanotis. The ceremony was performed under an arch of gardenias. The decorating was by the Baur Floral Co.

Business is getting brisk, as Memorial day is approaching. Cemetery work is

The Market.

Weather and business conditions last week were both good. The bedding season is now in full swing and is keeping all the plantsmen busy filling orders. Good cannas and geraniums in 4-inch pots are retailing for $1 and $1.50 per dozen. Cut flowers are good and plentiful for the time of year and meet with a satisfactory demand. Outdoor flowers are becoming plentiful.

Various Notes.

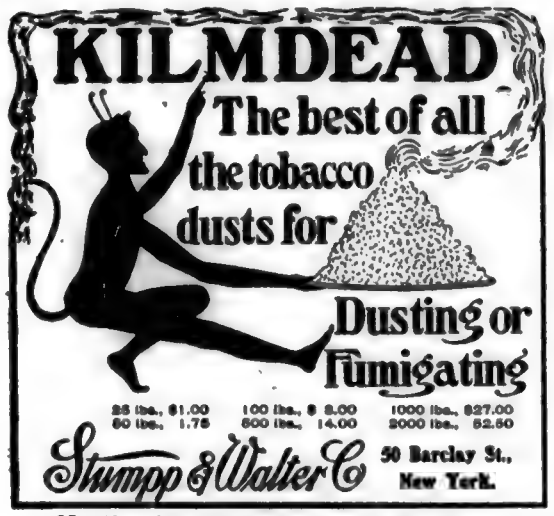
Another house will be erected at the J. A. Keller estate in the near future. The house will be 200 feet long and will be used for carnations.

The Michler Bros. Co. is busy planting out beds and filling vases in the cemetery.

August Le Clere, the florist at the asylum, is busy beautifying the lawns at that place.

Mr. Humphreys, of Graser & Humphreys, Mt. Sterling, Ky., was a recent visitor here. Mr. Humphreys says he will grow carnations and other cut flowers extensively next season and will discontinue the growing of plants. Their cut goes to Cincinnati and this market.

Mr. Corbett, also of Mt. Sterling, Ky., was a recent visitor in this city.



Some of the florists have begun planting out carnations in the field. The stock, taking it as a whole, is looking well. Blue Grass.

Lawrence, Mass.—Robert George, of Center street, has accepted a position with C. E. Wingate, on Essex street.

MILWAUKEE.

The Market.

With a heavy supply all last week in every line, business was really good. The funerals of four prominent people at short intervals undoubtedly helped a good deal toward keeping stock from accumulating. Roses, including Beauties, arrived in greatest quantities, followed by carnations, which held their own pretty well, owing to their good quality. Violets are all in for this season, and sweet peas, which have been moving well and are just equal to the demand, take their place. Greens, with the exception of smilax, are equal to demand.

The favorable weather of last week gave the bedding stock trade some of the long-looked-for vim. It also helped the carnation growers to hustle field operations along, and by the time these lines appear in print almost everyone will again say, "I'm glad that job's done."

Various Notes.

At the C. C. Pollworth Co.'s greenhouses, they have been busy beautifying the surroundings by converting several acres into a park. They certainly set a good example.

The Currie Bros. Co. was kept busy with orders for the funerals of Messrs. Palmer and Hyde, which called for large designs, as they were prominent in Masonic circles.

The Holton & Hunkel Co. reports a big crop of Beauties of fine quality now on at the greenhouses in Brown Deer.

The Loeffler Bros., of Watertown, Wis., are sending some extra fine sweet peas to this market.

Peter Benke, of Watertown, was a caller on Sunday.

The flower show committee has now completed arrangements with the Auditorium board, and the date for the fall show is set for November 11 to 14, inclusive.

The entertainment committee of the Florists' Club has been asked to make arrangements for the club's annual picnic this summer.

The Outdoor Art Association again asked the coöperation of the Florists' Club in its work, by requesting the president to appoint five judges to help them in awarding prizes in the fall.

E. O.

Morenci, Mich.—Le Roy Sutton is planning to build more greenhouses this summer.

Chas. W. Brooke.

THE HOSE POSTER.

The Revere Rubber Co., Boston, manufacturers of the much talked of Revero garden hose, have recently sent out to the trade an attractive display card setting forth the merits of Revero garden hose.

This hose possesses a number of features of advantage over the old style of hose of wrapped duck construction. It

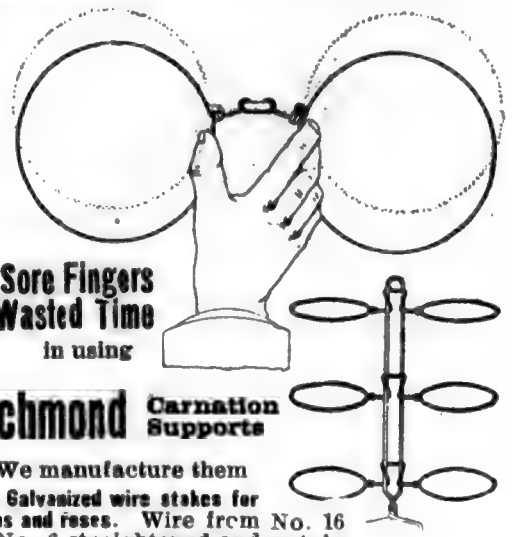
consists of a double braiding of tightly twisted cotton yarn over a seamless tube of high-grade rubber. The rubber cover is also of the seamless type and compounded to withstand hard usage. This hose is vulcanized in a patented rigid mold in such a manner that the cover and tube are forced through the fabric, making it a compact, homogeneous mass.

Revero hose has no seams to open up or unwrap and has less tendency to kink when bent at sharp angles than the old style construction. Another great advantage is the continuous length feature. This hose is put up on reels in continuous lengths up to 500 feet, a feature that is greatly appreciated by the dealer, as the remnant question is at once disposed of.

The company's business with florists extends all over the country, as stores are located at Boston, New York, Philadelphia, Pittsburg, Chicago, Minneapolis, New Orleans, San Francisco and Portland, Ore.

CHRYSANTHEMUM SOCIETY.

As a member of the Chrysanthemum Society of America I wish to express my appreciation and extend my hearty support to President Smith's appeal for an increase in membership of that organization. Mr. Smith very truly points to the benefits conferred on the growers of chrysanthemums generally by the work of the C. S. A. and its committees. And, while he does not do so, he undoubtedly could have offered practical suggestions, which, if acted upon, would materially increase the benefits conferred. The work of the organization may not be above criticism (if you happen to know anything in the universe that is, please hold up your hand) and sincere criticism is solicited. But standing off with your hands in your pockets and criticising the other fellow seldom accomplishes anything. In traveling the highway of human progress, you have probably noticed that it is pretty generally up hill, and for every one that is willing to give a helping hand to push the benzine buggy, there are nine who meander contentedly along, either doing nothing themselves or ridiculing the efforts of those who are, but ready to get in and ride as soon as the machine decides to go or the top of the hill has been reached and there are prospects of a comfortable coast down the other side.



Perhaps it may seem like imposing upon good nature to ask it, but will not each member of the C. S. A. make a special effort to get at least one new member during the remainder of the year? I will guarantee to send one myself.

I. L. Powell.

THE RETAIL FLORIST.....

THE ARISTOCRAT OF BOUQUETS.

The season of spring weddings is at hand, and soon the leading retail florists will be busily engaged in catering to this class of desirable business. To all florists who serve the brides, the accompanying illustration of a shower bouquet will be of interest. It is one of the set made by W. J. Palmer, Buffalo, which were illustrated in the Ladies' Home Journal for April, so that a large number of the public will recognize it. It even is quite likely that there will be calls for just such a bunch because of its having been shown in that widely circulated ladies' magazine.

This is an aristocrat among brides' bouquets. No choicer material could be found. Gardenias and cattleyas are used with the valley, and Farleyense, the choicest green, was employed. A lace bouquet scarf is partly obscured in the picture because the shower hangs in front of it. It will be noted that the cattleyas and gardenias were placed so as to stand above the valley just enough to bring them into the prominence desired.

The Aristocrat Among Brides' Bouquets.

SPRAYS OF SMALL FLOWERS.

Such Tiny Flowers as the Pansy.

Small flowers, if decided enough in color and well arranged, make charming sprays. Since the stems cannot be wired separately, as in the case of roses or carnations, they may sometimes be wired in small, slender bunches, with different lengths of stems in each, and the spray made on a deep though not thick foundation of green. Flat green, like Asparagus plumosus or adiantum, is not so useful for the foundation work of this style of spray as Sprengeri, which has strong foliage, able to hold itself up and some additional weight also.

Suppose it is a pansy spray that is to be made. If the supply at hand contains all colors of these velvet beauties, choose a color scheme if possible. Take the yellows, bronze and browns, shading into the reds. Tip the ends of the spray with the lightest and gradually work into the darker yellow, into the browns, and then the darkest of all under the tie. Or take the clearest white and blend with the blue and white, and thence into the dark blues, ending with the bluish black.

After deciding upon the color arrangement and the number of flowers which can be afforded for the price, select some graceful sprays of Sprengeri and rib them with pansies, or, in other words, wire on the flowers along the middle of the spray lengthwise, setting the flowers up as far as possible. No. 36 wire is the best for this, being strong enough to hold the stems in place and yet almost invisible in the completed work. Rib a number of the sprays of Sprengeri with the flowers and finally tie all together at the heavy ends of the sprays. Put plenty of green under the flowered sprays and raise the spray six or eight inches above the casket as it is placed there.

With a large spray, the most convenient method would be to tie in the center of the spray and let the branches of asparagus, with the pansies on them, extend in all directions like a shower. Add a little adiantum with the tie, which should be a cluster of narrow ribbon loops of a harmonious color. For example, with the yellow and bronze scheme use a corn colored tie, lighter than the yellow pansies. With the white and blue scheme, use a knot of white or light blue baby ribbon. Broad ribbon is scarcely suitable for small flowers.

Sweet Peas or Marguerites.

Sweet peas can be used similarly. Wire the separate bunches on No. 24 in 12-inch lengths. Fasten these upright along the rib of the Sprengeri spray, like bristles on an angry porker. Fasten the sections together as with the pansies, with a butterfly bow of narrow chiffon, training the ends and bows straight up. When completed, the spray will have the appearance of a number of radii extending carelessly from the bow tie, as the center,

THE RETAIL FLORIST.....

THE ARISTOCRAT OF BOUQUETS.

The season of spring weddings is at hand, and soon the leading retail florists will be busily engaged in catering to this class of desirable business. To all florists who serve the brides, the accompanying illustration of a shower bouquet will be of interest. It is one of the set made by W. J. Palmer, Buffalo, which were illustrated in the Ladies' Home Journal for April, so that a large number of the public will recognize it. It even is quite likely that there will be calls for just such a bunch because of its having been shown in that widely circulated ladies' magazine.

This is an aristocrat among brides' bouquets. No choicer material could be found. Gardenias and cattleyas are used with the valley, and Farleyense, the choicest green, was employed. A lace bouquet scarf is partly obscured in the picture because the shower hangs in front of it. It will be noted that the cattleyas and gardenias were placed so as to stand above the valley just enough to bring them into the prominence desired.

SPRAYS OF SMALL FLOWERS.

Such Tiny Flowers as the Pansy.

Small flowers, if decided enough in color and well arranged, make charming sprays. Since the stems cannot be wired separately, as in the case of roses or carnations, they may sometimes be wired in small, slender bunches, with different lengths of stems in each, and the spray made on a deep though not thick foundation of green. Flat green, like Asparagus plumosus or adiantum, is not so useful for the foundation work of this style of spray as Sprengeri, which has strong foliage, able to hold itself up and some additional weight also.

Suppose it is a pansy spray that is to be made. If the supply at hand contains all colors of these velvet beauties, choose a color scheme if possible. Take the yellows, bronze and browns, shading into the reds. Tip the ends of the spray with the lightest and gradually work into the darker yellow, into the browns, and then the darkest of all under the tie. Or take the clearest white and blend with the blue and white, and thence into the dark blues, ending with the bluish black.

After deciding upon the color arrangement and the number of flowers which can be afforded for the price, select some graceful sprays of Sprengeri and rib them with pansies, or, in other words, wire on the flowers along the middle of the spray lengthwise, setting the flowers up as far as possible. No. 36 wire is the best for this, being strong enough to hold the stems in place and yet almost invisible in the completed work. Rib a number of the sprays of Sprengeri with the flowers and finally tie all together at the heavy ends of the sprays. Put plenty of green under the flowered sprays and raise the spray six or eight inches above the casket as it is placed there.

With a large spray, the most convenient method would be to tie in the center of the spray and let the branches of asparagus, with the pansies on them, extend in all directions like a shower. Add a little adiantum with the tie, which should be a cluster of narrow ribbon loops of a harmonious color. For example, with the yellow and bronze scheme use a corn colored tie, lighter than the yellow pansies. With the white and blue scheme, use a knot of white or light blue baby ribbon. Broad ribbon is scarcely suitable for small flowers.

Sweet Peas or Marguerites.

Sweet peas can be used similarly. Wire the separate bunches on No. 24 in 12 inch lengths. Fasten these upright along the rib of the Sprengeri spray, like bristles on an angry porker. Fasten the sections together as with the pansies, with a butterfly bow of narrow chiffon, training the ends and bows straight up. When completed, the spray will have the appearance of a number of radii extending carelessly from the bow tie, as the center.

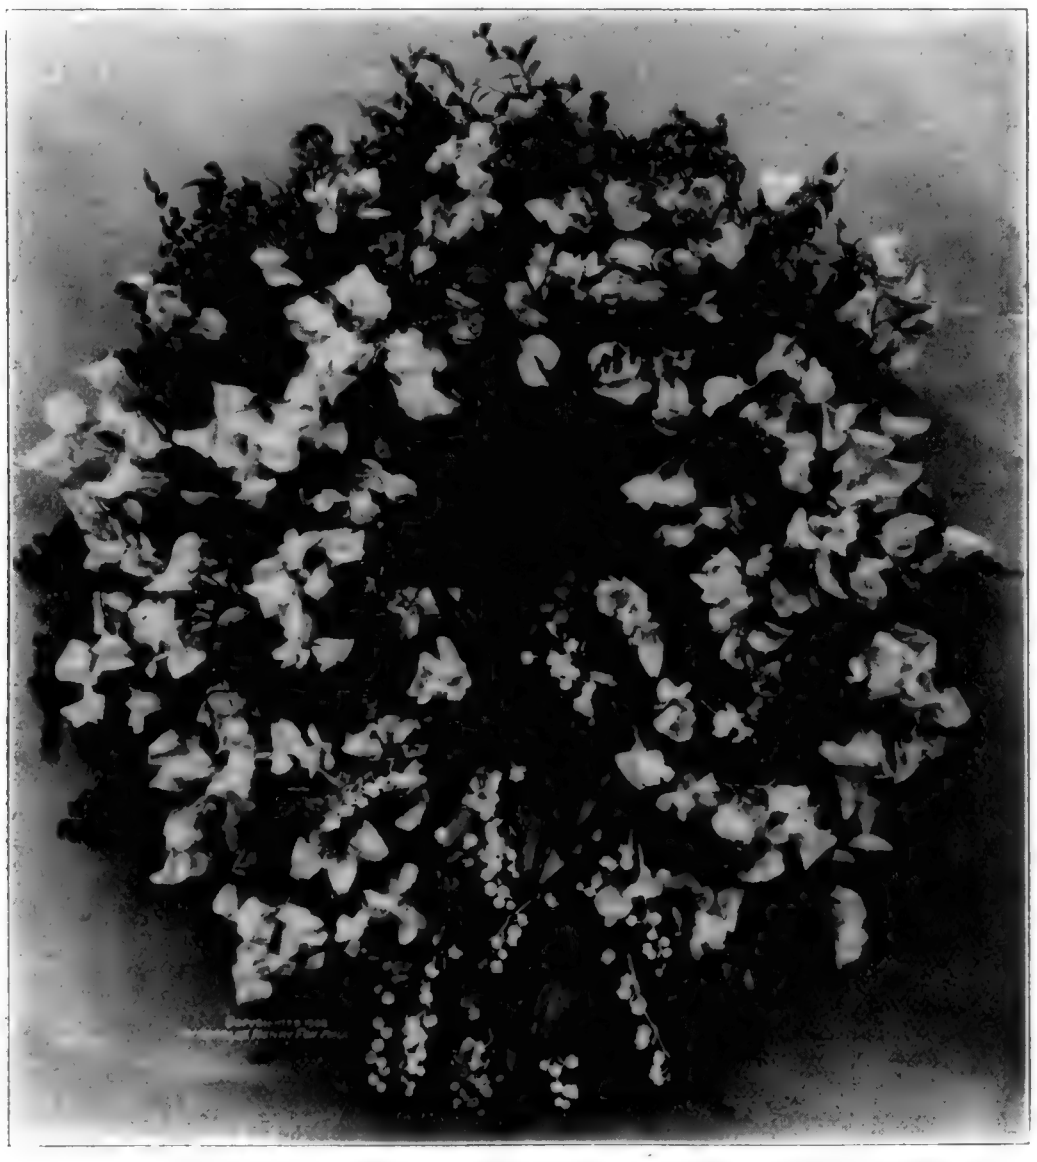
The Aristocrat Among Brides' Bouquets.

to various points on the circumference.

In combining peas, be careful to use Blanche Ferry with white only, Gladys Unwin or Lovely with King Edward, and Countess Spencer with the lavender and purples. Do not mix the reds or pinks. You will find that one kind of flowers in sprays is the favorite, rather than a mixture of small flowers, except in the case of such an indefinite color as is found in the forget-me-not. Not that the forget-me-not is really an indefinite color, but the effect of a mass of these flowers is too indistinct. Dot or tie the white rose spray with forget-me-nots for a child's funeral, and tie with that light blue chiffon for which you have heretofore found so little use.

Marguerites are beautiful, but, alas, it always comes to this: I have learned through bitter experience that they do not last. Try this: If the marguerites are rather short, wire them onto Sprengeri, as in the case of pansies and peas, and sprinkle liberally at the last minute.

If longer stems are used, make the spray in several sections and wrap the lower ends of the stems in a light layer of damp sphagnum. Cover the sphagnum above and below with green foil, to prevent the escape of moisture, and, for a finish, wrap with a scroll-like piece of birch bark over the stem portion. Turn back one corner and tie on a bow of green fiber ribbon. While this method will not entirely cure the defect of early wilting in the marguerites, it will greatly aid, and may, with care in sprinkling and late making up, almost do away with the objection to the use of these flowers out of water. This same method of wrapping the stems may be used with roses and other perishable flowers in hot weather, and will help to quite an extent.



Valley.

Valley is not easily arranged in a spray without its assuming a bunchy appearance and getting too thick in the center or base. Wire in their thin, tapering bunches on No. 24 wire and draw them together end for end in a suggestion of a crescent shape, tying in the center with a cluster of narrow ribbon and adiantums.

Some of these dainty flowers make a pretty finish over the stems of a spray of larger flowers, as sweet peas with pink roses, valley with roses or Easter lilies, sweet peas with carnations, etc. Sometimes extend this effect to a small shower falling to one or both sides of the stems. In this case, omit the ribbon tie. Occasionally stem a few small bunches of dainty flowers and insert them through the stems of the larger flowers, as in a design frame. Hide the picks with some extra green.

The tender stems of these small flowers are not easily handled and held in place without breaking them. Only a knack acquired by practice and experiment will accomplish this. Just tight enough to hold and not tight enough to break, is the object to be attained.

In making sprays of these cheaper outdoor flowers, it may be easier to realize the value of the work which has been sacrificed during the winter in the use of the more expensive flowers. Too often, in spray work especially, we fail to calculate on a reasonable amount for the work. It is scarcely possible to charge for work on small sprays, but it ought to be done on a spray amounting to $3 or more. Gertrude Blair.

The Wreath of Sweet Peas.

WREATH OF SWEET PEAS.

The wreath of sweet peas is one of the funeral designs by Charles Henry Fox, of the Sign of the Rose, Philadelphia. This wreath makes up beautifully and is especially appropriate for youth in the spring. The arrangement may be effectively carried out with lavender sweet peas and lily of the valley, or other color combinations will be equally beautiful. Phil.

REHDER'S CHURCH DECORATION.

That Will Rehder, of Wilmington, N. C., has some skill as a decorator is not only attested by the sample of his work which is shown in the accompanying illustration, but is also confirmed by the fact that there is a good call for his services in that line, both in his own city and in the surrounding districts. Of course, each of the two kinds of evidence—the quality of the work and the demand for it—has its own value and its own peculiar satisfaction, though the demand contributes more directly to the florist's pocketbook.

In describing the church decoration here shown, Mr. Rehder says that the main aisle was carpeted with white bleaching. At the end of each pew a bunch of Easter lilies and asparagus was placed, tied with No. 40 white satin ribbon. The windows were banked with southern smilax, and vases of Easter lilies were placed in each window. Garlands or festoons of southern smilax and white carnations were stretched from the chandeliers to the walls. The altar was banked with palms, ferns, primroses, and great bunches of Easter lilies and carnations. The flowers used on the side chandeliers were white carnations, tied with white satin ribbon.

FOREWARNED IS FOREARMED.

Few in the flower business have spent as much money in advertising as has the George Wittbold Co., Chicago. Operating three retail stores and doing an immense amount of garden work, as well as a large wholesale trade, the firm has for years employed printer's ink on a liberal scale. One of the things which has been discovered is that in advertising it pays to begin early. For that reason the Wittbold Co. does not wait until the season of actual demand before publishing its advertisements. The aim is to anticipate the actual demand, so that when the time for buying comes the name of Wittbold and the facilities of the concern will be impressed on the mind of the customer. With this thought in view, Wittbold has been advertising in leading Chicago dailies all through the month of May, calling attention to the company's facilities for executing orders for bouquets and for decorations for the June weddings, which for a month now will be the most important item with every high class retail florist.

Poughkeepsie, N. Y. — The Saltford Flower Shop had an especially pleasing decoration at the Vasser Institute, May 11.

Omaha, Neb.—At a recent meeting of the Hanscom Park Improvement Club, attended by the mayor, council and city engineer, one of the improvements brought up for discussion was the building of a greenhouse.

Church Wedding Decoration by Will Rehder, Wilmington, Del.

SOME DESIRABLE BIENNIALS.

Time to Sow the Seeds.

The present is a suitable time to make sowings of a number of biennials. Too often this is left until July or August, with the result that the plants do not attain a size and strength which will insure many of them blooming the following season. A suitable place to sow seeds of biennials is a coldframe. The sashes can be covered with cheese-cloth or some similar material, but it is well to leave some ventilation on all the time. For compost, a mixture of half loam and leaf-mold will be found ideal for starting the seedlings. Do not sow broadcast, but in straight rows run closely together, and be sure to cover the seeds lightly. Some varieties to be sown now are Campanula Medium, Canterbury bells. The single, and calycanthema or hose in hose varieties are better than the doubles, light blue, pink and pure white being the best colors. These will be found useful as pot plants for either Easter or Memorial day, for which purpose they can be lifted about the middle of October.

Digitalis purpurea, the foxglove, is always a popular biennial. It can be grown a third season with good success. The Ivery's spotted and gloxiniæflora strains are fine. Sow the seed thinly; being small, there is a danger of scattering it much too thickly. The Chinese larkspurs, Delphinium grandiflorum or Chinense, will bloom the same season if sown now, but the plants will be strong for flowering another season.

The aquilegias, or columbines, while really perennials, are more often treated as biennials. They are beautiful, hardy border plants, and charm all who see them when well bloomed. The seeds of these can still be sown. They grow more slowly than the digitalis and campanulas, and must stay in the seed bed longer.

WEDDINGS

All bridal couples truly appreciate the floral decoration of the home and church on their wedding day. We anticipate this by furnishing the services of competent men to do all the decorating and attend to every detail. We furnish festooning, scenery, canopies; in short, every detail, with that skill which can only result from long experience in this business.

We grow all our own flowers, hence our bridal bouquets and other flowers are absolutely fresh.

Our prices are always reasonable.

Advice, suggestions and information furnished free.

A Retailer's Newspaper Advertisement.

Good varieties are chrysantha, glandulosa, Stuarti, cærulea and Haylodgensis, the latter a hybrid of cærulea. There is no finer variety than A. cærulea, the Rocky Mountain columbine.

Hollyhocks, if sown now, will make big plants before fall. It is a mistake to leave the sowing of these until the end of July.

Almost any perennials of which it is desired to increase the stock can now be sown in frames vacated by bedding stock, pricking them outdoors during cool, moist weather.

It is, of course, too early to think of sowing such seeds as myosotis, rocket, violas, pansies and daisies.

The continual increase in the call for hardy herbaceous plants would seem to afford an opportunity for many country florists to raise good batches of some of the more popular and showy kinds. It is not possible to start all from seeds easily, but many are easily started in this way, and now is a good time to make a commencement. As with all other flowers, buy the best strains procurable; they are far the cheapest.

DENVER, COLO.—The greenhouses at 901 Jason street, belonging to James Benton, were almost entirely destroyed May 5, by a fire which was started by sparks from a railroad engine.

ITHACA, N. Y.—The State Legislature has appropriated $30,000 for the building of greenhouses for the Department of Horticulture, to take the place of the old buildings. The new houses will stand on the slope southeast of the Agricultural College buildings, just below the Carnegie filtration plant and north of the new athletic field. This ground slopes to the west, and will be terraced.

[illegible] and other perishable flowers in hot [illegible] will help to quite an extent.

Valley.

[illegible] of tastily arranged [illegible] spray [illegible] is assuming a bunchy appearance [illegible] getting too thick in the center [illegible] Wire them, taper[illegible] No. 24 wire and draw them together once or twice and [illegible] a suggestion of a crescent shape, tying in the center with a [illegible] of narrow ribbon and adjust the loops.

Some of these dainty flowers make a pretty finish over the stems of a spray of larger flowers, as sweet peas with pink roses, valley with roses or Easter lilies, sweet peas with carnations, etc. Sometimes extend this effect to a small shower falling to one or both sides of the stems. In this case, omit the ribbon tie. Occasionally stem a few small bunches of dainty flowers and insert them through the stems of the larger flowers, as in a design frame. Use no picks in [illegible] greens.

The tender stems of these small flowers are too easily handled and held in place without breaking them. Only a knack acquired by practice and experiment will accomplish this. Just tight enough to [illegible] not tight enough to break is the object to be attained.

In making sprays of these cheaper outdoor flowers, it may be easier to realize the value of the work which has been sacrificed during the winter in the use of the more expensive flowers. Too often, in spray work especially, we fail to calculate on a reasonable amount for the work. It is scarcely possible to charge for work on small sprays, but it ought to be done on a spray amounting to $3 or more. GERTRUDE BLAIR.

The Wreath of Sweet Peas.

[illegible] the [illegible] stub pipe of [illegible] wire the stems portion. Turn [illegible] wire and [illegible] to [illegible] a bow of [illegible] about. With this method [illegible] only [illegible] the outset of early [illegible] [illegible] insecticides, it will greatly [illegible] [illegible] care in sprinkling and [illegible] making [illegible] almost do away with the [illegible] [illegible] the use of these flowers out [illegible] [illegible] Thus same method of wrapping [illegible] stems may be used with roses

WREATH OF SWEET PEAS.

The wreath of sweet peas is one of the funeral designs by Charles Henry Fox of the Sign of the Rose, Philadelphia. This wreath makes up beautifully and is especially appropriate for youth or the spring. The arrangement may be effectively carried out with lavender sweet peas and lily of the valley, or other color combinations will be equally beautiful. PITH.

REHDER'S CHURCH DECORATION.

That Will Rehder, of Wilmington, N. C., has some skill as a decorator is not only attested by the sample of his work which is shown in the accompanying illustration, but is also confirmed by the fact that there is a good call for his services in that line, both in his own city and in the surrounding districts. Of course, each of the two kinds of evidence, the quality of the work and the demand for it, has its own value and its own peculiar satisfaction, though the demand contributes more directly to the florist's pocketbook.

In describing the church decoration here shown, Mr. Rehder says that the main aisle was carpeted with white bleaching. At the end of each pew a bunch of Easter lilies and asparagus was placed, tied with No. 10 white satin ribbon. The windows were banked with southern smilax, and vases of Easter lilies were placed in each window. Garlands or festoons of southern smilax and white carnations were stretched from the chandeliers to the walls. The altar was banked with palms, ferns, primroses and great bunches of Easter lilies and carnations. The flowers used on the side chandeliers were white carnations, tied with white satin ribbon.

FOREWARNED IS FOREARMED.

Few in the flower business have spent as much money in advertising as has the George Wittbold Co., Chicago. Operating three retail stores and doing an immense amount of garden work, as well as a large wholesale trade, the firm has for years employed printer's ink on a liberal scale. One of the things which has been discovered is that in advertising it pays to begin early. For that reason the Wittbold Co. does not wait until the season of actual demand before publishing its advertisements. The aim is to anticipate the actual demand, so that when the time for buying comes the name of Wittbold, or the facilities of the concern, will be impressed on the mind of the customer. With this thought in view, Wittbold has been advertising in leading Chicago mediums all through the month of May, calling attention to the company's facilities for executing orders for bouquets and for decorations for the home weddings, which for a month now will be the most important item of every high-class retail florist.

POUGHKEEPSIE, N. Y.—The Salttord Flower Shop has especially pleasing decorations at the Vassar Institute May 21.

OMAHA, NEB.—At a recent meeting of the Hanscom Park Improvement Club, attended by the mayor, council and city engineer, one of the improvements brought up for discussion was the building of a greenhouse.

Church Wedding Decoration by Will Rehder, Wilmington, Del.

SOME DESIRABLE BIENNIALS.

Time to Sow the Seeds.

The present is a suitable time to make sowings of a number of biennials. Too often this is left until July or August, with the result that the plants do not attain a size and strength which will insure many of them blooming the following season. A suitable place to sow seeds of biennials is a coldframe. The lights can be covered with cheesecloth or some similar material, but it is well to leave some ventilation on all the time. A compost, a mixture of half loam and leaf mold will be found ideal for starting the seedlings. Do not sow broadcast, but in straight rows run closely together, and be sure to cover the seeds lightly. Some varieties to be sown now are Campanula medium, Canterbury bells. The single, old calycanthema or host of those varieties are better than the doubles, light blue, pink and pure white being the best colors. These will be found useful as pot plants for either Easter or Memorial day, at which purpose they can be lifted about the middle of October.

Digitalis purpurea, the foxglove, is always a popular biennial. It can be sown at this season with good success.

Brown's spotted and gloxinaeflora varieties are fine. Sow the seed thinly; being small, there is a danger of scattering it too thickly. The Chinese larkspurs, Delphinium grandiflorum or Chinense, will bloom the same season if sown now, but the plants will be strong for covering another season.

The snapdragon, or columbines, while really perennials, are more often treated as biennials. They are beautiful, hardy border plants, and charm all who see them when well bloomed. The seeds of these can still be sown. They grow more slowly than the digitalis and campanulas, and must stay in the seed bed longer.

ORCHIDS

COCKROACHES ON ORCHIDS.

You will find under séparate cover an insect which has been attacking the tips of orchid roots this spring, and also last. Can you tell me the name of the insect, and best method of getting rid of it?

H. W. C.

The pest referred to and duly received is the cockroach, which if not kept in check will do great damage not only to roots, but also to tender foliage and flowers on orchids. It is also destructive on gardenias and some other flowers. Cockroaches love a dry heat, and are invariably to be found near boilers or in walls through which heating pipes pass. To keep them in check several remedies can be recommended. Mix up some lard, powdered sugar and white arsenic in paste form and lay it here and there on pieces of paper near their haunts. Both ants and roaches relish this toothsome decoction.

Another good plan is to sink a few glass jars containing some molasses and water in the floor, leaving the top of the jar level with the ground. Lay a smearing of molasses on the top to attract them. Many can be trapped in these jars. Stale bacon placed in jars is also a potent attraction. By trying each or all of these remedial measures and killing all you can see, especially at night, with the aid of a lantern, you will soon materially lessen the number of these pests, but their extermination, once they have obtained a good foothold, is difficult if not impossible. W. N. Craig.

SEASONABLE ORCHIDS.

Trichosma Suavis.

Trichosma suavis is not much seen in cultivation, being rather rare. It is occasionally grown as Cœlogyne coronaria and is commonly known as the hair orchid, from the crispy crests on the disk. A native of the Khassia Mountains, trichosmas succeed best in shallow baskets in an intermediate temperature, 55 degrees at night in winter being ample. Fern root mixed with a little sphagnum is a suitable compost, and the plants should be hung well up to the light and grown in a north house in summer. The flowers, which are carried on short racemes, closely resemble those of cœlogynes. They are creamy white in color, the tips having spots and margins of brownish crimson. The odor is very pleasing.

Ansellia Africana.

African orchids in cultivation are not numerous. Ansellia Africana is a strong growing variety, introduced in 1844 from Fernando Po. Large pots are necessary for its culture. They should contain ample drainage. A compost of coarse fern fiber and sphagnum is suitable. Little water is needed in the resting season and an abundant supply while growth is being made. The growths attain a height of three to five feet and carry light evergreen foliage. The drooping flower spikes are large, carrying twenty-five to 100 flowers, and are greenish-yellow in color, spotted with brownish-red. They are borne on the upper part of the bulbs. Ansellias require a warm house, 60 degrees at night in winter being as low as they should be grown.

ANOTHER NEW PLUMOSE FERN.

What is described as "the most beautiful sport that has yet appeared in this numerous family" of crested ferns is in the hands of Thomas Rochford & Son, Turnford Hall Nurseries, Broxbourne, Herts, the largest commercial greenhouse firm in England. The variety was exhibited May 4, before the Royal Horticultural Society, London, where the floral committee unanimously voted it an award of merit. It was staged under the name Nephrolepis exaltata Lycopodioides, and is said by the Horticultural Advertiser to be "an exquisite plumose form, so dense and mossy in appearance as to amply merit its varietal name." The fronds are smaller than in the case of some other varieties now in commerce.

DON'T RUB IT IN.

In all the years that nicotine preparations have been used in American greenhouses but one accident has been reported as a result of carelessness, but from England there come frequent tales of death and injury through ignorant use of this poison. The latest case is from the Hants and Sussex County Press of May 15:

"Two little girls have had a very narrow escape from being killed by nicotine, such as is used for fumigating greenhouses to destroy green fly. A boy, employed at Redlands Nursery, Emsworth, took some such preparation home with him, needless to say, without permission, which his mother used on the heads of the two little girls. Both the children became unconscious very quickly, and were for some time in a very precarious condition, but thanks to the skill of Dr. Glanville, of Emsworth, they have now recovered. We would urge upon gardeners to keep all such preparations carefully locked up."

SEASONABLE SUGGESTIONS

Callas.

With Memorial day the calla season practically ends. The flowers are now only a fraction of their normal size, and the yellowing of the foliage indicates the desire of the plants for a rest. Take the pots outdoors and lay them on their sides, where they can get plenty of sunshine. If you have a quantity of young offsets, not yet sufficiently strong to flower, the best way to strengthen them is to plant outdoors in rich soil. They will not make much growth until late summer, but by the early part of September they will have increased surprisingly in size and strength, when they can be carefully lifted and potted.

Cyclamens.

With the numerous other duties at this busy season, it is difficult to properly attend to the wants of all our plants, and some are liable to be a little neglected.

The little cyclamens will now be better removed to a coldframe, where they can be stood on a bed of clean ashes. Here they will be well up to the light, and can get an abundant supply of air. Until we get warmer and more settled weather, it is inadvisable to leave the sashes off at night, but on cloudy days we like to remove them for a few hours. Be sure that the young plants are not allowed to become matted in the pots. If they have become root-bound, carefully loosen the ball of roots with a pointed stick when repotting them.

Our largest plants are now in 4½-inch pots, and a smaller size are in 3-inch. For future shifts we will use a rather heavier soil, one containing no leaf-mold, but a mixture of fibrous loam, rotted cow manure and sand. It is better to leave out bone and other fertilizers and apply these in the form of top-dressings later. Keep the surface soil loosened and fumigate to keep thrips in check. Run lath shades over the plants during bright sunshine, rather than shade the glass.

Nephrolepis.

With Memorial day stock out of the way, many carnations practically done and more vacant greenhouse space than we have had for many months, it is possible to give some attention to increasing the stock of nephrolepis. If a small house can be given up to these, all the better. If not, a side bench can be utilized to good advantage. Cheese-cloth can be tacked along the front of the bench to keep the air away. Nephrolepis do well in a good loam; a little leaf-mold or decayed manure is not objectionable. An abundant crop of runners will now be found on the old plants, and if these are gotten in at once they will make nice stock by fall. Of course, if this work

Ansellia Africana.

had been done two months earlier, it would have been better, but it paid to utilize space for other stock then. If you have no runners of your own, now is the time to order some from one of the numerous advertisers.

Nothing yet beats the old Boston; next to that come Whitmani and Pierson's fine form. Of Scottii less is grown than two or three years ago. Allow your plants eight to twelve inches apart each way in the benches. Soak well with water and spray lightly on all warm days. You will be surprised at the headway the plants will make.

Bouvardias.

Bouvardias should now be well hardened and ready to plant out in rows in the field. Allow them fifteen inches between the plants, and in the case of Humboldtii, which is the most robust grower, even more space is better. The plants will need little attention during summer, except the removal of flowers and any necessary pinching. Bouvardias are brittle and easily broken during wind and rain storms; therefore we like to use a stout stake for each plant and tie the leading shoots on to it early in August.

For cutting outdoors it will pay to grow a good row of the large, pure white, fragrant B. Humboldtii.

Peonies.

The peony season has begun. The plants in northern latitudes look remarkably thrifty, being loaded with big buds which in a few weeks will make a glorious display. If you want big blooms, disbud your flowers. You can also improve them wonderfully by scattering a little nitrate of soda or sulphate of ammonia around each plant, later hoeing over the surface. The first rain will carry this to the plant roots, and it will be found decidedly stimulating. After a good rainfall, if you can spare the time to run a few tubs of liquid manure among your peonies, it will also do them a world of good. Guano water is excellent, if you cannot get cow or sheep manure conveniently.

Take note of the peonies as they come in season. They are destined to become more popular every year, and the man who stocks up on varieties with taking colors which are wanted in the markets is making a good, safe investment.

Asters.

The early batch of asters should be planted out at once, if they are not already in the ground. Ground well enriched with cow manure and which has been plowed, harrowed and leveled with a smoothing harrow will grow fine asters. Grass land suits them well, but is liable to give more cutworms and other pests.

Set the plants in rows two feet apart and allow eight to twelve inches between the plants. The latter distance is necessary with such sorts as Queen of the Earliest, Semple's and Vick's Branching. Victoria, peony flowered and chrysanthemum can go closer together.

Cutworms will raise havoc with the young plants, and on their appearance being noted, mix up a mash of fresh shorts (bran), molasses and Paris green, dropping it here and there. Keep the mixture off the plants, as the Paris green will burn them.

Hardy Roses.

With the first appearance of aphis use the force pump or sprayer and wet the foliage thoroughly with kerosene emulsion. You can use whale oil soap also for the same purpose, but remember the foliage is now tender and easily burned; therefore use care not to get it too strong. Manetti suckers will probably be showing on some plants. These should be cut out clean, and they will not cause any future trouble. If your plants did not get any spring top-dressing, apply one now in the form of dried blood or cow manure. There is nothing better than the latter, if you can get it conveniently. A mulch of it will make a wonderful difference to your plants.

Chrysanthemums.

Without wishing to trespass on Mr. Totty's department, we would say that mums for first-class blooms should be planted out as soon as possible, but many florists prefer medium blooms, and it is possible to root these for two months yet and get nice flowers. We saw a fine house of single stems last year, the cuttings of which were not put in until June 10. Of course, these were not fancy flowers, but of good, useful, commercial size. The present is a good time to put in cuttings of varieties suitable for growing into bush plants in 6-inch or 7-inch pots. These plants, if kept growing along under glass, will make excellent little stock, just the kind many of your customers will want.

BEVERLY, MASS.—J. W. Philbrick, of Hale street, will remove to a new building on Abbott street as soon as it is ready for occupancy.

NORTH CAMBRIDGE, MASS.—John McKenzie is considering plans for the improvement of his property at the corner of Massachusetts avenue and Davenport street by the erection of a modern block.

Trichosma Suavis.

COCKROACHES ON ORCHIDS.

You will find under separate cover an insect which has been attacking the tips of orchid roots this spring, and also last. Can you tell me the name of the insect, and best method of getting rid of it?

The present is a good time to put in cuttings of varieties suitable for growing into bush plants in 6-inch or 7-inch pots. These plants, if kept growing along under glass, will make excellent little stock, just the kind many of your customers will want.

BEVERLY, MASS.—J. W. Philbrick, of Hale street, will remove to a new building on Abbott street as soon as it is ready for occupancy.

NORTH CAMBRIDGE, MASS. John McKenzie is considering plans for the improvement of his property at the corner of Massachusetts avenue and Davenport street by the erection of a modern block.

Trichosma Suavis.

DOROTHY PERKINS' CUP.

Jackson & Perkins Co., Newark, N. Y., have received the silver trophy known as the Nickerson cup, awarded to them last spring by the National Rose Society in England, and are extremely proud of their trophy, as of twelve such cups this is the only American firm to receive one.

It will be recalled that W. E. Nickerson, of Cambridge, Mass., gave the National Rose Society twelve cups to be awarded to the twelve best roses for general cultivation. The committee in charge sent voting papers to a large number of leading rosarians in England and elsewhere and invited them to indicate their choice of varieties in each of twelve divisions.

Reference to the Review of July 9, 1908, in which the result was reported, shows that Jackson & Perkins Co. was right in the front rank with Dorothy Perkins, the variety which it raised and disseminated in 1901. In the class for climbers blooming in clusters, shades of pink, Dorothy Perkins had more than seven times as many votes as any other variety. It had nearly twice as many votes as were given Turner's Crimson Rambler in its color, and there were only two varieties, Mme. Alfred Carriere and Frau Karl Druschki, which received more votes in their respective classes than did Dorothy Perkins. Dorothy Perkins was the only rose of American origin which figured in the awards.

The cup bears the inscription, "National Rose Society Nickerson Cup, awarded in 1908 to the Jackson & Perkins Co., Newark, N. Y., U. S. A., the raisers of the best pink climbing rose blooming in clusters, Dorothy Perkins," and under the circumstances is naturally one of the firm's most valued possessions.

AMERICAN ROSE SOCIETY.

Mrs. Gertrude Hubbard, of Washington, D. C., has established a gold medal fund for the American Rose Society by placing the sum of $250 in the treasury, the interest from which shall each five years be used for a gold medal to be awarded to the most promising new rose of American origin.

Mrs. Hubbard all her life has taken much interest in stimulating and encouraging people, young and old, to make attractive homes and keep surroundings pretty. Mrs. Hubbard was created the first honorary member of the Rose Society. Peter Bisset, superintendent of Twin Oaks, Washington, was Mrs. Hubbard's agent in the matter.

Doubleday, Page & Co., New York city, have submitted a proposition of interest concerning the awarding of a series of medals, which will be acted upon at the next meeting of the executive committee.

Roses are being planted out this year more extensively than common and if the rose plant growers are wise they will throw their support to the American Rose Society by becoming active members.

Benjamin Hammond, Sec'y.

CROPS FOR HOUSE IN SUMMER.

I am not a large grower, by any means, and I grow mostly bedding stock, probably 12,000 plants in a season, but it seems to me I should make use of my space when it is not occupied by the bedding stock. I have had no experience outside of bedding stock. My market for this stock is in small surrounding towns, within a radius of about six miles, and there would be no call for cut flowers. Anything in the cut flower line would have to be sent to Pittsburg, a distance of twenty-six miles by rail. Could I grow mums or anything in time to be out of the way for bedding stock, and at a profit this distance from the city? I could spare the most of a house 18x100, at least three-fourths being from three to seven feet from the glass on raised benches, or, in other words, over 900 square feet of planting space. Another 300 feet is too close to the glass for anything tall.

I grow vegetables and fruits, besides doing a business in poultry and eggs, and the flowers go with these nicely, as the same customers usually buy some of all. We are surrounded by many small towns and usually sell directly to the consumer as well as to grocery stores. E. B.

There is no good reason why you could not get some returns from your house in summer. I am inclined to think that vegetables would pay you better than flowers. If chrysanthemums were grown, only very early sorts could be planted, and these would need to be out of the way early in October. There are no summer flower crops which can be planted after bedding stock is sold and which would pay you to grow under glass.

It would be possible for you to grow good crops of melons, cucumbers or tomatoes in your house. The benches should be filled with new compost containing a good proportion of rotted barnyard manure, and plants should be ready in pots to set in as soon as the house is cleared of bedding stock. Any of the above-named vegetables can be grown either trained or allowed to ramble over the benches, but I should have a preference for tomatoes, which always command a ready sale in summer. Such varieties as Chalk's Early Jewel, Comet, Stirling Castle or Livingston's Stone are all good for summer culture indoors. You should start seeds sufficiently early so as to have strong plants in 4-inch pots ready to put in the benches as soon as the house is ready for them. On the front bench, where there is a lack of head room, you could allow the plants to run over the bench, or grow melons. Tomatoes will, of course, require an abundant water supply, and feeding with liquid manure and top-dressings when fruiting heavily. Careful culture of these should give you a handsome return from your house in the summer. C. W.

CARNATION NOTES.—EAST.

Split Calyxes.

This is not the season of year when growers are troubled by calyxes splitting, but I am prompted by reading the article of H. M. Harvey, in the Review of May 6, to give a few ideas which may aid in carrying the discussion farther. It is my belief that his theory leads in the right direction, but, as he says, it remains to be proven.

Taking the botanists' statement regarding the growth of the green parts during the day only, while the development of the flower petals proceeds at night as well, it would not seem surprising during the winter months, when the periods of darkness are about twice as long as those of daylight, that the calyx should be too slow in development to accommodate the more rapid growing petalage. As is well known, we are then producing bloom out of natural season, and any variation in temperature sufficient to cause a check will naturally show its effect in more marked degree.

Factors in the Trouble.

A sudden fall in the temperature, or a temperature that is continuously too low, has been considered a cause of calyxes splitting, from the fact that when this error was corrected, the trouble ceased or diminished; this would seem to prove its being a factor, at least. The application of strong liquid manure, or supplying a solution of normal strength when the plants are suffering from lack of water, is also regarded as a means of aggravating this malady.

Now, while it is contrary to my usual custom to advance theories, Mr. Harvey's article follows ideas so similar to my own that I feel warranted in adding thereto, trusting we shall be favored with the

Anchusa Italica Dropmore in the Nursery Row.

views of others. That part of his theory relative to night and day temperature does not, however, impress me as being a remedy. GEO. S. OSBORN.

ANCHUSA ITALICA DROPMORE.

Anchusa Italica, commonly known as the Italian alkanet, has been a well-known hardy herbaceous perennial for many years. The new form named Dropmore, in honor of a noted English estate, is of a much more beautiful blue color, being, in fact, one of the purest blues I know of. When introduced a few years ago and exhibited before the Royal Horticultural Society in London by a noted firm of hardy plant specialists, it at once jumped into popularity, and in America, where it is now fairly common, it has also become a great favorite.

This anchusa is of easy culture. The easiest method of propagation is from seeds, which, if sown in early spring and transplanted to the open ground in May, will make heavy plants to set out in the fall. The early flowering of this plant, its great freedom and charming color, are all strong points in its favor, and in the herbaceous border it should always find a place. Of vigorous habit, this anchusa occasionally attains a height of five to six feet, although more commonly it is seen half this height. A light winter coating of leaves when the ground freezes is all the protection it requires. W. N. CRAIG.

BENTON HARBOR, MICH.—C. Edinborough, on Rural Route No. 4, is building a greenhouse.

THE WATER GARDEN.

[An extract from a paper by Peter Bisset, read before the Boston Gardeners' and Florists' Club May 18.]

There is no more fascinating pursuit connected with horticulture, certainly none that gives greater pleasure and enjoyment to the owner, than the cultivation of a water garden. This is brought about from various reasons, chief among which is the important part played by water in all well ordered landscape effects; secondly, the wealth and diversity of color, the great range of beauty, the interesting historical associations of many of the water plants employed and their unique manner of flowering.

Location of the Water Garden.

In selecting the location of a pond or pool in which to grow water lilies, the ground should be gone over carefully, and a site chosen where a supply of water, either from a natural stream or from an artificial source, will be provided. The location should, if possible, be sheltered by buildings, by a planting of trees and shrubs far enough away from the edge of the pond so that they will not overshadow the water, or by a high bank on the northwest, northeast and north, but open towards the south, southwest and southeast. This will insure the full benefit of the sun's rays in warming the water, and, at the same time, afford protection from high winds that soon would ruin the tropical growth of the tender water lilies and the subtropical plants in the surrounding borders. If the pond is intended for the growth of hardy kinds only, it will not be necessary to protect it, as these will thrive in a much lower temperature than the tender ones, and the leaf surface of the hardy sorts is so small that they are never seriously damaged by the wind. In making a pond for the cultivation of water lilies for pleasure, it is well not to have it so wide that one cannot enjoy the flowers at close range. The greatest width should not exceed seventy-five feet. The flowers never rise above the water more than fifteen inches, except in the case of the nelumbiums, which grow to a height of from two to eight feet out of the water. But with water lilies proper, one has to get near them to enjoy the full beauty and exquisite coloring of the flowers.

Material for Pools.

The best material that can be used for the formation of all ponds and pools is, without doubt, hydraulic cement, from which an inexpensive and easily made artificial stone can be had that will stand the test of all climates, and be proof against all boring pests. The concrete wall can be carried up to within six inches of the ground level, and grass be grown on top of the wall, presenting a natural appearance, or the wall may be carried above the ground level and finished with a coping. In many places there are natural ponds, which, at little expense, can be made very beautiful and a joy to their owners.

The first consideration is the source of the water supply. Is it subject from any cause to a wash that would render it at times unsightly, by the quantity of muddy water carried into it by heavy rains? Or is there a stream passing through the pond from springs, which, being cooler, will lower the temperature of the water it contains? If so, then the stream must be diverted so that it cannot

THE WATER GARDEN.

[An extract from a paper by Peter Bisset, read before the Boston Gardeners' and Florists' Club May 18.]

There is no more fascinating pursuit connected with horticulture, certainly none that gives greater pleasure and enjoyment to the owner, than the cultivation of a water garden. This is brought about from various reasons, chief among which is the important part played by water in all well ordered landscape effects; secondly, the wealth and diversity of color, the great range of beauty, the interesting historical associations of many of the water plants employed and their unique manner of flowering.

Location of the Water Garden.

In selecting the location of a pond or pool in which to grow water lilies, the ground should be gone over carefully, and a site chosen where a supply of water, either from a natural stream or from an artificial source, will be provided. The location should, if possible, be sheltered by buildings, by a planting of trees and shrubs far enough away from the edge of the pond so that they will not overshadow the water, or by a high bank on the northwest, northeast and north, but open towards the south, southwest and southeast. This will insure the full benefit of the sun's rays in warming the water, and, at the same time, afford protection from high winds that soon would ruin the tropical growth of the tender water lilies and the subtropical plants in the surrounding borders. If the pond is intended for the growth of hardy kinds only, it will not be necessary to protect it, as these will thrive in a much lower temperature than the tender ones, and the leaf surface of the hardy sorts is so small that they are never seriously damaged by the wind. In making a pond for the cultivation of water lilies for pleasure, it is well not to have it so wide that one cannot enjoy the flowers at close range. The greatest width should not exceed seventy five feet. The flowers never rise above the water more than fifteen inches, except in the case of the nelumbiums, which grow to a height of from two to eight feet out of the water. But with water lilies proper, one has to get near them to enjoy the full beauty and exquisite coloring of the flowers.

Material for Pools.

The best material that can be used for the formation of all ponds and pools is, without doubt, hydraulic cement, from which an inexpensive and easily made artificial stone can be had that will stand the test of all climates, and be proof against all boring pests. The concrete wall can be carried up to within six inches of the ground level, and grass be grown on top of the wall, presenting a natural appearance, or the wall may be carried above the ground level and finished with a coping. In many places there are natural ponds, which, at little expense, can be made very beautiful and a joy to their owners.

The first consideration is the source of the water supply. Is it subject from any cause to a wash that would render it at times unsightly, by the quantity of muddy water carried into it by heavy rains? Or is there a stream passing through the pond from springs, which, being cooler, will lower the temperature of the water it contains? If so, then the stream must be diverted so that it cannot

enter the pond unless desired by the owner. This can be done by an open ditch, dug so as to skirt the pond and at some distance from it. If no stream is available the water can be taken from a well, or the city supply where such exists; or, if the pond is not too large, the down-spouts that conduct the rain water from the roofs of the buildings can be run to the pond. This supply will be found sufficient to supply all loss from evaporation in the average season, and to keep the water in good condition.

Fertility Essential.

To grow all nymphæas and nelumbiums successfully they must be supplied with good, rich soil in abundance. For best results, prepare the soil as carefully as you would for roses or any other greenhouse plants. The sod from an old pasture, with soil inclined to a heavy clay texture, is the best for water lilies. This should be taken to a depth of four inches, and mixed with an equal amount of cow manure, and the whole turned several times to get them well incorporated; half a pound of bone meal to every cubic foot of soil will prove of benefit to most soils.

In planting roots in large natural ponds, the roots should be pressed down into the soft mud, two to three inches deep, and held in place by stones until the plants get well rooted. If this is not done the roots may be disturbed and rise to the surface. The majority of the hardy water lilies increase rapidly from the roots; therefore, they should have plenty of room between the plants; the stronger varieties should be planted from eight to ten feet apart, the weaker growing varieties in proportion. The planting of hardy water lilies can be done at any time from the start of growth in the spring up to the last week of August.

The tender or tropical water lilies should not be planted until settled warm weather arrives; for the latitude of Boston, not before the middle of June. Planting in boxes or tubs is by all means the best method of growing water lilies, as then they are confined to the space allowed to each one. The size of the boxes should be 2x2 feet and one foot deep for the smaller lilies, and 4x4x1 for the large night-blooming class. For the Victoria Regia a box 8x8x1 will be none too large.

Care After Planting.

After the lilies have been planted their wants are few. All decaying leaves and flowers should be removed as soon as they begin to look unsightly. If green scum should gather on the surface of the water, it should be washed towards the overflow pipe with the hose, where it can easily be got rid of. Green scum will form wherever new soil and manure have been added to the pond, the still, warm water having a tendency to promote the growth of these particular algæ. From twenty-three grains to five drams troy of sulphate of copper for every 1,000 gallons of water will prove a sure preventive of algæ. The amount of sulphate of copper that can be used will depend upon the amount of lime in the water. The best way to apply the copper is to suspend the crystals in the water in bags from mosquito netting, distributing them about the pond.

One thing we must not forget, and that is to have plenty of goldfish in the pond to keep down insect life in the larval stage; otherwise the pond will become a nuisance, and countless numbers of mosquitoes be bred and reared to the adult stage in the water. With plenty of fish in the pond, not a single mosquito will ever get beyond the wriggler stage.

Phytelephas Macrocarpa.

Wheeling, W. Va.—Fred Davidson has made an offer to Chief Terrill to furnish flowers and care for them for two years on the condition that the city erect a new city building. He will plant the flowers on the lawn of the new building, do the sodding and take care of them in every way for the two years.

PHYTELEPAS MACROCARPA.

Vegetable ivory has been known as an article of commerce from South America for the last half century, being used in a multitude of small articles, such as buttons, toys and various ornaments, instead of the real ivory, probably on account of its smaller cost.

This vegetable ivory is produced by the plant we now illustrate, Phytelephas macrocarpa, a plant that is commonly spoken of as the ivory nut palm, and one that is quite common in the northern portion of South America, being especially plentiful in New Granada.

Some botanists claim that phytelephas is not a palm, strictly speaking, from the fact that its flowers possess an indefinite number of stamens, instead of the usual six stamens that appear in the flowers of the majority of palms; but, be this as it may, the plant in question has the general appearance of a palm, and is considered as such in most books of reference.

The photograph shows a young plant, and thus does not give a good idea of what the mature specimen of this species attains to, for the latter has magnificent leaves that are fifteen to twenty feet long, nearly erect and gracefully arching, these leaves proceeding from a short trunk.

The trunk or caudex of this palm seldom reaches a greater length than twenty feet, and most of this trunk is prostrate on the ground, the upright portion of the stem, from which the leaves grow, being about five or six feet in height.

This plant is unisexual, the male and female flowers being on separate trees, and it is said that the trunk of the male plant is much taller and more erect than that of the female.

The seeds, the part used as ivory, are produced in a compound drupe, or cluster of drupes, the cluster containing six or more seeds, and the whole covered with a warty-looking, wood-like covering, and weighing about twenty-five pounds. These fruit clusters have been given the name of negroes' heads, and when seven or eight such clusters are seen hanging around the stem of the tree the effect must be singular.

In its young state this palm has been grown more or less in greenhouses since 1846, and in that condition has leaves somewhat like those of a kentia, the stems being without spines and the foliage dark green.

Under cultivation phytelephas has usually been grown as a warm house palm, though sometimes used for outdoor decoration in summer, in Europe, but from the fact that it is not confined to low levels in the tropics, but also appears up to 3,000 feet above sea level, it would seem that high temperature at night would not be required for strong specimens. But its natural habitat is in moist ground, and from this we gather that an abundant supply of water is demanded for the welfare of this plant. While not specially considered as a trade palm, phytelephas is offered in small plants by a few growers in this country, and is doubtless to be found in various private collections.

W. H. Taplin.

Orlando, Fla.—The Luther greenhouses will be established on North Orange avenue as soon as the proper houses and conservatories can be built. Mr. Luther has purchased a large corner lot for the purpose.

Loading the Teams of Arthur Dummett, Mt. Vernon, N. Y.

DUMMETT OF MT. VERNON.

At Mt. Vernon, N. Y., Arthur Dummett has its headquarters. "It" because Arthur Dummett is a corporation, with Mr. Dummett, a young man full of the progressive spirit, the head of the concern. A branch is maintained at White Plains, opposite the post-office, and in the accompanying illustration the Arthur Dummett teams are seen loading up at the Mt. Vernon place with stock for the White Plains store. Mr. Dummett himself stands in the center, the figure in gray at the head of the double team. The company does a general business in the nursery and landscape gardening line, handling also plants, seeds, bulbs and fertilizers, with all other stock that goes to make up a horticultural depot. Business this spring has been specially good in the nursery and in landscape work, and now the demand for soft-wooded stock is becoming strong.

POTASH FOR PIGMENT.

If flowers are deficient in color, it is usual to lay it to the light—too much or too little—but it may be the soil. A writer in an English gardening magazine says he has found deficiency in potash in the soil means poor color in the crops:

"I grew Lychnis viscaria splendens plena on a rather light soil for a number of years, but could not induce it to produce the rich color I found on those grown, to all appearance, on the same kind of formation in another neighborhood. Some of my friends remarked that they must be different varieties, and in order to prove that they were the same I exchanged plants with the grower of the more richly colored ones, with the result that my soil and treatment produced the pale-colored flowers I had always obtained, and the soil of my neighbor converted my plant into one of a more decided hue of flower.

"This was not merely an isolated case among the plants I then grew, for even geraniums, lobelias and all outdoor plants lacked the distinguishing color of the varieties they represented in a more or less degree. This lack of color was most marked in red and purple flowers. I drew the attention of some eminent gardeners to the facts, and although all gave advice, yet when it was put to the test it proved valueless, so that I had almost despaired of arriving at a solution of the problem.

"At this stage, one of the professors of an agricultural college happened to call, and as we were looking at a plant of Lychnis dioica fl. pl., which had washed-out flowers, I asked if he could explain the deficiency of color. This he did by stating that potash was the chief element in organic coloring, and that my soil was evidently deficient in this alkali. He further explained that the chief constituent of the pigments just within the skin of the apple was potash, and, owing to a scarcity of this all-important ingredient in the soil, I could not expect either richly colored flowers or fruits. Pointing to some rhubarb, a little later, this gentleman remarked, 'That plant requires an exceptionally liberal supply of potash, and if you find it languishing under fairly generous treatment, you may safely conclude that it is unable to get sufficient potash to enable it to develop strong growth.' I learned then, too, that sulphate of potash and kainit were the best sources of supply of potash, and that the sulphate could be applied at any time, but kainit should only be used in late autumn and early winter.

"In order to test the correctness of those statements, I applied sulphate of potash to various plants which were growing side by side, of the same varieties. The amount of sulphate of potash employed was about one and one-half ounces to the square yard of surface of ground, and the beneficial effect was apparent at the end of the summer in the healthier trees and larger and more highly colored fruit. There was also evidence of the dressings of this sulphate when applied to bedding and other plants, convincing me that I had found the key to the cause of badly-colored flowers and fruits, and inducing me to employ it and kainit much more extensively than I would otherwise have done. Of course, it means time, and several applications, before a soil poor in potash can be made rich in this plant food constituent, so that it took some years to work it up to the desirable point, and occasional dressings afterwards to maintain it at this standard.

"If any other gardener has a difficulty in securing color in his flowers or fruit, all other essentials being provided for, I would advise him to try the effect of a dressing of sulphate of potash at the rate stated, and note the result. It takes time to become diffused in the soil, and to be taken up by the plants."

KILLING OUT POISON IVY.

Will you please let me know the proper name of that poisonous vine commonly known as poison oak or poison ivy? And how can I kill it out of a stone wall? Some of the vines are nearly an inch in diameter. What can I put on my hands and face while exterminating it, as my skin is very sensitive and I get poisoned while working near-by? W. M.

The botanical name of poison ivy is Rhus Toxicodendron. If leather gloves are worn when handling this vine and care is taken not to bring the gloved hands in contact with the face, probably no serious trouble will result.

To exterminate it, all of the vine that is visible should be cut away with shears or anything that can be used effectively, and then during the growing season all succeeding growth should be cut away. If this fails, try a strong solution of salt in hot water, using the solution while still hot. If even that fails, try muriatic acid, being extremely careful not to get any of the acid on any part of the person. D. M.

LINCOLN, ILL.—The owners of the West End Greenhouses have dissolved partnership. Otto Hembreiker retires from the concern and Hans Schmalzl remains in charge of the business, which has grown to a considerable establishment as the result of the hard work both partners have put into it.

enter the pond unless desired by the owner. This can be done by an open ditch, dug so as to skirt the pond and at some distance from it. If no stream is available the water can be taken from a well, or the city supply where such exists; or, if the pond is not too large, the down spouts that conduct the rain water from the roofs of the buildings can be run to the pond. This supply will be found sufficient to supply all loss from evaporation in the average season, and to keep the water in good condition.

Fertility Essential.

To grow all nymphaeas and nelumbiums successfully they must be supplied with good, rich soil in abundance. For best results, prepare the soil as carefully as you would for roses or any other greenhouse plants. Fresh soil from an old pasture, with soil inclined to a heavy clay texture, is the best for water lilies. This should be taken to a depth of four inches, and mixed with an equal amount of cow manure, and the whole turned several times to get them well incorporated; half a pound of bone meal to every cubic foot of soil will prove of benefit to most soils.

In planting roots in large natural ponds, the roots should be pressed down into the soft mud, two to three inches deep, and held in place by stones until the plants get well rooted. If this is not done the roots may be disturbed and rise to the surface. The majority of the hardy water lilies increase rapidly from the roots; therefore, they should have plenty of room between the plants; the stronger varieties should be planted from eight to ten feet apart, the weaker growing varieties in proportion. The planting of hardy water lilies can be done at any time from the start of growth in the spring up to the last week of August.

The tender or tropical water lilies should not be planted until settled warm weather arrives; for the latitude of Boston, not before the middle of June. Planting in boxes or tubs is by all means the best method of growing water lilies, as then they are confined to the space allowed to each one. The size of the boxes should be 2x2 feet and one foot deep for the smaller lilies, and 4x4x1 for the large night blooming class. For the Victoria Regia a box 8x8x1 will be none too large.

Care After Planting.

After the lilies have been planted their wants are few. All decaying leaves and flowers should be removed as soon as they begin to look unsightly. If green scum should gather on the surface of the water, it should be washed towards the overflow pipe with the hose, where it can easily be got rid of. Green scum will form wherever new soil and manure have been added to the pond, the still, warm water having a tendency to promote the growth of these particular algae. From twenty-three grains to five drams troy of sulphate of copper for every 1,000 gallons of water will prove a sure preventive of algae. The amount of sulphate of copper that can be used will depend upon the amount of lime in the water. The best way to apply the copper is to suspend the crystals in the water in bags from mosquito netting, distributing them about the pond.

One thing we must not forget, and that is to have plenty of goldfish in the pond to keep down insect life in the larval stage; otherwise the pond will become a nuisance, and countless numbers of mosquitoes be bred and reared to the adult stage in the water. With plenty of fish in the pond, not a single mosquito will ever get beyond the wriggler stage.

Phytelephas Macrocarpa.

PHYTELEPAS MACROCARPA.

Vegetable ivory has been known as an article of commerce from South America for the last half century, being used in a multitude of small articles, such as buttons, toys and various ornaments, instead of the real ivory, probably on account of its smaller cost.

This vegetable ivory is produced by the plant we now illustrate, Phytelephas macrocarpa, a plant that is commonly spoken of as the ivory nut palm, and one that is quite common in the northern portion of South America, being especially plentiful in New Granada.

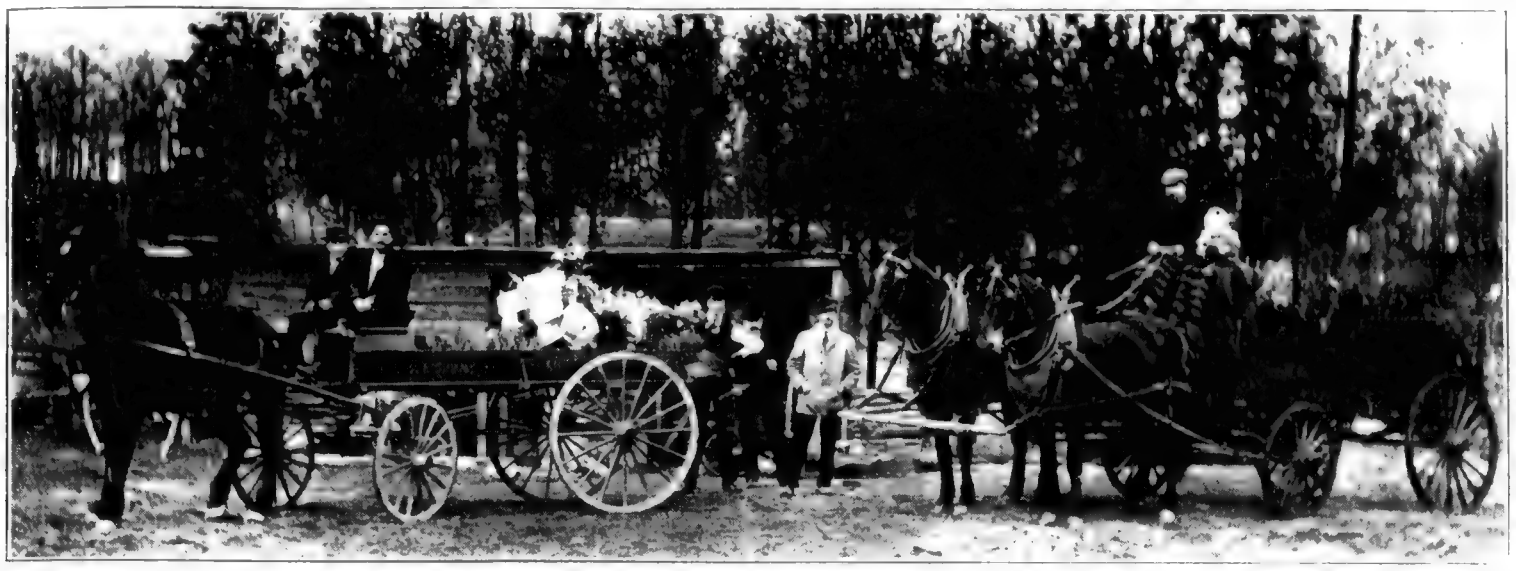
Some botanists claim that phytelephas is not a palm, strictly speaking, from the fact that its flowers possess an indefinite number of stamens, instead of the usual six stamens that appear in the flowers of the majority of palms; but, be this as it may, the plant in question has the general appearance of a palm, and is considered as such in most books of reference.

The photograph shows a young plant, and thus does not give a good idea of what the mature specimen of this species attains to, for the latter has magnificent leaves that are fifteen to twenty feet long, nearly erect and gracefully arching, these leaves proceeding from a short trunk.

The trunk or caudex of this palm seldom reaches a greater length than twenty feet, and most of this trunk is prostrate on the ground, the upright portion of the stem, from which the leaves grow, being about five or six feet in height.

This plant is unisexual, the male and female flowers being on separate trees, and it is said that the trunk of the male plant is much taller and more erect than that of the female.

The seeds, the part used as ivory, are produced in a compound drupe, or cluster of drupes, the cluster containing six or more seeds, and the whole covered with a warty-looking, wood-like covering, and weighing about twenty-five pounds. These fruit clusters have been given the name of negroes' heads, and when seven or eight such clusters are seen hanging around the stem of the tree the effect must be singular.



In its young state this palm has been grown more or less in greenhouses since 1846, and in that condition has leaves somewhat like those of a kentia, the stems being without spines and the foliage dark green.

Under cultivation phytelephas has usually been grown as a warm house palm, though sometimes used for outdoor decoration in summer, in Europe, but from the fact that it is not confined to low levels in the tropics, but also appears up to 3,000 feet above sea level, it would seem that high temperature at night would not be required for strong specimens. But its natural habitat is in moist ground, and from this we gather that an abundant supply of water is demanded for the welfare of this plant. While not specially considered as a trade palm, phytelephas is offered in small plants by a few growers in this country, and is doubtless to be found in various private collections.

W. H. Taplin.

Wheeling, W. Va. Fred Davidson has made an offer to Chief Terrill to furnish flowers and care for them for two years on the condition that the city erect a new city building. He will plant the flowers on the lawn of the new building, do the sodding and take care of them in every way for the two years.

Orlando, Fla. — The Luther greenhouses will be established on North Orange avenue as soon as the proper houses and conservatories can be built. Mr. Luther has purchased a large corner lot for the purpose.

Loading the Teams of Arthur Dummett, Mt. Vernon, N. Y.

DUMMETT OF MT. VERNON.

At Mt. Vernon, N. Y., Arthur Dummett has its headquarters. "It" because Arthur Dummett is a corporation, with Mr. Dummett, a young man full of the progressive spirit, the head of the concern. A branch is maintained at White Plains, opposite the post-office, and in the accompanying illustration the Arthur Dummett teams are seen loading up at the Mt. Vernon place with stock for the White Plains store. Mr. Dummett himself stands in the center, the figure in gray at the head of the double team. The company does a general business in the nursery and landscape gardening line, handling also plants, seeds, bulbs and fertilizers, with all other stock that goes to make up a horticultural depot. Business this spring has been specially good in the nursery and in landscape work, and now the demand for soft-wooded stock is becoming strong.

POTASH FOR PIGMENT.

If flowers are deficient in color, it is usual to lay it to the light—too much or too little—but it may be the soil. A writer in an English gardening magazine says he has found deficiency in potash in the soil means poor color in the crops:

"I grew Lychnis viscaria splendens plena on a rather light soil for a number of years, but could not induce it to produce the rich color I found on those grown, to all appearance, on the same kind of formation in another neighborhood. Some of my friends remarked that they must be different varieties, and in order to prove that they were the same I exchanged plants with the grower of the more richly colored ones, with the result that my soil and treatment produced the pale-colored flowers I had always obtained, and the soil of my neighbor converted my plant into one of a more deeded hue of flower.

"This was not merely an isolated case among the plants I then grew, for even geraniums, lobelias and all outdoor plants lacked the distinguishing color of the varieties they represented in a more or less degree. This lack of color was most marked in red and purple flowers. I drew the attention of some eminent gardeners to the facts, and although all gave advice, yet when it was put to the test it proved valueless, so that I had almost despaired of arriving at a solution of the problem.

"At this stage, one of the professors of an agricultural college happened to call, and as we were looking at a plant of Lychnis dioica fl. pl., which had washed-out flowers, I asked if he could explain the deficiency of color. This he did by stating that potash was the chief element in organic coloring, and that my soil was evidently deficient in this alkali. He further explained that the chief constituent of the pigments just within the skin of the apple was potash, and, owing to a scarcity of this all important ingredient in the soil, I could not expect either richly colored flowers or fruits. Pointing to some rhubarb, a little later, this gentleman remarked, 'That plant requires an exceptionally liberal supply of potash, and if you find it languishing under fairly generous treatment, you may safely conclude that it is unable to get sufficient potash to enable it to develop strong growth.' I learned then, too, that sulphate of potash and kainit were the best sources of supply of potash, and that the sulphate could be applied at any time, but kainit should only be used in late autumn and early winter.

"In order to test the correctness of those statements, I applied sulphate of potash to various plants which were growing side by side, of the same varieties. The amount of sulphate of potash employed was about one and one half ounces to the square yard of surface of ground, and the beneficial effect was apparent at the end of the summer in the healthier trees and larger and more highly colored fruit. There was also evidence of the dressings of this sulphate when applied to bedding and other plants, convincing me that I had found the key to the cause of badly colored flowers and fruits, and inducing me to employ it and kainit much more extensively than I would otherwise have done. Of course, it means time, and several applications, before a soil poor in potash can be made rich in this plant food constituent, so that it took some years to work it up to the desirable point, and occasional dressings afterwards to maintain it at this standard.

"If any other gardener has a difficulty in securing color in his flowers or fruit, all other essentials being provided for, I would advise him to try the effect of a dressing of sulphate of potash at the rate stated, and note the result. It takes time to become diffused in the soil, and to be taken up by the plants."

The Editor is pleased when a Reader presents his ideas on any subject treated in

THE WEEKLY FLORISTS' REVIEW

As experience is the best teacher, so do we learn fastest by an exchange of experiences. Many valuable points are brought out by discussion.

Good penmanship, spelling and grammar, though desirable, are not necessary. Write as you would talk when doing your best.

WE SHALL BE GLAD TO HEAR FROM YOU.

KILLING OUT POISON IVY.

Will you please let me know the proper name of that poisonous vine commonly known as poison oak or poison ivy? And how can I kill it out of a stone wall? Some of the vines are nearly an inch in diameter. What can I put on my hands and face while exterminating it, as my skin is very sensitive and I get poisoned while working near by? W. M.

The botanical name of poison ivy is Rhus Toxicodendron. If leather gloves are worn when handling this vine and care is taken not to bring the gloved hands in contact with the face, probably no serious trouble will result.

To exterminate it, all of the vine that is visible should be cut away with shears or anything that can be used effectively, and then during the growing season all succeeding growth should be cut away. If this fails, try a strong solution of salt in hot water, using the solution while still hot. FUNDS FOR FLORICULTURE.

Legislature Cuts Appropriation.

The Illinois legislature is struggling this week with the matter of the appropriation for floriculture at the State Experimental Station.

The lower house of the legislature reduced the sums allotted to each department at the state's educational institution at Champaign. The asking for floriculture, to cover two years, was $35,000, but the House reduced this to $15,000, offering as the necessity therefor the fact that the total of appropriations asked was nearly twice what the revenue of the state is expected to be in the next two years. Therefore, it was argued, the appropriation was reduced no more than the average reduction of all askings.

W. N. Rudd and George Asmus spent May 20 at Springfield in an endeavor to get the Senate committee to deal more liberally with floricultural interests. On the evening of May 21 there was a meeting of a few of the craft at the Union restaurant, Chicago, and plans were made for further impressing the Senate committee with the necessity for this appropriation. The State Senate will act within the current week, but as yet no information is to be had as to what the Senate committee on appropriations will recommend and the conditions are such that many other interests are receiving much less than floriculture is reasonably sure of.

Last week Peter Reinberg wrote each member of the committee as follows:

Dear Sir: The maintainance and extension of the work in Floriculture at the Experimental Station is of vital importance. The State has never made but one appropriation for this great industry and this appropriation was only one half what was asked and was essential to put this new department on its feet.

I trust that you will see that the present asking for Floriculture is allowed and that no cut is made from the authorized estimate of $35,000. Yours very truly,

PETER REINBERG.

Chicago, May 21.

The REVIEW addressed the following letter to the chairman and members of the Senate committee on appropriations:

Since word went out that the House cut the appropriation for Floriculture from $35,000 to $15,000 we have been hearing from our subscribers all over the State. They urge us to "do something about it."

We expect next year's United States census to show the value of florists' products in Illinois to be, at first hands, more than four million dollars a year.

If you could realize the value of the Experimental Station work to this large and rapidly expanding industry, you would, we are sure, cast your vote in the Senate committee to report out the full asking, $35,000.

Very truly yours,

FLORISTS' PUBLISHING CO.

HAIL BREAKS LATHS.

On the afternoon of May 8 the most terrific hail storm ever known in Oklahoma struck the establishment of the Stiles Co., at Oklahoma City. The accompanying illustrations will give some idea of the result. It will be noted that the glass in the sashbars was taken out almost as cleanly as if done by hand. In the greenhouses of the Stiles Co. there were about 14,000 square feet of glass, and diligent search failed to reveal more than a dozen panes unbroken, except in the partition walls, after the storm. So heavy was the hail that many of the pieces of ice not only broke the glass, but also broke the flower pots which they struck after passing through the glass.

The Stiles Co. had a part of its field adjoining the greenhouses roofed over with laths nailed on rafters and supported on posts eight feet high. One of the pictures shows what the hail did to the laths. It is estimated that 3,000 laths in this roof were broken. This lath structure is used for summer stock, and was vacant at the time.

Lath Roof of the Stiles Co., Hit by Hail.

COMPOST FOR BEDDING PLANTS.

Will you please tell us about our soil for next winter's use? We grow geraniums, heliotropes, tomatoes, pansies, verbenas, asters and all kinds of annuals in boxes for spring sale, and we want to make up a compost that will do for all these plants. We have now to start with a heap of sod taken from clay soil one year ago. We can get plenty of muck taken from swamps, which, of course, is light when dry. This year our soil was decidedly clayey and our plants have not done well. The geranium foliage has turned red and we think it must be because of the soil. M. & S.

There is no great amount of virtue in swamp muck by itself. It requires laying out for a year and sweetening before being used for compost. When dug it is sour and if mixed with other soils right away unsatisfactory plants will be the result. I would advise you to mix one-fourth well decayed cow or horse manure with your clayey loam and stack up in a pile. You can place the manure in layers, later turning it over. There is no good reason why a clay loam should not grow excellent geraniums. For young stock I would add some leaf-mold at potting time, also some sharp sand. The same will lighten the compost nicely for other bedding stock. Spent hotbed manure is excellent for mixing in your heavy soil for bedding plants. Some of these latter will do better if you use at least one-half such a compost, while the tomatoes like a fairly stiff loam and the addition of cow manure would be all they required.

Fall is a good time to prepare a large compost pile, chopping and mixing over the same in spring. For bedding stock, if the sod is fibrous, the pile will be better if kept till the second year, but for tomatoes it can be used the following spring or summer. Keep weeds pulled out of the compost pile, as they soon largely exhaust it. C. W.

Work of Hail at Establishment of the Stiles Co., Oklahoma City.

OBITUARY.

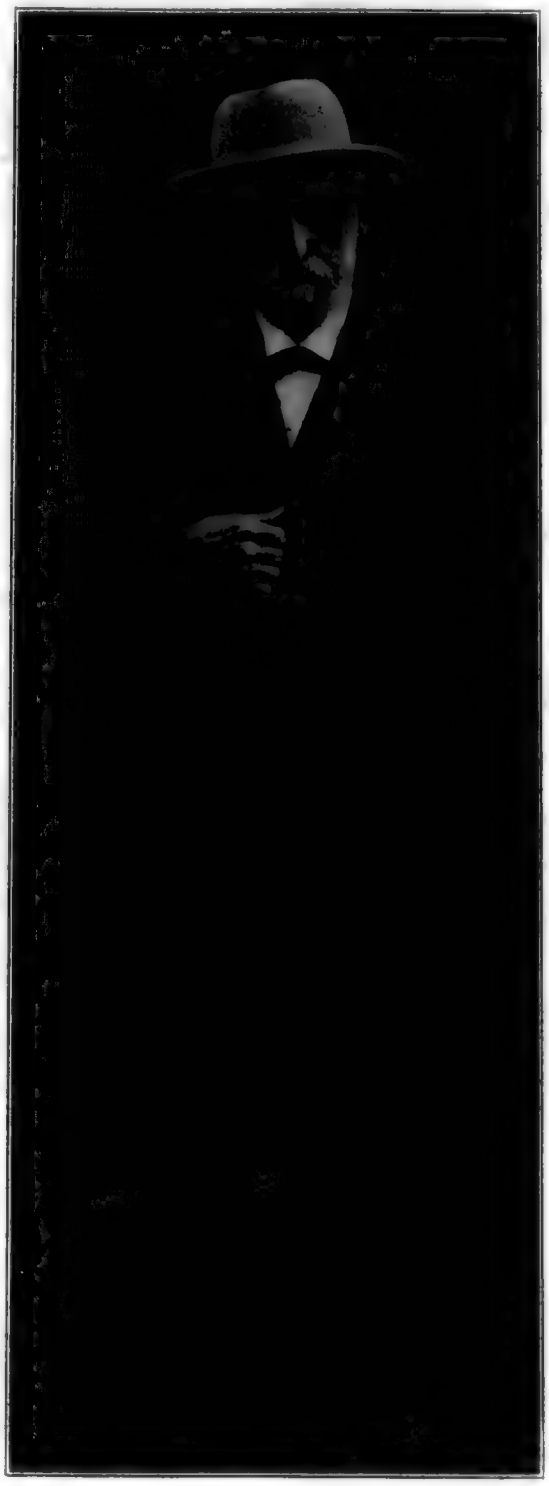
John F. Pollworth.

John F. Pollworth, father of C. C. and Jos. E. Pollworth, of the C. C. Pollworth Co., Milwaukee, died Wednesday evening, May 19, at the age of 71. Mr. Pollworth was a pioneer settler in Milwaukee and was one of the earliest hotel keepers in the city. He retired from active business about seventeen years ago, but in later years he took great interest in the commercial progress of his seven sons, all of whom are located in Milwaukee.

He was a lover of flowers and took great pride in beautifying his home surroundings. He believed life's greatest pleasure was to create cheerfulness, and therefore he was liberal in distributing flowers among his friends. The Old Settlers' Club, of which he was an active member, was always kept supplied with flowers either from his own garden or from the establishment of the C. C. Pollworth Co. He was well acquainted locally in the trade, and many florists will remember meeting him during their visit to Milwaukee when the florists' convention was held there.

Charles L. Allen.

Venerable Charles L. Allen is dead. The end came Saturday, May 22, at Floral Park, N. Y., in the eighty-first year of his age.



Charles L. Allen was born at Union Springs, Cayuga county, N. Y., June 13, 1828, and the story of his life, if fully told, would run in parallel lines with the narrative of the development of the resources of the country, for when he first began to practice horticulture the nation was in its youth with him. He was of a deeply studious nature and in young manhood came to be recognized as an authority in horticultural matters. For many years he was one of the most extensive growers of seeds of cabbage, kale and allied plants, and also of bulbs, on Long Island, giving his personal attention to the details of the work, but he some years ago retired from active management, turning the burden of detail over to his grandson, Linnæus Allen, who was recently called home from a trip among the trade in the west by the senior's illness.

To Charles L. Allen as much as to any man is due the great industry of market gardening now practiced on Long Island, and especially that part of it which makes a specialty of cabbage and cauliflower. He was a pioneer grower of these crops for market and later for seeds. The gladiolus also was one of his early specialties, and it is said that he was the first to grow this flower for the New York market. His collection of gladioli was sold to E. V. Hallock & Son, and later passed to John Lewis Childs, with the Hallock stock.

Mr. Allen was a man of strong mentality and literary in his tastes. He was a constant contributor to the gardening press and was the author of several volumes on trade and horticultural subjects. His monograph on "Cabbage, Cauliflower and Allied Vegetables," written years ago, is considered in the trade as the standard work on these important crops, and still has a steady sale. A more pretentious volume is "Bulbs and Tuberous Rooted Plants," which will be found in all the libraries making any pretentions toward supplying gardening literature. How strong his mental faculties remained was commented on a fortnight ago, when a paper prepared by him was read before the New York Florists' Club, his physical strength not permitting his presence.

Saturday, June 13, 1908, Mr. Allen celebrated his eightieth birthday anniversary at his home in Floral Park and there was a large gathering of friends and relatives, to whom he read a paper entitled "At Eighty," in which he said:

"Man's greatest mistake is in giving up. To give up is to give out. The machinery of life will soon stop running if it has nothing to run for. The man that tore down his barns to build greater ones,

C. L. Allen.

found that when he began to take his ease, he was taken. Man was created for a purpose, to be useful along the line of his endowments. There is a diversity of callings, one as important as another. The man with the hoe is as essential as the man with the pen — perhaps more so. Both are useful—both essential and entitled to the same degree of respect."

Mr. Allen never "gave up"; his big brain was busy and strong, although his body never recovered from an illness with pneumonia suffered during the last year.

Mr. Allen leaves two sons, Charles H. Allen, a carnation grower at Floral Park, and W. S. Allen, a wholesale florist in New York city. The seed business will go on under the management of the grandson, Linnæus Allen, who is a young man well liked in the trade.

The funeral services were held Monday, May 24, and were attended by a large number of people, including leading men on Long Island and in the trade, The flowers were numerous and beautiful.

A. Q. Wolf.

A. Q. Wolf, of Dayton, O., the originator of the Wolf ventilating apparatus, died May 19, of Bright's disease. He was about 50 years of age. He had been totally blind for several years, but nevertheless conducted his business in a successful manner.

Hugo Beyer.

Hugo Beyer, a veteran seedsman of Iowa, died at his home near New London, May 18. He had been ailing with heart trouble for some weeks, but was up and around the house up to the time of retiring that evening.

Mr. Beyer perfected the perpetual-bearing raspberry, known in many states, and has perfected many novelties in the plant world. Two sons survive the father, the wife having died several years ago. For years Mr. Beyer has lived alone in his little home about four miles north of New London.

The funeral was held at the M. E. church in New London. In all the talk on the streets regarding Mr. Beyer, all regard him as a wonderful man. He was born in Germany, and was trained in the culture of plants in the Fatherland. He leaves his sons a legacy in the training he has given them in his own chosen line.

John Cassidy.

John Cassidy, founder of the firm of Cassidy & Sons, Long Island City, N. Y., died May 18, at the age of 98 years. His sons, Joseph, James, John Thomas and Richard, survive him.

Mr. Cassidy was born in County Tyrone, Ireland, and came to New York city when a young man. At the suggestion of Archbishop Hughes, of New York, who was his relative, he removed to Long Island City and began business as a florist in the neighborhood of Calvary cemetery. In 1849 he formed a partnership with Cavanagh & Flaherty. After several years this partnership was dissolved, and Mr. Cassidy took his sons into the business. This business he continued until within a few weeks of his last illness.

Mr. Cassidy helped to organize the first Democratic county committee in Queens. Although prominent in politics, he refused to hold any office except that of school trustee, which had no salary attached.

EDGING FOR CANNA BED.

What kind of plants in the buff color would make a desirable border for a canna bed? R. R. C.

I do not know of a coleus of just the color you wish. Golden Bedder will be too light and Verschaffeltii too dark. Try Acalypha Macafeana. The color will probably be pretty nearly what you want. C. W.

SOMERSWORTH, N. H.—Besides rebuilding the greenhouses which were recently destroyed by fire, G. S. Ramsburg has now purchased the glass for another house, which will be erected after Memorial day and will be used for violets and sweet peas. Mr. Ramsburg has a fine stock of Memorial flowers, which seem to be timed just right.

Allen as much as to any man is due the great industry of market gardening now practiced on Long Island, and especially that part of it which makes a specialty of cabbage and cauliflower. He was a pioneer grower of these crops for market and later for seeds. The gladiolus also was one of his early specialties, and it is said that he was the first to grow this flower for the New York market. His collection of gladioli was sold to E. V. Hallock & Son, and later passed to John Lewis Childs, with the Hallock stock.

Mr. Allen was a man of strong mentality and literary in his tastes. He was a constant contributor to the gardening press and was the author of several volumes on trade and horticultural subjects. His monograph on "Cabbage, Cauliflower and Allied Vegetables," written years ago, is considered in the trade as the standard work on these important crops, and still has a steady sale. A more pretentious volume is "Bulbs and Tuberous Rooted Plants," which will be found in all the libraries making any pretentions toward supplying gardening literature. How strong his mental faculties remained was commented on a fortnight ago, when a paper prepared by him was read before the New York Florists' Club, his physical strength not permitting his presence.

Saturday, June 13, 1908, Mr. Allen celebrated his eightieth birthday anniversary at his home in Floral Park and there was a large gathering of friends and relatives, to whom he read a paper entitled "At Eighty," in which he said:

"Man's greatest mistake is in giving up. To give up is to give out. The machinery of life will soon stop running if it has nothing to run for. The man that tore down his barns to build greater ones,

C. L. Allen.

found that when he began to take his ease, he was taken. Man was created for a purpose, to be useful along the line of his endowments. There is a diversity of callings, one as important as another. The man with the hoe is as essential as the man with the pen—perhaps more so. Both are useful—both essential and entitled to the same degree of respect."

Mr. Allen never "gave up"; his big brain was busy and strong, although his body never recovered from an illness with pneumonia suffered during the last year.

Mr. Allen leaves two sons, Charles H. Allen, a carnation grower at Floral Park, and W. S. Allen, a wholesale florist in New York city. The seed business will go on under the management of the grandson, Linnaeus Allen, who is a young man well liked in the trade.

The funeral services were held Monday, May 24, and were attended by a large number of people, including leading men on Long Island and in the trade. The flowers were numerous and beautiful.

A. Q. Wolf.

A. Q. Wolf, of Dayton, O., the originator of the Wolf ventilating apparatus, died May 19, of Bright's disease. He was about 50 years of age. He had been totally blind for several years, but nevertheless conducted his business in a successful manner.

Hugo Beyer.

Hugo Beyer, a veteran seedsman of Iowa, died at his home near New London, May 18. He had been ailing with heart trouble for some weeks, but was up and around the house up to the time of retiring that evening.

Mr. Beyer perfected the perpetual bearing raspberry, known in many states, and has perfected many novelties in the plant world. Two sons survive the father, the wife having died several years ago. For years Mr. Beyer has lived alone in his little home about four miles north of New London.

The funeral was held at the M. E. church in New London. In all the talk on the streets regarding Mr. Beyer, all regard him as a wonderful man. He was born in Germany, and was trained in the culture of plants in the Fatherland. He leaves his sons a legacy in the training he has given them in his own chosen line.

John Cassidy.

John Cassidy, founder of the firm of Cassidy & Sons, Long Island City, N. Y., died May 18, at the age of 98 years. His sons, Joseph, James, John Thomas and Richard, survive him.

Mr. Cassidy was born in County Tyrone, Ireland, and came to New York city when a young man. At the suggestion of Archbishop Hughes, of New York, who was his relative, he removed to Long Island City and began business as a florist in the neighborhood of Calvary cemetery. In 1849 he formed a partnership with Cavanagh & Flaherty. After several years this partnership was dissolved, and Mr. Cassidy took his sons into the business. This business he continued until within a few weeks of his last illness.

Mr. Cassidy helped to organize the first Democratic county committee in Queens. Although prominent in politics, he refused to hold any office except that of school trustee, which had no salary attached.

EDGING FOR CANNA BED.

What kind of plants in the buff color would make a desirable border for a canna bed? R. R. C.

I do not know of a coleus of just the color you wish. Golden Bedder will be too light and Verschaffeltii too dark. Try Acalypha Macafeana. The color will probably be pretty nearly what you want. C. W.

SOMERSWORTH, N. H. Besides rebuilding the greenhouses which were recently destroyed by fire, G. S. Ramsburg has now purchased the glass for another house, which will be erected after Memorial day and will be used for violets and sweet peas. Mr. Ramsburg has a fine stock of Memorial flowers, which seem to be timed just right.

RESULTS.

We give them. You get them.
We both have them.

For 600 weeks the REVIEW has now made its regular appearance with the news of the trade.

SEND the REVIEW a report on the Memorial day trade in your locality—and send it while the story is news, not ancient history.

THE annual meeting of the American Peony Society will be held at Cottage Gardens, Queens, N. Y., Tuesday and Wednesday, June 8 and 9.

IF you do not see in the REVIEW a regular news-letter from your city, write to the Editor about it, sending a sample of what you can do in the line of writing trade news.

FROM the southern localities, where bedding out has been in progress for a fortnight or more, come reports of the rapid depletion of all stocks of bedding plants. It looks as though the only one who will have cause for complaint is the man whose geraniums are late in blooming.

THE International Harvester Co., the trust that sells the reapers and other farm machinery, finds that there is one machine in which the farmer is now taking much interest, and which he buys elsewhere. So inside information has it that the trust is preparing to go into the automobile business.

F. R. PIERSON, chairman of the S. A. F. committee on tariff and legislation, has been twice to Washington in the interest of the trade. Mr. Pierson does not go after things he wants either with a hammer or with a brass band, but his quiet work will nevertheless be apparent in the duties on horticultural wares when the bill comes from conference.

GENERAL BUSINESS.

In its review of the general business situation, the R. G. Dun & Co. commercial agency said last week:

"The commercial outlook is brighter, and awaits an early settlement of tariff revision. Developments, as a whole, carry the encouragement which stimulates enterprise, renewed strength and confidence being well established. Current activities are conspicuous in the enlarged movements of heavy materials, factory products, general merchandise, and grain. The outgo of provisions also is increased, although live stock arrivals declined and packing capacity works under the normal.

"Weather conditions have favored more extended operations in the leading industries, construction, and building, and gain is seen in the absorption of seasonable goods, but more warmth is needed for an adequate disposition of lightweight apparel, retailers not yet securing ample sales. Cheaper prints and costlier tendencies of wool fabrics induce more widespread orders in wholesale dry goods and clothing. This has brought larger numbers of visiting buyers into the markets for staples, and bookings rise for immediate and fall shipments of textiles, footwear, men's furnishings, furniture, and household needs.

"The forwardings of hardware, tools, wagons, and materials for farm improvements compare favorably with a year ago. Inquiries for furnace and mill outputs extend farther into the future, and the contracts closed reflect distinct progress in iron, wood, brass, and leather workings. Railway orders appear more freely, and assure increasing activity at the forges and equipment plants.

"Building materials are under the greatest consumption known here, and this stiffens prices and puts the building trades upon a substantial basis. Lumber receipts have risen sharply within the last few weeks, but there is no overaccumulation at the yards, and sellers obtain better returns for desirable hardwoods. Contracts for power and machinery are more plentiful, and electric works report gratifying recovery in new business and increase in workers.

"The markets for raw materials continue strong, especially for hides, leather, wool, and minor metals. Investment in real estate and structures is advancing. Sales of bonds and securities run well above the volume of a few months ago, and money is in ample supply for choice commercial paper, with rates in favor of borrowers. Bank clearings at Chicago, $271,814,502, exceed those of the corresponding week in 1908 by 19.5 per cent, and compare with $252,032,830 in 1907."

MOTHERS' DAY.

In Parkersburg, W. Va.

We have watched the REVIEW'S reports of Mothers' day, and have noted that in some cities there were large sales, while in others there was not much doing that day. We believe Mothers' day in the future will be one of the banner days for the florist.

In our little city this was the first year that Mothers' day was publicly honored. Our governor issued a proclamation calling on all the people to observe Mothers' day by wearing a white flower. In addition to this we induced the mayor to issue a proclamation to the same effect. We also went to every church in the city and donated plants and a nice vase of white flowers for the altar. Each pastor had a notice placed in the papers calling on the people to attend special services for that day, and also mentioned that the church would be decorated for the occasion. Now, this seems like a whole lot of work and expense, but it paid well. Try it, Mr. Florist, next year, and be well fortified with plenty of white flowers. J. W. DUDLEY & SONS.

CHICAGO.

The Great Central Market.

Last week was decidedly dull up to Friday, when conditions began slowly to improve. There was a decrease in supplies, and a corresponding increase in demand. Prices did not advance particularly, but it became possible to clean out, or nearly so, at something like a market price. For a fortnight only a small part of the receipts could be sold through regular channels, and the accumulation had to be jobbed at what it would bring, so the change to more stable conditions brought much satisfaction to everyone except the sidewalk venders. The current week opened with little change, but steady progress is being made toward the holiday level of prices, and conditions are considered highly satisfactory, in view of the depression which so recently prevailed.

There are a great number of orders on file for shipment between May 27 and 29. Memorial day brings into the market hundreds of orders from country florists

If you're in a pinch, call us on the L. D. Phone

Peonies

So long as there's a train to carry the stock in time, you can be sure of getting of us all the Peonies you need

Best stock in the market, . . $6.00 to $8.00 per 100
Good stock, ... 4.00 to 5.00 per 100

Here are some other items we are specially strong on for Decoration Day

Beauties

Our annual summer crop. Fine.

Sweet Peas

50,000 to 75,000 a day. All colors and all lengths. Nothing to equal our special fancy grade.

Roses

Good stock. Plenty of it. Wire.

Carnations

Largest lot of strictly fancy stock in this market. Enormous demand, but expect to have enough for every order.

Miscellaneous Flowers

Large supplies of all other seasonable flowers. Order anything you need.

Hardy Cut Ferns

We have a big lot of Hardy Cut Ferns. Fine for this date. Far and away the best stock on the Chicago market—and the best stock always is cheapest in the end. Order of us and you'll get satisfactory goods.

who buy at no other season, and from the regular buyers it brings largely increased demands. It is the general report that orders this year average larger than ever before, and most houses report they have booked more advance orders than ever before; some say the advance orders even exceed the total done last year.

The orders run largely to carnations, and in most cases the proportion of white is limited. It is venturesome to predict, but most wholesalers feel that colored carnations will prove decidedly short of the demand, but that there will be plenty of white.

The Beauty crops are not so heavy as they were, and the quality has retrograded, so that only a small proportion can be called first-class. The medium-length stock from young plants is in most cases the best the market affords, and therefore commands a premium. There is a special call for Richmond, and doubtless this rose will be considerably short of the demand, as it almost always is at a holiday. The orders for other roses are not especially heavy, but it is figured that before the end of the week buyers will be taking thousand lots of roses, the "our selection" grade, because they can get them as cheap as colored carnations.

Sweet peas are in extremely heavy supply, and this market never has seen such good stock. Dozens of growers are picking the Spencer varieties in half a dozen colors, with stems a foot long and three and four flowers to the stem. The market knows these as "butterfly" peas, and they are selling at sight at fair prices. There still is a large proportion of short-stemmed stuff that has little value.

Cape jasmines are in, but are not likely to be an important factor for Decoration day. Their lateness is expected to help the sale of white carnations, which will be substituted for them, if necessary.

This market has peonies for every florist who hasn't them of his own, and all other cut flowers are in large supply. The market affords an unusual variety of stock at this time. There is little possibility of short supply for Decoration day, except of colored carnations, and everyone is looking forward to the biggest week the market ever has known. The way orders are coming in indicates that the Memorial day celebration will begin Saturday and continue through Monday.

Mention The Review when you write

The bulk of the orders are to go out May 27 and 28, because most retailers want their stock in hand for sale Saturday afternoon and Sunday morning, but a good many wholesalers are looking forward to a heavy run of telegraph business Saturday and Sunday morning.

Monday, May 31, will be observed as the holiday in this market. The postoffice will make only two deliveries of mail, the last at 9 a. m., and most of the wholesalers will close at noon. Buyers should get orders in early.

The Peony Situation.

Never in the history of this market have there at this date been so many peonies in storage as at the present moment.

One room on the fifth floor at the Western Cold Storage Warehouse contains nearly an acre of space. It is given over entirely to peonies, packed away in buckets and tubs. The most venturesome would not hazard a guess as to how many dozens there are. Not only this, but down in the basement of the warehouse there is still another patch. In addition, the Booth warehouse contains quite a few peonies. The man in charge of the peony business for the Western Cold Storage Co., who has been on the job ever since peonies first were stored, says he never has seen anything like these quantities on hand for Memorial day. No two lots are put up just alike, and each grower's little patch is distinct. The largest lot is that of R. E. Kennicott & Co., Carbondale, but the Kennicott Bros. Co. farm at Villa Ridge is a close second.

Where all the peonies have come from is a mystery. A few years ago the growers could be counted on the fingers of one hand, but nowadays their name is legion, and it takes a Burroughs adding machine to foot up the total of their acreage. There are so many people growing peonies that the flowers even are coming in on South Water street, packed loose in berry cases.

It will mean an enormous business if all these accumulated peonies, and the daily receipts, are to find a market at the end of this week. Already the miscellaneous grades are being moved at a concession whenever an opportunity presents. There is sure to be a wide variation in the prices returned to growers. No matter how overabundant the unskillfully handled peonies are, the stores that have high class trade will pay a fair price for the goods put up by men who know their business, and the holders of the best goods are keeping a stiff upper lip.

Schramm's Gladioli.

Schramm Bros., Arlington Heights, last week began shipping Kennicott Bros. Co. some exceptionally fine gladioli. The variety is Mrs. Francis King, flame pink, and Frank Schramm says they will be able to cut 2,500 spikes this week. He planted a house with these in the last week of December, following a crop of late chrysanthemums. The bulbs were set 4x4 inches, and the house at the pres-

ent is a sight. The flowers are of large size, and he gets from four to eight open at a time on each spike. The first sold for $2 a dozen, and as the crop was grown cool, he figures there will be a good profit in the big cut this week, even if it brings considerably less than the first few hundred did. The only trouble with the Mrs. Francis King gladiolus for indoor flowering is that it is just a little weak in stem.

Vaughan & Sperry Move.

Vaughan & Sperry are this week transacting business in their new double store in the basement at 52 and 54 Wabash avenue. How this excellent location happened to be so long overlooked by wholesale florists is one of the things which is puzzling the market. Desirable spaces have been scarce in that locality. True, the building has been remodeled, but it seems strange no one found this store before, for it is one of the best in the district. It is large, the light is good, and there is valuable cool room space under the sidewalk. It is under the walk that Vaughan & Sperry have built their big new ice-box. It will be some little time yet before they get all the equipment complete. Their lease in the Flower Growers' Market runs to October 1, and they will continue their stand there for a time.

Adam Ziska, one of the largest manufacturers of wire work for this market, has taken space in the basement with Vaughan & Sperry. He heretofore has had space with J. B. Deamud Co., and another wire factory two blocks west, on Dearborn street, but will now concentrate at 52 and 54 Wabash avenue.

Various Notes.

No great amount of bedding out has yet been done, but it is reported that vincas are scarce, great numbers now being used in window-boxes, and it also

is said that geraniums in good flower are hard to find, a great many growers being so behind with their stock that it will not be in bloom until well along in June, when there is likely to be a surplus, for buyers demand geraniums in bloom when delivered to them.

Poehlmann Bros. Co. says orders for roses are coming in briskly, and the prospect is for extremely satisfactory business in this department from this time on.

L. Baumann, of Baumann & Co., is in Europe buying florists' supplies, and when last heard from was enjoying a few days' rest at Baden-Baden.

John Gormley, of Canger & Gormley, says the business situation looks good to him. He not only expects a large Memorial day trade, but is figuring on a big June, with the annual crop of spring weddings.

At Peter Reinberg's "farm" on Lincoln avenue, the posts are set and the gutters up for four new carnation houses. The posts are of concrete, made by the regular employees, and so far as known the first concrete posts used in this vicinity for ridge and furrow houses.

C. W. McKellar predicts that boxwood will shortly join the common ferns in the aristocratic class. He says the supply is nearly used up, and prices will therefore advance.

Percy Jones says Aristocrat has come to the front in the last few weeks as the best carnation on the market.

John Zech is specially well pleased with some of the Maids and Brides Zech & Mann have been receiving the last few days. The Maids have excellent color.

E. A. Riehl, of Alton, has shipped the J. B. Deamud Co. many thousands of peonies in the last few days.

Emil Sigwalt built two houses at Arlington Heights two years ago, and has since had such good success growing carnations that he will add another house this season.

Scott G. Randall, of Redlands, Cal., is visiting his brothers, A. L. and W. W. Randall, accompanied by his daughter. It is twenty-two years since the Randall brothers have met, and introductions were necessary. Mr. Randall is on his way to the old home of the family in western Pennsylvania.

E. C. Amling says it is notable the proportion of carnations called for on advance orders for Decoration day. They all run far heavier for carnations than for any other flower.

E. H. Hunt has just issued a new booklet describing the concrete benches built with the improved Wittbold devices for which the firm is sales agent. Experience with concrete construction has resulted in a number of modifications to simplify and cheapen construction.

Vaughan & Sperry report that by May 21 this year their sales were in excess of the total for the month in 1908.

Weiland & Risch feel more confidence in the call for white carnations than do most of the wholesalers. They say the comparative scarcity of jasmine will turn many orders for white to carnations.

Wietor Bros. consider themselves fortunate in having a good cut of Victory, but say orders for red would consume many times what any grower can supply. Once upon a time growers thought Memorial day called for white, but now buyers would take all red if they could get them.

The Thompson case occupied the attention of the Federal court again May 25.

The E. F. Winterson Co. received the first cape jasmines of the season May 21, and they sold well. Mr. Winterson says he expects at least 25,000 this week, in spite of the lateness of the crop in Texas.

C. L. Washburn said Monday that he considered the condition of the cut flower market as eminently satisfactory; business as brisk as could be expected at this date, with exceptionally heavy orders for shipments later in the week, and prospects for an excellent business through

WILMINGTON, N. C.—Will Rehder has had exceptional success with sweet peas this spring and made a display of them recently in a downtown store window.

GLOUSTER, O.—D. H. Stedman says trade has not been as brisk as usual this season, owing to the mines being shut down, but he looks for a good run of business for Decoration day.

ST. LOUIS.

The Market.

Business among the retailers last week was good; that is, funeral work; but in other lines it was not so good. The busy people now are the plantsmen, who have plenty of work. The wholesale market last week had plenty of everything. There are a great many outdoor flowers coming in, which are selling cheaply. Carnations are plentiful, especially white, and have been selling as low as $7.50 per thousand. All stock is of excellent quality. Roses, too, have been more than the demand can use, and have sold cheaply. Peonies are selling well. Good quality sweet peas are in demand, but the bulk of them are short in stem.

This week the trade is looking for extra business in both local and shipping for Decoration day. A great many orders have already been placed.

Various Notes.

Mrs. A. C. Canfield, of Springfield, Ill., spent a day with the trade here last week.

Max Rotter, the North Broadway florist, will leave early next week for the east on a six weeks' vacation trip.

Mrs. M. M. Ayers was showing a tasteful window display last week, of early gladioli and longiflorum lilies.

C. Young & Sons Co. are doing all the bedding around the St. Regis apartments this week. They have finished up Delmar garden, which cost nearly $600.

The trade was busy Saturday, May 22, with funeral work for the obsequies of Mrs. Julius Walsh, wife of President Walsh, of the Terminal railroad. Mrs. Walsh was the leader of St. Louis upper society. The west end florists in particular were busy.

Henry Emunds, of Belleville, was a caller last week, and says he and the rest in the trade will be kept busy with planting out from now on.

George Waldbart is cutting a lot of fine peonies and other outdoor flowers from his place in Clayton, in St. Louis county.

"Billy" Smith, who has charge of the Florists' Club's S. A. F. convention affairs, announces that the club members will travel in a special car over the Big Four railroad to Cincinnati. Mr. Smith has in print a lot of stickers, to adorn the florists' mail in the trade, announcing the trip.

Charles Wors has given up his downtown stand for the summer, and has opened at Delmar garden, where he has a nice trade at night.

H. M. Schisler, of the Schisler-Corneli Seed Co., will have charge of the local delegation that will attend the twenty-seventh annual convention of the American Seed Trade Association, which meets at Niagara Falls, Ont., next month. A good delegation from here is expected.

Most of the local greenhouse men say that they are almost cleaned out of bedding stock. All are reporting big plant sales, and from all reports this will be an exceptionally good plant year.

Henry Ostertag, of Ostertag Bros., reports that they have a number of good wedding orders booked for next month, also some good orders for Decoration day.

The Henry Shaw medal, valued at $25, will again be offered by the trustees of the Missouri Botanical Garden at the St.

Niessen's News Column

June Weddings

...and...

Commencements

We have always found a brisk demand for good stock during the early part of June. You will find with us the choicest stock in every line that is to be had at this season of the year. We would like to call your attention to some of the stock that we can advise recommending to your trade.

Beauties
The best at $2.50 and $3 per doz.

Valley
Very choice stock.
$3.00 and $4.00 per 100.

Cattleyas
$7.50 per doz.

Peonies
$6.00 and $8.00 per 100.

The local peonies are somewhat later than usual. The first week in June, in fact, during the entire month we expect to have a good supply of all the best varieties to be had.

Sweet Peas
75c and $1.00 per 100.

Very choice stock in pink, white and lavender. Peas are a great favorite in the month of June, in fact, of the better grades we never see an over supply.

Roses

A very satisfactory grade at $6.00 per 100, and choice stock in Richmond and Killarney at $8.00 and $10.00 per 100. For design work, good value at $4.00 per 100.

Dagger Ferns
$2.50 per 1000.

Louis Horticultural Society's fall flower show. The medal was founded by the trustees in 1893. Any information regarding this medal will be furnished by Prof. William Trelease, director of the garden.

Henry Ostertag, W. C. Smith and Charles Schoenle, the club's trustees, will start next week on an inspection trip to find a suitable place for holding the club's annual picnic, which takes place during July, and it may be that the outing will be held on the east side this year.

J. J. B.

PHILADELPHIA.

The Rising Eastern Market.

A change has come over the cut flower market as complete as it was unexpected. The unusual cold prevailing during the storm that lasted from May 20 to 23, with the absence of sunshine, cut down production — one help, it is believed. Prices became firmer and in some cases advanced, where quality was evident. Even where there was no advance, average returns will be far better, waste being reduced.

Peonies have been retarded, receipts being light early this week. The locally grown Beauties have paled before the eastern stock, which has come to the front with a rush. Other roses have not suffered so much from climate and competition, and where called for are bringing fair values.

Carnations are in demand when good, white rather more so than colored. Prices are firming in anticipation of Memorial day. Outdoor sweet peas give needed tone to their indoor sisters. Good stock is wanted, but there is much that is not good. Cattleyas continue in moderate supply.

Gardenias are doing better, the southern stock not having arrived. The advance guard of snowballs act as samples for the buyers in search of a big dollar's worth a few days hence.

Dagger ferns are the leaders in greens. Smilax has taken a brace and is selling better. There is much stock in the wholesale houses that is not equal to market requirements. Its outlet is found in the curbstone broker.

Memorial Day Prospects.

The opinion prevails that the demand for the holiday will be on or before Saturday, May 29. Flowers arriving Monday, May 31, are not expected to be in more than ordinary demand. The peony crop will be largely influenced by the sunshine and temperature prevailing during the next forty-eight hours. Carnations promise to be in only fair supply. The white varieties, as a rule, have withstood climatic conditions better than the colored. Enchantress in many cases has retrograded. Roses will be plentiful in the lower grades, but hardly in the upper. The crops with many growers are going off. Outdoor sweet peas are coming into bloom.

Crotons.

Crotons are growing in popularity as bedding plants, and for window boxes at this season, and as basket plants for the Christmas holidays. The beds at Girard College that are now filled with pansies, daisies, the remains of the bulbous flowering stock and the beautiful hardy blue Phlox divaricata, will soon be filled with coleus and with crotons. The crotons are Mr. Lonsdale's special pets. He has a fine stock of them in the best bedding varieties. He depends on the well-known standards, Queen Victoria, Rothschild, Dayspring, Langii, fasciatum, and for edging, Weismanii, planting both one and two-year-old plants, with occasional specimens of greater age for the center.

In addition to these varieties, Mr. Lonsdale has in quantity two seedlings of his own, raised at Wyndmoor about six years ago. These are the variety named after himself by his friend Robert Craig and the variety which, I think, he named after this same friend. Both varieties are proving of sterling merit. Both can be found commercially grown at Forty-ninth and Market streets, and privately—or shall we say academically?—grown at Girard College. The first-named

Mention The Review when you write.

variety, Edwin Lonsdale, is well known to REVIEW readers on account of its beautiful red coloring, so much prized at the Christmas holidays. The other variety, Robert Craig, was only named last fall. It resembles the well-known Le Compte; yellow in center of leaf, with irregular markings on a green field on the outside. It holds its color better, it is said, than the older variety, grows more freely and propagates more readily. Mr. Lonsdale is enthusiastic about both varieties, believing them worthy additions to the leading varieties of crotons.

The crotons are featured this year more extensively than ever by the Craig Co. Robert A. Craig pointed out a handsome house, 200 feet long, I think, entirely filled with crotons, which he said was the quantity they had in excess of last year's stock. Both Mr. Craig and his right-hand man, Duncan Macaw, spoke highly of the two Lonsdale seedlings that they are trying out. Mr. Craig said that they could not have too many of the Edwin Lonsdale for the holidays. Mr. Macaw placed the variety named after the head of his company as in the front rank. Robert A. Craig has two new seedlings of his own that give promise, one believed to be an improved form of Carrierei that holds its color better, the other a more recent arrival, yellow with red veins, distinct habit, very pleasing in appearance.

The new system of culture is being tried on the crotons and gives promise of excellent results.

Various Notes.

The Collingdale Greenhouses are a factor in young chrysanthemums, their stock of standards and novelties comprising many popular sorts.

The finishing touches are being put on the flower store in the Hotel Edouard, at Thirteenth and Walnut streets. It promises to be decidedly attractive.

EVERY now and then a well pleased reader speaks the word which is the means of bringing a new advertiser to

A. Paxton, formerly with Charles H. Campbell, is now with Fred Ehret.

Frank Gaul, the popular manager of the Century Flower Shop, has been ill for a few days.

M. Rice & Co. have received a large shipment of birch-bark and cork bark, the largest in the history of this enterprising house.

Charles W. Jefferson, manager of the West Laurel Hill cemetery, is planning six new greenhouses, 20x150 feet each, to replace some of the older houses.

William Munro, of Garrettford, will be strong on My Maryland and Killarney next season.

William J. Muth points with just pride to the outdoor peas now coming into the Philadelphia Cut Flower Company's salesrooms.

The steamship Menominee brought large imports of immortelles and baskets to H. Bayersdorfer & Co. Paul Berkowitz says that their Memorial day designs are praised for beauty and originality.

William Yeager is planning additions to his greenhouses at Norristown.

The Robert Craig Co. is receiving encouraging duplicate orders on the arrival of their first shipment of Lorraine begonias.

Israel Rosnosky, vice-president of the Florists' Club, was in a curious trolley accident between Frederick and Hagerstown, Md. The car fell between the rails. An inclined plane of stones was built to where the rails were in proper position, the car being forced up the plane with full power.

William J. Young, Jr., speaks cheerfully of the bedding plant situation.

The demand for young plants of tomatoes, egg plants, cauliflower and peppers has been excellent.

Robert Crawford, Jr., says Killarney is the best rose ever brought out for the retailer.

the new greenhouses of the Florex Gardens at North Wales. PHIL.

With the handing down of a decision by Judge Holland in the federal court at Philadelphia in the case of Bayersdorfer & Co., one of the important customs cases is cleared up. The question before Judge Holland was whether ornamental florists' supplies, such as wreaths, crosses, ferns, leaves, etc., are to be admitted into the United States as "natural flowers" with a tax of only twenty-five per cent, or assessed as "ornamental leaves" with duty at the rate of fifty per cent under paragraph 425. When the same issue was before the board of appraisers, that body upheld the collector of customs in levying the higher duty. Judge Holland, however, takes a different view and May 18 reversed the board and the collector.

BOSTON.

The Market.

Business last week was erratic and dull, on the whole. Supplies fell off considerably the latter part of the week, owing to the dull, cold weather. There is more activity this week, and prices show an improvement. An enormous amount of material is required in every town and village for Memorial day, and there will be a holding back of supplies until the last of the week. All indications point to a heavy trade in cut flowers, and, with warmer weather, supplies should be abundant. There will this season be rather more in the way of outdoor flowers than usual. Lilac will be at its best. Valley, Narcissus poeticus and late tulips will also be in season. Quite a few German iris will also help out, but there will be no local grown peonies.

Roses have had a quiet sale of late, but are bracing up a little. Thanks to continued cool weather, these and carnations continue of good quality. Carnations vary from $1 to $4 per hundred, but are improving in price, and will sell higher later in the week. Spanish iris at $4 and Gladiolus Blushing Bride and The Bride at $3 and $4 are seen in quantity. Gladiolus America makes $1.50 to $2 per dozen, and other large-flowered gladioli $4 to $8 per hundred. Sweet peas are plentiful, and sell well. Quite a lot of outdoor valley is in, and the quality is about equal to that of the forced article. Cattleyas and gardenias are more abundant. Bulbous stock, such as narcissi and tulips, still hold out. There is an excellent trade in asparagus, smilax and hardy ferns.

The Exhibition.

Although no prizes were offered, there was a splendid show at Horticultural hall May 22 and 23, the exhibits being twice as numerous as a year ago and of splendid quality. J. T. Butterworth received a silver medal for two fine baskets of Cattleya Mossiæ, carrying seventy-five and sixty flowers, respectively. Julius Roehrs Co. had a well-grown group of orchids. About a dozen Odontoglossum Pescatorei were finely flowered, one spike carrying seventy-five flowers. They also had Phalænopsis Rimestadtiana, cattleyas and other seasonable sorts. A bronze medal was awarded for the group. Laelio-Cattleya Canhamiana rex (Cattleya Mossiæ Reineckiana x Lælia purpurata) received a first-class certificate. The same firm had a small group of fine foliaged plants, Tradescantia Reginæ receiving honorable mention. Mrs. J. L. Gardner, William Thatcher, gardener, had a nice group of cattleyas, miltonias and Vanda teres.

William Whitman, M. Sullivan, gardener, had eighteen large and well-flowered zonal pelargoniums, also some good azaleas. William A. Riggs had six splendidly grown ivy geraniums in pyramidal form, also Clerodendron Balfouri, awarded a cultural certificate. The Bellevue Nurseries, A. E. Poetsch, manager, had a neat table of growing plants of alpine and other perennials. Old Town Nurseries, South Natick, M. P. Haendler, proprietor, had a display of Doronicum excelsum. Francis Skinner had Rhodo-

dendron giganteum, awarded honorable mention. The Boston Park department received a bronze medal for a display of cut shrubs, large vases of Cornus florida rubra and Azalea Vaseyi being especially attractive.

Mrs. E. M. Gill had a nice display of pansies and many other seasonable flowers. Mrs. A. W. Blake, J. L. Smith, gardener, had good pansies. Mrs. Frederick Ayer, George Page, gardener, had the pink form of Marguerite Queen Alexandra, awarded a certificate of merit; also a table of Campanula Medium. Harvard Botanic Gardens had a large and interesting display of narcissi and late tulips, in which Mr. Cameron specializes. E. J. Mitton, J. Lawson, gardener, had some large and well-flowered specimens of Calceolaria rugosa Golden Gem.

R. & J. Farquhar & Co. had a table of English hybrid rhododendrons in pots, also an extensive display of cut lilacs, ornamental crab apples, trollius, late tulips, Arabis alpina flore pleno, decorative dahlias flowering in small pots, and violas. Included in their exhibit was a unique dark blue hydrangea, found growing in clefts of rocks at Mikko, Japan.

M. A. Patten had a large vase of mixed carnations.

W. W. Rawson & Co. put up the most extensive and interesting display of Darwin, Cottage and other late tulips ever seen in Boston, embracing no less than 320 varieties. These filled three large tables the width of the hall. The exhibit was an educational one, finely staged. The same firm showed a collection of named narcissi of the poetaz section.

The next exhibition at Horticultural hall will occur June 5 and 6. Rhododendrons, hardy azaleas, hardy herbaceous plants, fruits and vegetables will be specialties.

Various Notes.

The cold weather experienced in New England of late has kept some of the growers guessing, and indications are that some batches of Memorial day flowers will be late, unless hot weather arrives during the present week.

Peirce Bros., S. J. Goddard, Mann Bros., and several other growers, are marketing some fine Gladiolus America, as well as quantities of the nanus and Colvillei sections.

T. F. Galvin is making displays of named tulips, from W. W. Rawson & Co., a feature of his Tremont street store, large vases of Darwins being fine.

In spite of cool weather, bedding plant trade has been good and geraniums are practically sold out, Ricard and other standard sorts being almost unprocurable.

S. J. Goddard and William Nicholson have big batches of double feverfew for Memorial day.

John Barr has handled a large quantity of finely grown hydrangeas, no better being seen around Boston.

W. W. Edgar & Co. are having an exceptionally heavy trade in bedding stock, being already well cleaned out of some lines.

A magnificent lot of Calceolaria Golden Gem and Stewarti are to be seen in bloom at James Crosby's, on the Tafts' estate, Medford, Mass. The plants show splendid culture.

Interest in the big orchid show to be held in Boston a year hence is increasing, and it looks now as though about all the leading growers in America would be among the exhibitors, as well as some from Europe. W. N. CRAIG.

ASHTABULA, O.—Mr. Good, of Good & Bush, on West street, has purchased his partner's interest in the firm, and will continue the business in his own name.

SOMERVILLE, MASS.—Gus Cabral, proprietor of a barber shop at 13 Holland street, is also the owner of a hothouse in his native Azores, and is now arranging to build two more, with the intention of going extensively into the cultivation of pineapples and other fruits. It is expected that he will eventually return to the islands and give personal attention to the business.

150,000 Cut Blooms

May 15 to July 1

Large White, $8.00 per 100. Medium White and Pink, $4.00 per 100

W. A. HAMMOND, Richmond, Va.

PROVIDENCE, R. I.

Trade Conditions.

Trade has been about normal for this season of the year. There has been about the usual amount of funeral work, while the social functions incidental to the junior festivities at Brown University have created a good demand for cut flowers. All the florists and gardeners are busy now with outdoor work, either for themselves or for private places, while bedding stock is plentiful and brings fair prices. A cold, drizzling rain of several days' duration somewhat checked the sale of bedding stock the latter part of the week.

Club Meeting.

The regular monthly meeting of the Florists' and Gardeners' Club of Rhode Island was held at its rooms, 98 Westminster street, Monday night, and was one of the best attended in several months. The club's aggressive discussions over the trade abuses have created a lively interest, and the members feel that the club has taken a lease of life that may make it an influence for the benefit of the trade generally.

President Charles Macnair was in the chair. The subject of holding an outing this season was introduced and discussed at great length. Much enthusiasm was manifested in the project, but nothing definite was decided upon, and it was made the topic for discussion at the next monthly meeting.

Various Notes.

The will of Walter S. Hogg was proved in the Municipal Court last week.

Alexander Macrae was elected marshal of Roger Williams Lodge, A. F. and A. M., at its annual meeting May 22.

Willis S. Pino has purchased a lot, with the buildings thereon, at the corner of Melrose and Ontario streets, of George L. Miner.

Robert Louis Van Meter, 831 Westminster street, has been granted a license for marriage with Lena Mathilda Bache.

F. E. Saunders, 354 Elmwood avenue, is conducting a special sale of dahlia roots.

P. Welch, of Welch Bros., and William J. Stewart, of Boston, were in the city May 21.

The city of Pawtucket has passed a resolution appropriating $500 for tree preservation, to be expended under the direction of the commissioner of public works.

James Cottier, recently from Winchendon, Mass., is now with C. H. Hunt, having succeeded Charles Lewis in charge of the greenhouses. Mr. Lewis has gone to New York state.

N. D. Pierce, of the Home Nurseries, Norwood, is bringing in thousands of pots of bedded stock.

The "Prom" ball at Brown University, May 21, furnished plenty of corsage bouquet trade for the retailers. Sweet peas in light colors predominated.

The florists of Newport had an unusually big demand for carnations May 23, it being Mothers' day there.

At the County Horticultural Society's show at Worcester last week, George McWilliams, gardener for G. Marston Whitin, and William McAllister, for Mrs. John C. Whitin, of Whitinsville, were the recipients of awards on pansies and orchids, respectively. W. H. M.

James P. King, of this city, has tastefully laid out the grounds in front of the headquarters of the Pocasset Social Club, at Thornton.

NEW YORK.

The Market.

This week opens with splendid sunny, spring weather, after one of the most unseasonable and discouraging weeks on record. Cold rains and a market flooded with every variety of cut flowers, for which there was comparatively little demand, added to the general gloom. No two weeks of any May can compare in pessimism and low values with the two of unhappy memory just departed. May we never look upon their like again. But all lanes have a turning, and we have reached the parting of the ways. Decoration day is in sight, and the skies are brighter. Just as was anticipated, the supply is shortening, and the average of values must improve. The Memorial holiday will bring a great demand this year, for its observance promises to be universal. The less said of last week's prices the better. Buyers were masters of the situation. Even the street merchants were overloaded with Beauties, and of other roses and carnations the slaughter was pathetic. Even orchids fell to unreasonable figures, and apart from the

FOR JUNE WEDDINGS we offer extra select Lily of the Valley, Bride, Killarney, American Beauties and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

Rogers funeral, there was no special demand.

The market was topheavy with sweet peas and lilac. Irises and gladioli are abundant, and peonies from the south are arriving in tremendous quantities and selling as low as $1 per hundred for fine stock, with even lower quotations for the undeveloped buds. Outdoor valley is of splendid quality, and has cut down the price of the indoor supply to the lowest figures of the season.

The orders booked for June wedding work are numerous, and these, and the lessened supply of roses, give hope of better times from now until the month of roses passes.

Various Notes.

The next meeting of the Florists' Club, and the last for the season, will be held June 12. Following that, the next event of importance will be the club's annual outing at Whitestone Landing, July 1. To this have been invited the retail associations of New York and Brooklyn, and all the gardeners' societies within a radius of twenty-five miles. There should, therefore, be a record attendance. An effort is made to have the wholesalers and retailers fight out their baseball challenges on that day, as three ball fields are at the disposal of the club.

The Bowling Club will meet every Friday evening at Thumm's alleys during the balance of the season. Any member of the Florists' Club is welcome, and the cost of each evening's bowling is equally divided. Any member also is at liberty to bring a friend, and accessions from the experts among the retailers are especially desired. The club must not fall behind its excellent record at Buffalo, where only five pins separated it from all the highest honors of the tournament.

George Cotsonas was able to tide the market over the fancy fern scarcity, which at one time last week left the storage supply almost depleted.

June 7 is the date of the next meeting of the New York Retail Florists' Association.

Richard Scommadau is celebrating the fiftieth anniversary of his beginning in the florists' business in New York. He has occupied his present headquarters at Thirty-fourth street and Eighth avenue for thirty-two years. His first store was on Twenty-fifth street and Eighth avenue, which he held from 1859 to 1877.

Philip Recht, formerly with the Hinode Co. and now with the Zeidler Co., has an office in Vienna, Austria, and is European representative of his firm. He has just returned from Europe and will now make his permanent home in Vienna, where his parents reside.

A new florists' supply house has been opened at 384 Jay street, Brooklyn, by J. W. Merritt. Brooklyn, with its several cut flower, green goods and supply wholesale centers, is beginning to demonstrate its ability to stand alone.

B. S. Slinn, Jr., concluded the Seattle exposition and far-away Alaska good rejuvenators for the summer, after the strenuous season just ended, and is already on his way.

The Beauty "king" no longer struts in conscious sovereignty, the stork last week having brought a Joseph Millang, Jr., for recognition.

Jersey is adding fast to its nurseries and to the splendid developments in this

line at Rutherford and Elizabeth; those of West Norwood give promise of being in line ultimately with their older competitors. Here Herman Steinhoff, of West Hoboken, has purchased a fine tract of 125 acres on the banks of the Hackensack, where he has built a greenhouse 35x200, the first of the new range where ultimately all his interests will be centered, as the rapid growth in value of land at Hoboken makes concentration farther out a necessity. This is only an hour from the city. On the way the fine trial grounds and nursery of the Stumpp & Walter Co. are passed, and in the distance may be seen the Palisades Nurseries, of Sparkill, N. Y., where Robert Clucas presides. Close at hand are the two 54x400 houses of the Ernst Asmus estate, at Closter, N. J., where E. R. Asmus presides, and Killarney, Bride and Maid, 25,000 of them, send their tribute daily to the New York wholesale market, with White Killarney and My Maryland to be added to the variety for the coming season. Nearly 75,000 of his new rose, the Steinhoff Red Rambler, are being grown by Mr. Steinhoff at West Norwood, where Herman, Jr., has charge, and many lilacs, retinosporas, privet, shrubs and 5,000 peach trees already form the nucleus of the growth that is to be. Mr. Steinhoff and his family make this their summer home, and already the proffer of the mayoralty has been made as an encouragement to permanent location.

Hugo Jahn, of Brooklyn, had several handsome floral pieces for the H. H. Rogers funeral. The church pulpit and altar were banked with hundreds of such mementos. The family order and the $500 pall of orchids were executed by Wadley & Smythe, which firm had charge of the decorations at the Memorial church at Fair Haven, Mass.

Another light is out in the horticultural sky of the east, and Charles L. Allen, the veteran of over 80 years, has joined the silent majority. Since the beginning of the year we have lost of the brotherhood grand men like Hallock, Noe, Hagemann, Scott and Dreyer, and now a giant in mental achievement and world-wide fame has been called away. Eighty-one is a good old age, but many a time Mr. Allen has told me he thought he would stay the century. Until a year ago, when his constitution was weakened by pneumonia, he gave every promise of the fulfillment of this expectation. Only two weeks ago his splendid paper on "Plant Development" was read at the club's May meeting and it gave evidence of his splendidly preserved mental skill and capacity. He was always an optimist. His personality was an inspiration. Two sons, Charles H. Allen, of Floral Park, the carnation grower, and W. S. Allen, a wholesale florist on Twenty-eighth street, survive him.

Mrs. Warendorff, of the Ansonia, sailed for Europe May 25 on the Kaiser Wilhelm der Grosse.

Sigmund Geller says the Memorial day business is heavy and satisfactory. He leaves early in June for Europe and his usual purchases.

Enormous clearings of flowering plants are made daily by Charles Millang from Sixth avenue and Twenty-seventh street, and by Kessler Bros. from Twenty-eighth street. These houses are represented every morning long before daylight at the big downtown plant market, where business begins at midnight.

PEORIA, ILL.

Nelson Cole has found that it is an ungrateful task to repel foreign invasions in this country. Two weeks ago he ejected from his flower store the proprietor of the Illinois Sugar Bowl, Sypros Thanos, with more force than politeness; in fact, he applied the toe of his boot to a convenient portion of Mr. Thanos' anatomy, not only lacerating the candy man's sensibilities, but causing him considerable physical pain. Mr. Cole was arrested for so forcibly turning the tide of immigration, and the case came up last week before Justice Nothnagel. At that time the jury failed to agree and a change of venue was secured to Justice Hall, before whom the case was set for May 20. Neither Mr. Cole nor counsel put in an appearance and the justice proceeded to affix a fine of $25 and costs.

ALBANY, N. Y.

Club Meeting.

A flower show, the first of its character ever attempted in this city, will be held at the State Armory for three days during the second week in November. This was decided upon at a meeting of the Albany Florists' Club May 20. President Fred A. Danker presided. Chairman E. C. Hazeltine, of the hall committee, announced that the armory had been secured. E. C. Tracey, in his report on the judges, stated that the premium list would be completed within a month. Fred Goldring, who acted as one of the judges at the New York show, will introduce some metropolitan ideas.

There will be special exhibits from the growers of the Hudson valley, wholesale flower dealers of New York and expert

growers of Connecticut. The list of prizes will be large and there will be as many classes as can be reasonably provided. Among the classes to be arranged will be some for the Albany county growers and others for the local retailers, out-of-town retailers and wholesale dealers, and growers. Several prizes have been voluntarily offered by out-of-town growers. The committee is busily engaged trying to interest Albany women in the event, and a percentage of the show's proceeds will be donated to some charitable cause. The exhibition should prove a big success, as there are thousands of lovers of flowers in this vicinity who would travel miles to witness a display of this kind.

CALCIUM SULPHIDE.

The following method of preparation by which calcium sulphide becomes a useful insecticide and fungicide was given by Dr. Contant in a lecture to the Société Nationale d'Horticulture de France, published in the February number of the Journal of the society. Prepared in this way, the calcium sulphide (or polysulphide) is said by Dr. Contant to be extremely efficacious. A large kettle, capable of holding eight gallons, is set up in the open air over a fire. Three to four pints of water are poured into the kettle and boiled, and then about three pounds of quicklime are added gradually. The kettle is then half-filled with water. Fine sulphur passed through a sieve is dropped in little by little, the liquid being stirred meanwhile. The liquid is then boiled for half an hour. Water is added till the kettle is full, and the liquid is allowed to stand for six hours at least. A sediment settles, leaving a clear orange liquid. The deposit serves as an excellent winter wash for fruit trees, etc. The liquid to be used for spraying is diluted with nine times its volume of water, and is serviceable both for the destruction of fungous pests and also for the aphis of roses, peaches, etc. It is particularly useful for vines and makes "sulphuring" unnecessary. It should be noted that the liquid to be kept must be syphoned off into receptacles, such as carboys, which can be corked, since by exposure to air the sulphides become decomposed, forming sulphur and calcium sulphate.

McKeesport, Pa.—J. W. Butler has opened a flower store on Fifth avenue, opposite the hospital. He also will open branches at Versailles and Richand cemeteries.

A GOOD INVESTMENT.

Enclosed please find my check for $1.40 in payment for my half-inch card one month in the department for Leading Retail Florists in the Review. This has been a good investment for me ever since I made the yearly contract, and is getting better right along.

George C. Baker.

San Antonio, Tex.

BALTIMORE.

The Market.

Trade for the week has been fairly good, considering the unfavorable weather. Flowers are rather abundant, especially roses and carnations. We have had a cold spell for several days, with rain on Friday and Saturday, which is expected to start everyone to planting out stock. The hardy material which usually is largely seen during May is lacking, and flowers for Memorial day will probably be scarcer than at any former celebration within the memory of the trade. Peonies will hardly be in bloom in time for Decoration day, as most of them are hardly showing color.

Decoration day here is almost as much observed as Easter. Notwithstanding the number of public parks, there is a large proportion of every city's population which resorts on Sundays and holidays to our large burial grounds, though these, of course, are not now, as was the case a generation or two ago, the show places to which strangers are escorted. The efforts made, therefore, to keep them up to a higher standard of taste, in the laying out of the grounds, the construction of roads, the formation of masses of shrubbery and the tasteful arrangement of beds of flowering plants, deserve commendation as furnishing examples for the many who find pleasure in visiting beautiful grounds dedicated to those who have passed away. London park, one of the largest cemeteries in Baltimore, has over 700 acres and an electric car system for the use of its lot-holders, and has seven large greenhouses where they grow plants for cut blooms to supply their trade.

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., Watson S. Woodruff, Orange, Conn.; First Vice-pres., J. C. Robinson, Waterloo, Neb.; Sec'y and Treas., C. E. Kendel, Cleveland. Twenty-seventh annual convention, Niagara Falls, Ont., June 22 to 24, 1909.

THE peas are not yet all in the ground.

VISITED CHICAGO: H. W. Buckbee, Rockford, Ill.

HENRY FIELD has returned to Shenandoah, Ia., after a trip east.

SOME of the bean growers are still looking for a few more acres.

SWEET corn is in demand. Little of the later varieties has as yet been planted in the vicinity of the "great central market."

VENERABLE Charles L. Allen, pioneer Long Island seedsman, died May 22. His portrait and a brief sketch appear on page 15.

THE seedsman's trade is reported to be humping itself. It is no more than right that it should, considering the rest that it took a week or so ago.

THE weather has continued unreasonably cold over a large part of the country—an occasional spring day and then a relapse to a March temperature.

A NOTE in the Nursery Department records that the Henry Field Seed Co., Shenandoah, Ia., has acquired the peony stock of the late H. A. Terry, Crescent, Ia.

HUGO BEYER, the veteran seedsman and plantsman of Iowa, died May 19 at his home, about four miles outside of New London, where he has lived alone for several years. A note appears in the obituary column this week.

E. J. DEAL, general manager of W. W. Johnson & Son, Ltd., Boston, England, is planning a visit to this country in August and September. He expects to sail from Liverpool July 31. He has many friends in the trade here, but has not been over for several years.

IT is just at the beginning of the planting season in the Colorado vine seed section and too early to give any idea of crop prospects except that the seed is going in under excellent soil conditions. D. V. Burrell states that he is putting in a somewhat increased acreage.

A. H. GOODWIN, vice-president of the W. W. Barnard Co., has returned to Chicago from a six months' trip through Europe. An involuntary delay of ten days in Sicily, caused by the recent earthquake, was the first experience after reaching European soil last December.

THE annual meeting of the Iowa Seed Dealers' Association will be held at the Chamberlain hotel, in Des Moines, Tuesday, June 1, and it is believed that there will be a full attendance of members, as quite important matters are to come up before this meeting. Charles N. Page, of the Iowa Seed Co., is president.

THE John H. Allan Seed Co., Sheboygan, Wis., filed new articles of incorporation with the Secretary of State at Madison May 13. The business was established in 1856, incorporated in 1892, and the new articles, which state the capital to be $110,000, are signed by E. M. Parmelee, president; W. B. Lucas, treasurer, and A. L. Sommer, secretary.

MOST of the onion set fields in the Chicago district are said to be showing a good stand.

THE canning season in the Baltimore district opened last week and will soon be under full headway.

THE end-up of the season is not likely to show 1909 as good as an average year. In most cases reports are to the effect that the business of the past month has

been much better than an average May, but the general opinion is that the losses occasioned by unfavorable condition in March and April will hardly be made good.

CONDITIONS in the Illinois corn belt are reported to be in good shape for planting and the supply of good seed corn is being depleted quickly. The shelled article of field corn offered as seed this year is much smaller than usual and it has been hard to dispose of. Now, however, it is going out, and, inasmuch as it germinates well and has in most cases a good pedigree, it will unquestionably produce a good crop.

IMPORTS.

The imports of seed through the port of New York for the week ending May 15 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Annatto ...	5	$ 75	Grass	47	$ 531
Caraway ..	300	2712	Hemp	453	1474
Cardamom .	61	2768	Millet	1264	3668
Castor	3507	12197	Mustard ...	105	1204
Celery ...	50	666	Poppy	500	1981
Clover	182	3998	Rape	3	17
Coriander .	366	1620	Other		1974

In the same period the imports of bulbs, trees and plants were valued at $13,149.

PUGET SOUND CABBAGE SEED.

Frank Leckenby, vice-president of the Charles H. Lilly Co., Seattle, is the first seed grower heard from who reports a favorable spring season. May 18 he said: "We are having a favorable spring season for cabbage, and except for the damage done by our exceptionally severe winter, we have no complaints to make. We shall harvest a fair crop of cabbage seed this year, but do not anticipate any surplus."

THE SEED SITUATION.

In general the trade seems to have gotten down to the usual seasonable temper. The annoyances caused by the bumps received in the early part of the year have been lost sight of in the effort to make the most of present opportunity. Turnip seed, sweet corn, melons and cucumbers are among the staple articles that are in demand and in many cases there is a shortage of the kinds called for. There are other kinds quite as good, however, which are recommended in their place.

The seed travelers for the jobbing houses report good business and the outlook for the coming year is satisfactory all around. Prices at which future orders are being booked are some shades higher than were obtainable last year at same time. Peas and vine seeds seem to stand for the greatest advance. The wholesalers agree that prices must advance in proportion to the advance which has to be given to the farmer grower.

CONNECTICUT CONDITIONS.

Watson S. Woodruff, president of the American Seed Trade Association and head of S. D. Woodruff & Sons, Orange, Conn., writes as follows of conditions in the territory in which his firm operates:

"It has been a cold, wet May up to this writing (May 22), with vegetation of all kinds unusually backward. About the usual acreages of onion, beet, kale and parsnip have started off nicely. Roots of the biennial crops as a rule kept over splendidly, and there is still plenty of time for crops to catch up and make an abundant harvest.

"The wet May that makes the barn full of hay certainly ought to work to the advantage of the general farmer, and meadows and grain crops look unusually fine.

"Corn planting is about finished, and about the same acreage of sweet corn has been put out as usual; in fact, little change from the average acreage of the last five years. An abundant harvest is

sorely needed to supply the ever-increasing demand for high-grade seeds, and growers in the Connecticut section, while their product is limited, claim, and rightfully so, I believe, to produce some pedigree stocks that are eagerly sought for at good prices by the trade.

"There is not a seedsman in Connecticut, I believe, but whose warehouse is cleaned up better than it has been for years."

PEAS AND BEANS.

W. H. Grenell does not take a hopeful view of the pea and bean situation; he believes shortages will be the rule with peas and that beans will not be in as good supply as usual.

"We are having a very backward seeding for peas," he said at Saginaw last week, "but are not losing the amount of seed stock lost in May of 1908. Many fields will be late, and without weather unusually favorable for the pea crop, we cannot expect a large crop. I am not looking for any surplus; on the other hand, I expect shortages will be the rule. Beans are all contracted for with farmers and, on the whole, are not in as good hands as usual, for the high price of pea beans has claimed many of the best growers. I do not expect any surplus."

STATE SUES GRASS SEED CO.

The Kentucky Blue Grass Seed Co., J. M. Bigstaff and M. O. Cockrell, of Mt. Sterling, Ky.; D. S. Gay, of Winchester; J. S. Wilson, Woodford, and Calesby Spears, of Paris, have been sued in the Montgomery Circuit Court for $5,000 each by Commonwealth Attorney Alex. Conner, of Owingsville. The petition alleges that they are members of a pool or

trust for the purpose of controlling the price of blue grass seed and the production, in violation of the anti-trust law of the state of Kentucky.

The Kentucky Blue Grass Seed Co. has one of the finest cleaning plants in the United States, located in Mt. Sterling, and the men sued individually are among the wealthiest in that section.

COOPER-TABER'S CROPS.

The following summary of prospects for 1909 harvest was received May 24 by a correspondent of Cooper, Taber & Co., London:

Beet—Table varieties seriously damaged, especially the extra early kinds. Crosby's Egyptian and Detroit will be very short. Long varieties are doing fairly well.

Beet—Sugar and Swiss chard have suffered severely, and the same is true of mangel wurzel. In each case a large acreage was planted.

Borecole, Brussels sprouts and kohlrabi—A moderate stand.

Cabbage—All varieties have been badly damaged, but it is not possible to say definitely now what proportion will survive.

Carrot—Long varieties are standing well, but the early short varieties are about twenty-five per cent less than planted.

Celery—All varieties nearly destroyed, and the crops will be very small.

Celeriac—About one-half standing.

Endive and leek—Moderately good.

Onion—Italian varieties promise about two-thirds of a crop. French grown varieties will be short.

Parsley and parsnip—Nearly an average.

Radish—Winter varieties about two-thirds standing.

Rutabaga—American and Long Island Purple-top doing well; Universal nearly a failure; Best of All, Monarch or Elephant and Magnum Bonum doing very badly; other varieties fairly good.

Turnip — White Globe Strap-leaved failed; Golden Ball, Early Red (Purple) Top Globe and Purple and White Milan will be very short; other varieties promise more than half a crop.

Annual Crops — Stock seeds are all sown, but nothing further can be reported at present.

SEED TRADE ASSOCIATION.

Annual Convention.

In his announcement of arrangements for the approaching convention of the American Seed Trade Association, Secretary C. E. Kendel confirms the report first published in last week's Review that Conrad Appel is sending a representative from Darmstadt to meet the grass seed dealers. The secretary's circular is as follows:

"The Clifton hotel, Niagara Falls, Ontario, has been selected as headquarters for the twenty-seventh annual convention, June 22 to 24.

"A special rate has been obtained for the members as follows, all on the American plan, which includes the banquet on

THE FIRST OFFER OF

"Rawson's Beauties" Cineraria

This is an entirely new strain and offered for the first time. It is dwarf in type and bears the largest heads of the best colored and finest formed flowers that we have ever seen exhibited anywhere.

It will be a great surprise to those who raise Cinerarias, and all we ask is a simple trial. **Per trade package, $2.00; per ½ trade package, $1.00.**

Cut Dahlia Flowers Pay

If You Have the Following Varieties

After considerable consideration and observation, and "talks" with the trade, we have decided to offer the following Dahlias to florists this season. Our retail Catalogue, which will be mailed free, contains a larger collection, but few are superior to the following and all are good size, divided clumps that have been field-grown and are strong and healthy.

Price of all the below-named varieties of Dahlias, large divided clumps or roots, except where noted, 10c each, $1 per doz., $7.50 per 100, $70 per 1,000.

Jack Rose. (Decorative type.) The variety Jack Rose is rightly named and is a florist's Dahlia, "from the ground up." The color is similar to the Jacqueminot rose, and is a unique color in the Dahlia, which lights up beautifully at night. The habit of the plant is stocky, very free-flowering. Producing its blooms in great profusion, upon erect, long stiff stems, making it invaluable for cutting. You cannot afford to be without it, if you sell cut-flowers. Price, green plants, ready April 1, 1909, 50c each, $5 per doz., $35 per 100.

Decorative Dahlias

Sylvia. Best described as a Giant Nymphæa, being stronger, larger and deeper colored. Flowers 4 to 6 inches in diameter, of fine form and full to the center, which is white, shaded to soft pink on the outer petals. One of the best cut-flower varieties.

Admiral Dewey. Brilliant imperial purple.

Black Beauty. A beautiful dark velvety maroon.

Blue Oban. A sport of the Decorative Dahlia Oban, and the nearest approach to blue found in Dahlias. 25c each, $2.50 per doz.

Catherine Duer. Strong-growing, free-flowering crimson-scarlet.

Clifford W. Bruton. Best yellow; immense size; perfect form

Frank L. Bassett. Color, bright royal purple, shading to blue.

Grand Duke Alexis. Very large, white, tinted pale lavender.

Henry Patrick. Superb pure white; long stems; fine for cutting.

Lyndhurst. One of the best bright scarlet.

Maid of Kent. Cherry-red, tipped white.

Mrs. Winters. Very large; pure snow-white.

Nymphaea. Color, clear, light shrimp-pink.

Oban. Very large rosy lavender.

Orange King. Rich glowing orange; early and profuse.

Perle (Perle de la tete d' Or). The grandest white Decorative Dahlia to date; very large and of beautiful shape.

William Agnew. Rich, dazzling red; immense size.

Cactus Dahlias

Aegir. Petals are twisted and color bright rich crimson-scarlet.

Countess of Lonsdale. A pleasing blending of amber and salmon.

Dainty. The ground color is lemon-yellow, which shades lighter as the season advances, at which time the color approaches canary-yellow at the base of the petals.

Earl of Pembroke. Bright plum. 15c each, $1.50 per doz., $12 per 100.

Floradora. Color, dark velvety crimson. The best dark crimson for cutting, as the flowers are borne on long, erect stems and keep for a long time. 15c each, $1.50 per doz., $12 per 100.

General Buller. Color, deep, rich, velvety maroon, tipped white. 15c each, $1.50 per doz., $12 per 100.

Harbor Light. Flowers are of immense size, outer petals extending to 7 inches across; long, slender, twisted and incurved; color, orange-red.

Jealousy. Purest pale canary-yellow.

J. H. Jackson. The largest of the deep, rich velvety maroons.

Keynes White. One of the best white Cactus Dahlias.

Kriemhilde. One of the finest pink Cactus Dahlias.

Cactus Dahlias

Mrs. H. J. Jones. Incurved portion of the petals are deep crimson; the broad stripe of white running through the center of the petals extends almost to the center.

Standard Bearer. Brightest scarlet; profuse bloomer. 15c each, $1.50 per doz., $12 per 100.

Strahlein Krone. Intense cardinal-red.

Victor Von Scheffel. The color is a fresh, delicate pink, shading to deep rose-pink. 15c each, $1.50 per doz., $12 per 100.

Winsome. Flowers white, very large, beautiful Cactus form.

Show and Fancy Dahlias

A. D. Livoni. Beautiful soft pink; early and profuse bloomer.

A. Pefferhorn. Rosy crimson.

Arabella. Pale primrose, tipped and shaded old rose and lavender.

Camelliaflora. A fine large pure white.

Glowing Coal. Brilliant red.

Green's White. One of the best whites for cutting.

Harlequin. Brilliant crimson, striped and tipped white.

Lemon Beauty. A grand yellow.

Menheddy Beauty. Fancy buff, with crimson spots, free, long stems, large bloom. 8c each, 80c per doz., $6 per 100.

Olympia. Color is deep rose-pink, striped and penciled crimson.

Progress. The color is a clear, soft rosy lake, beautifully penciled and spotted glowing crimson. Very valuable as a cut-flower. 15c each, $1.50 per doz., $12 per 100.

Queen Victoria. Deep yellow; fine for cutting.

Red Hussar. Pure cardinal, red flower, very free bloomer, splendid for cutting.

Storm King (Blizzard). A companion for the superb pink Dahlia, A. D. Livoni. Flowers are snow-white; extremely early and a free-bloomer. This is the florist's ideal white. 15c each, $1.25 per doz., $10 per 100.

White Swan. Snow-white, with long stems.

Single Dahlias

THE 20TH CENTURY. Intense rosy crimson, with white tips and white disk around the yellow center.

Dahlias to Color

We can also furnish, without names, in mixture, all colors separate, or all colors mixed, as follows:

Mixed Pinks, Mixed Whites, Mixed Reds, Mixed Yellows. 8c each, 75c per doz., $6 per 100, $55 per 1,000.

Mixed, all colors. 60c per doz., $5 per 100, $45 per 1,000.

Wednesday evening as well as all other meals:

"Room without bath, per person, $4.00 per day.
"Room with bath, one person, $6.00 per day.
"Room with bath, two in a room, $5.00 each person per day.

"Arrangements may be made with the customs authorities to allow automobiles to enter Canada for the three days' stay without paying the customary license.

"Word has been received that at least one large grass seed dealer in Darmstadt will send a representative to the convention to meet the dealers on this side, ostensibly, the secretary has been led to believe, to confer on matters connected with this branch of the trade.

"Several notable men connected in various capacities with horticulture have promised to address us, chief among them Prof. Liberty H. Bailey, of Cornell, than whom none is better known.

"The subjects to be considered are vital and a large attendance is anticipated, especially with the meeting place so attractive and accessible. It is therefore advisable, while the hotel is ample to accommodate us, to secure rooms in advance."

The program of papers and discussions is as follows:

"The National Organization of Seed Analysts, its Purpose and Scope," by the president, Dr. E. H. Jenkins, director of Connecticut Experiment Station.
"Root Crops," by Prof. C. A. Zavitz, representing Ontario Agricultural College, Guelph, Ont.
"Seed Legislation, its Uses and Abuses," by Prof. L. H. Pammell, of Iowa State College of Agriculture.
"A Campaign for Rural Progress," by Prof. Liberty H. Bailey, director of New York State College of Agriculture at Cornell University.
"The Deterioration of Types of Cabbage," by J. M. Lupton, of Mattituck, L. I., N. Y.
"Color Photography," illustrated with views from nature, by J. Horace McFarland, of Harrisburg, Pa.
Tuesday evening, 8:45, concert by Clifton Hotel orchestra, followed by informal dancing.
Wednesday evening, banquet; a few five-minute talks, followed by Mr. McFarland's lecture on "Color Photography."

Vegetable Forcing.

GREENHOUSE VEGETABLES.

Boston, May 24.—Cucumbers, $2 to $4 box; tomatoes, 25c to 30c lb.; lettuce, $1 to $1.25 box.

New York, May 24.—Cucumbers, $1 to $3 box; mushrooms, 25c to 65c lb.; tomatoes, 10c to 15c lb.

Chicago, May 25.—Cucumbers, 60c to 90c doz.; lettuce, 17½c to 20c box; mushrooms, 50c to 60c lb.; radishes, 25c to 50c doz. bunches.

GARDENING FOR PROFIT.

If you're gardening for profit,
  And your fortune would increase,
You should sow your farm with onions,
  For they bring a scent apiece.
And if you are scent-imental
  You should plant, in nook and ell,
Something you can cauliflower
  And a vegetable as well.
—Saturday Evening Post.

CUCUMBERS VERSUS GNATS.

A House of Cucumbers Ruined.

Having had an experience similar to that referred to by H. G. in the Review of May 6, what I have to say may be of interest to someone.

I lost a whole houseful of cucumber plants in less than a week, just as they were coming into bearing, and when I examined the roots I found a large number of small worms around the collar of the plants. The blame for this I laid to my using a lot of fresh horse manure for making bottom heat. Either the manure prevented proper drainage and caused the soil to become sour, or the worms did it; I am not sure which. Anyhow, it was my first trouble of that sort in a thirty years' experience in growing cucumbers, both for private use and for market, in England and here.

The best soil I have found to grow cucumbers in is sod cut from a pasture, about three inches thick, stacked up with a lot of half-rotted horse manure mixed with it, and left to rot for six months. You then get all the strength of the manure without its objectionable features. Fresh manure and fresh cut sod are dangerous to the crop, because of rankness in the manure and insect pests, besides the sourness of soil incidental to decaying vegetation in the sod.

A Successful Method.

A successful plan I adopted for growing hothouse cucumbers was as follows: I had a long, narrow lean-to house, with a southeastern exposure. This house was about ten feet wide and eight feet high at the back, with a path sunk a foot lower than the outside ground. There was a bench about four feet wide, extending the whole length of the house, with sufficient hot water pipe running all around the bench but above it, against which I placed inch boards, forming a box. I placed two inches of drainage material on the bottom, then three or four inches of rough sod and about a bushel of compost in a pile for each plant to start growth in. As the roots came to the top of the soil, fresh, warm soil was added, about an inch at a time, thus keeping the plants growing and healthy the whole of the time they were fruiting. The piping around the bed against the boards kept the soil nice and warm without installing an expensive system of bottom heat.

There was sufficient piping to keep a night temperature of 65 degrees, with a zero temperature outside. I had galvanized iron troughs made to fit on the piping, placed these at intervals and filled them with water, adding plenty of sulphur to keep down red spider.

While the plants were small, I used the available space between the plants and on shelves on the back wall to propagate a whole lot of tender bedding plants, and to raise seeds that required a warm temperature.

I should add that the roof of the house was wired about fourteen inches from the glass, for the plants to run over.

W. J. G.

Everett, Mass.—Osgood Bros. have notified the police that two men have been visiting residences in various sections of the city soliciting orders in their name, endeavoring to secure money and defraud the public.

Bottineau, N. D.—The board of trustees of the State School of Forestry announced May 15 that bids would be received for the construction of a greenhouse. The time for the reception of bids was to close June 7.

INDIANAPOLIS.

The Market.

Business is still on the boom, and the indications are that this month is going to be the best May we have had for years. Funeral work, coupled with decorations and the bedding business, is giving us all we can handle, and some of us will be glad when it is over.

Flowers are still scarce, owing to the continued cool weather and heavy demand. Roses, callas and sweet peas are coming in fair quantity, but carnations are not enough to go around. Outdoor valley, iris and some peonies are to be had. Flowers will be scarce for Memorial day, as there will be practically no outdoor flowers, which undoubtedly will make business good for the florists, as everyone has to depend on them for flowers.

Florists doing bedding business have all they can do, and the prospects are that this will be a good year. The weather is cool, and that will cause the planting to continue till the end of June. When the season opens up hot and stays that way, the planting is all done in three weeks, as the people begin to think about going away in June, and those who have not gotten their plants by that time let them go. For that reason, this will be a good year. Florists at the flower market report trade good, and it seems probable that good salvias, geraniums and vinca vines will be scarce and high in price in another week.

Various Notes.

Phil Conway is the proud father of a new ten-pound boy. Mr. Conway reports business good.

Lee Woodworth is on the sick list.

A. Wiegand & Sons had the decorations for the dedication of the new Masonic temple this week. This is said to be one of the finest Masonic temples in the world, having cost more than $750,000.

Albert Pettit has the Seattle fever. He expects to make a trip out there soon.

S. S. Skidelsky has the sympathy of his many friends here in the loss of his wife.

Mr. and Mrs. Anthony Wiegand left this week for a three months' trip to Europe. They expect to visit Italy, Switzerland, Germany and France.

W. H. Elverson and Fred Weber, Jr., of St. Louis, were visitors last week.

E. A. Nelson is working overtime. He has the contract for the flower beds at Woodruff place this year. This, with his cemetery work, is keeping him on the jump.

The florists in the vicinity of Crown Hill say that the increase in price for filling cemetery vases has not caused them to lose many customers, as they have all they can do.

A fatal accident befell the little six-year-old boy of George Wilmer, with E. A. Nelson, last week. In some manner the little fellow fell under the street car and had one leg crushed off. He died one hour later from loss of blood.

Hartje & Elder have a fine lot of stocks for Memorial day. H. L. W.

In answer to your letter of May 8, asking me if I can offer any suggestions for the improvement of the Review, I will say that I cannot. I don't think your paper needs it. Enclosed you will find the money for another year's subscription.—D. W. Evans, Scranton, Pa.

PACIFIC COAST.

Portland, Ore.—The Tonseth Floral Co. is now located in its new store in the Marquam building, 325 Morrison street.

The government experimental bulb farm at Bellingham, Wash., was visited by thousands of people this spring, while the bulbs were in bloom, and made a fine showing.

San Jose, Cal.—Arthur Cann, the florist on South Whitney street, has placed a formal complaint before the city authorities, alleging that garbage is being dumped within the city limits, in violation of a municipal ordinance.

George H. Whitelaw has bought 960 acres of land in Kern county, California, for $25,000 cash, and the Eucalyptus Hardwood Co. has been organized with $300,000 capital stock, to proceed to plant the property to eucalyptus. The company will establish a nursery near Anaheim.

The MacRorie-McLaren Co. has succeeded to the business established by Daniel MacRorie individually, at 721 Crocker building, San Francisco, Cal. An importing and jobbing business in trees, shrubs, plants, seeds and bulbs is done, phalænopsis and Philippine orchids being a specialty.

GRAND FORKS, B. C.

To the majority of us who live in the central or eastern portion of the United States, British Columbia is looked upon as being a region of almost eternal winter; a region inhabited by aborigines and venturesome prospectors. The northernmost portion of it possibly does have snow storms on its schedule almost every day in the year, but the southern part has a climate that is remarkably mild. During the winter months the temperature will take a tumble occasionally to well below zero, while in the summer months it gets as hot as most of us care to endure.

The possibilities of the southern part of the province for those who grow perishable crops is just beginning to be realized. In many of the splendid valleys fruit growing has reached a very profitable stage. In what is known as the Kettle valley, with the little town of Grand Forks as its metropolis, fruit growing is rapidly reaching an extensive and money making stage. The pioneer horticulturist of the valley is W. H. Covert, who has an orchard of about 200 acres of the most splendid trees to be found in all of the northwest. Because of the success of this orchard, some of which is now twenty years old, other plantations have been set out, and other horticultural interests developed.

The Frache Bros. are firm believers in the future prosperity of the province, and have a range of greenhouses covering about 20,000 square feet. There are seven houses in the range, of different sizes and construction, and each has been built as the demand was felt. Because of this arrangement, they are contemplating the reconstruction of their range and the addition of still more houses. Their trade is increasing with such leaps and bounds that their houses at the present time are crowded to supply the demand.

Two of these houses of Frache Bros. are devoted to carnations, with a few pot and decorative plants, while the rest of

the range is planted to tomatoes and lettuce as the main crop. At the time of my visit, a few days ago, they were just harvesting a splendid crop of flowers from their carnations, and it was good to see such magnificent Enchantress, White Enchantress, Rose-pink Enchantress and Prosperity. In size and length of stem they were the equal of any produced in the more southern climes, but Aristocrat was very small.

When it comes to lettuce, Frache Bros. are growing a crop as fine as one ever sees. Their tomatoes were set full of fine young fruit, and gave promise of a first-class harvest. To see these houses, away up in the far northwest, and to see the splendid crops that were being there produced, made me feel more strongly than ever that those of us who live in more southern climates would better not swell up too much and think that we are the whole show. Some of these days these northwestern Canadian brothers of ours will come to our shows and wipe the board clean. E. H. Favor.

SAN FRANCISCO.

The Market.

Business is again quiet, and everyone is looking forward to Decoration day as a possible solution of how to get hold of some ready cash. Flowers in the line of roses and carnations are not as plentiful as they have been, and are being held at somewhat stiffer prices. The former are in fair demand, however, when the poor condition of trade is considered, but for the latter the demand nowhere is half equal to the supply.

Sweet peas are the most popular article at present and, although the price is uniformly cheap, they move well. From 50 cents to 75 cents per dozen bunches seems a low figure, but the growers seem to be making good at these prices. Spanish iris is in abundant supply, but peonies are about over for the season. The late flowering tulips have entirely disappeared. Gladioli, especially The Bride, are in heavy supply. From present appearances, the Memorial day out-of-town shipping is going to be good.

Various Notes.

C. A. Fredericks will depart June 1 to view the exposition at Seattle.

H. M. Sanborn, of the Dwight Way Nursery, Berkeley, is sending some fine Kate Moulton roses into town at present.

Dr. Parker, of Santa Cruz, is sending some splendid cattleyas and other orchids to our leading dealers.

W. W. Saunders is at present at Sebastopol, Cal., arranging for the shipment of a large lot of florists' moss.

H. Hayashi & Co., of Alameda, Cal., who purchased the A. Galloway place at Fruitvale, have moved the entire plant to their new nursery at Elmhurst.

James Nevin, of Ross Station, is planting for the coming fall exhibition of the Marin County Flower Show several hundred show tuberous-rooted begonias recently imported from England.

Mr. Gregg conducts greenhouses at Fortieth and Market streets, Philadelphia. It is possible that in time the greater part of his plant will be located here.

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1908 9: Pres., Charles J. Brown, Rochester, N. Y.; Vice-Pres., C. M. Hobbs, Bridgeport, Ind.; Sec'y, Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y. The 34th annual convention will be held at Rochester, June 9 to 11, 1909.

THE nursery farm of T. N. Yates & Bro., east of North Wales, Pa., has been sold to Wm. M. Frost, of Holmesburg. The farm consists of 198 acres.

IT is confidently expected the Rochester convention of the American Association of Nurserymen, June 9 to 11, will bring out the largest attendance in the history of the organization.

KLEHM'S NURSERIES, Arlington Heights, Ill., say that "the M. Jules Elie peony is one of the finest pink varieties and is a strong, robust grower, the only objection being the short stem. We have not had much experience in growing this particular variety and so cannot say much about its keeping quality."

GEORGE C. SEAGER has been secretary of the American Association of Nurserymen since 1893, having been elected at the world's fair meeting in Chicago. The association, in all its thirty-three years, has had but three secretaries: D. W. Scott, of Galena, Ill., from 1876 to 1887; Chas. A. Green, Rochester, from 1888 to 1892, and Mr. Seager for the latter half of the life of the organization.

PEONY SOCIETY.

The next meeting of the American Peony Society will be held at Cottage Gardens, Queens, N. Y., on Tuesday and Wednesday, June 8 and 9, 1909.

A. H. FEWKES, Sec'y.

FIELD GETS TERRY PEONIES.

It is well known in the nursery trade that the collection of peonies of the late H. A. Terry, Crescent, Ia., was one of the largest in the country, and it will interest all nurserymen to know that this collection has now passed to the Henry Field Seed Co., Shenandoah, Ia., Mr. Field having recently purchased the entire stock from the Terry estate. The Terry collection, while it includes large numbers of the standard varieties, is largely made up of sorts raised by Mr. Terry himself, and which have proven specially adapted to western climatic conditions. In speaking of his purchase Mr. Field said: "This collection is said to be one of the finest in the United States. Mr. Terry has been a grower and hybridizer of peonies for over forty years and at the time of his death a few months ago left a large and fine collection. I expect to move it down to my grounds this fall and will probably issue a special catalogue on the peony."

ARBOR-VITAES FROM SEED.

I would be under obligations to you if you would please give me some pointers on arbor-vitæs. I have bought and planted at different times about twenty-five and not one has grown. How are they raised from seed and what time of year are they planted? W. B. J.

Seed of arbor-vitæs may be sown in shallow flats in the fall and the flats placed in a greenhouse. When the seedlings are large enough to handle, they should be put into small pots and kept growing until well on in spring, when they may be planted outdoors in the open ground, in a sheltered, partially shaded location.

There should not be any difficulty experienced in growing them. There must have been something seriously wrong in the soil, location or treatment when none of those planted grew. I never lose five out of a hundred seedlings. The young seedlings need careful watering and some shade until they get established in pots and in the open ground.

If it is not convenient or feasible to sow the seed in the fall, when ripe, the seed may be stratified—that is, kept in sand in a cool place—until spring, and then sown indoors or out.

Arbor-vitæs can also be grown from cuttings, taken in summer. These should be put in soil composed in great part of leaf-mold and sand. After the cuttings are in, they should be well watered and shaded and never allowed to dry out until they are rooted, which should be, under favorable conditions, in about six weeks. When the cuttings are well rooted they may be planted farther apart in the open ground and protected with coarse manure in winter, or they may be left where they have taken root until spring. D. M.

EARLY FLOWERING SHRUBS.

Dirca palustris, better known as the Leatherwood, is one of the earliest flowering shrubs grown, being in full flower this season, in the vicinity of Boston, the first week in April. This is a rather curious shrub, of low growth, sometimes resembling a miniature tree. The leaves are yellowish green and the flowers yellow in color. The bark was at one time much used by the Indians for making fish lines and bow strings, and has great strength. It is usually found in a native state in woods and thickets, and seems to prefer wet soil. Some masses of this early flowering shrub in the Boston parkway system were very effective in early spring.

A SPECIALTY

The Dingee & Conard Co. West Grove, PA.

Mention The Review when you write

is a specially valuable shrub, not only on account of its abundance of single orange yellow flowers, which were fully expanded May 16 and will be carried to some extent all summer, but because of its striking green bark, which makes it stand out in marked contrast to other shrubs. The plant has a graceful habit and the foliage is of a lovely light green color. In severe winters the shoots are sometimes cut back rather severely, but the plant quickly sprouts from the bottom and regains its full size. It is of easy propagation, as it makes large quantities of suckers which can be taken off in spring and transplanted. There is a double form of this kerria, also one with variegated foliage, but the single flowered form is preferable. This shrub is worthy of extended culture, if only for its winter bark effects.

Spiræa arguta, similar to the well known S. Thunbergii, but a decidedly better shrub, was in full flower in the Arnold Arboretum May 9. One special variety, pointed out by Jackson Dawson as being discovered in New Hampshire, had a more erect habit, larger and whiter flowers and was a great improvement over the type. This has not the fine foliage effect of S. Thunbergii, but is a better shrub to plant where floral effects are a prime consideration. It is hardier than S. Thunbergii, the flower buds on which are sometimes killed in severe winters. It can be planted with equal success in either spring or fall.

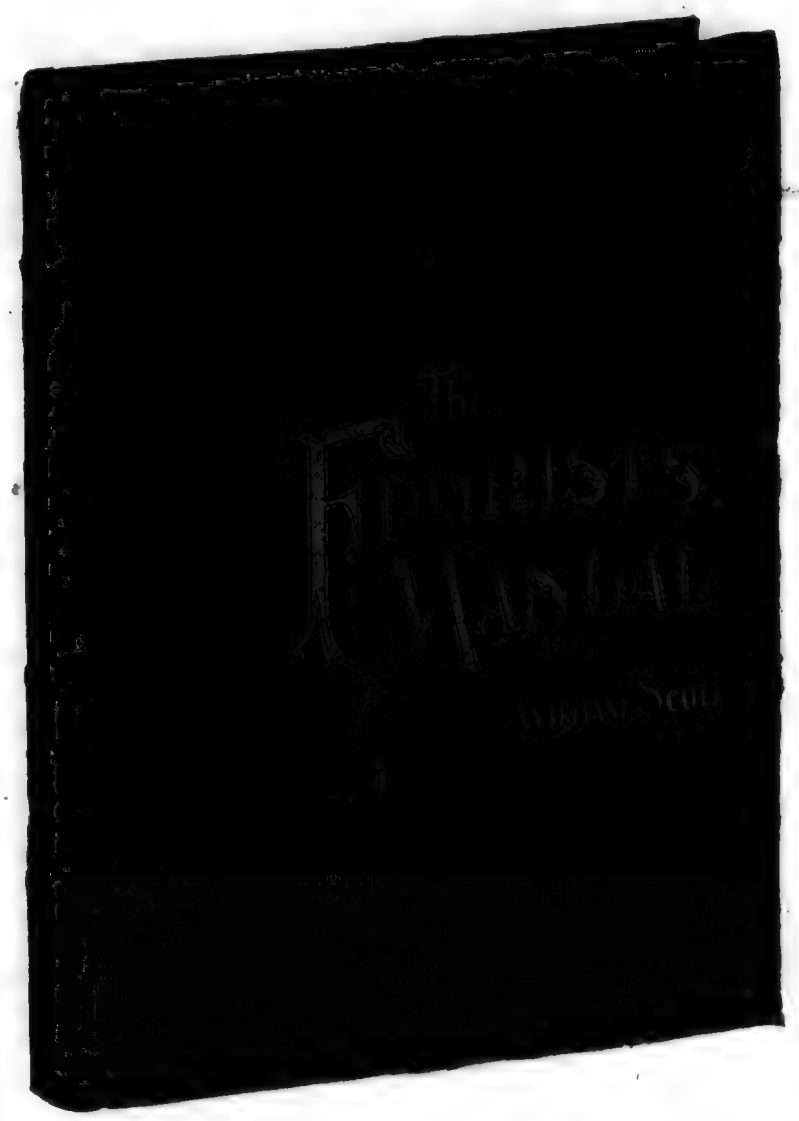
Bonfire, Splendens and Zurich, from 2¼-in. pots, price, $3.50 por 100; $30.00 per 1000.

JOHN SCOTT, Rutland Road and East 45th Street, Brooklyn N. Y.

NEW ORLEANS.

Current Comment.



Business is slackening at all the markets. This year has been about the same as last in the number of plants sold, but prices have been lower. Work in the gardens is plentiful, and this part of the business is all the time on a steady increase. Tree planting is over and little has been done. No doubt, next year the movement to embellish the city will be on a better footing. A new botanical garden is to be started at Audubon park. Prof. Reginald S. Cooks will be in charge. It is endowed by Mrs. T. G. Richardson. A part of the experiments will be for the benefit of gardeners, in a large collection of trees and exotics suitable for our soil and climate.

The Horticultural Society met Thursday, May 20. The election of new officers is nearly at hand and the society expects to make it a lovely evening for the members. Arrangements for an outing are talked about. On the exhibition table was a new species of climbing sweet pea from Japan, seeds received by U. J. Virgin and grown by R. Eichling, who says they are quite an improvement and a good white for fine flower work at this time of the year. J. Newsham cuts quantities of orchid sprays. He showed Cattleya Mendellii and Lælia Digbyana.

The Metairie Ridge Nurseries invited the public to come and see the large field of gardenias now in full bloom. Each visitor was presented with a bunch of cut blooms. Outside of the city they grow to perfection. In private gardens in the city they require some attention to be kept free of the white fly, which spoils the leaves and disfigures the flowers.

The Gardeners' Protective Association had its regular annual picnic at the Southern park, May 23. M. M. L.

This is The Florists' Manual

By William Scott

SECOND EDITION

THOROUGHLY REVISED AND BROUGHT UP TO DATE

NO SCIENCE, BUT LOTS OF PRACTICAL COMMON SENSE

"I have several times been consulted by those who would make a beginning in the Florists' business. In each case I have said that the first step is to subscribe for a Trade Paper, and the next to procure a copy of the Florists' Manual." —J. A. VALENTINE, Pres. Park Floral Co., Denver, Colo.

"Find enclosed $5 for the Florists' Manual, by William Scott. It is the best book of the age on commercial floriculture and should be in the home of every gardener."—CONRAD FORBACH, Buffalo, N. Y.

No dry-as-dust botanical classifications, but tells you just how to produce marketable plants and cut flowers in the best and cheapest way.

MINNEAPOLIS.

The Market.

The weather man has finally turned his thoughts toward the grower, and turned the weather a trifle warmer, so that the people took courage enough to allow the lawns to be planted. Plants are in good condition this year, and stock of that kind seems to be plentiful. Roses are a drug on the market. Carnations are about equal to the demand, gladioli are here in fair quantities and sweet peas are plentiful. There are no outdoor flowers as yet, and the outlook for cut flower sales for Decoration day is encouraging.

Various Notes.

The parks are looking especially fine this year in their tulip bed decorations. The planting was quite successful.

The Minneapolis Floral Co. has just received a fine consignment of large phœnix and bay trees. Business is excellent at this place, and the out-of-town shipping is most satisfactory.

Miss Whitted had some good funeral work last week, both here and outside of town.

Souden & Desmond find trade as rushing as ever in the new store.

R. A. Latham is getting in some fine sweet peas.

O. C. Swanson has a window full of fine irises, gladioli, etc.

A pretty substitute for rice and old shoes at a recent wedding consisted of hundreds of little balls of florists' netting containing rose petals.

Visitor: A. H. Stolper, Winnipeg.

M. E. M.

South Braintree, Mass.—Edward Arnold, of the Music hall block, supplied the decorations for the seventh annual concert and ball of the Street Railway Employees' Union, in Music hall. In front of the space occupied by the orchestra there was a fine display of potted palms and ferns. On the front part of the platform Mr. Arnold had constructed a good-sized street car, composed of daffodils, carnations, pansies and asparagus. On each end of the car was a lay figure representing a conductor and motorman, and as the grand march started, the car was illuminated by electric lights.

CLEVELAND.

The Market.

The cut flower market was unsteady last week. There seemed to be no particular demand for any kind of stock.

The quality of flowers being received is of the best for this season of the year. Carnations are especially good. Sweet peas are not so good as heretofore, being rather short stemmed. Cut pansies are arriving daily, and meet with fair demand. There are plenty of shipped peonies to be had, but the call for them is erratic.

The hardy fern question is a serious one at present. Wholesalers find it impossible to get enough to fill orders.

From general appearances at present, peonies will not be in for Decoration day in this locality.

Various Notes.

Cliff & Son report good trade and state that May, so far, has been their best month since they have been in business. They turn out quantities of funeral work.

Otto Knoble, of Knoble Bros., has recovered from his illness, and is now back at the store in good shape.

Albrecht & Smith, of Prospect avenue, report a good week. Their cut flower trade was above the average, and they also had some large funeral orders.

F. R. Williams is the possessor of a new White steam automobile. He contemplates some long trips this summer.

Frank Piggott, of Meyers avenue, has a fine lot of spring bedding plants for Decoration day. B.

NEWPORT, KY.

Frank Ernsterhoff, of Highland avenue, Fort Thomas, recently was arrested, charged by the Bell Telephone Co. with willful destruction of property. The telephone company has built a new line in Highland avenue, and when an attempt was made to place a pole at the corner of the avenue in front of Mr. Ernsterhoff's property, he objected. The company, however, secured a permit, and, while Mr. Ernsterhoff was away from home, the pole was erected and wires strung. When he returned, it is alleged, he cut down the pole and cut the wires.

Mr. Ernsterhoff was released under a bond for $100, while his case awaited trial. A few days later, however, he was arrested again, on a charge of threatening to shoot anyone who attempted to erect a telephone pole at the corner of his premises. When the employees of the telephone company ventured on the scene again, Mr. Ernsterhoff appeared with a gun, it is said, ready to take desperate measures. He was placed under a peace bond of $500.

CINCINNATI.

The Market.

Business is showing signs of coming to life again, and we are mighty glad to welcome it back. Stock is selling out clean now, and prices are showing an inclination to get somewhere near where they ought to be. Good stock is now bringing a good price, and even the poorer grades are selling out well. There has been a decided shortening in the supply, also. Whether this is caused altogether by the growers holding back stock for Decoration day is hard to state, but it would look as if the dark weather we have been having might have a great deal to do with it.

Unless we have some good, bright and warm weather from now on, there is going to be a shortage in the peony supply for Decoration day. Under present weather conditions, they are not moving at all. This would be a great disappointment to many growers in this locality, as they always count on good returns at this time.

The arrival of southern ferns in this market has eased the green goods situation a great deal. There is always a big demand for this article when it first arrives, and the wholesale houses are kept busy taking care of it. Other classes of greens are selling well.

Various Notes.

Joseph Linfoot is bringing in some of the best sweet peas seen in this market. They are of the latest varieties, and of the most popular colors.

J. A. Peterson is preparing for a business trip that will keep him on the road for some time.

Nick Weber is spending a few days visiting relatives in Louisville, Ky.

Gus Adams, of Grand Rapids, Mich., was a caller. C. J. Ohmer.

George & Allan want $5,694.57 damages from the city as a result of the breaking of the water main on Madison road, near Oakley avenue, December 6, 1908. It is alleged that on account of that break the water was turned off and their supply was stopped, thus preventing them from heating their greenhouses. These greenhouses were filled with roses and chrysanthemums for the Christmas market, and thousands of these and other plants were frozen. The total value of the destroyed plants is itemized at $5,694.57, for which they sue.

Adam Miller, of Clifton, is at the head of a committee which has been appointed by the Unemployed Protective Association to observe Memorial day by decorating the graves of the unknown dead. Several florists have consented to donate flowers for this purpose, and the schools and churches will be asked to help with floral contributions.

Meriden, Conn.—C. W. Blatchley constructed two elaborate Decoration day designs for Jesse Sands, of this city. One of the designs was to be placed at the base of the soldiers' monument.

DAYTON, OHIO.

State of Trade.

"We're just rushed to death" is the cry that comes from every direction. This kind of an expression is always expected at this time of the year. Orders of all sizes are rolling in, and it is a positive fact that there will not be enough stock in the market to meet the demand.

Carnations, without a doubt, are fine and in good crop, and orders for them are coming in heavily, much in excess of the supply. Roses, for the season of the year, could not be better. A faint tinge of pink is noticed in the Brides. Maids are a good color and Kaiserins are first-class. Orders for roses are as heavy as carnation orders.

There will be a good supply of callas and longiflorums on the market for Decoration day. Much to the florists' regret, there will be no home-grown peonies. From the present outlook, the condition of business for Decoration day will be an improvement over last year.

Various Notes.

Present and past experience has proven to the Miami Floral Co. that its plant is not of sufficient size to accommodate its trade, which increases steadily. The company intends, therefore, to build a large addition to its plant next fall. The outdoor planting was finished May 18, and there are 100,000 healthy-looking carnation plants out. The weather has been most favorable for the stock.

The Dayton Floral Co. reports having just received three shipments of palms from Belgium, and all arrived in splendid condition. They also report that they are "just up to their necks" in Decoration day orders, and that business in all lines is especially good.

Miss Ruby Bartholomew spent a most enjoyable day May 23 visiting friends in Richmond, Ind.

H. H. Ritter reports the plant business the best it has been in several years. He has a force busy planting out the roof garden on the Algonquin hotel.

Mrs. Elizabeth Young, M. & L. Johnson and the Heiss Co. were busily employed all day last Sunday, making up floral designs.

Henry Ehrhart, of Sidney, O., and Wm. F. Frisch, of Piqua, O., were visitors May 23. R. A. B.

ATLANTA, GA.—Beginning with the first signs of spring, the Ponce De Leon Floral Co. had a force of men engaged in preparing the Ponce De Leon amusement park for the opening of the season's entertainments.

ERIE, PA.

The Market.

Business is rushing this week; the latter part will be a record breaker. Bedding plants are moving fast; the men are working day and night to keep abreast of the orders. Hydrangeas, spiræas, Astilbe Japonica and rhododendrons are in great demand for cemetery use.

Various Notes.

George Tar, formerly at the greenhouses of the Baur Floral Co., left for Detroit last week.

Chas. G. Offerle has an attractive new delivery wagon.

Lewis Lipsett, father of Nellie Lipsett, saleslady at John Laver's store, died Thursday, May 20. The funeral was largely attended. The floral designs were many and beautiful.

Miss Mary Leppner has accepted a position in John V. Laver's store.

Frank Thayer, who has been on the sick list, is convalescent. B. P.

DOVER, DEL.

That the Great Provider is making up in other crops for the shortage of the Delaware fruit crop for 1909 is evidenced here. C. W. & James Lord, nurserymen, have practically no Keiffer pears, peaches or apples in their orchards in and around Camden and Dover, but the fruit growers are making up for lost time in gigantic crops of asparagus and of strawberries. C. W. Lord has thirty acres in asparagus. This asparagus is of the mammoth quality, and twenty-four bunches fill a crate. As high as twenty-five crates are hand-picked and prepared for shipment each day by this one grower, and the prices range up to $2.50 a crate. Mr. Lord believes this the greatest crop of asparagus Delaware has ever produced.

Asparagus shipments are making business brisk at the railroad stations all the way from Bridgeville to Bear, including all three counties.

Murray Hill, N. J.—L. B. Coddington is building an addition to his greenhouses.

Bar Harbor, Me.—In view of the recent discussion of the famous Holbein paintings, it is worth noting that one of the local florists, Frederick H. Moses, is the owner of one of the great Dutch painter's works. The painting was left to Mr. Moses by the will of the late David Bugbee, of Bangor.

LOUISVILLE, KY.

The Market.

Business last week was good. Funeral work was plentiful and some good work was turned out. We are in the middle of the planting season and will finish in a week or ten days, although the boys near the cemetery will get a few orders until the middle of June.

Prospects for Decoration day are not any too good. Too many outdoor flowers and wild flowers are to be had. In fact, that day "cuts little ice" here unless we have a very late frost; then a good many flowers are shipped all through the state.

Cut flowers of all kinds continue to be plentiful, but green goods are still scarce.

Various Notes.

Manz & Neuner are planting the courthouse yard, and are using a good many plants in different varieties.

Werner Susemichel, sexton at the Jewish cemetery, has the place in tiptop shape. He has four greenhouses that were well stocked with bedding plants of all kinds, but has sold them all out and bought quite a lot of stock at wholesale prices.

Jacob Schulz is sending some fine orchids to his store. K. R.

WINSTON-SALEM, N. C.

Martin McNulty has purchased the business and good will of the Fallon Floral Co., of this city, from John Fallon, of Staunton, Va., and Frank Fallon, of Roanoke, Va., paying therefor the sum of $15,000. Mr. McNulty has acted as manager of the company for some time, is a florist of many years' experience and will doubtless continue to make a success of the business.

This company, though young, has built up a large trade.

Sayre, Pa.—J. B. Knapp has the contract for the bedding at the plant of the Sayre Electric Co. It will be the most extensive display in the valley.

Amesbury, Mass. — Herbert Leslie's business, on Main street, is developing rapidly. He grows both flowers and vegetables and has a fine lot of bedding plants ready for Decoration day.

A Prosperous Florist is like the Bee—Never idle

We have plants to sell, so have thousands of other florists.

But we have quantity, quality and prices that few can offer.

Our immense stock of bedding plants is now ready, every hole and corner full for immediate shipment.

Geraniums, S. A. Nutt (best crimson), John Doyle and other reds, Mme Thibaut and Jean Viaud (pink), Beaute Poitevine, Albion (single white), Alphonse Ricard, Alliance and Ivy geraniums, 4-in. pots, $7.00 per 100.

Scarlet Sage (salvia). The true Clara Bedman or Bonfire variety. Ours is the true, medium tall, genuine variety, an immense bloomer, with deep red, brilliant flowers, so well-known and admired in the capitals of Europe and America. The seeds of this famous variety were gathered by me in Zurich, Switzerland, the home of Salvias. Price, 4-in. pots, in bloom, $7.00 per 100.

Ageratums, best of the blue dwarf, 4-in. pots, in bloom, $6.00 per 100.

Heliotropes, best of blue dwarf variety, 4-in. pots, in bloom, $7.00 per 100.

Begonia Vernon, newest strain, the well-known dark variety. Our own importation, the seeds having been gathered from the best specimen plants by me on my trip to Switzerland and France. It does well in either warm or cold climate and blooms profusely in July and August, even when fully exposed to the sun, and is very valuable for bedding purposes, in many instances taking the place of Geraniums and other plants. Price, 4-in. pots, in bloom, $8.00 per 100.

Begonia Flambeau, on account of its waxy foliage (pink flowers in summer), is valuable for window boxes, vases, and makes a striking appearance, 5¼-in. pots, $2.00 per doz.; 4-in. pots, $1.00 per doz.

Fuchsias, assorted, in bud and bloom, 4-in. pots, $6.00 per 100, worth $10.00.

Lantanas, assorted, 4-in. pots, in bloom, $7.00 per 100.

Mignonette, 4-in., $7.00 per 100.

Nasturtiums, dwarf, assorted, 4-in. pots, $6.00 per 100.

Stocks, German, six weeks, 4-in. pots, $7.00 per 100.

Vincas, variegata and periwinkle, 4-in. pots, $12.00 per 100.

Cobaea scandens, fine, blue, bell-shaped flowered, climbing vine, growing from 30 to 50 feet high in one summer, blooming far into November, 4-in. pots, nicely staked up, $8.00 per 100.

Cannas, 4-in. pots. Henderson, Poitevine, Bismarck, Mlle. Berat, Black Beauty, Austria, etc., $8.00 per 100. King Humbert, 4-in., $10.00.

Aster Victoria, German, 5 best sorts, $3.00 per 100.

Honeysuckle, large, 6-in., 50c; 10 plants sold at 100 rates.

Ampelopsis Veitchii, 4-in., 10c.

Dracaena indivisa, imported, broad-leaved, big plants, 50c to 75c.

SMALL PLANTS

Petunia California Giant, 3-in. pots, $4.00 per 100.

Petunia Inimitable, 2½-in. pots, $3.00 per 100.

Verbenas, assorted, in bud, 2½-in. pots, $3.00 per 100.

Coleus, Verschaffeltii, Golden Bedder and Queen Victoria, $3.00 per 100.

Coleus, fancy leaved, 2½-in. pots, $4.00 per 100.

Marigold, Tagete's or French dwarf, 3-in. pots, $3.00 per 100.

Centaurea Gymnocarpa (Dusty Miller), 2½-in. pots, $3.00 per 100

Parlor or German Ivy, 2½-in. pots, $3.00 per 100.

Salpiglossis, assorted, 2½-in. to 3-in. pots, $3.00 per 100.

Lobelia Crystal Palace (blue), 2½-in. pots, $3.00 per 100.

Tradescantia, green and variegated, 2½-in. pots, $3.00 per 100.

Kenilworth Ivy, 2½-in. pots. $3.00 per 100.

Thunbergia, or Black Eyed Susan, 2½-in. pots, $3.00 per 100.

Cuphea, or cigar plant, 2½-in. pots, $3.00 per 100.

Vinca variegata, 3-in., $4.00 to $5.00 per 100.

Ageratum, blue, dwarf, 3-in. pots, $4.00 per 100.

Asparagus Plumosus Nanus, 2¼-in., bushy stock, $3.00 per 100; $25.00 per 1000; 3-in. pots, $4.00 per 100.

Cosmos, 4 early varieties, separate colors, made up 3 plants in a pot, $3.00 per 100 pots.

Summer Chrysanthemums, best varieties, 3-in. pots, $4.00 per 100; 4-in., $7.00 per 100.

Pyrethrum Aureum (Golden Feather), 2½-in. pots, $3.00 per 100.

Roses, Climbing Lady Gay, Crimson Rambler, D. Perkins, 5½-in. to 6-in. pots, 25c, 30c to 40c.

REMEMBER

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa,** and those we offer were imported the Spring of 1908.

Florists should bear in mind that no garden, lawn, etc., is complete without the Araucaria; therefore, if you wish to make money, recommend the Araucaria to your customers. Introduce this noble plant to your trade. We give you a special price, and it will pay you to handle them.

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 19th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta, specimen plants, 7 to 8-in. pots, 4 to 5 years old, 3, 4 and 5 tiers, 20, 25 and 30 inches high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 3, 4 and 5 years old, 4, 5, 6 and 7 tiers, 6-in. pots, 20, 25, 30 and 35 in. high, an Elephant for only 75c; a Jumbo for $1.00 and a Holy Terror for $1.25 to $1.50.

Araucaria Excelsa, a consignment of small sizes just in, per Steamer Manitou, 35c, 40c, 50c and 60c.

Kentia Forsteriana and Belmoreana, just arrived, per Steamer Manitou, from Antwerp. Price for good stuff, 75c, $1.00, $1.25, $1.50, $2.00 each.

O! what a sight!
Moonvines, moonvines, moonvines—
The genuine, pure white, waxy, fragrant moonvine,
With flowers as big as a saucer.

THE SECRET OF THE MOONVINE

Look! Life, Life, Life everywhere!

What is life? Yourself is a life. Your time is a life. Your porch is a life—a mass of flowers. Your home is a life. Your garden wall is a life. O! life and joy everywhere! Flowers and green everywhere—O! what a fine odor! Every spot of our home is a life. All happy.

"Mein Haeuschen steht im Gruenen."

I Am the Moonvine King of America

Grower and shipper of the so well-known Ipomoea Noctiflora, the pure white, fragrant, waxy moonvine, bearing flowers as big as a saucer, for which we have a world-wide reputation. For the last twenty years we have controlled the American market of this beautiful climbing vine, which grows 30, 40 to 50 feet high in one summer, covering every spot quickly wherever planted; 25,000 plants are raised and shipped by us every spring into every part of America. Beware of cheap stuff floating around the market. Price, 4-in. pots, nicely stocked up, $12.00 per 100; 3-in. pots, $8.00 per 100; 2½-in. pots, $5.00 per 100.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

Godfrey Aschmann, West 1012 Ontario St. **Philadelphia, Pa.**

IMPORTER, WHOLESALE GROWER and SHIPPER OF POT PLANTS

PALE FOLIAGE ON HYDRANGEA.

Can you suggest to us, for immediate use, a treatment for white leaf on Hydrangea Otaksa? We thought it might be possible to get prompt action and have better color on the foliage by Memorial day. The plants were well ripened last fall, but the leaves now are pale and even the buds are whitened by this disease. W. H. G.

If your plants are in the condition you describe, it must be due either to starvation of the roots or extreme acidity in the soil, probably the first named. Hydrangeas are gross feeding plants, requiring copious water supplies, and when the pots are filled with roots, frequent top-dressings or waterings with liquid manure are needed, to keep the foliage a dark green color. I would advise watering your plants with nitrate of soda, a teaspoonful to a three-gallon can once in three or four days, and also with soot water twice a week. Place the soot in a bag and immerse it in a barrel. Do not use the juice full strength, but dilute it, using three-fourths clear water to one-fourth soot water. This is excellent for toning up practically any plants with pale foliage. C. W.

HIBBERTIA READI.

Far and away the best known of the hibbertias is H. dentata, a delightful climbing plant for the greenhouse, in which structure it will keep up a succession of its golden blossoms throughout the winter months, and often well on into the spring. A second species, H. volubilis, is even a more vigorous climber, but it does not bloom so freely, and the yellow flowers have a most unpleasant odor. From these two species that at the head of this note, H. Readi, differs widely, as it naturally forms a dense, twiggy little bush, which will flower freely when not more than a foot high. The leaves are small and narrow, and, like all the other members of the genus, the flowers are yellow. They are, in the case of H. Readi, about the size of a shilling. The Gardeners' Magazine says this hibbertia will succeed under much the same conditions as the eriostemons, chorizemas, and other Australian plants, but the climbing species enjoy more liberal treatment.

Vassar, Mich.—A heavy rain and hail storm, May 15, broke much glass in greenhouses and other buildings in this vicinity.

I consider the Review the only florists' paper in this country for ready reference.—G. V. Gooding, Waterbury,

There Is a Splendid Chapter on

Greenhouse Heating

in The Florists' Manual

By WILLIAM SCOTT

GROWERS' SUPPLIES Write for Prices
WILSON PLANT OIL AND FERTILIZER CO., Chatham, N. J.

ST. PAUL.

The Market.

Dark weather has delayed all greenhouse growth, and bedding stock is backward, many plants not showing buds or blooms as yet. Outside work is now on and everyone in the trade is extremely busy planting. Cut flowers have been plentiful, with the demand unusually good. All the growers seem to have a full crop on.

There will be no outside blooms in this section for Memorial day, which will be observed in the city and state May 31. There are prospects of a good trade for that occasion.

Club Meeting.

The monthly meeting of the Minnesota State Florists' Association was held Tuesday evening, May 18.

The question of reducing the annual dues was thoroughly discussed, but, owing to the small attendance, action was deferred until the fall meeting.

The entertainment committee made a final report on the dance and card party given in the winter, stating that the small deficit existing had been provided for by the committee.

The fall flower show committee reported—Mr. Olson for St. Paul and Mr. Jorgenson for Minneapolis. While assistance was offered in both cities by organized bodies, the florists would have to be responsible for the expense of premiums and would receive no share of the receipts except what they might secure in the way of advertisements in the program. Under the circumstances, the society rejected all propositions, and the committee was instructed to interview the Twin City florists and ascertain what they would subscribe to a guarantee fund for holding a fall show. The committee is to report to the executive committee Monday evening, May 24, and the executive committee was empowered to take whatever action it deemed best.

A picnic committee was appointed to arrange for an outing in July. The regular June meeting was suspended, and the executive committee was empowered to appoint a field day at its discretion.

Otto Will gave an interesting talk on his trip around the world, and the meeting adjourned at 10:50. X. Y. Z.

ELIZABETH, N. J.—Henry Leahy has purchased a new delivery wagon, which is said to be one of the handsomest vehicles of its kind in the city. The wagon is at present being used for both stores, but an order for another of the same design has already been placed, so that in a short time there will be one for each of the establishments.

Greenhouse Heating.

Curiously enough, all the evidence as to the cause of the disastrous boiler explosion at the establishment of Miller & Sons, Bracondale, near Toronto, goes to show that the cause was the same as in the case of the equally disastrous explosion at the George M. Kellogg plant, Pleasant Hill, Mo., a year or so ago. It appears that in each case the explosion was due to an inoperative safety valve, combined with the almost certain fact that the valve in the pipe connecting the exploding boiler with the main steam pipe was closed.

PEAT FOR FUEL.

In reply to an inquiry in the Heating Department of the Review of May 20, I would say that we have had one winter's experience with peat for greenhouse heating. Late in October, 1908, we bought a huckleberry swamp, which for generations has been considered worthless, except for the fine huckleberries that grow on it.

I took notice of the quality and quantity of the peat contained in this swamp, some of which is valuable for florists' use and some as fuel.

Its former owners had burned this peat in cook stoves and heaters for the last thirty years, but never thought of offering it to the public, and therefore were willing to sell out at the first opportunity.

In November we dug a good supply of peat. The peat had the same appearance as the brown coal in Germany, which is due to the dry season we had last summer. We burnt it just as it came from the bog. We also pressed some under a cheese press into the shape of a brick, which we gave a trial in zero weather, with good results.

If pressed, its heat is equal to that of hard coal. Three tons will go as far as two tons of coal. It contains an oily, alcoholic substance, making a blue blaze, as when alcohol is burning. The smoke is something like that of green wood. Any stove or fireplace intended for hard or soft coal burns peat. The fire does not clog up. The ashes drop through like wood ashes.

We do not know how valuable these

ILLINOIS MALLEABLE IRON CO.

539 DIVERSEY BOULEVARD — CHICAGO.

ashes are as fertilizer. Last year we treated a patch of gladioli with peat ashes, using it double in proportion. On both sides of it were gladioli treated with wood ashes. The results were equal.

This year we will install a power press, as the people of this vicinity have watched our experiments closely, and have taken samples home and tried it in their own stoves. They talked about red-hot stoves, and we are sure that a demand for peat as fuel has been created.

The price will be a matter of experiment for a while, but will be below the price of coal. W. E. KIRCHHOFF.

BOILER AND STACK.

I wish to build four greenhouses 21x80 feet, five feet to the gutter and twelve feet to the ridge, which should average about 60 degrees. Will some one kindly tell me what size boiler will be necessary, using steam heat, and how high the stack should be? J. W. R.

Any boiler rated at 5,000 feet would be all right. It will take about 4,000 running feet of 1¼-inch pipe, but I would get a boiler rated at 5,000 feet. A

stack two feet in diameter and forty feet high will serve.

I would advise J. W. R. to build two houses and cover the same amount of land as the four houses now planned will do. They will heat easier and will not cost so much as his original plan.

G. T. E.

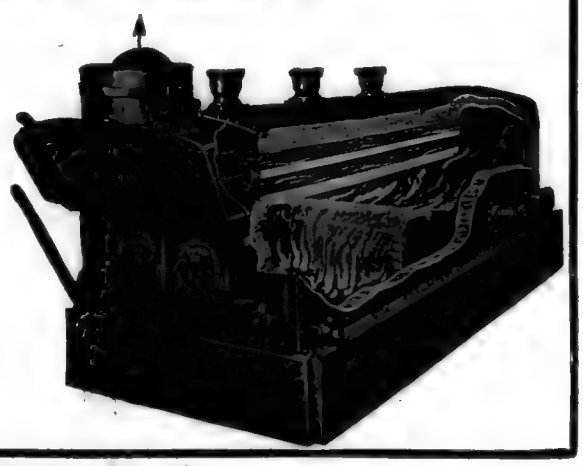
NEW CASTLE, IND.

Herbert Heller, secretary and treasurer of the South Park Floral Co., has had a long and serious illness, dating from an operation performed in an Indianapolis hospital in February to relieve a tumorous growth in the abdomen. He did not fully recover from this and for the last few weeks has been confined to his bed in a serious condition. However, in the last few days he has shown some improvements and there is now hope for his ultimate recovery.

Buffalo, N. Y.—George J. Reichert, of Genesee street, having located on a farm about twelve miles from this city, intends to grow garden truck. His farm is considered one of the best in this vicinity, about one mile south of Main street on Transit road, or at the end of the Williamsville trolley line. He also intends to grow wholesale cabbage, cauliflower, tomatoes, celery and all kinds of vegetable seedlings, and in the near future will build greenhouses for the winter forcing of vegetables and flowers.

INSTALL A
"DETROIT" Return Trap
AND YOU BUY A GUARANTEE

It takes 90 to 120 lbs. of steam per horse power to operate an ordinary boiler feed pump. "Detroit" Return Traps require only about one-tenth that amount. Why not save the nine-tenths?



Write us size of boiler and number of square feet of glass in your greenhouses, for our proposition.

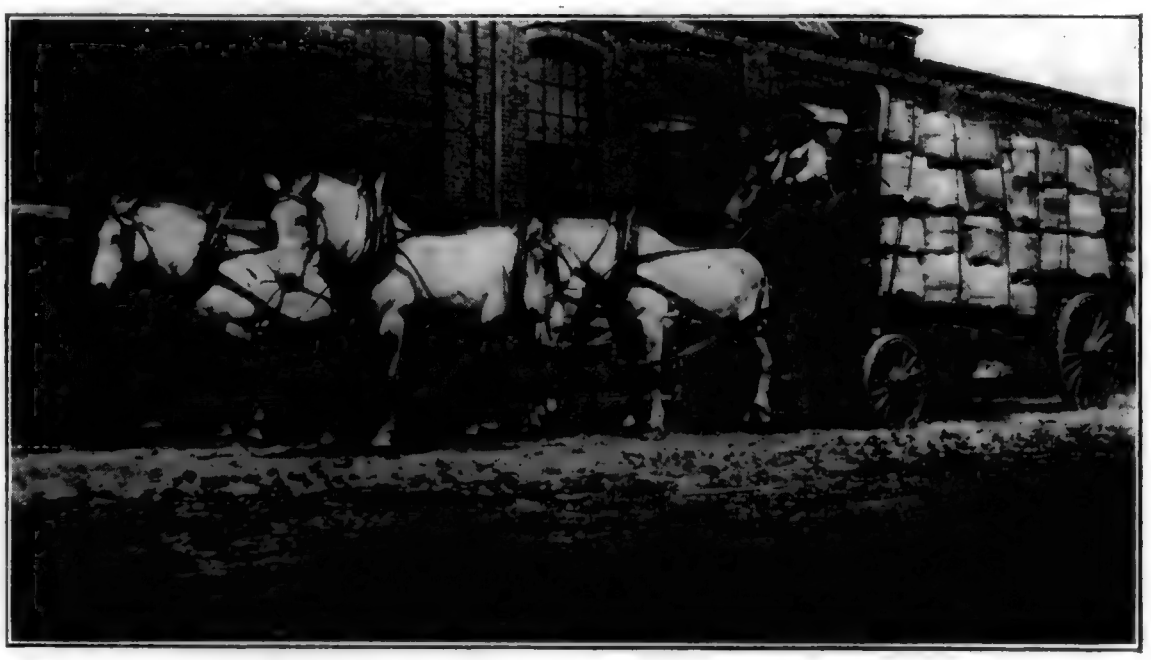
DETROIT.

The Market.

Business is rushing just at present—rushing with those doing outdoor work as well as indoors. While things have been fairly lively right along, there was an unusual spurt last Saturday, and by Monday noon stock was pretty scarce.

White carnations, especially, were not to be had at any figure. These are just about off crop, having been in for some time without any let-up. Most of the business was for funerals, and naturally white was in big demand. White sweet peas are also nowhere equal to the demand.



One thing noticeable this year is the small number of inquiries in regard to wedding work. At this time of the year formerly there were many inquiries as to prices for decorating and for bouquets, but such is not the case this year. It must be that the popularity of June weddings has passed by. Still, it does not make much difference; people are bound to get married, and if we do not have the work in spring it will come in fall or winter.

Green is quite scarce, especially Asparagus plumosus. The Michigan Cut Flower Exchange is daily shipping thousands of ferns broadcast over the states. Their stock is fine.

DENVER.

The Market.

Continued unfavorable weather has not increased the sale of flowers. Neither has it helped to bring in the outdoor stock, so it looks as if there would be scarcely any outdoor stock for Decoration day, and no snowballs or lilacs. Carnations, too, have shortened up materially, and it is almost impossible to get any from the growers, as they have all been bought up.

Sweet peas and daisies are meeting with a good sale, and anything that looks like outdoor stock can find ready sale. Cape jasmine is coming in, and will be used largely, but it does not cut the figure it used to.

Roses are still good and apparently plentiful, although the weather affects them some. Beauties of good grade are scarce.

One of the scarcest items on the market is hardy fern leaves. While some have had orders for them for several weeks and are trying to locate them, those who have received some were unable to use them, as they arrived in bad condition. Smilax is also scarce.

New Members for S. A. F.

The florists of Colorado are making it plain that they appreciate the honor done them by having one of their members elected president of the S. A. F. Vice-president Benson has already secured fifteen new members for the society, and there are more to follow. With this much progress made, the vice-presidents in other states need to look to their laurels. President Valentine is certain to have a good-sized escort from here to Cincinnati, and it is likely to include a bowling team worthy of the occasion. So look out for the cowboy hats again. E. S. K.

LEXINGTON, KY.

The Market.

The weather is fine and the plantsmen are having a good run on bedding stock. Hundreds of window boxes and vases are also being filled. Bedding plants seem to be in greater demand than ever this year.

Roses, carnations and other cut flowers are abundant and meet with ready sales at from 75 cents to $1.50 per dozen. Beauties are plentiful and have a satisfactory demand. Outdoor flowers, such as peonies, sweet peas, irises and sweet williams, are becoming more plentiful. There will be a good supply for Memorial day.

Various Notes.

The carnation growers are exceedingly busy planting out young stock in the field.

An automatic pumping machine for liquid manure will be used at the J. A. Keller estate next season. Ground is being broken by this company for the new carnation house, which will be 30x 200 feet. J. F. Keller, the manager, is busy with bedding stock at present and is planting the beds at the courthouse grounds. The firm is planting about 20,000 carnation plants in the field.

Honaker is cutting quantities of Beauties. The quality is excellent.

S. S. Kelley is moving thousands of plants. He reports a good demand for bedding.

August Le Clere has done some beautiful work in planting the beds on the lawns of the lunatic asylum. His son Joseph has accepted a position at Olympian Springs, Ky., and leaves June 1.

Miss Fannie White, of Anderson & White, was in Cincinnati, O., recently, on a business trip.

A. Reichspfarr, of Richmond, Ky., was a recent visitor here, and called on Lucien Le Clere at the South Broadway Greenhouses.

J. P. Keller reports a good business at the downtown store, on Main street.

MILWAUKEE.

The Market.

Although there was a heavy supply in all lines all last week, still everybody was kept busy enough to keep stock on the move. Even the end of the week found everything cleaned up. Funeral work again was an important factor.

Everything at present points to a good Memorial day business, which this year will continue for three days instead of one, as the legal holiday falls on Sunday. Prospects at present are that there will be plenty of all indoor as well as outdoor cut flowers. The unusually cool weather, especially at night, has retarded the outdoor stock, which this year will be just in its prime. Lilacs, snowballs, valley and late tulips will be in bloom just on time.

Various Notes.

The Mueller & Schroeder Co. is cutting some extra fine snapdragons, with stems from four to six feet long. At present the firm is installing another boiler, necessitated by the new addition, which is now completed.

The engagement of Miss Valeria Edlefsen to Richard Eihlman was announced last week. She is the youngest daughter of Mr. and Mrs. Wm. Edlefsen, of the Edlefsen-Leidiger Co., and is well known to all, as she was at one time one of the store hands.

John F. Pollworth died May 19, aged 71, of a complication of organic troubles. He is survived by his wife and seven sons, two of whom, C. C. and Joe E. Pollworth, are in the wholesale florists' business. He took a great deal of interest in floriculture, and consequently came in contact with most of the local florists. The large number of floral emblems at his funeral were a sign of the high esteem in which he was held. The funeral took place Saturday morning, May 22.

About the same time that Mr. Pollworth died, W. A. Kennedy, a member of the C. C. Pollworth Co., and superintendent at the greenhouses, received notice of his mother's death in New Jersey. Mr. and Mrs. Kennedy left at once for the east.

Tom Cassidy, one of the older hands at the Pollworth commission store, is confined to bed, threatened with typhoid fever.

The Holton & Hunkel Co. reports a large amount of orders on hand for Memorial day. Shipping trade with them continues most satisfactory.

The next club meeting takes place June 3, and matters pertaining to the fall flower show will be taken up. E. O.

Marlboro, Mass.—H. H. Rogers is building another greenhouse.

THE RETAIL FLORIST.....

A DAISY BUNCH.

The daisy bunch again will be in demand. In the late winter and early spring buyers seem to turn naturally to the daisy for table arrangements, baskets and bouquets. Where the bride carries valley or orchids, the bridesmaids frequently will be given daisies.

The accompanying illustration shows a well arranged bunch photographed at the store of W. J. Palmer, Buffalo. The daisies were arranged loosely, yet not so loosely that the bunch appeared straggly, as sometimes is seen. The foliage used was Adiantum Farleyense, which now can be had cut in most of the principal flower markets. The supply in many markets is so large that prices have become quite reasonable and Farleyense is largely used for fine work. The scarf added in the bunch illustrated may be had in any of the large supply houses in a wide range of patterns and values. One of these scarfs adds more than its cost to practically every wedding bouquet.

A Daisy Bunch.

DIFFICULTIES IN SPRAY MAKING.

Some Common Defects.

Not only beginners, but experienced designers, often have troubles of their own in producing a symmetrical and graceful casket bunch. To the self-observing critic numerous deformities appear in both mechanical and artistic construction. The spray is either too flat or too heavy, too weak backed or too ponderous; it is sprawly or too compact, too bunchy or too long. There ought to be a happy medium style which would put forth a loosely arranged spray of whatever design, able to hold its shape in spite of much handling. It might be profitable to indicate, first the artistic, and secondly the mechanical defects observed at random, and to suggest in each criticism a remedy for the fault or an encouragement for valuable work.

Under the topic, the art of the spray, let us notice the value or lack of value in the design and coloring of any spray—selected where you please, your own work or somebody else's work. If it is your own work, analyze your thoughts about the spray. Did you have in mind any definite form, into which you desired to fashion the spray? If it is another's work, what evidence do you see that there has been some picture in the mind of the designer?

Slavish Imitation.

The most common fault is the easy habit of conventionalizing, whereby the hands do the work and the mental faculties rest. A certain style is invented or suddenly develops. It is immediately adopted and used, to the exclusion of almost all other styles, though they be ever so good. Although there may be strong reasons for the sudden popularity of certain styles, it smacks of commonness to adopt them bodily. It is not the fashion-plate dresser nowadays who is considered the best appearing person, but it is the dresser who chooses and individualizes his clothes; it is the woman who puts herself into her clothes, rather than some clothes onto herself.

Though you see many people from a so-called leading section of the country making their sprays after a certain fixed type, it does not follow that you must either adopt the style or be considered out of date. But when you observe some style which is gaining popularity, size it up and down and all around for its good and bad features, pick out its valuable points and add them to your adjustable budget of good habits, doing all this in spite of the fact, a little wounding to your pride, that you had not thought of it yourself. Practice it along with some points which you may be able to develop for yourself.

Discriminative Imitation.

To illustrate: Take the full, loose, oval spray now so much in favor. Let us discover its good and bad points, preserve the good by frequent use, and ignore the faults. In the way of good points, this style has not a few, among them being the display of long stems, the depth of the body of the spray, and the looseness, which develops the individuality of the flower and brings it out by itself. All this results in a fine showing for the money, and accounts well for the quantity of stock used. Opposing these good points and resulting from their being carried to extremes, we find the long stems trained in almost parallel instead of branching lines, and the flowers are turned up mechanically at almost measured distances apart. This destroys the relationship of one to others and to the whole spray.

In the grouping of flowers, each one should find its own place, according to its length of stem, size, bend of stem and maturity. Long-stemmed, slender buds seem to belong to the tip of the spray, while the more open, large, heavy flowers

In the way of good points, this style has not a few, among them being the display of long stems, the depth of the body of the spray, and the looseness, which develops the individuality of the flower and brings it out by itself. All this results in a fine showing for the money, and accounts well for the quantity of stock used. Opposing these good points and resulting from their being carried to extremes, we find the long stems trained in almost parallel instead of branching lines, and the flowers are turned up mechanically at almost measured distances apart. This destroys the relationship of one to others and to the whole spray.

In the grouping of flowers, each one should find its own place, according to its length of stem, size, bend of stem and maturity. Long-stemmed, slender buds seem to belong to the tip of the spray, while the more open, large, heavy flowers

seem to be more in place at the base of the spray. As to the relationship of one flower to another, one will lie gracefully close to another; some buds will cluster easily together and some few will fly off on an independent line apart from the main spray.

The Individualities of Flowers.

All these little diversions of stem and flower form the character of the spray, by their being allowed to fall together, as it were. Some will lie gracefully on the background; others will turn slightly upward, and still others may be more naturally bent back over the stems. One long, strong stem can determine the shape or bend of the spray. Play that it is the tree trunk and let the other stems be the branches attached to it and extending in different directions.

Beauty of stem and foliage should not be hidden by an excess of added foliage. In rose sprays, use mostly extra rose foliage, with perhaps a few ferns or a cluster of smaller flowers for a band across the stems. Make a foundation of rose brush composed of stems from which the old flowers have been cleared or cut off for design work. Lay the roses on it where they seem to fall in line, and if the completed spray, large or small, does not have an individuality, it will be due to a lack of conception, which is a bad habit, rather than to a lack of ability in designing.

When your last rose spray is somewhat different from some of its predecessors, and when carnations and lilies take forms peculiar to themselves, then you are beginning to count the milestones of progress and the stages to good designing.

Do not complain if your orders are not all large. The sprays of a dozen or two of roses can be traced into the daintiest forms, which will be attractive on account of this very oddity.

Gertrude Blair.

ART VASES.

Every now and then a retail florist finds time, in the press of other duties, to design a new receptacle for flowers. Charles Henry Fox has originated many of the novel baskets and vases used at the Sign of the Rose, his unique flower shop on Broad street, Philadelphia. One of his vases is shown in the accompanying illustration.

FLOWER MERCHANDISING.

Advertising is the Stepping Stone.

The Review holds the opinion that retail florists miss being merchants simply through their general failure to take advantage of the most potent power in merchandising—advertising.

The big businesses of today are built by advertising. The artist, or the purveyor to the classes, does not advertise, but he does a business limited by his personal capacity. His profits are only those which can be made on his own work. The merchant makes a profit, not only upon his goods, but upon the work of others. Advertising is his method of reaching those outside the limited circle of his personal acquaintance.

Florists advertise too little. Those who, with capable advice, have made a test of the possibilities of advertising, have found that they shortly needed larger stores and more help. Some advertising is better than other advertising, but any advertising is better than none at all. Most advertising printed in a book, directory, program, or souvenir has only the fractional value that the same advertising would have if printed in a newspaper, any newspaper, but preferably the one with the largest circulation.

The Fleischman Floral Co., Chicago, has one of the finest flower stores in the world and does a business of the highest class, but recently Mr. Rubel, president of the corporation owning the business, has given indications of a desire to extend the field of operations, and is advertising in the leading daily paper. When Fleischman does anything it is done well. Therefore, when Fleischman advertises, he uses plenty of space, even if it is high-priced. The appearance of the Fleischman store, with its mirror-covered walls, could give the impression to some that prices there might not be as low as elsewhere, so the Fleischman advertising has been aimed to show that the prices are no higher than similar stock and similar service would cost elsewhere.

The business, already one of the largest in Chicago, is feeling the stimulus of the newspaper advertisements rather sooner than would be the case if the store were not so favorably located; it is in the center of the city, where practically none of the newspaper circulation is wasted. A store in a residence district at one side of a town is at something of a disadvantage in that a large part of a paper's circulation would be among people who never go to the vicinity of the advertising store.

There can be character in an advertisement as well as in a flower store; you even can put personality in it.

MEMORIAL DAY.

From all parts of the country comes the report that the Memorial day demand was in excess of that of any previous year. For several years the flower business for May 30 has been increasing rapidly, and this year it seems to have made a longer jump than ever before. A portion of the increased demand felt in wholesale centers was due to the remarkable shortening of supplies caused by unfavorable weather conditions. In the middle of May there was unwieldy overproduction in almost all sections of the country. Just as the last week of the month came in there was a period of dark, cold, stormy weather, first extending over the Atlantic states and then moving inland through the Ohio and upper Mississippi valleys. Coming just at a time when a big crop had been rushed off, the unfavorable weather produced an extremely sharp curtailment of supplies, with the result that many who usually have their own stock, or even some to wholesale, were in the market to buy to fill their retail orders. The demand for carnations was particularly strong.

The season has been backward over a large section of the country and many localities that usually are well supplied with outdoor stock were compelled to rely on the greenhouse product. Large plantations of peonies, some of them put in for the express purpose of meeting the Decoration day demand, failed to give any flowers. Cape jasmines were not ready.

Outside of the wholesale centers practically everything of usable character found ready sale and Memorial day, if it had not done so before, took its place as the leading flower day of the year. Far more stock was sold than at Easter.

Except at the extreme north the demand is that bedding out shall be done before Memorial day. This year the business has been heavier than it ever was before. The geranium is, of course, the leading bedding plant and for red, particularly, but also for other bright colors, there has been a demand which has taken practically all the stock which was in flower. It again has demonstrated that the grower who has his stock well in flower May 15 will make a clean sweep within the fortnight. There has been a special call for Dracæna indivisa this season, as it has been largely used as the center of lawn and cemetery vases. The large increase in the number of window-boxes and piazza-boxes now filled has in some places made a shortage of vincas and plants so small as to otherwise not be salable have found a market at good prices; but from one or two points come reports that vincas have not sold. The owners of this stock should have no difficulty in finding a wholesale market, for the plant trade will hold out longer this year than usual because of the belated spring.

EUONYMUS RADICANS.

Each year Euonymus radicans, the beautiful, dark-leaved evergreen vine, seems to be more and more in demand. People are just beginning to appreciate its many admirable qualities and its all-the-year-around beauty. It is the only absolutely hardy climber we have in our northern states, English ivy being only successful in occasional instances. Not only is it an admirable subject for covering walls, woodwork, rocks, etc., to any or all of which it will cling ivy-like, but if allowed to grow as an upright shrub it makes a handsome spreading plant. Not in the most severe winter have we had any of our plants injured in the least. It is sometimes classed as slow growing, but in good soil it will make shoots three to five feet long in a season. A wall seventeen feet high covered with it, the plants being set in a dry, gravelly bank, shows what it will do even under unfavorable circumstances.

Euonymus can be safely planted from April until October, but for the best results we like to set the plants out in May, June or July, choosing if possible cool, moist days for the work. There never seems to be an overplus of stock in nurserymen's hands, but propagation is so easy that no one need lack for stock. Where planted against walls, the top shoots are now pushing out quantities of young roots. These shoots, cut off early in June, planted rather thickly in a coldframe in ordinary loam and kept well watered and shaded, will be well established and fit to go in nursery rows within six or eight weeks. It is possible to get two or three crops of cuttings in a season, for, when once the plants have attained the desired height on a wall, they will need trimming several times each year to keep them within bounds. Of course, on rocks or when grown as bushes, no trimming is needed. It is not possible

seem to be more in place at the base of the spray. As to the relationship of one flower to another, one will lie gracefully close to another; some buds will cluster easily together and some few will fly off on an independent line apart from the main spray.

The Individualities of Flowers.

All these little diversions of stem and flower form the character of the spray, by their being allowed to fall together, as it were. HAERENS' NEW AZALEA.

The accompanying illustration is from a photograph of the original seedling plant of a new azalea raised by August Haerens at Somergem, Belgium. It is now 5 years old and when photographed was flowering for the fourth time. Mr. Haerens is extremely enthusiastic over this variety, considering it one of the best ever raised in Belgium, where is located the azalea center of the world. The plant is robust, the flowers large and described as deep rose shaded with carmine. The center is brilliant crimson.

Mr. Haerens formerly traveled in this country in the interest of the firm to the business of which he has since succeeded, and he has many friends in the trade here who hope that all his sanguine anticipations may be fulfilled by the azalea to which he has given his wife's name.

SEASONABLE SUGGESTIONS

Bedding Out.

The rush of another Memorial day has passed and all indications point to its having been an excellent one for florists. Everything considered, Memorial day is now a more important holiday with many than even Easter, for everyone buys some flowers or plants, less expensive, it is true, than at Easter, but with many the aggregate sales are as large or larger.

A large proportion of bedding plants will now be sold, but sales will continue well through the month of June. Never have we had more ideal weather for getting the plants into the ground, for it has been uniformly moist and they have made a splendid start. As sales increase, the plants will present a scattered appearance in the houses and frames. It will facilitate handling and watering if what are left over of each kind are placed together in compact batches. Be sure to remember your own needs for another year. Do not sell all your good plants of geraniums, cannas, etc., and leave a few starvelings to plant out for stock for yourself. It is to be hoped you have found time to set out at least one or two attractive beds on your own lawn. It pays any florist to make his own grounds attractive. The neater appearance a place has, the more it will draw customers.

In setting out stock plants of the various geraniums and other bedding plants, give them an open, sunny spot and use large labels for each variety. As the flowering season progresses carefully mark any not true to name.

Marguerites.

Memorial day sales practically clean out the balance of the marguerites, although in such a cool season as we experienced this year it is easily possible to hold them well into June. There are, however, so many outdoor hardy perennials and shrubs flowering then that it scarcely pays to hold them so long. A number of stock plants of each variety should be cut back moderately hard and planted outdoors in rich soil. They will not make much wood suitable for propagation before early September, but when the cool evenings come on a plentiful crop of cuttings will be procurable and from stock taken at that time you can grow along plants for either Easter or Memorial day next year.

Dahlias.

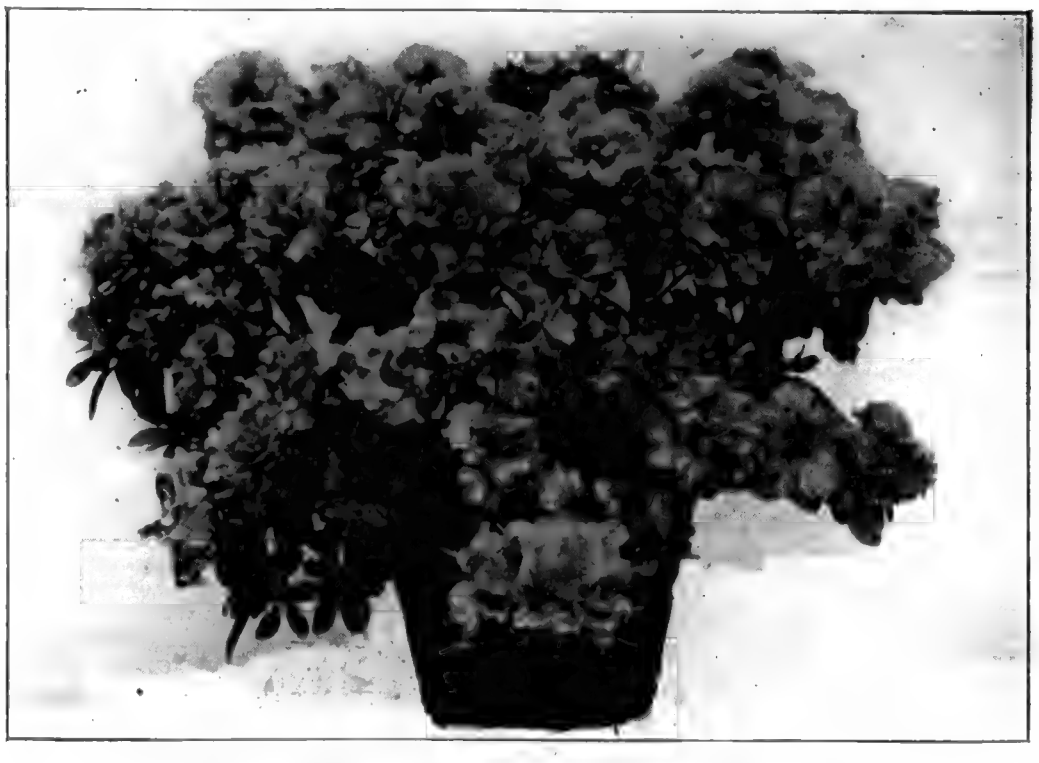
There is no great advantage in planting out dahlias early. Many growers say they always have better results from June than from May planting. Each year they are more disinclined to use pot plants, especially those produced from rooted cuttings, for if there chances to be a good crop of cutworms, these soft dahlia tops make toothsome chewing for them. Divided pieces of root containing at least one good eye cannot be beaten for planting out. Reduce the shoots to one, where several appear, and if nice, stocky plants are wanted, pinch out the tops of the shoots when eight to twelve inches high.

Dahlias are destined to hold a more important position in the cut flower trade of the future than they have in the past. There is no good reason why a house of them planted for Memorial day should not be profitable, if the right colors are selected. They bloom nicely indoors and they should certainly prove better sellers than many of the flowers now produced. There would seem to be a fine opening here for some enterprising and progressive florist.

Lorraine Begonias.

It is still possible to get in a late batch of cuttings of these popular, winter-blooming begonias. When established in little pots, they can be used to good advantage for making up into 6-inch pans.

During the hot months these Lorraine begonias grow painfully slow, but do not on this account neglect and starve them. Even when not making much leaf growth, there is activity at the roots, and just so soon as the first cool nights in August come along they start into new life. Do not allow the early potted off plants to suffer from want of a shift. For soil use plenty of flaky leaf-mold, that from oak leaves being the best. The plants will not grow well in a heavy, clayey soil. Avoid large shifts; an inch at a time is ample now, increasing this towards fall. Lorraines do not require a heavy shade, but are better broken from the sun's direct rays. Give them a fresh stand from time to time, picking off any decaying leaves, removing weeds and lightly loosening the surface soil where necessary. After this date the plants will do well in a frame, if you need greenhouse space for mums, nephrolepis or other crops.



Stevias.

Many growers still plant out their stock of stevias, but there is so much danger from shoots breaking at lifting time that a much better plan is to keep them in pots or plant them in boxes, standing them outdoors where they can be conveniently watered and later in the season furnished necessary supports. It is not too late to root cuttings of stevias. These can still be grown along into fine plants before fall.

Sweet Peas.

The indoor crop of sweet peas will now be on the wane and after this date is liable to become spidery. There is no lessening in the popularity of sweet peas as a market flower. All during the season now closing they have sold better, on the whole, than anything else in the cut flower line, and there is room for a great development of their culture under glass.

In milder localities, the outdoor varieties are just beginning to come in season and, while a little short-stemmed, will

Original Plant of Azalea Mme. August Haerens.

Lawn Scene at the Home of Wm. F. Gude, Washington, D. C.

speedily improve if given a little attention. The cultivator should be frequently run between the rows and hand weeding resorted to to pull up any weeds among the plants. A mulch of well decayed manure, straw, hay or grass between the rows assists in keeping the roots cool and moist, and where it is possible to provide this a wonderful improvement in stems, as compared with plants not so treated, will be noted.

The mistake of too thick sowing, or a neglect to do necessary thinning, is still the rock on which sweet pea culturists stumble. You cannot get strong stems carrying three or four flowers each where your plants are crowded.

Poinsettias.

It is time to get in an early batch of cuttings of poinsettias. Those taken with a heel root most readily, but there is no trouble in propagating if clean, fresh sand is used, with good drainage below it. Do not put your cuttings where they will get any drip, or they will speedily rot. Give at least one thorough watering each day and if you are unable to root the cuttings in your greenhouses, put them in flats of sand and place them in a cold-frame close to the light, but well shaded during sunshine. Keep the frame quite close until cuttings are rooted, then air more freely. Be sure to pot off as soon as rooted, as the roots break easily.

English Ivy.

If your stock of English ivy is low, the present is a good time to root a good batch of cuttings. It is not necessary to depend on tops of shoots, as any portion of the wood will root. The harder portions take a little longer. Just now there is no special pressure on the propagating bench and it may well be utilized for any of these useful odds and ends. Any ivy plants in pots left over should be plunged over the pots outdoors. These will make lots of growth before fall. When propagating of ivy or, in fact, any other plants, is being carried out during hot weather, frequent waterings are necessary. One good wilting and drying up will ruin them.

DAHLIAS.

Can you inform me how to grow dahlias so they will bloom well? Is it proper to let all the stems grow, or nip some off? G. E. S.

In planting out dahlias, if your clumps are large, divide them with a strong, sharp knife, leaving at least one strong eye to each division. Plant in the field in rows three feet apart and twenty-four to thirty inches between the plants, depending on how much room you can spare them. Reduce the growths to one to each plant. This is much more satisfactory than leaving several on each. When the shoot is eight to twelve inches high, pinch out its top, then let it go ahead. Plants treated thus will need little staking, but flower a little later than if unpinched. In the latter case, however, staking is a necessity or your plants will be broken with the first strong winds. The largest dahlia growers do not stake at all, but all adopt the single-stem, pinched-back system. The ground between dahlias should of course be kept thoroughly cultivated during the whole growing season. C. W.

GUDE'S GROUNDS.

The accompanying illustration is reproduced from a photograph made in a suburb of Washington, D. C., and will be of interest because many will recognize the gentleman in the carriage as William F. Gude, formerly president of the S. A. F. and now president of the Chamber of Commerce at Washington. The picture was made on the grounds at Mr. Gude's suburban home. The pipe summer-house at the left is planted with Lady Gay roses.

CARNATION NOTES.—EAST.

Wet Weather Items.

In this section we have had an unusual amount of rain and cloudy weather, which will naturally produce a soft, sappy growth.

When the sun does come out, and the soil has dried out sufficiently to crumble or not stick to the cultivator, then is the accepted time to break up the surface thoroughly. To start the cultivator too soon makes the soil pasty and causes it to dry out in lumps, thereby defeating the prime object of stirring the surface, namely, to form a finely divided, loose mulch.

After a soaking rain, if the cultivating is not done at the proper time, the soil

to root cuttings from these as easily as when taken from walls, as they make few roots while on the parent plants.

HAERENS' NEW AZALEA.

The accompanying illustration is from a photograph of the original seedling plant of a new azalea raised by August Haerens at Somergem, Belgium. It is now 5 years old and when photographed was flowering for the fourth time. Mr. Haerens is extremely enthusiastic over this variety, considering it one of the best ever raised in Belgium, where is located the azalea center of the world. The plant is robust, the flowers large and described as deep rose shaded with carmine. The center is brilliant crimson.

Mr. Haerens formerly traveled in this country in the interest of the firm to the business of which he has since succeeded, and he has many friends in the trade here who hope that all his sanguine anticipations may be fulfilled by the azalea to which he has given his wife's name.

SEASONABLE SUGGESTIONS

Bedding Out.

The rush of another Memorial day has passed and all indications point to its having been an excellent one for florists. Everything considered, Memorial day is now a more important holiday with many than even Easter, for everyone buys some flowers or plants, less expensive, it is true, than at Easter, but with many the aggregate sales are as large or larger.

A large proportion of bedding plants will now be sold, but sales will continue well through the month of June. Never have we had more ideal weather for getting the plants into the ground, for it has been uniformly moist and they have made a splendid start. As sales increase, the plants will present a scattered appearance in the houses and frames. It will facilitate handling and watering if what are left over of each kind are placed together in compact batches. Be sure to remember your own needs for another year. Do not sell all your good plants of geraniums, cannas, etc., and leave a few starvelings to plant out for stock for yourself. It is to be hoped you have found time to set out at least one or two attractive beds on your own lawn. It pays any florist to make his own grounds attractive. The neater appearance a place has, the more it will draw customers.

In setting out stock plants of the various geraniums and other bedding plants, give them an open, sunny spot and use large labels for each variety. As the flowering season progresses carefully mark any not true to name.

Marguerites.

Memorial day sales practically clean out the balance of the marguerites, although in such a cool season as we experienced this year it is easily possible to hold them well into June. There are, however, so many outdoor hardy perennials and shrubs flowering then that it scarcely pays to hold them so long. A number of stock plants of each variety should be cut back moderately hard and planted outdoors in rich soil. They will not make much wood suitable for propagation before early September, but when the cool evenings come on a plentiful crop of cuttings will be procurable and from stock taken at that time you can grow along plants for either Easter or Memorial day next year.

Dahlias.

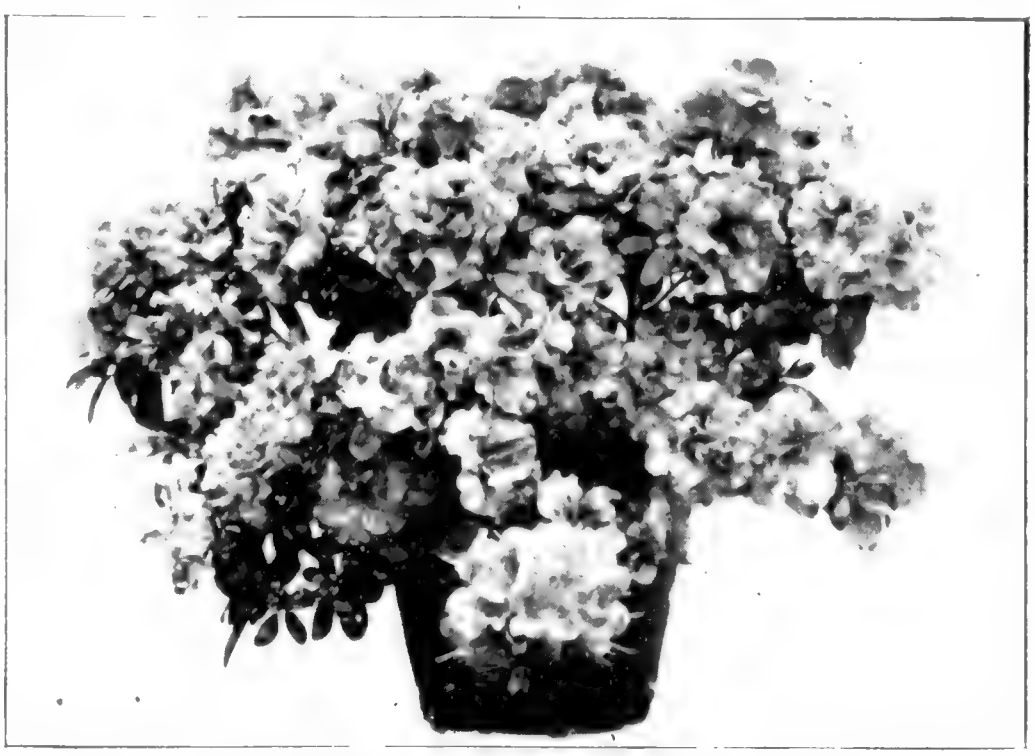
There is no great advantage in planting out dahlias early. Many growers say they always have better results from June than from May planting. Each year they are more disinclined to use pot plants, especially those produced from rooted cuttings, for if there chances to be a good crop of cutworms, these soft dahlia tops make toothsome chewing for them. Divided pieces of root containing at least one good eye cannot be beaten for planting out. Reduce the shoots to one, where several appear, and if nice, stocky plants are wanted, pinch out the tops of the shoots when eight to twelve inches high.

Dahlias are destined to hold a more important position in the cut flower trade of the future than they have in the past. There is no good reason why a house of them planted for Memorial day should not be profitable, if the right colors are selected. They bloom nicely indoors and they should certainly prove better sellers than many of the flowers now produced. There would seem to be a fine opening here for some enterprising and progressive florist.

Lorraine Begonias.

It is still possible to get in a late batch of cuttings of these popular, winter-blooming begonias. When established in little pots, they can be used to good advantage for making up into 6-inch pans.

During the hot months these Lorraine begonias grow painfully slow, but do not on this account neglect and starve them. Even when not making much leaf growth, there is activity at the roots, and just so soon as the first cool nights in August come along they start into new life. Do not allow the early potted off plants to suffer from want of a shift. For soil use plenty of flaky leaf-mold, that from oak leaves being the best. The plants will not grow well in a heavy, clayey soil. Avoid large shifts; an inch at a time is ample now, increasing this towards fall. Lorraines do not require a heavy shade, but are better broken from the sun's direct rays. Give them a fresh stand from time to time, picking off any decaying leaves, removing weeds and lightly loosening the surface soil where necessary. After this date the plants will do well in a frame, if you need greenhouse space for mums, nephrolepis or other crops.



Stevias.

Many growers still plant out their stock of stevias, but there is so much danger from shoots breaking at lifting time that a much better plan is to keep them in pots or plant them in boxes, standing them outdoors where they can be conveniently watered and later in the season furnished necessary supports. It is not too late to root cuttings of stevias. These can still be grown along into fine plants before fall.

Sweet Peas.

The indoor crop of sweet peas will now be on the wane and after this date is liable to become spidery. There is no lessening in the popularity of sweet peas as a market flower. All during the season now closing they have sold better, on the whole, than anything else in the cut flower line, and there is room for a great development of their culture under glass.

In milder localities, the outdoor varieties are just beginning to come in season and, while a little short-stemmed, will

speedily improve if given a little attention. The cultivator should be frequently run between the rows and hand weeding resorted to to pull up any weeds among the plants. A mulch of well decayed manure, straw, hay or grass between the rows assists in keeping the roots cool and moist, and where it is possible to provide this a wonderful improvement in stems, as compared with plants not so treated, will be noted.

The mistake of too thick sowing, or a neglect to do necessary thinning, is still the rock on which sweet pea culturists stumble. You cannot get strong stems carrying three or four flowers each where your plants are crowded.

Poinsettias.

It is time to get in an early batch of cuttings of poinsettias. Those taken with a heel root most readily, but there is no trouble in propagating if clean, fresh sand is used, with good drainage below it. Do not put your cuttings where they will get any drip, or they will speedily rot. Give at least one thorough watering each day and if you are unable to root the cuttings in your greenhouses, put them in flats of sand and place them in a cold frame close to the light, but well shaded during sunshine. Keep the frame quite close until cuttings are rooted, then air more freely. Be sure to pot off as soon as rooted, as the roots break easily.

English Ivy.

If your stock of English ivy is low, the present is a good time to root a good batch of cuttings. It is not necessary to depend on tops of shoots, as any portion of the wood will root. The harder portions take a little longer. Just now there is no special pressure on the propagating bench and it may well be utilized for any of these useful odds and ends. Any ivy plants in pots left over should be plunged over the pots outdoors. These will make lots of growth before fall. When propagating of ivy or, in fact, any other plants, is being carried out during hot weather, frequent waterings are necessary. One good wilting and drying up will ruin them.

DAHLIAS.

Can you inform me how to grow dahlias so they will bloom well? Is it proper to let all the stems grow, or nip some off? G. E. S.

In planting out dahlias, if your clumps are large, divide them with a strong, sharp knife, leaving at least one strong eye to each division. Plant in the field in rows three feet apart and twenty four to thirty inches between the plants, depending on how much room you can spare them. Reduce the growths to one to each plant. This is much more satisfactory than leaving several on each. When the shoot is eight to twelve inches high, pinch out its top, then let it go ahead. Plants treated thus will need little staking, but flower a little later than if unpinched. In the latter case, however, staking is a necessity or your plants will be broken with the first strong winds. The largest dahlia growers do not stake at all, but all adopt the single-stem, pinched-back system. The ground between dahlias should of course be kept thoroughly cultivated during the whole growing season. C. W.

GUDE'S GROUNDS.

The accompanying illustration is reproduced from a photograph made in a suburb of Washington, D. C., and will be of interest because many will recognize the gentleman in the carriage as William F. Gude, formerly president of the S. A. F. and now president of the Chamber of Commerce at Washington. The picture was made on the grounds at Mr. Gude's suburban home. The pipe summer-house at the left is planted with Lady Gay roses.

CARNATIONS

CARNATION NOTES.—EAST.

Wet Weather Items.

In this section we have had an unusual amount of rain and cloudy weather, which will naturally produce a soft, sappy growth.

When the sun does come out, and the soil has dried out sufficiently to crumble or not stick to the cultivator, then is the accepted time to break up the surface thoroughly. To start the cultivator too soon makes the soil pasty and causes it to dry out in lumps, thereby defeating the prime object of stirring the surface, namely, to form a finely divided, loose mulch.

After a soaking rain, if the cultivating is not done at the proper time, the soil

either becomes baked on the surface or gets in the lumpy state referred to—two conditions especially detrimental to plants which have undergone a long period of rain and cloudy weather.

In the case of heavy clay or imperfectly drained fields, it might be advisable to assist evaporation by breaking up the space between the rows directly after a rain, but a space of at least four inches should be left on each side of the rows, for cultivation later. This is, however, an extreme case, and the method recommended is not offered as a pretext for planting in unsuitable locations.

During the next few weeks, growth should be rapid, and every means must be employed to forward the plants as much as possible before hot weather sets in.

Geo. S. Osborn.

THE LARGEST PRIVATE RANGE.

What is said will be the largest and finest private greenhouse establishment in the United States will be erected this season by John B. Duke, president of the American Tobacco Co., at Somerville, N. J. It will consist of twenty-four compartments, besides service buildings, and will cost in the neighborhood of $70,000. The contract has been secured by Lord & Burnham Co., George Sykes, manager of the new Chicago office, having spent three weeks in the east for the purpose of closing the deal.

The new range will include the following separate compartments: One American Beauty house, two tea rose houses, two carnation houses, two gardenia houses, four melon houses, two orchid houses, two fern houses, two vineries, one peach house, one nectarine house, one tomato house, one orangery, two propagating houses, one chrysanthemum house. It will be built with curved eaves; no gutter or eave-plates will be used. Many other Lord & Burnham special styles of construction also will be employed, including the cast-iron benches, self-oiling ventilators and the shadeless ridge type of construction in the rose and carnation houses. Where side ventilators are required Lord & Burnham's improved wall ventilators will be used, made of iron frames and fitted with galvanized wire to keep out birds, squirrels, etc. A special feature will be a fruit room fitted up after the English style.

A work-room 25x60 feet will be built in the center of the range, fitted with a private office, etc. All foundation walls below grade will be of stone concrete, the outside walls above grade of field stone to match the present buildings. The cellar will be large enough to hold about 150 tons of coal, besides boilers, cool storage and mushroom cellars. The houses will be heated by hot water with a combination of 3½-inch cast-iron pipes and 2-inch wrought iron.

Lord & Burnham Co. built Mr. Duke a large show range about eight years ago.

CHRYSANTHEMUMS

LATE PROPAGATION.

There is still time to propagate, if one wishes to grow late varieties or figure on a later cut of the midseason kinds. It is not so easy to root cuttings now as it was two months ago, but it can be done.

Shade the glass heavily if the cuttings are exposed to the sun, and let them be in a position where the wind will not catch them, as a draft of warm air on these "rare June days" is fatal, since the cuttings, if they wilt and get hard, rarely come up again. Cuttings put in now should be put close together, and by overhead spraying, several times a day, if need be, they can be kept from wilting and the greater part can be rooted easily enough.

There is still time, too, for the rooting of stock intended to be grown in 6-inch pots, and such stock, grown along without any check and caught on the first bud that shows, often produces remarkable results. Charles H. Totty.

MUMS FOR NOVEMBER 1.

I should like to have a little information in regard to growing mums. I have the following varieties: Estelle, Rosiere, Monrovia, Pacific and Polly Rose. Can these be grown so as to give me the main crop of blooms by November 1?

I want to grow some in 6-inch pots and some on the bench. When will be the proper time to bench them, and when to take the bud? My stock is now in 2½-inch pots, and I am shifting them to 4-inch, as my compost pile is too wet to handle.

Is it a good policy to have the compost pile two or more years old? A year ago I procured sod and added manure, according to the suggestions in the Review, and have enough to last me three years. I can continue to pile it up if there would be any advantage in doing so. The compost piles have been turned over about three times.

Can Pacific Supreme and Golden Glow be brought into bloom by November 1? If I cannot use the varieties I have mentioned, please advise me as to what varieties I can use, to have the main crop by November 1. J. V. & S.

The Editor is pleased when a Reader presents his ideas on any subject treated in

The Weekly Florists' Review

As experience is the best teacher, so do we learn fastest by an exchange of experiences. Many valuable points are brought out by discussion.

Good penmanship, spelling and grammar, though desirable, are not necessary. Write as you would talk when doing your best.

WE SHALL BE GLAD TO HEAR FROM YOU.

While all the kinds mentioned by J. V. & S. can be grown to produce their flowers by November 1, it would be far more satisfactory to get midseason kinds for the general crop and let the early ones come in as they naturally would, from October 1 to 15. Early kinds, if they are planted about the end of June and the terminal bud is taken, can be kept to November 1, but the flowers from terminal buds are small, and what is the use of trying to keep back these varieties when a small expenditure will give you all the midseason kinds you want? And the difference in the quality of the product will pay ten times over for the plants bought.

The kinds mentioned by J. V. & S. are all good, early varieties, generally classed as money-makers, and he might do worse than plant these, but for November 1 I would suggest the following kinds; there are lots of others, but these are good with us: Yellow—Cheltoni, Appleton, Bonnaffon. White—Beatrice May, Clay Frick, Lynnwood Hall. Pink—Duckham, Enguehard, Mary Mann, Liger.

Regarding the compost heap, I do not consider it good practice to use soil that has been stacked up for over two years. As I remarked recently in my notes on soil, the mum loves a "live" soil; that is to say, a soil that has in it lots of decomposing fiber. When the sod is all rotted and the soil settles closely together, the air does not enter the soil nearly so readily as when the fiber is present, and the plants do not do so well. J. V. & S. can easily prove this by using old soil in one section of a bench and comparatively new soil in another, and comparing the crop.

Charles H. Totty.

CUTTINGS FAILED TO ROOT.

Kindly advise me as to what caused the following trouble with my mum cuttings. The stock plants were housed in a hotbed, which was heated with hot

water. They wintered finely, and gave a great abundance of cuttings. I prepared the sand bed in the usual way, and put in the cuttings. They stayed up and looked fine for about two weeks, but just about the time they usually start to root they completely wilted off, and proved a total failure. The varieties were October Frost, Polly Rose, Appleton, White Eaton and Yellow Eaton.

I purchased some unrooted cuttings from a neighbor, which were placed in the same bed, trimmed and put in by the same person, and they rooted finely. My neighbor's stock was housed in a carnation house, in boxes on a window sill. He had some stock which was wintered successfully outside, in the open, but which wilts off and dies in about two weeks after placing in the sand. His varieties are Baby and Jerome Jones.

Of course, my stock plants were never fumigated, but were washed in clean water before placing in the sand. They were very soft, meaty cuttings, some as large as a lead pencil, but were free from bugs. I gave some of my cuttings to two different growers, so that they might try to root them, but they did not have any better success than I did.

G. S. B.

If all the facts are just as G. S. B. says, it is hard to determine what is the trouble. If the trouble had been due to fungus in the sand, the unrooted cuttings mentioned as having been bought from a neighbor would also have damped off. My first thought was that the outdoor cuttings were hard, from not receiving sufficient water, but that was dispelled by the conclusion of G. S. B.'s note, where he says they were "soft, meaty cuttings."

There is no reason, so far as the plants are concerned, for this failure. The fact of their having been wintered in a frame should be a help rather than a hindrance, if, as I assume, the frame was kept cold, for such comes much nearer to the natural treatment of the plants than does keeping them growing in a carnation house temperature.

The only explanation I can give is that the cuttings may have been grown in too rich a soil, and consequently were too gross and sappy, and instead of callousing and forming roots, simply melted away. While the mum is a gross feeder, it should not receive that feed during the dark winter months. A night temperature of 40 degrees, and fresh loam for the plants to grow in, should eliminate G. S. B.'s difficulties another year, if he gives the stock plants all the air possible and keeps the glass free from snow or other accumulations.

CHARLES H. TOTTY.

EARLY GOLDEN GLOW MUMS.

The photograph here reproduced, showing a group of potted Golden Glow chrysanthemums, was taken at the establishment of the C. C. Pollworth Co., Milwaukee, May 28. The plants were from cuttings taken in December, and about 200 of them were ready for Decoration day trade.

"It seems," says the firm, "that this variety of mums can be brought into bloom at almost any time, according to the time the cuttings are struck and the way they are grown. Most of the plants contained two or three large blossoms, and we have smaller ones with buds and they found a ready sale. It was not intended or presumed, at the time these cuttings were struck, that they were to be brought into flower at this time of the year, but the small plants happened to be in a house of some belated lilies which required extra forcing and a higher temperature to get them in for Easter; consequently these plants began to make rapid growth and set with bud. They were shifted into larger pots and brought along, and the result is that they came into flower much out of season.

"There were also a few plants of the Dr. Enguehard which came in at the same time, but the flowers on the Golden Glow were equal to the best flowers that come in at their regular season in the fall. This plainly shows the earliness of this variety."

Chrysanthemum Golden Glow for Memorial Day.

CALIFORNIA LILY BULBS.

Now a Commercial Proposition.

The first Easter lilies flowered from American grown bulbs which have been marketed in the Chicago wholesale cut flower district were sold in May by E. C. Amling and attracted much attention among those who knew their history. It put the bulb-growing industry in this country on a commercial basis.

For several years the U. S. Department of Agriculture has been at work on the problem of growing the bulbs of Lilium Harrisii in this country and, while experiments have proven more or less satisfactory, even the most successful ones were slow in developing into a commercial proposition. California proved the best field for lily bulb growing and one or two firms there took hold of the project in the hope of making a profit. So far as recorded, the flowers sold on the Chicago market in May were the first to stand the test of the actual sale of the bulbs to a florist who grows for the wholesale trade.

These lily bulbs are supposed to have been raised from bulbs grown originally from seed. The plants varied considerably in character. The earliest lilies were big, hard flowers on long, well clothed stems, but in the tail end of the crops the growth was weak, the foliage irregular, curled and yellow, with the flowers soft, thin and watery. The deterioration was steady from the fine, perfect flowers that were first cut; the strength was in proportion to the time of blooming, or vice versa.

The lily bulbs in question were grown by the Santa Ana Easter Lily Co., Santa Ana, Cal., who received $65 for 1,000, half 5 to 7 and half 7 to 9. Price would be a secondary consideration if every bulb flowered strongly. The bulbs were flowered by the Albert F. Amling Co., Maywood, Ill. A. F. Amling, president of the company, gave the following account of them:

Mr. Amling's Story.

"About those California lily bulbs, I wish to say that we bought 500 5 to 7's and 500 7 to 9's, which arrived September 28, 1908, and were at once potted into 5-inch pots and set in a cool house; night temperature 50 degrees. This we maintained throughout their growth. They were about all cut May 24; they came in too late for Easter and too early for Decoration day. We lost about half of the bulbs, as they were too weak and sickly. The other half were fairly good; some nice hard flowers were cut from these, about four to six flowers to the stem.

either becomes baked on the surface or gets in the lumpy state referred to—two conditions especially detrimental to plants which have undergone a long period of rain and cloudy weather.

In the case of heavy clay or imperfectly drained fields, it might be advisable to assist evaporation by breaking up the space between the rows directly after a rain, but a space of at least four inches should be left on each side of the rows, for cultivation later. This is, however, an extreme case, and the method recommended is not offered as a pretext for planting in unsuitable locations.

California proved the best field for lily bulb growing and one or two firms there took hold of the project in the hope of making a profit. So far as recorded, the flowers sold on the Chicago market in May were the first to stand the test of the actual sale of the bulbs to a florist who grows for the wholesale trade.

These lily bulbs are supposed to have been raised from bulbs grown originally from seed. The plants varied considerably in character. The earliest lilies were big, hard flowers on long, well clothed stems, but in the tail end of the crops the growth was weak, the foliage irregular, curled and yellow, with the flowers soft, thin and watery. The deterioration was steady from the fine, perfect flowers that were first cut; the strength was in proportion to the time of blooming, or vice versa.

The lily bulbs in question were grown by the Santa Ana Easter Lily Co., Santa Ana, Cal., who received $65 for 1,000, half 5 to 7 and half 7 to 9. Price would be a secondary consideration if every bulb flowered strongly. The bulbs were flowered by the Albert F. Amling Co., Maywood, Ill. A. F. Amling, president of the company, gave the following account of them:

Mr. Amling's Story.

"About those California lily bulbs, I wish to say that we bought 500 5 to 7's and 500 7 to 9's, which arrived September 28, 1908, and were at once potted into 5-inch pots and set in a cool house; night temperature 50 degrees. This we maintained throughout their growth. They were about all cut May 24; they came in too late for Easter and too early for Decoration day. We lost about half of the bulbs, as they were too weak and sickly. The other half were fairly good; some nice hard flowers were cut from these, about four to six flowers to the stem.

Establishment of Charles P. Mueller, Wichita, Kan.

"When out in California in February, 1908, I visited Fred Rafferty, a florist in Santa Ana, who has some nice greenhouses, grows a great quantity of plumosus in lath houses, and has a general line of cut flowers and plants. He had some Easter lily bulbs out in the field and said he grew them without the lily disease. His plants, which, by the way, were then about four to five inches high, looked very healthy. He called my attention to a new corporation, just organized, the Santa Ana Easter Lily Co., whose sole object was to grow lily bulbs for the trade.

"The next day I visited the farm, or ranch, as they call it, of the Santa Ana Easter Lily Co., about three miles west of Santa Ana, or about twenty-five miles in a southeasterly direction from Los Angeles. Mr. Metcalf, the vice-president and general manager, took us in hand and showed us about the grounds. He had a large force of men and teams at work grading, as there everything must be brought to a level for irrigating. About 100,000 lily bulbs they claimed to have then planted out for a beginning. Mr. Metcalf also made the claim that they would grow their bulbs without the lily disease; anything showing the least sign of it would be exterminated. I decided to give them a trial, so placed an order for 1,000, but will say that I am somewhat disappointed with the result. We planted and treated them strictly according to Mr. Metcalf's directions, but, as above stated, lost about half entirely. We are enough interested, however, so that we shall give them another trial this year."

It is stated that other lots of these bulbs have been sold in the trade and flowered with good success this season.

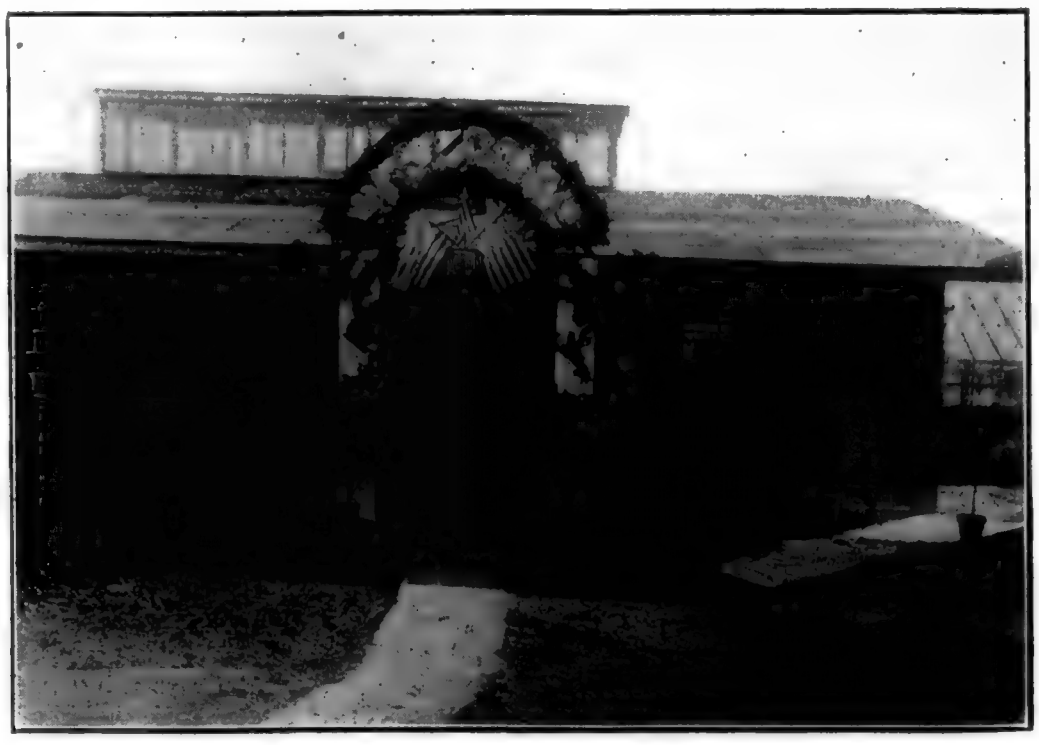
GLIMPSES OF MUELLER'S PLACE.

In November, 1908, when Charles P. Mueller, of Wichita, Kan., held a reception at his greenhouses, photographs were taken of several different parts of the establishment. Three of the photographs are here reproduced. The terra cotta building, of which a front view is presented, contains the office and shipping room. Another illustration shows a carnation house, which measures 30x152 feet and is stocked with about 10,000 plants. In the other greenhouse which is here pictured, there is a smilax bed in the center, with benches of Asparagus Sprengeri on each side and baskets of Boston ferns and Sprengeri suspended from the sashbars.

Mr. Mueller's houses are located about half a mile from the end of the car line. On the occasion of the reception referred to, special cars were chartered to handle the crowds, and carriages were run from the end of the car line. During the day several thousand persons visited the plant. As seen in the pictures, the men wore a uniform apron and cap. Everything was in apple-pie order, and the general impression was one of up-to-dateness and thrift.

C. H. Conger, manager of the plant, is a Cincinnati, O., boy, and is the son of J. T. Conger, of Hartwell, O. He took charge of the plant last September.

During January a severe wind storm struck the place. A gale of sixty-five miles per hour made the houses sway and buck like a bronco. Over 200 lights were broken. It was necessary to get fence wire and anchor the houses down to prevent much greater loss. It required quick and energetic work to save the plant from total destruction.



Mr. Mueller conducts a retail store in Wichita, located at 145 North Main street, and he is doing a fine business.

HAIL LOSSES HEAVY.

May made a new record with the Florists' Hail Association for the payment of losses. Between May 5 and May 29 the sum of $11,085.81 was disbursed, the following being the payments:

Samuel R. Faulkner, Omaha, Neb.	$ 166.60
E. A. Barnhart, Clinton, Mo.	40.50
E. J. Larimer, Herrin, Ill.	18.41
Henry Meyers, Council Bluffs, Ia.	37.90
John R. Elder, Sioux City, Ia.	257.80
F. J. Olsan, Ames, Ia.	75.70
George Sorrenson, Florence, Neb.	19.50
Wm. Stolba Floral Co., Cedar Rapids, Ia.	15.61
M. K. Bishop, Sioux City, Ia.	21.00
Wm. Goos, Davenport, Ia.	6.30
John T. Temple, Davenport, Ia.	100.24

Shipping Room and Office of C. P. Mueller, Wichita, Kan.

Green Goods House of C. P. Mueller, Wichita, Kan.

that there is a company in which we can insure at such reasonable rates, and such quick and sure response in time of need. We thank you very much."

MONEY RETURNED.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

Please discontinue my advertisement of Asparagus plumosus and Sprengeri. I am not only sold out, but had to send back several orders with checks, which goes "agin" the grain. Review ads do the business.—James Hamilton, Mt. Washington, Md., May 26, 1909.

WORKING UP STOCK.

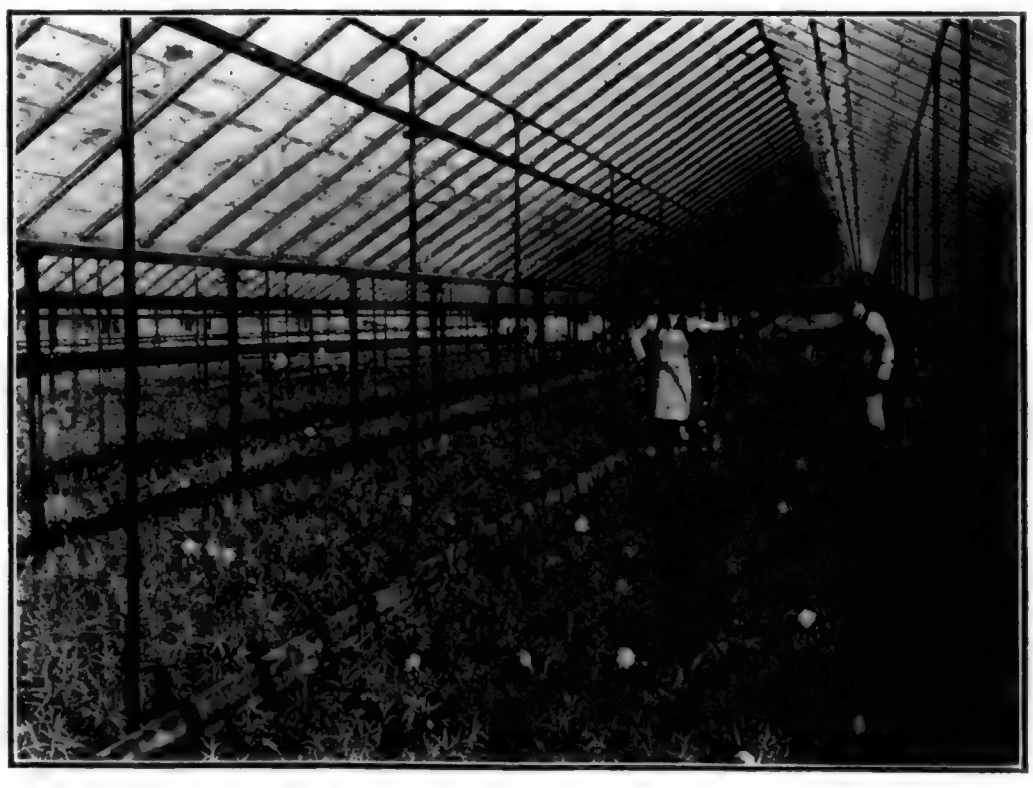
In our garden we have a dark blue violet of exquisite perfume; so much so that the odor scents the air twenty feet from the plant. We have sold them to local florists, and one florist who saw them growing in the open air and learned that they were hardy, went into ecstasy; all who have seen them express great surprise. We also have the ordinary kind of violet, which is hardy and of a lighter hue, but absolutely without perfume.

We find there is a great demand here among florists and the better class of people for a violet such as we have. We planted them only for our own accommodation and they have spread so that we now have several hundred plants in perfect condition, without disease or insects of any kind. This spring they came into bloom early in May; I am not certain but some were in bloom the latter part of April, and we did not learn of their commercial value until about a week before they ceased blooming; the original plant, when given to my wife, she was told was an "English" violet and I had no knowledge that it might be anything else.

Is there some special method of culture by which the plants could be more rapidly multiplied than by permitting nature to follow its regular course? The plant is now entirely out of bloom, otherwise would send you sample. I am also informed that these plants bloom twice a year. E. K. H.

You do not state whether your violets are single or double. There is a double, dark blue variety which is hardy in your latitude (central New York), often called the double Russian. It flowers late, has rather short stems, a heavy odor and comes in crop about the time you mention. There are one or two single, dark blue varieties which will winter outdoors.

Apart from seeding, violets are readily propagated by division of the plants, or from runners. This should be done as soon as the flowering season is over. The runners or divisions should be placed in a coldframe and kept well watered and shaded until they root, when they can be planted outdoors.



I have an idea that the violet you have is one which is not at all a winter bloomer if grown under glass, merely giving a spring crop when the other violets are over. I do not think any of the violets give two crops a year. There may be a few scattering flowers other than in spring, but the flowers are really all produced in April or May. The violets grown commercially, such as Marie Louise, Campbell and Princess of Wales, flower from early October until the end of April. C. W.

SWEET PEAS AND VIOLETS.

I am thinking of using a house 19x32, with four feet of head-room at the eaves, for sweet peas and violets. Would you advise growing these two crops together, or can you suggest something better to grow in the same house for cut blooms. The sweet peas we find profitable and what we want is a good cut flower to grow with them, and something that would require, of course, the same amount of heat. W. C. F. C.

If you have only four feet of head-room, you had better not attempt to grow sweet peas. To grow the latter you should have not less than six to eight feet of head-room. Sweet peas, if in solid beds, will grow ten to twelve feet high, and in raised benches want far more head-room than you can give them. A good crop to grow with your violets would be Spanish iris. You can either grow these in benches by themselves, or dot the bulbs among the violets. You will find these an excellent market flower and the bulbs are so inexpensive as to be within reach of anyone. You can use such sorts as Chrysolora, golden yellow; Mont Blanc, pure white; Louise, pale blue, and Comte de Nassau, dark blue. Gladioli of either the Gandavensis or nanus type is another crop you could grow. If you do not want any of these bulbous flowers, mignonette will succeed well in a violet temperature, doing better in a solid bed than in benches. C. W.

ADAMS, MASS.—A. J. Boothman, the North Summer street florist, has started to build his fourth greenhouse. It will be about the same size as the ones previously erected. All will be connected.

Carnation House of C. P. Mueller, Wichita, Kan.

Establishment of Charles P. Mueller, Wichita, Kan.

"When on, in California in February, 1908, I visited Fred Rafferty, a florist in Santa Ana, who has some nice greenhouses, grows a great quantity of plumosus in lath houses, and has a general line of cut flowers and plants. He had some Easter lily bulbs out in the field and said he grew them without the lily disease. His plants, which, by the way, were then about four to five inches high, looked very healthy. He called my attention to a new corporation, just organized, the Santa Ana Easter Lily Co., whose sole object was to grow lily bulbs for the trade.

"The next day I visited the farm, or ranch, as they call it, of the Santa Ana Easter Lily Co., about three miles west of Santa Ana, or about twenty-five miles in a southeasterly direction from Los Angeles. Mr. Metcalf, the vice president and general manager, took us in hand and showed us about the grounds. He had a large force of men and teams at work grading, as there everything must be brought to a level for irrigating. About 100,000 lily bulbs they claimed to have then planted out for a beginning. Mr. Metcalf also made the claim that they would grow their bulbs without the lily disease; anything showing the least sign of it would be exterminated. I decided to give them a trial, so placed an order for 1,000, but will say that I am somewhat disappointed with the result. We planted and treated them strictly according to Mr. Metcalf's directions, but, as above stated, lost about half entirely. We are enough interested, however, so that we shall give them another trial this year."

It is stated that other lots of these bulbs have been sold in the trade and flowered with good success this season.

GLIMPSES OF MUELLER'S PLACE.

In November, 1908, when Charles P. Mueller, of Wichita, Kan., held a reception at his greenhouses, photographs were taken of several different parts of the establishment. Three of the photographs are here reproduced. The terra cotta building, of which a front view is presented, contains the office and shipping room. Another illustration shows a carnation house, which measures 30x152 feet and is stocked with about 10,000 plants. In the other greenhouse which is here pictured, there is a smilax bed in the center, with benches of Asparagus Sprengeri on each side and baskets of Boston ferns and Sprengeri suspended from the sashbars.

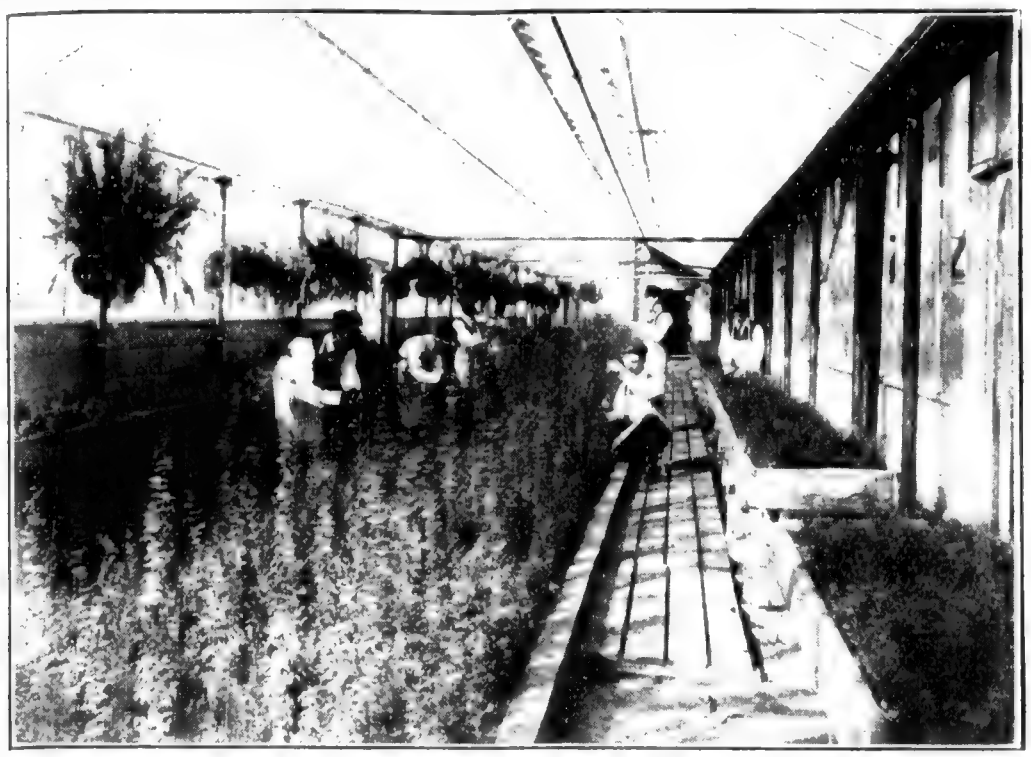
Mr. Mueller's houses are located about half a mile from the end of the car line. On the occasion of the reception referred to, special cars were chartered to handle the crowds, and carriages were run from the end of the car line. During the day several thousand persons visited the plant. As seen in the pictures, the men wore a uniform apron and cap. Everything was in apple-pie order, and the general impression was one of up-to-dateness and thrift.

C. H. Conger, manager of the plant, is a Cincinnati, O., boy, and is the son of J. T. Conger, of Hartwell, O. He took charge of the plant last September.

During January a severe wind storm struck the place. A gale of sixty-five miles per hour made the houses sway and buck like a bronco. Over 200 lights were broken. It was necessary to get fence wire and anchor the houses down to prevent much greater loss. It required quick and energetic work to save the plant from total destruction.

Mr. Mueller conducts a retail store in Wichita, located at 145 North Main street, and he is doing a fine business.

HAIL LOSSES HEAVY.



May made a new record with the Florists' Hail Association for the payment of losses. Between May 5 and May 29 the sum of $11,085.81 was disbursed, the following being the payments:

Samuel R. Faulkner, Omaha, Neb.	$ 166.60
E. A. Barnhart, Clinton, Mo.	40.50
E. J. Larimer, Herrin, Ill.	18.41
Henry Meyers, Council Bluffs, Ia.	37.30

Carnation House of C. P. Mueller, Wichita, Kan.

CALLAS.

Which is the best way to grow callas for cut flowers, on the ground, or in wooden boxes with about four bulbs in each? In the latter case, how big should the box be and how deep should the bulbs be planted? If set in the ground, how far apart should they be planted and at what time in the state of Georgia?

J. T.

Callas can be successfully grown in pots, boxes or benches. If you decide to use boxes, a suitable size would be thirty inches long, nine inches wide and six inches deep inside. This would accommodate and do justice to four strong bulbs. A good time to start the bulbs is from the middle to the end of August. If you prefer to plant in benches, use six inches of soil. A mixture of three-fourths fibrous loam and one-fourth rotted cow manure will be found excellent. Set the bulbs twelve inches apart each way. I like to start the callas in pots or boxes containing some light, sandy soil, later transferring them to the benches. If you decide to grow in boxes, which method I would recommend in preference to planting in the ground, it would be well to leave these outdoors until October in your state. C. W.

DICHORISANDRA SIEBERTII.

This species of dichorisandra cannot be as well known as others of the genus, for Nicholson does not mention it and Bailey's Cyclopedia of Horticulture merely says, "A little known plant with white midribs and margins." Dichorisandras are warm house, herbaceous perennials, some of them with handsome flowers as well as foliage. The general treatment of dichorisandras is a good, turfy loam, with some leaf-mold added, with a good supply of water when started in spring and on through the summer. Gradually diminish the water supply in October and November. While resting dry in winter, they should still be kept warm, for most of them are natives of Brazil. They need shade from the hot sun.

Owego, N. Y.—E. B. Snow will open a flower store on Broad street, in this place.

.....BUSINESS AND OTHER NOTES.....

Northampton, Mass. — A. B. Graves reports this "the busiest season ever" at his greenhouses on Bridge street, and even with extra help he finds it difficult to fill orders. Some improvements in the place make it much more inviting.

Middleboro, Mass.—T. F. Creedon has a fine stock of plants and ships a good many of them to other towns in that state. A Cape Cod newspaper says that Mr. Creedon has for more than thirty years been serving satisfied customers on the Cape.

Somersworth, N. H.—G. S. Ramsburg had the contract for the decorations at Central park this year, and finished planting them May 26. The stock at his new establishment was in fine shape for Memorial day, in spite of the unavoidable delay connected with rebuilding.

Lynchburg, Va.—The florists of the city, together with several civic organizations, are arranging for a chrysanthemum show to be held here on November 9, 10 and 11. Rules will be drafted at once, and attractive prizes will be offered to professional and amateur chrysanthemum growers.

Marquette, Mich.—T. M. Sorensen, proprietor of the Stafford Greenhouses, will move his downtown branch into a more suitable store as soon as it can be remodeled for his use. The building will be thoroughly overhauled and the interior repainted enamel white, with counters and cases to match.

Hebron, Neb.—Mrs. Mary F. Lindsey says that trade, both in plants and in cut flowers, has increased wonderfully here during the last year, and she has never before had so much business as in the present season. People in the small towns, she says, now use flowers on all occasions, and want the best that are grown.

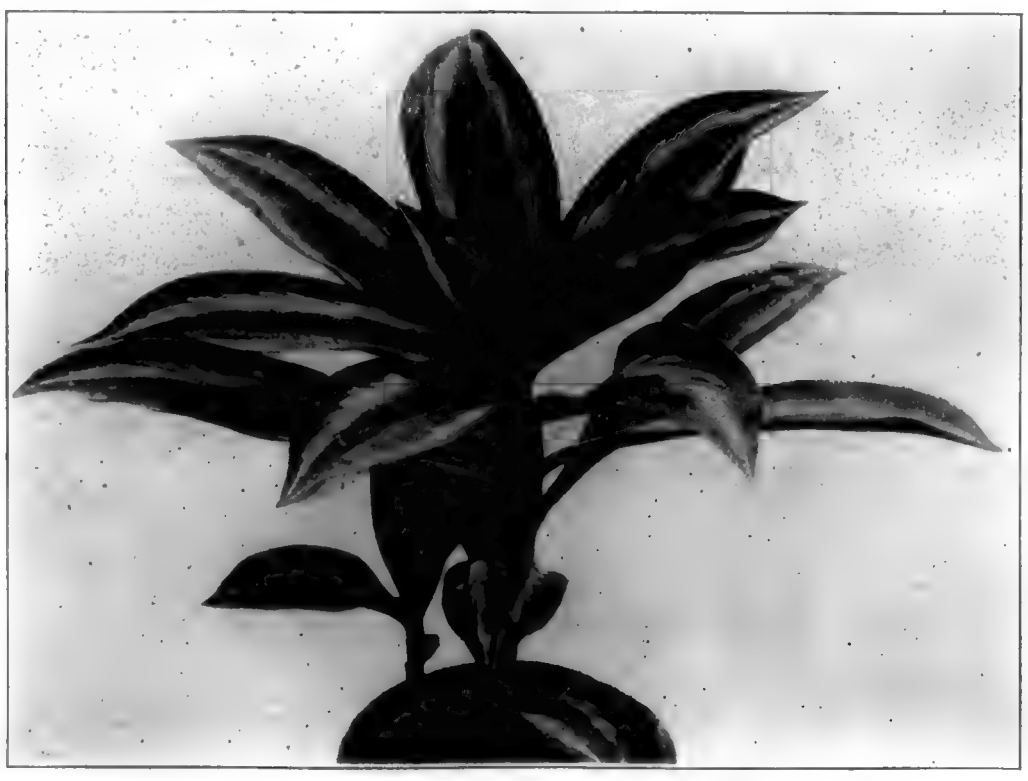
Wellesley, Mass.—The Wilson greenhouses have been leased by Arthur Capers, who intends to make a specialty of carnations.

Adams, Mass.—Cornelius and Thomas Boothman, sons of A. J. Boothman, have leased a store on Park street and will handle the products of their father's greenhouses.

Bay City, Mich.—The Schweers & Potratz Floral Co. has begun business on South Euclid avenue. The company makes a specialty of cut flowers and potted plants.

Cleveland, O. — M. L. Ruetenik is largely increasing his place this season, having given an order to the John C. Moninger Co., Chicago, for the material of seven houses, 30x190, all for vegetable forcing.

Millbrook, N. Y.—Stuart Smith, who for many years ran the greenhouses here for his father, H. J. Smith, is with his parents at Long Island, and contemplates taking up a course in forestry at Cornell College.



South Bend, Ind.—The Beyer Floral Co. has been incorporated with a capital stock of $40,000. The incorporators are August F. Beyer, Louis M. Beyer, Paul O. Beyer, Herman H. Beyer, Rose A. Beyer, William R. Beyer and John F. Beyer.

Lowell, Mass.—H. L. Shedd is putting in the cement foundations for a third greenhouse at his place at South Lowell. It will be used to grow violets, the others being devoted to carnations. Mr. Shedd also keeps considerable land under cultivation for early vegetables.

Cambridge, Mass.—Robert E. Sands, for the last four years in the employ of F. C. Becker, the florist, has associated himself with Geo. H. Conant, Jr., 67 Garfield street, and the two will conduct a business as wholesale and retail dealers in bedding plants, under the firm name of Sands & Conant.

Oconto, Wis.—Joseph Sylvester says Decoration day trade was far ahead of other years; every flower sold out clean and any plant with a flower on was bought at the finish. He had saved about double what he had last year, but everything went, hydrangeas, well-flowered geraniums and pelargoniums going first.

Pittsfield, Mass.—Clifford Allen, of Canaan, Conn., a boy employed by T. L. Lowden, disappeared on the morning of May 19 and, at last report, had not been heard from. Mr. Lowden was taking orders on Bartlett avenue and sent the boy to one house while he went into another. When Mr. Lowden came out the boy was not to be found. A note, addressed to Mr. Lowden, was found on the seat of the wagon beside Mr. Lowden's pocketbook. The note stated that the boy was "sick of it all," and had left, and it would be of no use trying to find him. "I have taken three dollars which is due me," he wrote. The rest of the money in the pocketbook was found to be intact. The young man is 16 years old.

Dichorisandra Siebertii.

THE WATER GARDEN.

[An extract from a paper by Peter Bisset, read before the Boston Gardeners' and Florists' Club May 18. Continued from the Review of May 27.]

The hardy water lilies begin to flower very early in the season. In sheltered ponds the first week in June will see several of them in bloom, and from that time until well into September flowers of hardy water lilies can be picked. The roots of the hardy water lilies will commence to flower within a few weeks after planting and will keep on blooming throughout the season. The hardy lilies give us a great variety and variation in the form of the petals, as well as in the color of the blooms. Some of the flowers rise above the water on stems of from six to nine inches; others float on the surface, presenting an endless variety in leaf and flower.

The best of the hardy lilies spring from the American species, Nymphæa odorata, Nymphæa reniformis (or tuberosa), as it is more commonly called, and the Mexican variety, Nymphæa Mexicana. These, with the European species, Nymphæa alba and Nymphæa alba rubra, and the Chinese Nymphæa tetragona, or, as it is better known, pygmæa, have all been used by the hybridist to give us the many beautiful forms we now possess.

Some Good Nymphaeas.

Nymphæa odorata, the white, fragrant pond lily of the northeastern states, is still a desirable one, and should be grown by every person who cultivates water lilies. By the side of the one just mentioned should be planted Nymphæa odorata rosea, the far-famed Cape Cod pink

(Concluded on page 28.)

OBITUARY.

John E. Andre.

John E. Andre, one of the best known florists in Pennsylvania, died at his home in Doylestown, Thursday, May 27, of peritonitis, after a brief illness.

John E. Andre was born in Detroit, Mich., April 28, 1859. He removed to Doylestown in 1881 to take the position of foreman for John Y. Smith, then a leading florist. When Mr. Smith withdrew from business in 1888, Mr. Andre started for himself, gradually building up an excellent business and a reputation for character and ability. Mr. Andre was a rose grower for the Philadelphia market. His stock was ranked among the best coming into that city. This reputation, consistently sustained throughout a score of years, was due to hard work and perseverance quite as much as to his knowledge of his profession. Mr. Andre's place always looked clean; his plants always showed vigor. "I always plant good plants in time," he said. This sentence, indicating thought, punctuality, system, will show why he was successful. Mr. Andre devoted his attention chiefly to Brides and Bridesmaids.

He is survived by a widow and one son, John E. Andre, Jr. The funeral took place Monday, May 31. Mr. Andre will be mourned by a large circle of friends. PHIL.

James H. Woodburn.

James H. Woodburn, a pioneer resident and nurseryman of Sterling, Ill., died May 25, of paralysis.

James H. Woodburn was born in Newville, Pa., October 12, 1836. In the fall of 1838 he went west with his parents. Mr. Woodburn was given a liberal education at Linn Academy, Indianapolis, and at the Big Springs Academy. After graduating he returned to Sterling and engaged in farming. August 2, 1862, he enlisted in Company I, Seventy-fifth Illinois Volunteer Infantry. He participated in the battles of Stone River, Lookout Mountain, Missionary Ridge and Ringgold Gap. He was with Sherman in the Atlantic campaign and remained in the service until the close of the war and was mustered out on June 12, 1865. After his return from the war he turned his attention to horticulture and floriculture, and at the time of his death was the proprietor of a nursery west of the city.

James H. Woodburn was married November 15, 1858, to Miss Susan Farrar, a native of Manchester, N. H. Two children were born, George W., who died in April, 1890, and Charles H., an attorney of Sterling. Mrs. Woodburn died in 1903.

John E. Andre.

Julius Friedlander.

Julius Friedlander, whose flower store was in Times square, New York city, thirty years before the name Times square was applied to it, died May 25, at the home of Walter Gantz, 124 West Fifth street, Bayonne, N. J., of cancer of the stomach. He was 56 years old and leaves a widow, two married sons, three brothers, and a sister. The sister is Lottie Abeles, wife of Edward Abeles, the star in "Brewster's Millions," and herself a member of the company. Mr. Friedlander's mother is still living, at the age of 86, in Norwalk, Conn.

Mr. Friedlander's father, the late Ludwig Friedlander, opened a florist's shop at Broadway and Forty-eighth street in 1868, and it was never closed until illness forced the son to give up the business in the fall of 1908. Mr. Friedlander was little more than a boy when his father's business was established. There was then a small structure with a fence around it on the site of the Times building. There were many fine private estates in the vicinity. The owners of these places, long ago displaced by business blocks, were liberal patrons of the Friedlander flower store.

M. C. Pennock.

Matthew C. Pennock, former superintendent for J. E. Jackson, at the Piedmont Greenhouses, Gainesville, Ga., died Monday afternoon, May 24. He had been in ill health for some time, and had received treatment at several sanitariums. He had many friends in Gainesville and in his former home, Philadelphia. He leaves a wife and one son, Herbert.

Mr. Pennock had been with the Piedmont Greenhouses for nine years. He was a skillful florist and a man of lovable nature and kind disposition. He had a severe attack of typhoid fever seven years ago, and since then his health had been gradually failing, especially during the last twelve months.

Lottie LeMoult.

Miss Lottie LeMoult, daughter of A. LeMoult, the veteran florist of the Bowery, New York, and sister of the wife of Jos. Fenrich, the New York wholesale florist, died of consumption Memorial day and was buried June 3. Miss LeMoult was a lady of splendid mentality and popular with all who knew her. Profuse floral mementos attested the love of many friends.

FAR ROCKAWAY, N. Y. — Axel Lindstrom, whose son, ten years old, was killed last January by a dangling telephone wire, has accepted $2,000 from the telephone company, as settlement.

CALLAS.

Which is the best way to grow callas for cut flowers, on the ground, or in wooden boxes with about four bulbs in each? In the latter case, how big should the box be and how deep should the bulbs be planted? If set in the ground, how far apart should they be planted and at what time in the state of Georgia?

J. T.

Callas can be successfully grown in pots, boxes or benches. If you decide to use boxes, a suitable size would be thirty inches long, nine inches wide and six inches deep inside. This would accommodate and do justice to four strong bulbs. A good time to start the bulbs is from the middle to the end of August. If you prefer to plant in benches, use six inches of soil. A mixture of three-fourths fibrous loam and one fourth rotted cow manure will be found excellent. Set the bulbs twelve inches apart each way. I like to start the callas in pots or boxes containing some light, sandy soil, later transferring them to the benches. If you decide to grow in boxes, which method I would recommend in preference to planting in the ground, it would be well to leave these outdoors until October in your state.

C. W.

DICHORISANDRA SIEBERTII.

This species of dichorisandra cannot be as well known as others of the genus, for Nicholson does not mention it and Bailey's Cyclopedia of Horticulture merely says, "A little known plant with white midribs and margins." Dichorisandras are warm house, herbaceous perennials, some of them with handsome flowers as well as foliage. The general treatment of dichorisandras is a good, turfy loam, with some leaf-mold added, with a good supply of water when started in spring and on through the summer. Gradually diminish the water supply in October and November. While resting dry in winter, they should still be kept warm, for most of them are natives of Brazil. They need shade from the hot sun.

Owego, N. Y.—E. B. Snow will open a flower store on Broad street, in this place.

Dichorisandra Siebertii.

.....BUSINESS AND OTHER NOTES.....

Northampton, Mass.—A. B. Graves reports this "the busiest season ever" at his greenhouses on Bridge street, and even with extra help he finds it difficult to fill orders. Some improvements in the place make it much more inviting.

Middleboro, Mass.—T. F. Creedon has a fine stock of plants and ships a good many of them to other towns in that state. A Cape Cod newspaper says that Mr. Creedon has for more than thirty years been serving satisfied customers on the Cape.

Somersworth, N. H.—G. S. Ramsburg had the contract for the decorations at Central park this year, and finished planting them May 26. The stock at his new establishment was in fine shape for Memorial day, in spite of the unavoidable delay connected with rebuilding.

Lynchburg, Va.—The florists of the city, together with several civic organizations, are arranging for a chrysanthemum show to be held here on November 9, 10 and 11. Rules will be drafted at once, and attractive prizes will be offered to professional and amateur chrysanthemum growers.

Marquette, Mich.—T. M. Sorensen, proprietor of the Stafford Greenhouses, will move his downtown branch into a more suitable store as soon as it can be remodeled for his use. The building will be thoroughly overhauled and the interior repainted enamel white, with counters and cases to match.

Heeron, Neb.—Mrs. Mary F. Lindsey says that trade, both in plants and in cut flowers, has increased wonderfully here during the last year, and she has never before had so much business as in the present season. People in the small towns, she says, now use flowers on all occasions, and want the best that are grown.

Wellesley, Mass.—The Wilson greenhouses have been leased by Arthur Capers, who intends to make a specialty of carnations.

Adams, Mass.—Cornelius and Thomas Boothman, sons of A. J. Boothman, have leased a store on Park street and will handle the products of their father's greenhouses.

Bay City, Mich.—The Schweers & Pratz Floral Co. has begun business on South Euclid avenue. The company makes a specialty of cut flowers and potted plants.

Cleveland, O.—M. L. Ruetenik is largely increasing his place this season, having given an order to the John C. Moninger Co., Chicago, for the material of seven houses, 30x190, all for vegetable forcing.

Millbrook, N. Y.—Stuart Smith, who for many years ran the greenhouses here for his father, H. J. Smith, is with his parents at Long Island, and contemplates taking up a course in forestry at Cornell College.

South Bend, Ind.—The Beyer Floral Co. has been incorporated with a capital stock of $40,000. The incorporators are August F. Beyer, Louis M. Beyer, Paul O. Beyer, Herman H. Beyer, Rose A. Beyer, William R. Beyer and John F. Beyer.

Lowell, Mass.—H. L. Shedd is putting in the cement foundations for a third greenhouse at his place at South Lowell. It will be used to grow violets, the others being devoted to carnations. Mr. Shedd also keeps considerable land under cultivation for early vegetables.

Cambridge, Mass.—Robert E. Sands, for the last four years in the employ of F. C. Becker, the florist, has associated himself with Geo. H. Conant, Jr., 67 Garfield street, and the two will conduct a business as wholesale and retail dealers in bedding plants, under the firm name of Sands & Conant.

Oconto, Wis.—Joseph Sylvester says Decoration day trade was far ahead of other years; every flower sold out clean and any plant with a flower on was bought at the finish. He had saved about double what he had last year, but everything went, hydrangeas, well-flowered geraniums and pelargoniums going first.

Pittsfield, Mass.—Clifford Allen, of Canaan, Conn., a boy employed by T. L. Lowden, disappeared on the morning of May 19 and, at last report, had not been heard from. Mr. Lowden was taking orders on Bartlett avenue and sent the boy to one house while he went into another. When Mr. Lowden came out the boy was not to be found. A note, addressed to Mr. Lowden, was found on the seat of the wagon beside Mr. Lowden's pocketbook. The note stated that the boy was "sick of it all," and had left, and it would be of no use trying to find him. "I have taken three dollars which is due me," he wrote. The rest of the money in the pocketbook was found to be intact. The young man is 16 years old.

THE WATER GARDEN.

An extract from a paper by Peter Bisset, ..d before the Boston Gardeners' and Florists' ..b May 18. Continued from the Review of ..y 27.]

The hardy water lilies begin to flower ..y early in the season. In sheltered ..nds the first week in June will see sev..al of them in bloom, and from that ..ne until well into September flowers of ..rdy water lilies can be picked. The ..ots of the hardy water lilies will com..ence to flower within a few weeks after ..anting and will keep on blooming ..roughout the season. The hardy lilies ..ve us a great variety and variation in ..e form of the petals, as well as in the ..lor of the blooms. Some of the flowers ..se above the water on stems of from ..x to nine inches; others float on the ..rface, presenting an endless variety in ..af and flower.

The best of the hardy lilies spring ..rom the American species, Nymphæa ..dorata, Nymphæa reniformis (or tube..osa), as it is more commonly called, and ..he Mexican variety, Nymphæa Mexicana. ..These, with the European species, ..Nymphæa alba and Nymphæa alba rubra, ..and the Chinese Nymphæa tetragona, or, ..s it is better known, pygmæa, have all ..been used by the hybridist to give us the ..many beautiful forms we now possess.

Some Good Nymphaeas.

Nymphæa odorata, the white, fragrant pond lily of the northeastern states, is still a desirable one, and should be grown by every person who cultivates water lilies. By the side of the one just mentioned should be planted Nymphæa odorata rosea, the far-famed Cape Cod pink

(Concluded on page 28.)

OBITUARY.

John E. Andre.

John E. Andre, one of the best known florists in Pennsylvania, died at his home in Doylestown, Thursday, May 27, of peritonitis, after a brief illness.

John E. Andre was born in Detroit, Mich., April 28, 1859. He removed to Doylestown in 1881 to take the position of foreman for John Y. Smith, then a leading florist. When Mr. Smith withdrew from business in 1888, Mr. Andre started for himself, gradually building up an excellent business and a reputation for character and ability. Mr. Andre was a rose grower for the Philadelphia market. His stock was ranked among the best coming into that city. This reputation, consistently sustained throughout a score of years, was due to hard work and perseverance quite as much as to his knowledge of his profession. Mr. Andre's place always looked clean; his plants always showed vigor. "I always plant good plants in time," he said. This sentence, indicating thought, punctuality, system, will show why he was successful. Mr. Andre devoted his attention chiefly to Brides and Bridesmaids.

He is survived by a widow and one son, John E. Andre, Jr. The funeral took place Monday, May 31. Mr. Andre will be mourned by a large circle of friends. PHIL.

James H. Woodburn.

James H. Woodburn, a pioneer resident and nurseryman of Sterling, Ill., died May 25, of paralysis.

James H. Woodburn was born in Newville, Pa., October 12, 1836. In the fall of 1838 he went west with his parents. Mr. Woodburn was given a liberal education at Linn Academy, Indianapolis, and at the Big Springs Academy. After graduating he returned to Sterling and engaged in farming. August 2, 1862, he enlisted in Company I, Seventy-fifth Illinois Volunteer Infantry. He participated in the battles of Stone River, Lookout Mountain, Missionary Ridge and Ringgold Gap. He was with Sherman in the Atlantic campaign and remained in the service until the close of the war and was mustered out on June 12, 1865. After his return from the war he turned his attention to horticulture and floriculture, and at the time of his death was the proprietor of a nursery west of the city.

James H. Woodburn was married November 15, 1858, to Miss Susan Farrar, a native of Manchester, N. H. Two children were born, George W., who died in April, 1890, and Charles H., an attorney of Sterling. Mrs. Woodburn died in 1903.

John E. Andre.

Julius Friedlander.

Julius Friedlander, whose flower store was in Times square, New York city, thirty years before the name Times square was applied to it, died May 25, at the home of Walter Gantz, 124 West Fifth street, Bayonne, N. J., of cancer of the stomach. He was 56 years old and leaves a widow, two married sons, three brothers, and a sister. The sister is Lottie Abeles, wife of Edward Abeles, the star in "Brewster's Millions," and herself a member of the company. Mr. Friedlander's mother is still living, at the age of 86, in Norwalk, Conn.

Mr. Friedlander's father, the late Ludwig Friedlander, opened a florist's shop at Broadway and Forty-eighth street in 1868, and it was never closed until illness forced the son to give up the business in the fall of 1908. Mr. Friedlander was little more than a boy when his father's business was established. There was then a small structure with a fence around it on the site of the Times building. There were many fine private estates in the vicinity. The owners of these places, long ago displaced by business blocks, were liberal patrons of the Friedlander flower store.

M. C. Pennock.

Matthew C. Pennock, former superintendent for J. E. Jackson, at the Piedmont Greenhouses, Gainesville, Ga., died Monday afternoon, May 24. He had been in ill health for some time, and had received treatment at several sanitariums. He had many friends in Gainesville and in his former home, Philadelphia. He leaves a wife and one son, Herbert.

Mr. Pennock had been with the Piedmont Greenhouses for nine years. He was a skillful florist and a man of lovable nature and kind disposition. He had a severe attack of typhoid fever seven years ago, and since then his health had been gradually failing, especially during the last twelve months.

Lottie LeMoult.

Miss Lottie LeMoult, daughter of A. LeMoult, the veteran florist of the Bowery, New York, and sister of the wife of Jos. Fenrich, the New York wholesale florist, died of consumption Memorial day and was buried June 3. Miss LeMoult was a lady of splendid mentality and popular with all who knew her. Profuse floral mementos attested the love of many friends.

FAR ROCKAWAY, N. Y. — Axel Lindstrom, whose son, ten years old, was killed last January by a dangling telephone wire, has accepted $2,000 from the telephone company, as settlement.

RESULTS.
We give them. You get them.
We both have them.

THE government statisticians figure that the duty of 1⅞ cents per pound on window glass of greenhouse size is equivalent to an ad valorem rate of 71.59 per cent.

THERE are plenty of growers who do things by rule, and many more who do them by guess, but the rare bird who mixes brains with his compost is worth watching.

COLLECT your accounts in June. If you let the month pass, the vacation season will be here, and you will have to wait till September or perhaps October for your money. Shall you enjoy being short all summer? Collect your money, pay your debts and be a free man.

THE Tarrytown Horticultural Society, Tarrytown, N. Y., has issued the premium list for its rose and strawberry show June 15 and for its eleventh annual exhibition, November 4 to 6. F. R. Pierson is chairman of the board of directors and E. W. Neubrand, of the F. R. Pierson Co., is secretary.

THE June number of the Home Journal, described as Canada's leading magazine, contained an interesting article, "The Bride's Bouquet," illustrated with photographs supplied by John H. Dunlop, Toronto. The illustrations included not only the bouquet for the bride, but for bridesmaid, matron of honor and flower girls.

As happens nearly every spring, just before Memorial day, there was a strong demand for geraniums in flower, the bedding out having used up all such stock, while later in the season there may be a surplus because of the stock which was not ready at the time wanted. A geranium must be in flower at the date bedding is done to be salable.

SOME leading houses, failing to find record that a buyer is in the business, withhold trade prices unless the order comes on a printed letter-head. And yet many growers and country florists for years in the business still write on the first piece of paper that comes handy. Letter-heads that look like business only cost a couple of dollars a thousand.

FUNDS FOR FLORICULTURE.

Florists' interests fared well in the Illinois legislature last week, all things considered, when $15,000 was appropriated for carrying on the experimental work at the State University under the advisory committee of the Illinois State Florists' Association.

True, the asking for the purpose was $35,000 for two years, but the total of all askings was nearly double what the revenue of the state was estimated to be, so an average cut of nearly fifty per cent in all appropriations was inevitable. The House cut the amount for floriculture to $15,000 and passed the bill on to the Senate. The Senate is where sleeps the watchdog of the public treasury, and here the university and experimental station were harshly dealt with. The total of appropriations for these great institutions was only $2,410,000 for two years, a savage slash from the askings and a material reduction, all along the line, from the sums granted by the more liberal House.

Under the circumstances, it may be considered that floriculture did not do so badly when the Senate permitted the $15,000 appropriated for it by the House to stand in the bill as it finally went to the governor.

The fact is that the sum of $15,000 is now fairly established as the minimum with which the state's experimental greenhouses can be maintained, and this sum, or more, will be provided by each succeeding legislature.

WHO HAS IT?

The REVIEW has received several inquiries from subscribers who wish to procure stock of Begonia incarnata, and the improved form raised several years ago by Charles Sander, gardener for Prof. C. S. Sargent, Brookline, Mass. These are grown on many of the private estates in New England, but none of the trade lists contain them. Who has stock for sale?

THE READERS' VIEW.

The duties of the advertising manager are lightened when the editor does his work well, for the readers are the real source of strength in a publication.

Enclosed you will find the dollar to renew my subscription. I lost over 10,000 feet of glass in the recent hail, and over 10,000 cabbage plants, the same of tomato and cauliflower, also most of my bedding plants, but it will take heavier hail than that to knock me out of the Review.—J. G. Angel, Oklahoma City, Okla., May 25.

TRY IT.

When You Have Surplus.

It matters little what the stock is, almost always, somewhere, there is a man in need of just the thing you are long on. Tell about your surpluses in the REVIEW classified advertisements and make quick sales:

We certainly were pleased with the quick returns we received from the advertisement inserted in the Review published Thursday, May 27. Friday noon we received our copy of the paper and Saturday morning we had a wire from one concern to ship C. O. D. all the Nutt and Perkins we could spare. Saturday's noon mail also brought an order for all our Beaute Poitevine. Accept our thanks and good wishes.—Hill City Greenhouses, Forest City, Ia., May 30, 1909.

Kindly omit my dracaena advertisement, as I am all sold out and had to send the money back in several cases. The Review certainly did the work all right.—Wm. Ehmann, Corfu, N. Y., May 29, 1909.

CHICAGO.

The Great Central Market.

The Memorial day market proved stronger than the most sanguine had anticipated. Early in the week it was figured that the only shortage would be of carnations in colors, and it was thought the supply of peonies was so heavy that it was doubtful if all would be sold. During the early days of the week the carnation was the only flower which was held at a stiff price, and the peony market might be said to be weak, although the owners of the best goods were holding them as firmly as the weakness in the lower grades would seem to justify. As the week progressed it was found that the shortage in carnations was so much greater than had been anticipated that it turned the demand to other flowers in such a fashion that practically everything was on the short side, with the single exception of peonies. Of these there were enough so that everyone could be supplied, but the market, instead of going to pieces, as many had feared it would, steadily took on strength until late Saturday afternoon. Prices

Special Fancy Stock

For June Weddings and Commencements

If you want good stock—the special June work is not satisfactory unless the flowers are the best obtainable—you will fare best by placing your order with us. Our supply not only is large, but the quality of our stock—on the average—is the highest the market affords.

Sweet Peas

The quantity and quality of our Sweet Peas has been the talk of the town for months, but **the crop is at its best right now.** For long-stemmed fancy stock, we never saw their equal—and as for quantity, well, we can fill all orders. All colors.

Peonies

Our Peonies are well known as the stock of the oldest and best shipper. In Peonies perhaps more than any other flower "it is what you get, not what you pay, that determines value." Order of us, get the right goods at a right price.

Beauties

The best we have seen in a long time. Perfect heads, fine foliage, all lengths. The spring crop is at its height with us. We want your order.

Roses

Don't overlook us when you are ordering Killarney, Kaiserin, Richmond, Maid or Bride. Good for the season.

Carnations

Our carnations are fine and the cut is heavy. We have been headquarters for fancy carnations all winter—and the best stock of winter will be far the best stock in hot weather, when poor stock can't be sold at all.

Miscellaneous Flowers

Order anything you want. We have it if it is in the market.

Hardy Cut Ferns

We have a big lot of Hardy Cut Ferns. Fine for this date. Far and away the best stock on the Chicago market—and the best stock always is cheapest in the end. Order of us and you'll get satisfactory goods.

throughout the list were held at the top until the actual business was over. It never fails, however, that there are receipts in considerable quantity which arrive too late for the demand. That was the case last week. Practically all the commission houses closed Saturday night and Sunday with stock on hand which would have found a good market had it only been shipped in Thursday, Friday or Saturday morning, when it was evident much of the stock was ready.

Possibly the carnation is entitled to first consideration; it certainly was first in demand. Days before the shipping began it was apparent colored stock would be short, but it was anticipated white would be fully equal to the demand. It proved that colored carnations were so short that even white was acceptable because nothing else could be had, and all carnations received while business was doing were taken at excellent prices. In fact, the only limit to prices was the fact that beyond a certain figure the retailers could not use the stock; Memorial day is distinctly not a high-priced day. It was a matter of general comment the way the cuts of carnations fell off; the weather early in the week was unfavorable, and the receipts, instead of multiplying several times, as they usually do for a holiday, actually were lighter than they had been when only a normal demand was to be met. Practically all growers were in the same boat. Hundreds of telegrams went out: "Can't ship carnations. Sorry."

The rose market profited by the shortage of carnations, but not to the extent that would have been the case had the quality of roses been better. The roses sold, but buyers would not stand for fancy prices, because most of the stock really was not worth it. Those who had the few really good roses got good prices for them, but by far the larger proportion of the flowers was small, there was much mildew on the foliage, and 4 cents looked like good money. Of course, Richmond was the best seller, with Killarney a close second, and in larger supply than any other rose. Killarney has become easily the leading rose on this market.

Beauties were in large supply; not many were of good quality. All orders could be filled at regular rates, and they were not a conspicuous item at any time during the Memorial day rush.

The peony was the flower of the day. It is impossible to form any accurate estimate of the quantity handled, except that it was much in excess of any previous Memorial day. In addition to the many thousands of dozens which had accumulated in storage, there were large daily receipts. Early in the week it looked like an oversupply, and prices were shaded, but by Wednesday night the market had turned, and from then on to Saturday afternoon the market stiffened. There is record of a few sales of special fancy stock as high as $1.50 per dozen, but the bulk was sold at from 60 cents to 75 cents, with the goods of one or two expert shippers bringing from 75 cents to $1. The clean-up was far better than most of the experienced observers anticipated, but for all that there were peonies left. The receipts were continuous, so there was no such thing as being sold out for long; also, the quantity stored was greater than the capacity of some of the merchandisers; and again, a considerable fraction of the receipts in certain houses were in that tight-bud state that precludes a sale anywhere short of July 4. On the whole, it was an eminently satisfactory period for the peony.

Cape jasmines were in light supply, and orders for them could not all be filled, but there were sweet peas galore. The sweet pea has been an exceptionally popular flower this spring, and with the shortage of other small flowers, the sweet pea growers had a field day. A rather larger proportion of the stock than ever before was extra fancy; these were the Spencer varieties, and brought excellent prices. The receipts of gladioli also were larger than usual—one house had nearly 2,500 from one grower—and they shared in the general prosperity. No large quantities of lilies were in the market, and there was no special demand for them. There is little shipping outside of the great staples, but the city trade consumed the odds and ends as closely as could be expected; they all brought better prices than most of the wholesalers thought possible early in the week.

The shipping was extremely heavy, and continued heavy longer than it has for any holiday in recent years. The first shipments began going out May 26, and from then on to Saturday night there was all the wholesalers could jump to; even Sunday morning there was heavy shipping. The local retailers found they were without their usual "day." Ordinarily for a holiday the shipping ceases twenty-four hours before the event, and the last day is given to supplying the local trade, usually at declin-

Supplies For Brides and Graduates

Ribbons and Chiffons No Wedding work is complete without Ribbons. Remember, we carry a complete stock of Ribbons and Chiffons, stock made up specially to match all flower and foliage colors, and can ship by first train. ing prices. There was, of course, some decline on sweet peas and peonies Saturday night and Sunday, but in general city trade paid good prices. With those houses handling peonies and miscellaneous stock, the week gave a better total of sales than they ever have had for Memorial day, but with the big growers, who run almost exclusively to roses and carnations, the shortage of carnations prevented much increase in their sales.

Monday's receipts were heavy, and prices were cut into from the jump. Carnations were on again in full force. Peonies began going into storage again, and sweet peas were overabundant. There was brisk business in the morning, but it was a general holiday, and most houses closed at noon.

June 1 found the market abundantly supplied, with the prospect of large business this month, but plenty to do it with.

Thompson Not Bankrupt.

The United States District Court has refused the petition of the Thompson Carnation Co. and others that J. D. Thompson personally be declared a bankrupt. At Joliet it is said that this decision will result in the sale of certain shares of stock in the carnation company, now in the possession of Ernest Oram, to the interests now in charge of the company, and that it will bring to a close the long litigation in which the members of the Thompson family have been engaged.

My Maryland.

Poehlmann Bros. Co. is again cutting some fine blooms of My Maryland rose, but not in quantity, as only a few plants were benched last season. These gave splendid results in the fall, but have not done anything all winter, but now are giving splendid flowers on long, strong stems, with perfect foliage. The flowers are larger than any Beauties at this season, and they keep splendidly. John Poehlmann says they have benched in the vicinity of 20,000 plants of My Maryland for next season, and already the earliest planted stock is up three feet, strong plants, that will soon be giving a good cut.

The Weather in May.

Few would believe it if anyone except the weather bureau said May was almost a normal month as to temperature; the official record shows it was only half a degree cooler than normal. But the rainfall was only two-thirds as much as usual and only one-third what it was last year. The precipitation was only 2.18 inches. The feature of the month was the high percentage of the possible sunshine. There were thirteen clear days, eleven only partly cloudy and only seven cloudy days. The percentage of possible sunshine was 67.77 and the least sunshine of the month was May 25 and 26.

Various Notes.

The John C. Moninger Co. is now in the fifth week of working its factory to 8 p. m. daily.

George Sykes, of Lord & Burnham Co., who opened an office in the Rookery building May 1, returned May 27 from a trip east.

A. Lange's business has greatly increased since he moved into his new and larger store on Madison street. None of the downtown places is busier.

Vaughan & Sperry say they could not have got all their receipts into the old quarters last week, to say nothing of having room enough to sort and pack the stock for shipment.

C. L. Washburn says that Bassett & Washburn shipped 170 boxes May 29.

H. F. Halle has one of the neatest stores in town at Sheridan road and Evanston avenue. Most of his Decoration day business was in cut flowers, as he does little with plant boxes or garden work. In spite of the fact that he has a class of trade above the average, he says he cannot use carnations at Decoration day at the prices demanded this year—May 29 he was asked 7 cents for the grade of goods he has been selling at 75 cents to $1 per dozen.

Harry Manheim, of J. A. Budlong's, says that he put in twenty-three hours at one stretch during the Decoration day rush.

Kennicott Bros. Co. had the biggest Decoration day in the history of the firm. E. E. Pieser says it was double

Nothing Succeeds Like Success

We knew we were right when we advised all buyers to order **early** and **heavy** on

PEONIES

for Decoration Day. And we still advise using Peonies for all June Weddings and Commencements.

The best flower for the purpose.
The cheapest flower for the money.
The showiest flower at any price.
The most satisfactory flower you can use.

This is the Peony House of America

$2.00 to $4.00 per 100; fancy, $5.00 to $6.00 per 100

All other flowers in season in large supply at market rates.

We advised correctly for Decoration Day, as we always aim to do. It is as much to the interest of the grower as it is the buyer to have correct advices—and the interests of growers and buyers are the interests of this House. See reproduction of full page advertisement in Review of April 29.

JOHN F. NELLIST, PROP
1200 JEFFERSON AVENUE

GRAND RAPIDS, MICH., Mar. 31, 1909.

Kennicott Bros. Co.,
48-50 Wabash Ave., Chicago.
Dear Sirs.--Now that the sweet pea season is closed for us, I wish to express my thanks to your firm, its management and employees, for the very satisfactory results you have attained for us.
I expect to plant three large houses next season, and will try to arrange a longer season by planting at different times, running from Oct. 15 to Easter.
I shall plant largely of pink and white, also white, and would like to know if you think it advisable to plant lavender; if you have a market for a small amount I will grow them.
I have recently had a request from your neighbor for regular shipments but I shall ship to you exclusively, as I do not consider it justice to you to give them to competing firms, at least without your consent.
I hope to be able to come to Chicago this summer and get acquainted with you people and get in touch with your requirements so I can take better care of you in the future. Yours very truly,
John F. Nellist.

Kennicott Bros. Co. Grand Rapids, Mich., Apr. 3, 1909.
Chicago.
Dear Sirs:--In reply to your letter of the 2d will say you are at liberty to use any part of my letter for your adv.
I shall be glad to furnish you with an agreement next season to ship to your firm all our stock that goes to Chicago so that you can advertise to handle my stock exclusively Yours very truly,
John F. Nellist.

FANCY IRIS, Yellow, Blue, Purple, $5.00 per 100
This is greenhouse grown and is the special fancy flower of this market at this time. All the leading stores are using it for their best work.

We shall have a large supply of fine Peonies for Decoration Day

Mention The Review when you write

last year's. The increase was made possible by the great quantity of peonies from Villa Ridge and Sarcoxie, which had been stored. To show how the peony business has broadened, May 29 Kennicott Bros. Co. received consignments of peonies from five growers the firm never before had heard of.

W. P. Kyle, of the J. B. Deamud Co., says he thinks that, on the whole, the wholesalers have never had so satisfactory a Decoration day as this year.

Henry Bassett, brother of O. P. Bassett, died May 26, at the age of 78 years. He lived at 772 Warren avenue; another brother, John J. Bassett, lives at Aurora.

Gilbert H. Wild, the Sarcoxie peony grower, was in town all last week. He annually ships half his large cut of peonies to this market for storage for Decoration day, and he came up this year to see for himself how the business is conducted. His stock is handled by Kennicott Bros. Co.

L. Baumann May 18 sent the REVIEW a postal card from Brussels, Belgium, showing the Jardin Italien au Jardin botanique, one of the sights of that old city.

Mrs. T. E. Waters has gone to Boston for a visit of two months with friends, while her husband is on the road, making a trip for the A. L. Randall Co.

The A. L. Randall Co. will handle the peonies of Peterson Nursery this year, and William A. Peterson says the cut will be the largest in the history of the nursery. He now has 60,000 plants, although not all are of blooming size.

Adam Wolniewicz says business last week was away ahead of other years. He sold out of everything in bloom and quite a lot of stock in bud was moved. He had about 2,000 2-inch vincas that brought as high as $5 per hundred.

E. E. Pieser, of Kennicott Bros. Co., says his firm will now put in cold storage at least 20,000 dozen of peonies, in anticipation of the demand which will come after the local crop has been cut. He looks for a big June business.

E. C. Amling thinks it was the two days of cold, dark weather at the beginning of last week that upset all Memorial day calculations. He lays the shortage of carnations to those two days, and points out that May 31 the receipts of carnations again became heavy, the weather having turned warm and bright. He believes that had it not been for those two bad days, there would have been carnations enough to go around.

It is reported a wholesaler objected to the language a Greek was using in the hall of the Atlas block May 29. Lively times were about to ensue, but an athletic relative of the wholesaler sat on the Greek.

John J. Wolniewicz, at Oakley and Le Moyne avenues, is building a greenhouse 25x100 at Forest Glen, using Moninger material, and intends to move out there soon.

The George Wittbold Co. says the spring season is still running away ahead of last year. Their shipping trade has been more than double last year's. Dracæna indivisa has sold splendidly.

Peter Reinberg is much farther along with his replanting this year than he ever has been before at this date. The work will be all finished up by the end of this week. The stock now being cut from will later be dried, rested and carried another year. It was the best May Peter Reinberg ever has had, beating even last May, which was a specially good one with him. He has concluded to make the addition to the carnation range at "the farm" eight houses, instead of four, and has bought the glass. The addition will have pecky cypress benches on concrete posts.

Discussing the prospects for the immediate future, Percy Jones gave it as his opinion May 31 that there would soon be not only enough stock to go around, but enough more for a large if not ornamental bow-knot.

George Reinberg's people say everything seemed to be in demand for Decoration day, except orchids. They had the largest cut of the season of Cattleya Mossiæ, and could not move them. C. W. McKellar also reports little sale for orchids last week, but says he received a large number of inquiries for white orchids, for delivery early in June. About all that can be done on calls for white orchids is to supply Cattleya Mendellii.

Mrs. Moore was taken ill at her stand in the Flower Growers' Market Decoration day.

E. F. Winterson says that it is impossible to sell dagger ferns in this market when anything else is to be had.

C. M. Dickinson, at E. H. Hunt's, comments on the fact that it was the biggest Decoration day this market ever has had in spite of the great shortage of the three Decoration day staples, carnations, cape jasmines and ferns.

O. P. Bassett is on an automobile trip to West Baden.

One of the week's visitors is Leroy B.

Hill, of the Hill Floral Co., Geneseo, Ill., resting up after a three days' Decoration day.

Bassett & Washburn have begun to cut from their range of Beauties and Kaiserin, grown for the summer crop.

Weiland & Risch are now cutting Kaiserin, and within three weeks will begin to cut from the young plants of Killarney.

The Benthey-Coatsworth Co. received old red peonies from Park Ridge June 1.

J. A. Budlong is bringing in a crop of summer Beauties of excellent quality.

N. J. Wietor believes there will be a first-class market for Beauties through June.

Zech & Mann have a consignor who is sending in several thousands a day of special fancy outdoor valley. The outdoor valley now in the market is in most cases fully as good as the indoor stock.

The bowlers will have a prize contest Friday night, and at the same time start a series of thirty games to determine the make-up of the convention team.

Ionia, Mich.—Decoration day trade this year was a record breaker. Everything in the greenhouses that was in bloom was cleaned out. M. Wetterling, as usual, had an exceptionally fine lot of hybrid perpetual roses in pots. Some of these bore as many as eight full-blown flowers. Most of these were purchased by the farmers. The farmers around here are unusually prosperous this year, owing to the fact that they are getting high prices for their produce, and also because Ionia county went "dry" this season.

NEW YORK.

The Market.

Glorious weather for the Decoration day business, and all through the three days up to Monday noon. The demand for wreaths of every kind, and cut flowers, and even plants, has been insistent and encouraging. Prices mended rapidly after Monday, May 24, in the wholesale market, and each day up to Saturday showed improvement. But by noon Monday of this week the influence of larger shipments began to be felt seriously, and even on Monday morning it was evident the boom was over. Top Decoration day prices were 35 cents for Beauties, 15 cents for Richmond and Killarney, 10 cents for Bride and Maid and 4 cents for carnations. At these prices the leading stores absorbed the best stock, and even for firsts and seconds good figures prevailed. The backward wave began to roll in Saturday evening, and Sunday was hardly up to expectations. Wholesale houses closed at noon Sunday, and on Monday at the same hour.

Tuesday, June 1, came the flood, and from now on there will surely be enough of everything to go around, and summer values will prevail. Lilac has about passed on, and now the snowball holds the fort. These are in every window, and were in great demand for decorative work, especially among the cemetery florists, where an enormous business has everywhere been done. The plant trade was fully up to expectations.

The Plant Market.

Saturday morning, hours before the sun rose, the great New York Covent Garden market, where John Birnie is king, and nearly every grower of importance, and dozens of the lesser grade, are represented, was a scene of aggressive activity that augurs hopefully for the coming larger enterprise, where under its own roof and with proper space and facilities this echo of the great London market may become a plant center worthy of the name. Hundreds of growers and buyers were there even as early as 1 a. m., and over $4,000 worth of

plants were disposed of for cash before the tents were folded and the lights went out. Wagons innumerable lined the streets on every side. Roses, palms, flowering plants of every known variety, and above all else geraniums, made a wealth of quantity and color that to a casual visitor was indeed surprising. Geraniums were sold first at 10 cents, later at 12½ cents, and before the daylight came the wise ones who bought early were able to close out their purchases on the ground at $1.75 per dozen. It was a morning long to be remembered, and it emphasized especially the fact that the florists, especially those who grow and market their goods in this way, turning night into day and living for months without proper rest and sleep, are the hardest working merchants in the world. There is not anything worth while they don't deserve.

Retail buyers were many, and the veteran, John Weir, who has not slept much for forty years, was one of the earliest and biggest purchasers of the crowd.

Various Notes.

June 12 the farewell Florists' Club meeting for the season will be held. A large attendance and a splendid evening's enjoyment are anticipated. The outing committee will make its final report, and the names of the prize donors and the advertising patrons for the forty or fifty-page souvenir will be read. The book will contain over 150 photos of the club members. The outing is already an assured financial success. The committee announces a $3.50 single rate ticket for gentlemen. The souvenirs will be distributed at the meeting.

Igoe Bros., of Brooklyn, have purchased outright the patents, good will, machinery, etc., of the Parker-Bruen Mfg. Co. This is an important step, and places Igoe Bros. at the head of the wire work merchants for florists in this country.

The American Peony Society will hold its annual meeting at the Cottage Gardens, Queens, L. I., Tuesday and Wednesday, June 8 and 9. An exhibit of great beauty and variety is expected.

Several of the nurserymen in and around New York will be at the convention in Rochester, June 9, 10 and 11, and the flower city will demonstrate its great ability and liberality as one of the leading convention cities of the country.

John S. Nicholas, of Forty-second street, and the Greely square retail florist have gone to Greece for a holiday. James Hammond, formerly in the wholesale cut flower business, is in charge of the Nicholas store for the summer.

Herman Moller, with Wadley & Smythe, has gone to Newport, R. I., where he will at once open the firm's retail store there for the season.

Michael Ford became the proud father of a baby girl May 23. The smile that won't come off is much in evidence in the establishment of Ford Bros.

Thomas Martin, the foreman for Traendly & Schenck, has purchased an apartment house in the Bronx that demonstrates the value of loyalty to one's

employers and the saving instinct of the enterprising buyer.

One of the wholesale florists of New York has shown his practical friendship for the club by purchasing thirty tickets for the outing. This is the loyalty that counts.

The committee of the Florists' Club has offered a special prize of $10, to be competed for by the wholesale and retail ball clubs July 1.

Frank Millang and family have gone for the summer to their country home up the Hudson. Mr. Millang and Mr. Volke, of the Coogan building, third floor, front and back, have both fully recovered from their little tussles with pneumonia.

William Ford, of Ford Bros., is now spending his week ends with his family in the Pennsylvania mountains, where he has a beautiful country home.

M. A. Bowe had the cemetery decoration of Gen. Wildman's grave, as usual at this time yearly. The general was U. S. minister to China. Mr. Bowe's store was handsomely decorated with flags and other tokens of loyalty for Memorial day.

G. Myer's windows at Madison avenue and Fifty-eighth street have a unique rural display, with turtles, fish, bungalow, etc., that attracts much attention.

Phil Kessler averages over 1,000 lilies daily in sales for his Greek grower over in Jersey. I asked the grower how he secured such uniformly fine stock, and he said, "I buy the best bulbs, no matter what they cost, and I look after them." That is the secret always, and it is easy to solve.

Monday evening, June 7, the retailers meet and decide upon the date of their smoker. Doubtless they will invite all the wholesalers to this function, and much harmony will prevail, as usual.

With becoming modesty, the Beauty king has named his new boy after his Uncle Charles. There are now three of the Millang boys in the Coogan building, one on each floor. Charles has leased the ground floor for five years, and it is quite likely will concentrate his wholesale energies at this location.

Arthur T. Boddington has been visiting his friends and customers in New England. The firm has had a wonderful season; over half a million cannas sold

Peonies

Pink and white Peonies for June weddings, etc., A-1 stock, handled just right, $3.50 per 100; $30.00 per 1000.

Long Distance 'Phone, Bell 9004-2

is a little item, showing which way the wind has been blowing.

The Fruit Auction Co. has been selling great quantities of bay trees at auction. A big sale Tuesday, June 1, drew a crowd of buyers. It will not be long until all the auctions will be daily.

Rosens, the florists' supply house of West Twenty-ninth street, reports an extraordinary demand for his specialties for Memorial day.

W. H. Kuebler, of Brooklyn, has added a $600 horse and wagon to his wholesale conveniences.

The spring show at the Bronx Park institute Saturday, June 5, should attract many visitors.

The bowlers turned out well Friday evening, May 28. The new system gives general satisfaction. Friday, June 4, there will be double the number present. Some fine scores were made, President Donaldson excelling. The four best games were as follows:

Player.	1st	2d	3d	4th
Donaldson	178	177	201	175
Scott	137	139	158	170
Berry	195	155	138	140

grand jury on a charge of presenting a fraudulent claim to an insurance company. He was released on bail.

The death of Julius Friedlander is reported in this week's obituary column. It is said the store he conducted at Broadway and Forty-eighth street was in contiuous operation from 1868 to 1908.

BROOKLYN, N. Y.—A horse driven by William Wentz, and attached to a florist's wagon, was frightened recently by an automobile and ran away, finally colliding with a sweeping machine and becoming so entangled in the operating gear of the machine that nearly an hour was required, it is said, to set the animal free. The horse's head and neck were badly cut, but the driver escaped with only slight bruises. The wagon was loadwith plants belonging to Tony Cassio, of 350 Woodward avenue, and Percy Dulay, of 73 Steward street. About half the load was destroyed.

Memorial Day Market.

It can safely be said that the volume of business transacted at Memorial day easily broke all records. A year ago there was something of an overplus of flowers and a considerable slump in prices took place. There was nothing of the kind this year and prices were far better all around than in 1908. The markets, wholesalers and retailers, all had fine trade and are more than satisfied. Prices on the whole were as good as at Easter, with the exception of roses, and so far as cut flowers are concerned it stands head and shoulders over all other holidays in the year.

Roses cleared out well. Bride and Maid made from $4 to $8 per hundred. Killarney sold at $4, $6, $8, $10 up to $16 for the best. Of Richmond there was an unusually fine lot which made all the way from $4 to $16 per hundred, the highest priced having excellent stems. Of Beauties the best made $3 per dozen, from that down to $4 and $6 per hundred.

Carnations had a remarkably strong market. Fancy scarlets sold as high as $8. Good Fenn, Enchantress, Fair Maid and reds made $5 and $6, and whites $3 and $4, nothing worth while going below these prices. Of sweet peas there were not nearly enough for the demand at 35 cents to $1.50 per hundred. Outdoor valley discounted the forced article; the best made $2 per hundred readily, some selling lower. Spanish iris made $4 and $5 per hundred. Gladiolus Peach Blossom, Bride and Blushing Bride sold at $5 and $6. Gladiolus America was in strong demand at $2 per dozen and other large gladioli at $1.50 per dozen. Spiræa Japonica made $3 per hundred, double stocks $2 and $4 per hundred, Beauty of Nice selling best. Single stocks sold at 25 cents per bunch, Candytuft at 25 cents and 50 cents per bunch, double feverfew 25 cents and 50 cents per bunch, pansies 35 cents per hundred, yellow marguerites $1.50 to $2 per hundred, white marguerites 75 cents to $1 per hundred. Narcissus poeticus and alba plena odorata brought $2 per hundred. Late tulips were not numerous, but sold well at $3 to $4 per hundred. There were no local peonies, but lilac was sold in large quantities and was never in better shape for Memorial day. For hardy ferns, adiantum and asparagus there was a heavy demand.

The principal market was May 29. May 31 a fair number of flowers appeared and made good prices. In bedding plants, hydrangeas and other stock for cemetery use there was a first-class call and the weather was ideal for setting out plants, being cool and showery. Weather conditions May 30 and 31 were ideal and everyone in the trade has every reason to be well satisfied with Memorial day business of 1909.

Since Memorial day business has been quieter, but the cleaning up flowers got has prevented any heavy arrivals of flowers. With a continuation of comparatively cool weather, prospects are bright for a good June trade.

Various Notes.

At the next meeting of the Gardeners' and Florists' Club, June 15, there will be no regular lecturer, but a larger number of pertinent and interesting queries will come up for discussion. There will be no meetings in July and August. Lecturers are already engaged for the September, October and November gatherings.

Peonies, except the old officinalis, will not be in bloom here during the present week. They never looked more vigorous and should be in splendid condition June 19, the date of the peony exhibition.

In the Boston park system the display of Cornus florida and the pink form, rubra, has been remarkably fine this season. Never have these beautiful trees bloomed with greater profusion. The loniceras, spiræas, deutzias, viburnums, azaleas and other shrubs are all blooming as never before. The cool evenings and frequent showers have given the trees and shrubs an unusually luxuriant appearance.

At a meeting of the board of trustees of the Massachusetts Horticultural Society, May 30, six new members were elected. An appropriation of $1,000 for additional premiums at the great orchid show to be held in May, 1910, was voted, also $4,000 for other exhibitions to be held the same year.

The annual war on the elm-leaf beetle is just commencing in this section. Prompt action alone can save many fine trees from destruction. In the city of Cambridge over 400 large trees died last year as a result of persistent eating of the foliage and lack of proper care.

Never have we had a finer season for bedding out. The abundant moisture has kept everything delightfully fresh. Carnation men have had ideal weather

for getting their plants out. Where cutworms are troublesome on carnations, asters and other plants, if arsenate of lead at the rate of four pounds to fifty gallons of water is sprayed on the foliage, it will be found better than any other remedy yet recommended. One good feature about this poison is that, owing to the glucose used in its preparation, it adheres to the foliage closely, while other poisons are washed off with the first rain.

At the Arnold Arboretum the display of lilacs was at its height this season May 30, a later date than usual. It as usual proved an attraction for many thousands of visitors. Pyrus coronaria and that finest of all ornamental crab-apples, Malus Ioensis fl. pl. Bechteli (Bechtel's double flowering crab) were also in fine bloom.

George H. Strange, representing Lager & Hurrell, was among our visitors last week.

There will be an excellent show of hardy perennials at Horticultural hall, June 5, in competition for the gold medal offered for the finest display of these plants at the several summer shows.

The Gardeners' and Florists' Club will hold its field day at E. J. Shaylor's, Wellesley Hills, June 17.

W. N. Craig.

PITTSBURG.

The Market.

While we have not been troubled with frosts, the weather continued so cool that people were suspicious of it, and planting was not fairly started until Monday, May 24, but since that time plantsmen have been reaping their harvest in earnest, having more than they could do. The general retail prices were: Geraniums, $1.25; cannas, $1.50; pansies, 50 cents, and coleus, 50 cents per dozen, but on Friday and Saturday good plants of anything in bloom brought about twice the regular price, without enough to go around.

Among the cut flower people, trade was not quite so good during the first few days of this week, but beginning with Thursday it was all that could be expected, and even more. Not that prices were so high; the demand, as has been the case all this year, was for reasonably priced stock, for which the demand was even greater than the supply.

There were some home-grown red peonies, but the other colors did not come in. Quite a number of shipped peonies were on the market, but they were poor, as a rule.

The markets were full of weigelas, mock oranges, snowballs, irises and red peonies, which were in their glory, but these did not seem to affect the regular trade, as the wholesale houses cleaned up by Saturday night at fair prices.

The retail stores had all they could do, many of them working all night Friday night and well into Sunday morning.

Various Notes.

President Taft's visit helped business somewhat, as there were a number of functions which demanded decorations. Randolph & McClements had the Yale banquet decoration at the Fort Pitt hotel, and Mrs. E. A. Williams had several handsome luncheon decorations as a result of the visit of the presidential party, including the luncheon at Sewickley, where the President was entertained.

Whatever You Want We Can Supply

Choice Stock

for the June Wedding work and School Closings. The following are some of our leading specialties:

BEAUTIES Best on the market.

We have a range of Beauties grown specially for a cut in June and later. These have much better substance, color, stem and foliage than from plants that were cut from all winter. Try them; they're good.

ROSES

Our Maids, Brides, Killarney, Kaiserin and Richmond are all grafted stock. Much better size and substance than own-root stock at this season.

CARNATIONS None Better

We grow the fancy sorts, like Aristocrat, Victory, Winsor, White Perfection, Enchantress, etc., and will not take a back seat for anybody on quality. They can't be beat.

PEONIES

We can supply these in white and pink—in any quantity. The best sorts and plenty of them. Prices right.

SWEET PEAS

Fancy stock in the fancy colors. Enchantress-pink, lavender, pink, blue and red. You will say these Peas are all right.

GREEN GOODS OF ALL KINDS

You can order of Us

with every certainty that you are calling on as good a source of supply as there is in Chicago.

Roses and Carnations A Specialty..... WHOLESALE GROWER of CUT FLOWERS

Mention The Review when you write.

A. W. Smith has had a unique window, filled with ferns, with three live owls sitting on old stumps. This window has been crowded all the week, and some funny remarks can be heard, such as bets that the owls are not alive, but are operated by electricity. Mr. Smith says they do not belong to the business, but they stop the people at his door.

Wm. Lauch, New Galilee, Pa., is building two large houses for carnations. Mr. Lauch has been consigning some fine carnations to the Pittsburg Cut Flower Co.

Frank Faulk, who had been on the sick list for several weeks, is again pushing the plant and cut flower business in the Allegheny Market.

One plantsman sent out a load of bedding plants last week which were to be delivered C. O. D. The driver took a check in payment. He has the check and wants to know how to collect the money, as the bank returned it marked N. S. F.

The cut flower end is reported to have been very satisfactory, although dragged out over Saturday, Sunday and Monday.

PHILADELPHIA.

The Rising Eastern Market.

The Memorial day demand for cut flowers was large; indeed, the volume of business was only limited by the supply. These unusual conditions were due to the cool, cloudy weather, following the hot wave of a fortnight earlier, curtailing production all over the country. The demand was for everything except orchids. Thursday, May 27, was the banner day for flowers of quality. Local commencement orders and Memorial day shipping orders required the best, and the prices realized for this grade were excellent. Friday and Saturday found the chief demand for cheaper grades. The man who wanted to make a big show for a dollar was the prime factor, and prices naturally declined. The bulk of the Memorial day business was finished on Saturday. Some wholesale houses had shipping orders that kept them at work Sunday, May 30, but these were not Memorial day flowers. Monday, May 31, there was little business, most of the shops closing for the afternoon. Tuesday, June 1, found an excellent demand, both local and shipping, with a large supply, sufficient to meet all requirements.

Carnations were in short supply. The average quality was only fair. All colors were wanted; even those who usually have their own carnations were buyers. Under these conditions, it was unfortunate that the supply was small, smaller than last year; $2 to $6 per hundred were the prices.

Peonies from most of the local growers were not ripe. Only a few had them in last week. A few fancy varieties brought $2 per dozen, $15 per hundred. The bulk of the stock brought from $6 to $8 per hundred, a few higher and a few lower.

Roses were in demand, especially May 27. Eastern Beauties of superb quality went at $4, while local stock was firm at $3 per dozen. Good Richmond, Kaiserin and Killarney brought $10 to $12 per hundred, with Brides and Maids $2 lower. Good roses were not so plentiful as the lower grades.

Sweet peas were in good supply. The glass-grown are holding out well, except in length of stem. The outdoor are still in their youthful stage. Most of the other flowers fared better than usual for Memorial day. Greens did not. Smilax shows unmistakable signs of dropping in price, while there is more Asparagus Sprengeri about than the market can absorb.

The strike of the trolley men was a factor in the local business. The central shops that are easily accessible rarely feature Memorial day, while the cemetery florists, who are tremendously busy on this holiday, found that their customers could not reach them easily; less business resulted, flowers remained unsold and orders were canceled in consequence.

A marked change in the peony situation came this week. The local stock arrived by the wagon-load, but there was insufficient demand. Prices fell rapidly. It was early evident that heroic measures must be adopted to move the stock at all.

Edward A. Stroud's View.

Edward A. Stroud, of Overbrook and of Strafford, has made a careful study of the requirements of the wholesale carnation market in this city. Mr. Stroud believes it is best to grow only self colors, bright pink, soft pink, white and scarlet, and only one or at the most two varieties of each color. His entire carnation range at Strafford is devoted to five sorts, Winsor, Enchantress, White Perfection, Lady Bountiful and Beacon. Mr. Stroud finds that the crimsons, variegated and the others are not wanted in sufficient quantities and with sufficient regularity.

The replanting of Winsor under glass is well under way. The season has been satisfactory since New Year's.

Various Notes.

Water from a fire on Chestnut street, June 2, damaged the H. H. Battles store at 108 South Twelfth street. Mr. Bat-

tles moved to the Century Flower Shop during repairs.

Edwin Lonsdale spoke on "Lawn Decoration" before the Florists' Club, June 1.

Many well-known florists paid their last tributes of respect to John E. Andre, of Doylestown, May 31.

The new flower shop in the Hotel Edouard bears the name of T. Nelson Geiger.

I have seen this week the finest Kaiserin Augusta Victoria roses that I ever saw. They came from Carl Jurgens, Newport, R. I., to W. E. McKissick & Bros., of this city.

M. Rice & Co. are busy selecting and photographing novelties for their catalogue, which Mr. Eschner assures me will be a triumph of its kind.

H. Bayersdorfer & Co. have a large Canadian order from a florist who has a department store, for large pedestals, wall pockets, etc., all in white and gold.

Henry A. Dreer Co. had their monthly statements delivered in the first mail in this city June 1, with one half and two full holidays on the three preceding days. This was a feather in the cap of Herbert G. Tull. PHIL.

PITTSBURG, PA.—George F. Hofmeister is the syndicate manager for the projected United States Floral Co., which is planned to work out some new ideas in flower merchandising.

STAUNTON, VA.—John Fallon has purchased a lot on Collicello street, in Harrisonburg, and, it is understood, will soon begin the erection of a building for a floral establishment at that place.

DAYTON, OHIO.

State of Trade.

Decoration day, without a doubt, was the busiest it has been in many years. There seemed to be no end to orders, many of which had to be turned down, though there was a good supply of stock, much more than came in last year. Each morning, as the bright sun arose, he found the florist busy, cutting, shipping, filling orders, etc., and as his last beam sunk in the horizon he left behind him a tired florist, still busy at work. But it is all over now, and a sigh of relief is heard from all quarters.

A few peonies came in at the last minute and helped out considerably, but they were not nearly as good in quality as last year. Anything resembling a carnation or rose sold at a good price. There was also a good crop of callas and longiflorums, which sold remarkably well. Sprengeri, plumosus, smilax, ferns and all green goods found ready buyers. It was rather difficult to get good ferns, as the new crop came in soft and small. The florists were also disappointed in not getting any jasmine, which in other years has helped out so well in bouquets. Besides the Decoration day orders, there were several large funerals in town, which brought in lots of work.

The month of May was a very satisfactory month for business. The sale of plants ran far ahead of last year, and the same held true with cut flowers. Crops were good and stock held out well. There was an abundance of rain, plenty of high winds, and enough sunshine thrown in to make the weather in general quite agreeable. The heavy rains did some damage to the market gardeners who had crops planted in the low places; otherwise market products look promising.

Various Notes.

The Dayton Florists' Club will hold its regular monthly meeting at the establishment of J. F. Young, East Fifth street, June 7. The entertainment committee is arranging an interesting program for the meeting.

"Never before have we had such a rush of business as we had for this Decoration day," is the report of the Miami Floral Co. "Flowers of all descriptions sold rapidly and it was not hard to get your own price."

H. H. Ritter also reports that business was the best with him that it has been for several years, and that bouquet orders with him were especially heavy.

The Dayton Floral Co. received several large shipments of peonies from the south, which, owing to a scarcity of peonies in the market, found eager buyers.

Together with Decoration day orders, Mrs. B. Hendrichs had a large run on funeral work last week.

Henry Ehrhard, of Sidney, O., made a hurried trip to Dayton early Sunday morning, in quest of stock. He reported that business was especially good in Sidney.

Mr. Leedle, of the Leedle Rosary, Springfield, O., was in the city on business last week.

Miss Ruby Bartholomew, accompanied by Miss Amy Ewings, leaves June 2 for

a month's visit to New York city and other eastern points.

Mrs. E. Young voices the sentiments of the other florists and is much pleased with the returns of Decoration day.

R. A. B.

THE WATER GARDEN.

[Continued from page 13.]

water lily. Another one of odorata parentage, of recent introduction, is Nymphæa William B. Shaw, a fine flower of a delicate rose-flesh color, that should be freely planted for its many fine qualities. Nymphæa alba candidissima is a large, free flowering white variety of strong, vigorous growth.

Nymphæa Marliacea albida, one of Marliac's first hybrids, gives us pure white flowers, of large size, with yellow stamens. Nymphæa Marliacea rosea is still one of the best of the deep pink hardy lilies. In Nymphæa Marliacea carnea we have a lily similar to the last named in flower, leaf and growth of plant; the color is a soft flesh pink. Nymphæa Marliacea chromatella has charming yellow flowers; the leaves are beautifully mottled with brown. Nymphæa Gladstoniana is a fine lily, of beautiful form and strong, robust growth. The flowers are of the purest white, cup-shaped, with golden yellow stamens, and very large. Nymphæa gloriosa is a magnificent variety, with flowers from four to six inches across, of beautiful form, which float on the water. They are of a deep, carmine rose color, becoming deep red with age. Nymphæa Robinsoni gives a flower of a unique coloring; the ground color is yellow, with an overlay of purplish red, the general tone being a dark orange red. Nymphæa William Doogue is an American seedling, of fine form and delicate, light pink color.

Nelumbiums.

Nelumbiums, or sacred lotuses, as they are commonly named, form one of the most interesting classes of plants in the vegetable kingdom. They always command interest and admiration because of the plant's sacred history and its beautiful, large flowers, which are borne on tall stems, towering above the stately, silvery, bluish green leaves, which often measure from two to two feet six inches in diameter, and from three to eight feet in height. The grand foliage, aside from its magnificent flowers, well repays one for growing the lotus.

The nelumbiums begin to bloom toward the end of June and continue in flower well into August. The flowers, like those of the nymphæa, open for three successive days. The first day they never open fully, but just enough to give one a glimpse of their beautiful, silky stamens. The blooms quickly close, opening again the following morning quite fully and remaining open for several hours; then they close, to open out quite flat the next day. The nelumbiums are of quick growth, and if good-sized roots are planted they will flower the first season, if the location is congenial. In planting the roots, care should be taken not to break the growing point of the rhizome, which would render the root useless unless there is another growing point on the root.

Day and Night Classes.

Of the tender or tropical water lilies there are two distinct classes—one flowering during the day, the other during the night. The day flowering ones open their blossoms in the early morning hours and they remain open until afternoon. To this section belongs Nymphæa gigantea, from Australia, the finest of all the day blooming blue lilies. The flowers are of the largest size and delicate in color. Next in order of merit is the Nymphæa Zanzibariensis. This is the true royal purple water lily of Africa, and still ranks as the best dark blue water lily in cultivation. In Nymphæa Pennsylvania we have one of the best of the light blue water lilies. Nymphæa Mrs. C. W. Ward and Nymphæa Zanzibariensis rosea give flowers of a deep rosy pink color. The

Michell's Primula Seed

Primula Chinensis Fimbriata

We have a very choice strain of Primula which we have procured from the leading Primula Specialists in England and Germany. Flowers very large, beautifully fringed, and of the brightest colors.

flowers are of large size and very desirable. Nymphæa gracilis, from Mexico, gives beautiful star shaped flowers, on strong stems, rising above the water from twelve to fifteen inches. The flowers are pure white, with deep yellow stamens.

The flowers of the night blooming water lilies open as the evening darkens into night, and remain open all night, commencing to close the following morning, if the sun is bright and clear, about ten o'clock; if the sky is overcast and the weather cool they remain open until one o'clock. The time of closing of the flowers varies and is regulated much by the weather, whether bright and warm, or cloudy and cool. Toward the end of the season, when the weather and water are cool, the flowers remain open day and night.

More About Nymphaeas.

Nymphæa dentata magnifica is a new white water lily of the first rank. The flowers measure from eight to fifteen inches in diameter. Nymphæa Devoniensis has the distinction of being the first hybrid among this beautiful class of plants. It was raised at Chatsworth, England, in 1851, and named in honor of the duke of Devonshire. The flowers are from eight to twelve inches across, of a bright rosy red color. Nymphæa rubra is very similar to Nymphæa Devoniensis, a little deeper in color, the petals less pointed, while the sepals are a little wider at the base. Nymphæa rubra rosea produces flowers from six to ten inches across, of a brilliant rosy carmine color. Nymphæa O'Marana gives splendid flowers from eight to twelve inches across, of a beautiful rosy red shade, with a faint tinge of white down the center of the petals. Nymphæa George Huster is a seedling from Nymphæa O'Marana; the color of the flower resembles that of Nymphæa rubra rosea. Nymphæa Bissetii is another pink flower, of beautiful form; the flowers measure from eight to ten inches across and are of a beautiful rose-pink color.

Victoria Regia and Cruziana.

Victoria regia, one of the most remarkable water lilies, was named in honor of the late Queen Victoria, by Dr. Lindley, who described and so named it, in 1837. It has very large, round, floating leaves, from four to seven feet in diameter. The edges of the leaves are turned up from two to eight inches at right angles to the surface of the water. The upper side of the leaf is of a rich green color, the lower surface of a deep, purplish green, with many prominent veins that radiate from the center to the margin of the leaf; these again are connected by smaller veins running transversely, so that the whole under surface is divided into a number of irregularly arranged quadrangular compartments or pockets.

Victoria Cruziana was named in honor of General Santa Cruz, of Bolivia, in 1840, and was introduced into American gardens in 1894 and sent out the following year as Victoria Trickeri. This variety succeeds well in a much lower temperature than Victoria regia, and therefore is better adapted to outdoor cultivation. The plant is similar to Victoria regia in leaf and flower, except that the turned-up edge begins to show at a much earlier stage of growth. The leaf is also of a lighter green color. The upper edge is more even and uniform than in the other species, in which it is rather uneven and ragged. This victoria flowers much earlier than regia, and requires less heat to bring it to perfection.

The Lily Pond's Surroundings.

The environments of the water lily pond must be made attractive, and to obtain this result it is in keeping to have the borders and beds surrounding it filled with subtropical plants; especially are these features appropriate if the large tropical lilies are growing in the pond. If the pond is well protected, the leaves will not be rent in shreds during every wind storm, which is the great drawback

FOR JUNE WEDDINGS we offer extra select Lily of the Valley, Bride, Killarney, American Beauties and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

to the cultivation of Musa Ensete and other large-leaved plants in the open ground. Among the plants suitable for this work are: Alocasia macrorhiza variegata; Cyperus Papyrus, the Egyptian paper plant, a very interesting plant and one that should be in every water garden, especially where the lotus is grown; Cyperus alternifolius, the umbrella plant, which does well in shallow water or planted in the borders; Musa Ensete, the Abyssinian banana, one of the best tropical plants to use for this purpose, a noble subject and of easy culture; Fatsia papyrifera, the Japanese paper plant, a beautiful plant, which will survive the winters in this locality if planted in a sheltered location.

Colocasia esculenta and Colocasia arborea are also desirable subjects for the tropical border. Some of the xanthosomas are very useful, such as violaceum, with its beautiful colored stems, and sagittifolium, which has a large leaf, with a beautiful metallic luster that makes it very attractive. All of the cannas work in well with the plants named, especially Canna Ehemanni, robusta and musafolia.

At the Water's Edge.

It will add much to the beauty of the natural or semi-natural pond or stream to plant the edges with some of the hardy herbaceous plants. These plants should be set in colonies, several of one variety together, whenever space is at command to allow of this being done. Many of them, such as acorus, typha, juncus, peltandra, sagittaria and pontederia, can be placed on the edge of the bank and allowed to extend out into the pond in the shallow water.

A few of the many plants useful for the edges are Arundo Donax, Acorus Calamus variegatus, Bocconia cordata, Buphthalmum speciosum, Digitalis purpurea (especially in the shade of the trees), Helenium autumnale, Hemerocallis fulva and flava, Hibiscus Moscheutos, militaris and Crimson Eve; also the splendid hybrids of Meehan's Iris aurea, Caroliniana and especially the lævigata, or, as they are better known, the Kæmpferi, which delight in such a location; there is nothing in hardy plants that can rival them in the gorgeous colors of the flowers. Lobelia cardinalis and syphilitica should be planted freely. Peltandra undulata, Pontederia cordata, rudbeckias, sagittarias, scirpus, Spirea Aruncus, and the typhas, rhododendrons, kalmias, also the sarracenias, especially purpurea and flava, should be planted. Places will be found for many of our beautiful native ferns, and they should be used freely wherever suitable locations can be got for them. The osmundas are especially attractive at the water edge. The hay-scented fern, Dennstædtia punctilobula, is a beautiful one and thrives well in the shade of trees. Athyrium thelypteroides, the silver spleenwort, delights in shade and can be used successfully underneath trees.

ERIE, PA.

The Memorial day rush has come and gone and the Erie florists and their employees have survived it. Trade was excellent and the work was heavy. Cut flowers and bedding stock were at a premium towards the last of the week. Carnations were not equal to the demand. Gladioli and Harrisii lilies were seen in some of the stores, and with the ever beautiful hydrangea blossoms in great profusion, the stores never looked prettier.

Steven Green, representing Bayersdorfer, Philadelphia, was in the city on business May 29. B. P.

A FINE FORCING SHRUB.

Ceanothus Veitchianus is, as are most of the other members of the genus, a native of California, and, in common with many plants from that region, it cannot be regarded as perfectly hardy. Still, it forms in most districts a delightful wall shrub, and it is also valuable for flowering under glass in early spring, its one great merit being the bright hue of the blossoms, which are in color so unlike any other hardy shrub employed for forcing. The flowers are borne in dense clusters on the ends of the short lateral branches. This ceanothus has for its immediate allies C. dentatus and C. papillosus; indeed, these species are sometimes confounded with each other. The leaves of C. Veitchianus are small, deep green, with a particularly glossy, almost varnished upper surface. "It is one of the many good things whose introduction to English conservatories," says the Gardeners' Magazine, "we owe to William Lobb during his travels in California about sixty years ago. When selections of shrubs are made for forcing purposes, this is undoubtedly entitled to a place among the best."

MINNEAPOLIS, MINN.—Henry Bachmann reports having placed an order with the Moninger Co., Chicago, for material for ten houses, 20x120.

STERLING, ILL.—Robert Lundstrom, of the Sterling Floral Co., has secured the contract to furnish and plant the flowers in the Central, Locust street and Broadway parks.

LA PORTE, IND.

The Kaber Co. was robbed of about $100 May 28. The burglars entered the home of the Kaber family by a kitchen window, while the family were asleep. They succeeded in opening the safe, which, owing to the fact that it was in a rather dark closet, under a dark stairway, and was fitted with a complex combination, had been left only partly locked. The family congratulate themselves, however, that a package of $150 was overlooked and no papers were disturbed.

The discovery was made while the burglars were leaving the house, and they made good their escape without leaving a clue. Moral: Bank your cash daily and lock your safe, especially in the busy season.

THERE has been an excellent call this spring for Dracæna indivisa in the larger sizes.

PLYMOUTH, MASS.—Charles T. Stevens, who started business in a small way fifteen years ago, has now about 8,000 feet of glass and is making plans for further enlargement this summer. He had a large Decoration day trade.

FOR SALE—In western New York; place of 20,000 sq. ft. of glass; fine work shed and handy constructed; all recently built; will be sold reasonably for cash, or part on time. Address No. **8**, care Florists' Review, Chicago.

FOR SALE OR RENT—First-class retail business; 20,000 ft. of glass; in a town of 20,000; clearing $4000 a year over expenses; $600 to $800 cash required, balance to suit; good reasons for selling. Address No. **10**, care Florists' Review, Chicago.

FOR RENT—Greenhouse, 6000 sq. ft.; almost new; will build more houses if desired; rent at present, $300.00 per year; third largest place in the city; good trade; 45,000 inhabitants; reason for selling, am not a florist. Address J. F. Wisner, 645 Chapin Ct., Rockford, Ill.

FOR SALE—A rare chance for a Swedish florist in Rockford, Ill.; about 7000 sq. ft. of glass; doing a general florist business; will sacrifice for quick sale; possession given June 1 or July 1. For full particulars, price, etc., address Greenhouses, care of Carrier No. 21, Rockford, Ill.

FOR SALE—Greenhouse property; lot, 100x125 ft.; 5000 ft. of glass; well stocked with bedding plants, carnations, etc.; ½ block from street car line and cemetery; good trade; will sell at reasonable price; owner wants to leave the city. Address N. Linden, 3104 21st Ave. S., Minneapolis, Minn.

FOR SALE—A good retail florists' business of 13,000 feet of glass in a growing city of 10,000, with natural gas, interurban, etc.; this place is in first-class condition, doing a good business; only florist here; just ten blocks from center of city; good 6-room dwelling; price $6000. Address W. E. Smith, Arkansas City, Kansas.

FOR SALE—Two greenhouses, 10x100 ft., stocked with carnations and bedding plants; dwelling-house, barn, windmill and other outbuildings; about 2 acres of land; will sell for $3000; one-half cash and balance on easy terms; situated in Dover, Delaware. Address Wm. Schaffer & Son, Dagsboro, Del., Route No. 1.

FOR SALE—In the outskirts of Baltimore, the great metropolis of the south, valuable greenhouse property; lot 100x150, with use of additional land; has 9000 ft. of glass; dwelling of 7 rooms with modern improvements; this entire property with the stock on hand goes for $2200. For further particulars address Fidelity Realty Syndicate, Baltimore, Md.

A GOOD INVESTMENT.

Enclosed please find my check for $1.40 in payment for my half-inch card one month in the department for Leading Retail Florists in the Review. This has been a good investment for me ever since I made the yearly contract, and is getting better right along.

George C. Baker.

San Antonio, Tex.

CINCINNATI.

The Market.

With pleasant weather, Decoration day brought forth a lively demand for all classes of stock, and a good clean-up for everyone. The worst feature of the business was that enough flowers to fill all orders could not be found. Many orders that had been taken in advance could not be filled in full, and many customers had to be disappointed. But this was one of the things that are bound to happen in this business now and then; there were simply not enough flowers to go around. As a consequence, the price of stock was boosted as high as possible, and it did not stop the buyers; they just took all they could get and never said a word about the price. So, all in all, though many more flowers could have been disposed of to advantage, the increased price paid for the available stock probably brought the total sales up to what they would have been had there been plenty of stock.

Peonies are the flowers for Decoration day, and they are to that day what the lily is to Easter. The demand for them was great, and could not be supplied. There were great quantities to be had, but the fact that the local crop is late this year made a great difference in the supply of this flower, and also tended to put the price up to an attractive figure. All the peonies sold in this market were shipped in from more favored districts. Many small growers were able to reap a rich harvest on this account. Within a week the local crop will be in, and then we shall be crowded with these flowers, and it is to be hoped that there will be some business to run them out.

Prospects for a continuation of good business are bright. We are having some

weather that is more seasonable, with a little sunshine thrown in now and then. This, in itself, makes things more cheerful. The local growers are busy with their spring bedding. As a rule, they report this class of business to be fine this year. In fact, they say that it is the best for years. If this is any criterion, it ought to point to a return of good times shortly.

Various Notes.

Everything is hustle among the various committees who are shaping things for the entertainment of the S. A. F. this fall. The program committee has its work well in hand, and is making this book one that will be a credit to the trade, as well as Cincinnati. The committee has been doing good work toward getting advertisements, and has been very successful. Final arrangements are now being made for printing, and all those who have not sent in their copy had better do so at once, or they will miss the opportunity of getting their

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., Watson S. Woodruff, Orange, Conn.; First Vice-pres., J. C. Robinson, Waterloo, Neb.; Sec'y and Treas., C. E. Kendel, Cleveland, Twenty-seventh annual convention, Niagara Falls, Ont., June 22 to 24, 1909.

FRANCIS BRILL.

Francis Brill, the seed grower at Hempstead, N. Y., is the youngest son of the late John Brill, one of the leading horticulturists of his day, who for many years conducted an extensive and thriving market garden and florists' establishment in Jersey City, and later in Newark, N. J., up to the time of his death in 1870. Here Francis Brill received that training which, combined with his executive ability, keen observation and personal experiments, in after years led to his being recognized as one of the leading seed experts in the country.

January 1, 1857, Mr. Brill and Ann Elizabeth MacDonald, daughter of the late David MacDonald, of Newark, N. J., were married. Mrs. Brill's grandfather, Robert MacDonald, was one of the early settlers of that part of Newark, N. J., known as The Neck, and was identified with the growth and development of that city.

In the year 1870 Mr. Brill moved with his family to Mattituck, in Suffolk county, Long Island, where he established a seed farm. At this place, through his efforts in developing and perfecting the cauliflower, he took a leading part in blazing the way for the extensive cauliflower industry that has made that section of

the island famous all over the country. From Mattituck Mr. Brill went to Riverhead, in the same county, and after a few years he removed to Hempstead, where he has since resided and carried on his seed business. Besides being successful in practical affairs, he is recognized as an authority in the discussion of subjects connected with his life-work and is the author of a book entitled "Farm Gardening and Seed Growing."

Mr. Brill has been prominent politically, and is still interested, as a good citizen, in public affairs. In 1876, while a resident of Mattituck, Mr. Brill was elected on the Democratic ticket as a member of assembly from Suffolk county. For several years he served as town clerk of the town of Hempstead. In both positions he gave practical evidence of his devotion to the people's interests.

Nine children have been born to Mr. and Mrs. Brill, five of whom are still living. They are Walter A. Brill, Mrs. John S. Nichols, Jr., Mrs. Louis F. Huleu and Miss Minnie A. Brill, of Hempstead, and Katharine A., who a few years ago married Walter Bodger, a member of the firm of John Bodger & Sons, seed growers, of Gardena, Los Angeles county, Cal.

FOREIGN COMMERCE IN SEEDS.

In the month of March, 1909, our imports of seeds, compared with the same month in 1908, decreased $43,468, while our exports increased $128,237. The figures are as follows:

	1908.	1909.
Imports	$632,374	$588,906
Exports	352,746	480,983
Balance against us	$279,628	$107,923

DRY IN CALIFORNIA.

W. J. Fosgate considers the situation in California, everything considered, to be as good as could be expected. At Santa Clara May 24 he said:

"The prospects for a good seed crop are very promising, but we cannot say now just what effect the long, continuous dry weather will have. We have had no rain since the floods in February. I have seen most of the other seed farms, and everything looks favorable."

CONDITIONAL VARIATIONS.

The uninformed gardener often blames the seedsman for apparent departures from an established type as to form, color or development, when really the variation is attributable entirely to some abnormal climatic influence of the year or years preceding, as they affected the atmosphere or soil at periods during the growth of the parent plants.

This is interestingly illustrated this season on Bloomsdale Farm, where on one field are two pieces of radish growing for seed, the identical strain of the indicated sort which we have been growing for over twenty years and usually as much alike as pennies from the mint. This year one-half of the patch is from hand-selected roots of the crop of 1907, the other half of hand-selected roots of the crop of 1908, but the growing crops of 1909 exhibit a marked difference in color and vigor of foliage. The crop from the older seed, grown and harvested throughout a rainy summer, is thirty per cent stronger in top, while the other, grown and harvested in a dry season, shows a dwarfing in habit—both of the same, identical breed and the same progenitors. The two examples are so variable as to give good grounds for an observer con-

cluding that one was of eastern growth and the other Californian, or the one American and the other European.

Such variations in every crop are constantly noticed by a close observer, and a student of plant growth is always ready to concede the thought that many differences may be attributable to differences of soil or climate or age, instead of jumping to the conclusion that the seedsman is a fraud. BURNET LANDRETH.

THE seed trade will be interested in an item about a commercial test of California-grown Easter lily bulbs, appearing on page 9.

THE acreage of radish grown in Michigan appears to be increasing not only steadily but rapidly. The quality of the seed is entirely satisfactory where sufficient care is taken with the stock seed.

W. F. PULS, Houston, Tex., is proprietor of the Puls Seed Co., at 704 Preston street, handling seeds, fertilizer and poultry supplies. He also runs a stall in the City market, handling butter, eggs, poultry and table delicacies.

A CHICAGO suburbanite who sells seeds says that from the conversations overheard in the trains coming and going, the congressman's seeds are not giving very good satisfaction this year; the weather has been unfavorable, however.

S. F. LEONARD, president of the Leonard Seed Co., Chicago, is in New York this week and will sail for Europe June 5, with Mrs. Leonard and their daughter. The itinerary will include all the principal seed growing sections.

THE counter trade is on the down grade. There still is a little doing in flower seeds, but not much else except in plants, which still are going fairly well. The cold weather has cut down the counter trade all season. The gardening fever is not contagious with the thermometer registering below 50 degrees night and morning.

L. C. ROUTZAHN, of the Routzahn Seed Co., Arroyo Grande, Cal., wrote May 25: "Crops in general are looking above the average. Especially is this true of sweet peas, nasturtium, and other flower seeds. Lettuce, salsify, tomato and cucumber are good. Onion prospects are for about two-thirds of a crop. Pole beans are in course of planting."

PROF. H. L. BOLLEY, of the Agricultural College, has been appointed state seed commissioner in North Dakota, charged with the enforcement of the new pure seed law that goes into effect July 1. Orin A. Stevens, of the Kansas Agricultural College, has been selected as assistant in the work. Professor Bolley is now engaged in preparing bulletins of instructions and rulings governing the taking of samples and the inspection and analysis of seeds.

THE seedsmen of Tennessee, both wholesale and retail, had a session May 29 in the senate chamber of the state capitol at Nashville with Commissioner of Agriculture John Thompson, who held a similar meeting at Knoxville, June 1, with seedsmen from that part of the state. The purpose was the discussion of the new seed bill which went into effect June 1 and which provides that every package of seeds, except garden seeds, must bear the state stamp, which will be a source of revenue to the state.

Merely A Reminder

of the importance of getting

Vick Quality Seeds

for summer sowing to secure the best results either in greenhouse or open field.

JAMES VICK'S SONS, Rochester, N. Y.

Mention The Review when you write.

day. The visitors spoke informally, giving their views of the Iowa seed law and its general effect in bettering conditions, improving the quality of seeds sold, both as to purity and vitality, and the seed corn betterment, as to quality, vitality and productiveness. J. F. Summers, an Ames graduate and practical seed corn grower, spoke on his method of testing seed corn, which was listened to with much interest.

At adjournment the members partook of a banquet, after which the evening executive session was held. A general discussion took place, after which the following officers were elected:

President, Charles N. Page, Des Moines; vice-president, Henry Field, Shenandoah; secretary, B. H. Adams, Decorah; treasurer, John T. Hamilton, Cedar Rapids; executive committee, Charles N. Page, John T. Hamilton, Walter C. Adams, Mel L. Webster, H. A. Johns.

SEED TRADE CONVENTION.

The convention of the American Seed Trade Association will be held at the Clifton hotel, Niagara Falls, Ontario, June 22 to 24. The location and appointments of this hotel are ideal, by far the finest location of any hotel on either the American or Canadian side of Niagara Falls, and ample accommodations will be made for as many as wish to attend.

Anyone desiring to become a member of the American Seed Trade Association should send his application to Albert McCullough, chairman of membership committee, Cincinnati, O. Initiation fee, $25; annual dues, $10.

An unusually fine program has been arranged, copy of which program may be secured by application to C. E. Kendel, secretary, Cleveland, O.

Watson S. Woodruff.

IMPORTS.

The imports of seed through the port of New York for the week ending May 22 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Annatto	4	$ 50	Grass	368	$4,580
Anise	5	58	Hemp	948	3,157
Caraway	250	2,281	Millet	200	656
Castor	4,163	13,887	Poppy	900	3,726
Celery	20	295	Rape	81	719
Coriander	726	1,631	Other	..	2,038
Fenugreek	200	850			

In the same period the imports of bulbs, trees and plants were valued at $11,956.

REAPPRAISEMENTS.

The customs authorities have announced the following reappraisements of interest to the trade:

TURNIP SEED—From Carter, Dunnet & Beale, London, exported January 5, 1909; entered at Philadelphia. File No. 51015. Entry No. 3482. Findings of Fischer, G. A.: Turnip Purple Top Aberdeen; entered at 7 cents, advanced to 10 4/10 cents per pound. Add bags.

CATALOGUES RECEIVED.

E. H. Hunt, Chicago, Ill., circular on cement bench construction; J. F. Rosenfield, West Point, Neb., peonies; Wood Bros., Fishkill, N. Y., roses, carnations, chrysanthemums, cannas and miscellaneous plants; D. Guiheneuf & Co., Paris, France, special offer of Lilium candidum; Hugh Low & Co., Bush Hill Park, Middlesex, England, new and choice roses.

The Review sends Smith's Mum Manual on receipt of 40 cents.

THE FIRST OFFER OF

"Rawson's Beauties" Cineraria

This is an entirely new strain and offered for the first time. It is dwarf in type and bears the largest heads of the best colored and finest formed flowers that we have ever seen exhibited anywhere.

It will be a great surprise to those who raise Cinerarias, and all we ask is a simple trial. **Per trade package, $2.00; per ½ trade package, $1.00.**

NURSERY NEWS.

AMERICAN ASSOCIATION OF NURSERYMEN.
Officers for 1908 9: Pres., Charles J. Brown, Rochester, N. Y.; Vice-Pres., C. M. Hobbs, Bridgeport, Ind.; Sec'y, Geo. C. Seager, Rochester, N. Y.; Treas., C. L. Yates, Rochester, N. Y. The 34th annual convention will be held at Rochester, June 9 to 11, 1909.

AMONG the month's weddings will be that of B. E. Gage, of Peterson Nursery, Chicago, and Miss Austin, which will take place June 19.

THE Estelle Nursery, of Wood River, Neb., has sold a half interest in the business to J. W. Weldon. W. T. Spelts retains the other half.

THE Loveland Nursery Co., Loveland, Colo., has been incorporated, with $5,000 capital stock, by N. A. Cramer, O. H. Egge and H. A. Gooch.

THE Texas nurserymen are conducting an active campaign on behalf of pecan orcharding, and have the coöperation of the state agricultural authorities.

PLANS have been made for establishing a nursery at Handsboro, Miss. D. P. Magruder, of Gulfport, Miss., will be the proprietor. An experienced orchardist has been engaged as manager, and five acres will be devoted to the propagation of a special variety of orange.

THE State Railway Commission of Nebraska has prepared a freight classification, amending No. 44 of the western classification committee, that gives nurserymen a benefit in that it strikes out a provision which says that an invoice value of nursery stock shall be declared, not exceeding $5 per 100 pounds, in order to secure the ratings carried in the classification.

THADDEUS N. YATES & Co., Philadelphia, think that the item in this column last week, reporting the sale of their nursery farm at North Wales, Pa., may be mistaken by some. They say: "Wm. M. Frost, of Germantown, was the purchaser of the ground. He did not purchase any of the nursery stock and we expect to continue in business, as we have made a very satisfactory lease with the new owner. Mr. Frost simply bought the ground for an investment and we sold him the ground but not any of the nursery stock."

AMERICAN PEONY SOCIETY.

The seventh annual meeting and sixth annual exhibition of the society will be held June 8 and 9, 1909, at the Cottage Gardens, Queens, N. Y., and all consignments of flowers for exhibition must be addressed to the Cottage Gardens Co., Queens, Long Island, N. Y. Express charges on all exhibits must be prepaid, and should be so marked on the boxes, as no charges will be paid by the manager of the exhibition.

The premium list is the same as in other years, offering classes for collections in each color and for best fifty in each color. Copies of the list may be had by addressing A. H. Fewkes, Newton Highlands, Mass.

All entries must be sent direct to the manager of the exhibition, R. T. Brown, Cottage Gardens, Queens, N. Y., so as to reach him at least two days before the exhibition. All entries not staged by 1 p. m., June 8, will be disqualified from any and all competition. At least one flower of each variety, in exhibits for competition, must be plainly labeled with the correct name of the variety, when known, or the name under which it is grown by the exhibitor. The society will furnish uniform cards for all exhibits entered in competition for the prizes offered by the American Peony Society and any exhibit not so marked will not be judged in any of the classes.

The 1909 meeting of the American Peony Society promises to be an exceptionally interesting one. Mr. Ward's extensive collection will be in fine condition and owing to the great number of varieties represented it will be worth traveling many miles to see.

All who can do so should send flowers for the exhibition, as the facilities for keeping them until the time of the exhibition are of the best and they will be cared for by experienced men in charge. In connection with the exhibition Mr. Ward wishes to have it distinctly understood that the Cottage Gardens Co. will not be a competitor in any of the classes.

Visitors can conveniently stay at any of the New York hotels, as Queens is situated within the limits of Greater New York, about eleven miles from Herald square and can be easily reached by the subway connecting with trains every hour at the Flatbush Avenue station, Brooklyn. Conveyances will meet all trains at

Queens during the two days of the convention and lunch will be served to those present at the meeting.

At our former meetings we have derived much information from informal discussion and if all who attend this meeting would come prepared to ask some question or relate some experience in cultivation, treatment of diseases, handling of flowers or in fact any subject connected with the peony, the meeting could be made of great value to all.

The regular business meeting will be held at 3 p. m., on the first day, June 8.

A. H. FEWKES, Sec'y.

EARLY FLOWERING SHRUBS.

Exochorda Grandiflora.

Exochorda grandiflora is one of the most beautiful of our many Chinese shrubs. Occasionally it is cut back during prolonged and severe winters, but during the last few years it has come through unscathed. When given a location where it can have room to spread and show its individuality, it will grow ten to twelve feet in height and as much in diameter. The pure white flowers are borne in racemes of four to six. The petals are spoon-shaped, very narrow and separated at the base. The flowers have a delightful odor. The buds before opening are pearl-like, which has given the plant the popular name of "pearl bush." The flowers of this interesting and attractive shrub were well developed near Boston this season May 28, a few days later than usual.

Rhodotypos Kerrioides.

Rhodotypos kerrioides, the white kerria, as this shrub is commonly called, is one of the prettiest of the Japanese May flowering shrubs, the blooms being fully open this season May 27. The foliage is large and handsome. The syringa-like flowers are pendulous and appear to some extent during the whole summer. It seems to succeed in almost all soils and locations. In fall the shiny, black seeds are quite attractive. This shrub is worthy of more attention from planters, it being one of our most charming early flowering shrubs. It succeeds best when planted in spring.

Pyrus Arbutifolia.

Pyrus arbutifolia, the familiar and common chokeberry, is a shrub with a densely branching habit, which can hardly be dispensed with where there are extensive shrubberies. In park departments it is much used. Not only are the clusters of pure white flowers, which have a strawberry-like appearance, pleasing in early May, but the red fruits which follow are highly ornamental. The latter are the size of peas and appear in flat bunches. The chokeberry is not at all a fussy subject and seems to thrive almost anywhere. It stands transplanting either in spring or fall, and is one of our most useful native shrubs.

CITRUS NURSERY FOR TEXAS.

According to Major Sam H. Dixon, chief clerk of the Texas department of agriculture, the country tributary to Brownsville promises to become one of the leading orange-growing sections of the state, as the land has been found to be particularly adapted to the growing of this product. Major Dixon has just returned from Mission, Hidalgo county, where he inspected the first carload of orange seedlings which has ever been shipped to that section. The shipment came direct from Japan, and the entire car was of the Satsuma variety of oranges. The seedlings were for the Mission Japanese Nursery, of which Henry H. Miamato, a Japanese, is manager. Major Dixon said the stock was found to be free of pests or diseases, having been previously inspected by the general government. He said this company controls several hundred acres of land in and around Mission which is to be planted entirely in oranges. The company has engaged the services of an expert Japanese agriculturist named Fujimeta. This is only the beginning of this new industry for that section of the country, and if it proves successful, and all indications are that it will, then other orchards will spring up, as the people are greatly interested.

While absent, Major Dixon also inspected a garden of cape jasmines which at Dickinson were reported to be infected. This was under the provisions of the new nursery inspection law. He said he found the plants to be all right, but at League City there were some cape jasmines infected, and the owners thereof quickly destroyed them, even before any inspection was made.

PACIFIC COAST.

Spokane, Wash.—The weather here is unusually chilly for the season, and outdoor stock is at a standstill.

Los Angeles, Cal.—Fred H. Hunter, vice-president and manager of the Germain Seed & Plant Co., has resigned.

The Alaska-Yukon-Pacific Exposition at Seattle opened June 1, in what is said to be a better state of preparedness than any preceding exposition has shown on the day designated for its opening. Many of the trade will visit Seattle this summer.

CALIFORNIA NURSERY TRADE.

The extreme dryness in central and southern California during the early spring months has not been conducive to heavy sales by the nurserymen and gardeners. Although we were not visited by such drying winds during April as we were one year ago, still the tendency was greatly against the planting of small stock, such as is usually sold during that month.

With no rain at all in May, or no prospects of any, prospective planters viewed with alarm the quick hardening of the soil and many of them considered the task of planting hopeless. As a consequence, next fall is the nearest season that is to be thought of.

Taken as a whole, the season's trade, except for such stock as could be handled to advantage in the fall, was not very satisfactory. With constant rain in January and a portion of February, followed by drying winds in March and dry, hot weather in April, the lot of the nurseryman was not an enviable one. Before the ground was dry enough to cultivate properly, the hot winds had so crusted the surface that subsequent planting was impossible.

This is the condition in a general way. In many cases, however, where planters had their own water supply and cared to use it, these difficulties could be overcome. But where natural conditions regulated the planting season, there is little to be said in favor of either the spring of 1908 or 1909. G.

OUTDOOR STOCK IN CALIFORNIA.

The excessive dryness of the present season has had a rather shortening effect on the outside flowers in the central and southern portions of California. Usually we expect and get a few showers of rain in April or the first part of May, but this, apparently, was intended to be a very dry year, and as a consequence natural growths of all kinds have made but little headway this spring. We had copious rains in February, and, with the advent of an excess of drying winds in March, the surface of the earth quickly dried and it has been getting drier ever since.

Where the soil was sufficiently sandy to allow dry cultivating immediately after a cessation of showers, there has been less suffering by the outside stock, but where for some reason or other cultivating was not carried on at just the proper moment on the heavy soils, the condition could hardly be worse than it is at present. Where the growers have plenty of water and are not afraid to use it, there has been no stoppage in growth, as this has been a fair growing season if the lack of moisture has been overcome.

This has been especially noticeable with the wild ferns and wild flowers, which at this writing are well past their prime. It has also had a crushing effect on the growers of hardy annuals and perennials. Many of these growers depend, in the early spring at least, on sufficient rainfall to keep their crops growing until Memorial day, but this season has been a hard one, and where there has not been an abundance of natural water it has been a serious task to provide it artificially.

The store men have been complaining all spring that the supply of coreopsis, gaillardias, stocks, candytuft and bachelor's buttons has never been so scarce, and such growers as have had this class of stock to sell have been the envy of some of our carnation growers who have many thousands of dollars invested. It certainly looks out of the ordinary to have florists crying for stock such as I have mentioned, and to hear them say in the next breath that they had no sale for some extra fancy carnations just sent in by some prominent grower. G.

SEATTLE, WASH.

Because he requested two young men to discontinue their rough-house tactics at a ball given in Dudley's hall in South Park Saturday night, May 22, James Simpson, a young florist, is laid up with a broken right leg, badly lacerated face and head, bruised shoulders and body, and his left ear is nearly severed from his head.

Simpson was in charge of the floor the night of the ball given by the Fraternal

Brotherhood to raise funds to buy new uniforms for its team, which is to drill at the Alaska-Yukon-Pacific Exposition. Simpson started home about 11:30 o'clock with his sweetheart, Miss Mary Powers. They had only just arrived outside Dudley's hall when Simpson was assaulted.

SAN FRANCISCO.

The Market.

From a summary of opinions, the shipping trade for Memorial day was not as good as it was one year ago. It is yet too soon to state definitely what the retail trade in town amounted to, but practically all the shippers say the out-of-town trade was light. This may be accounted for in a general way by attributing it to the business depression, but, to be more specific, it should be laid at the door of the fact that it has been a very favorable, cool spring in those usually warm interior towns where much stock is used, and also the fact that the country garden interests are yearly growing more conspicuous and more able to supply the smaller centers.

A few years ago all the large ranges of greenhouses were situated in the neighborhood of San Francisco, Los Angeles and the other business centers, but the increasing demands have been progressively met by concerns started in the vicinity of the smaller places, and as a consequence much of the Memorial day business has been handled by growers in suburban towns. It is but a few years since San Francisco dealers used to skirmish two weeks in advance of Decoration day among the growers, so that they would be able to fill their out-of-town orders, but within the last year or so there has been a great change; they now stay in their stores and have more stock offered to them daily than they can possibly use.

The prices at present are very low on everything, with the exception of fancy roses. Sweet peas continue to be the most popular flowers and they cost the retailers 75 cents per dozen bunches. Carnations bring from $1.50 to $3 per hundred; Bride gladioli, $1 per hundred; colored gladioli, $2 to $4 per hundred; Easter lilies, $1.50 to $2.50 per dozen; auratums, $2 to $3 per dozen, and valley, $3 to $4 per hundred. Sweet peas and carnations are the best sellers. Funeral orders have been good for the last week.

Various Notes.

It is the intention of Domoto Bros. to abandon their growing establishment at Melrose, Cal., and remove their stock to their headquarters at Elmhurst, Cal.

Joseph Stark, well known to the gardening fraternity in the Bay cities, has permanently located at San Jose, Cal.

John Finger has left Berkeley and is in town at present.

H. M. Sanborn, of Berkeley, Cal., is sending in some extra fine Kate Moulton roses. From indications, they will be heavily planted here next season.

John Fromenweiler is no longer connected with the F. M. Smith place, in East Oakland, Cal. Mr. Fromenweiler is one of the most successful landscape gardeners in California and was for twelve years superintendent of the Smith grounds.

The Oakland Floral Co. has purchased the store of N. Rolleri, on Seventh and Washington streets, Oakland. G.

Henry Kalcarnia, a florist living at 863 Wisconsin street, was brutally beaten at 10 o'clock Sunday night, May 23, by a gang of roughs, who held him up at Wisconsin and Twenty-fourth streets. Kalcarnia had no money to satisfy the rapacity of his assailants, so they beat him cruelly with a gas pipe, injuring his head so severely that his skull may be fractured. Kalcarnia was found later in an unconscious condition and was removed to the Poterero emergency hospital. Later he was transferred to the cen-

tral emergency. He is unable to give the police any clew to the identity of his assailants.

Vegetable Forcing.

GREENHOUSE VEGETABLES.

Boston, June 1.—Tomatoes, 20c lb.; cucumbers, $1.50 to $3.50 box; lettuce, $1 to $1.50 box.

New York, May 31.—Cucumbers, $1 to $3 box; mushrooms, 40c to 85c lb.; tomatoes, 10c to 15c lb.

Chicago, June 1.—Cucumbers, 40c to $1 doz.; lettuce, 5c to 10c box; radishes, $1.25 to $1.50 per 100 bunches; mushrooms, 50c to 60c lb.

MANURE GNATS ON TOMATOES.

I have three houses in tomatoes, which I have mulched with cow manure. Since so doing, the brown manure flies have become a pest. They settle on the vines and fruit in swarms, which makes the fruit very unsatisfactory in looks for market. H. E. F.

The best way to get rid of these manure gnats is to sprinkle the soil with something that will kill them before they get wings, or while they are in the larval state. Then fumigate or spray to kill the mature insects which are swarming about the house and on the plants. They, however, do not live long, and if they are prevented from reproducing they will soon get scarce or be entirely exterminated. Any of the tobacco products in the liquid form will kill the eggs and young, if sprinkled over the soil.

This same pest often does serious injury to plants by working on the roots while in the larval or immature state. H. E. F. should read an article on "Manure Gnats" which was published in the Review of May 6. H. G.

YIELD OF LETTUCE.

Will you kindly inform me as to the number of crops of lettuce that can be grown in a season and the average weight per square foot per crop? L. B.

If lettuce seed is first sown about September 1, that crop can be harvested about the first week in November, as it requires about eight to ten weeks to get a mature crop in good weather, such as we have in fall and spring. In winter it requires two to four weeks longer, depending on how bad the weather happens to be.

When one crop is about half grown, however, more seed should be sown, so as to have good sized plants to fill the benches again as soon as a crop is cut off. If the seed is sown in flats and, when up nicely, transplanted into other boxes or a bench, placing them about an inch and a half apart, they will make nice plants to transplant to the beds as soon as a crop is cut, so that the second crop would require the house only about six weeks. By careful management, the fourth crop can be cut by April 1, but few growers get more than three crops up to that time. After that the houses are usually planted to cucumbers, which pay well in May, June and July, when lettuce would not.

The time required to get a crop depends on the grower and the weather, and no exact time can be given.

Head lettuce requires nearly two weeks longer to mature than leaf lettuce, and is not as profitable for the grower.

There are no **Dry Spots** with The Skinner System of Garden and Greenhouse Irrigation.

The Skinner Irrigation Co.

TROY, O.

Mention The Review when you write.

I do not remember the weight of good average lettuce. I do not sell it by weight. It is sold by the dozen in most cities, and packed in cases holding two or two and one-half dozen. Leaf lettuce plants are set about 6x8 inches apart, so it is easy to figure up how many a bench or house will produce. Some growers cut their lettuce so much smaller than others that it is as hard to give an average weight as it is to give the exact length of time required to produce a crop. H. G.

CELERY.

Would you please give me some instructions as to the growing of celery? What is the best variety to plant, and at what time is the seed sown? L. H. D.

It is not too late yet to sow celery seed for very late celery, if they are given the best of care and hustled along, but if they get neglected it would be better not to try to do anything with them this season. I would not consider it worth while, myself. It would be better to buy some nice transplanted plants and get them out in the field before long. Early celery is now half grown.

There is much difference of opinion as to the best varieties. White Plume has long been considered the best in many localities, but many of the leading growers are now growing Golden Self-blanching and Giant Pascal.

Some growers plant on level ground, like cabbage, and bleach it with boards. Others plant in the bottom of deep furrows and fill in gradually as the plants grow up. H. G.

McKeesport, Pa.—J. W. Butler has opened a flower store on Fifth avenue, opposite the hospital.

The Review does beat all in selling stuff. Every time I advertise in it I get more orders than I can fill.—S. J. Galloway, Eaton, O.

INDIANAPOLIS.

The Market.

Trade continues good, and everyone has all he can do, especially florists doing bedding business. Of the last week, four days were rainy, and this went hard on the florists filling cemetery vases. Imagine about 300 vases to fill and two days in which to do it. With no sunshine last week, blooming geraniums are hard to find.

Decoration day business this year was about the same as last year, but should have been better, owing to the scarcity of outdoor flowers. Rain all day on Sunday no doubt cut down business, as many who intended going to the cemetery on that day were disappointed. Roses and carnations were enough to go around. There was a shortage in peonies Saturday, but the warm rain on Sunday brought them out in a hurry, and they were plentiful on Monday. Peonies brought $1.50 to $2 per dozen; carnations, $1 per dozen; roses, $1.50, $2 and $2.50 per dozen; Beauties, $4 to $9; lilies $3 to $4 per dozen. Sweet peas were plentiful, bringing 35 cents to 50 cents per bunch of two dozen. There were quantities of snapdragon, candytuft and feverfew to be had. The florists at the flower market had all they could do.

Various Notes.

William Billingsly expects to leave for Seattle about June 15.

Baur & Smith are still busy filling out-of-town orders for geraniums. This firm reports a big business in this line this year.

The regular monthly meeting of the State Florists' Association has been postponed until Tuesday, June 8.

A. Wiegand & Sons report May business the largest in the history of the firm. Carl Groener, of this firm, is on the sick list.

Mr. Farney, of M. Rice & Co., and Harry Balsley called on us this week. While in the city Mr. Balsley visited our new Masonic temple, and he says it is the best Masonic temple that he has ever seen.

Homer Wiegand expects to make the trip to the Shriners' convention at Louisville in his auto. H. L. W.

Rocky River, O. — The Rocky River Greenhouse Co., recently organized, has placed its order with the Moninger Co., Chicago, for all the material necessary to erect eight houses, 30x325. The company is organized by local market gardeners, who heretofore have had no glass. The plant will be used for forcing vegetables, lettuce and cucumbers being the staple crops.

PROVIDENCE, R. I.

Trade Conditions.

Last week was a dark, disagreeable one, a drizzling rain or mist putting everybody completely out of sorts. Notwithstanding this drawback, business among the retailers was the best in several weeks. There were more funerals and weddings than usual, which, with graduating and social functions at the various educational and dancing institutions, made a large demand for cut stock.

For several years there has been an increasing custom of purchasing potted plants in bloom for Memorial day purposes. The fact that Memorial day this year came on Monday greatly accelerated this demand and the supply of bedding plants of all kinds was almost exhausted. In years past small potted geraniums, heliotropes, ageratums and similar selections have sufficed to meet the popular cry; this year there has been a constant call and ready sale for potted rose bushes, ramblers, hydrangeas and others of the better class.

Late Saturday night, all day Sunday and from daylight Monday until far into the day the florists were busy making up loose bouquets, to retail at from 50 cents to $2. In these, callas, peonies, carnations, roses, stocks, asparagus and ferns formed the chief part. More than one florist sold completely out of cut flowers of every description, and prices ruled from a third to double the regular rates.

Various Notes.

Timothy O'Connor has during the last week been making transfers of his real estate to his several children, whereby they may have the benefit and enjoyment thereof during his lifetime. The conveyances, signed by himself and his wife, Elizabeth, were placed on record at the city hall May 25, as follows: To Mary L. McCarthy, lot and improvements on the southerly side of Barnes street; to Timothy L. O'Connor, lot and improvements on the southerly side of Barnes street, and to William H. O'Connor, lot and improvements at the corner of President and Cole avenues. Each of these is the house in which the party named lives.

FERNS and BLOOMING PLANTS

PEORIA, ILL.

Mention The Review when you write

Officers' Association of the Rhode Island National Guard, Alexander H. Johnson, of George Johnson & Son, who is major of the First District Coast Artillery Corps, was elected president.

The ruins of the greenhouses of Edward D. Clark, on Tockwotten street, have been removed and the site has been fenced in and sown to grass. The range was badly damaged by fire several months ago.

Mr. and Mrs. Carl Jurgens, of Newport, have returned from an extended trip through Europe, spending last week in New York before coming home.

Leikens, of New York, opened his Newport branch, at 110 Bellevue avenue, for the season, May 29.

Joseph Kopelman furnished twenty-one bouquets of white carnations, asparagus and ferns for the confirmation class at the Congregation Sons of Israel and David on the morning of May 26.

Mrs. Olsen, of the Brookside Greenhouses, Pawtucket avenue, East Providence, is considering the increasing of her range during the coming summer.

William Appleton & Son had all the family pieces, eleven in number, for the funeral of Thomas Troy, May 26.

Johnston Bros. and M. Sweeney furnished the cut flowers and decorations for the fortieth wedding anniversary of Mr. and Mrs. George E. Boyden, May 26.

W. H. M.

DETROIT.

The Market.

The last was by far the best Decoration day Detroit has ever experienced; in fact, there was much more business than was anticipated. Carnations, roses, peas, tulips, outdoor lilac, which is just coming in; iris and every other variety of flower were cut to the last one and still stock ran short. The demand for plants of every description was also unusually good. We have had a backward season and this set those having outdoor planting to do far back, and the warm weather just previous to Decoration day caused a general scramble.

Our local commission houses report a splendid out-of-town business. Those florists located near the cemeteries, to whom Memorial day is a sort of Easter, had about all they could handle. The stores downtown also noticed a decided increase in local business, much of which consisted of shipments.

The call for smilax, ferns, asparagus and the ever-popular galax leaves was heavy.

Various Notes.

A new, modern front in the store adjoining that of Patterson has added considerable to the value of the latter's store, giving it much more light.

It looks now as though Robert Flowerday would be this city's next superintendent of parks. The question just at present is, will Wm. Dilger serve under the new commissioner appointed by Mayor Philip Breitmeyer? Mr. Dilger is talking of resigning as superintendent and in that event Flowerday will most likely succeed him. Both the gentlemen are well liked by the florists and equally well qualified for the position.

The Detroit Cut Flower Supply House handled a fine lot of peas and carnations last week.

Chas. Warncke, Jr., is now dividing his time between the florists' and automobile business. He is conducting a branch agency for the Buick Motor Co., in the western part of Detroit.

So great was the demand for stock from out of town at the Michigan Cut Flower Exchange that it became necessary to substitute any available flower on some late orders. Many thousands of tulips were disposed of in this way, being the best thing on hand.

Philip Breitmeyer and J. F. Sullivan made the trip to Milwaukee last week with the members of the Detroit Board of Commerce. H. S.

VINCENNES, IND. — John G. Frisz is building seven houses, 28x100, using material from the Moninger Co.

MILWAUKEE.

The Market.

Taking it all in all, business for Memorial day was fine, and, from reports, away ahead of last year. The first part of the week, owing to the continued dark weather, found the supply unequal to the demand. At this time carnations were a scarce article. Friday was the first bright day; consequently the supply increased, but at no time was there too much of any one thing. Then, again, most of the outdoor stock was not fit to cut till the last minute, and consequently did not cut much figure, only helping to uphold the price on indoor stock. Small lots of gladioli and southern peonies sold at sight. Plenty of lilies were also to be had.

Even the plant trade, up to date, is away ahead of last season.

Various Notes.

Theo. Boetcher, of Fourteenth street and Groeling avenue, opened a store just opposite the eastern entrance of the Union cemetery, which he will vacate after the spring season. He reports a rushing business.

Mayor Phil Breitmeyer and J. T. Sullivan were passengers on the new steamer City of Cleveland, which brought a party of 400 representative merchants and manufacturers from Detroit May 29, who were our city's guests for the short period of twenty-four hours. Judging from reports, everyone had a fine time, especially Mayor Breitmeyer, for it was in this city that he was honored with the presidency of the S. A. F. in 1903.

The Wise Floral Co. says that it could have increased the volume of business if the necessary stock could have been procured.

The C. C. Pollworth Co. reports a fine shipping trade, with everything sold out that showed color in the pot line.

The Holton & Hunkel Co. had to cut nearly all shipments in the carnation line, as they could not get nearly as many as they expected. E. O.

Decoration day business was away beyond expectations. The call was extremely heavy for carnations and there were not anywhere near enough to meet the demand. There was never such a shortage in carnations for any holiday as there was this year for Decoration day. The crop was not coming in heavy with any of the growers and the cut was

MILWAUKEE.

[Concluded from page 60.]

hardly above the normal. The heavy demand for greenhouse grown stock was principally due to the shortage of outdoor flowers. Tulips, lily of the valley, peonies and lilac were all too late for Decoration day. The demand for flowers for Memorial day is exceeding any other holiday in the year and, although the orders run principally for a cheaper grade of flowers, yet the average compares favorably with Easter and Christmas, for the lower grades of stock bring better prices than the same grade would bring at Christmas or Easter. There was also quite a heavy demand for lilies and a crop of these is really as profitable to have for Decoration day as at Easter. The demand for bedding stock likewise was heavy the last two weeks. Geraniums, as usual, were most in demand. S. A. Nutt and Beaute de Poitevine are the favored ones and these are always sold out clean. In general, the business for Memorial day was most satisfactory; the only difficulty experienced was in supplying the demand for carnations, as the heavy call on these was away beyond expectations.

Philip Breitmeyer, mayor of Detroit, and J. F. Sullivan, of the same city, were visitors here May 28. They came with a delegation of 450 members of the Board of Commerce of Detroit.

C. C. P.

AMES, IA.—F. J. Olsan says Decoration day sales were twenty per cent better than last year. With plenty of home-grown stock, he sold pretty nearly everything that can be used for memorial purposes. Prospects are good for next season.

DAYTON, O.—Charles A. Bower reports that his sales for Memorial week were grand. May 28 he did not have a plant in bloom in his houses. He had to turn a lot of orders down, as it was impossible to fill them. The supply of cut flowers was short in Dayton, and nicely grown pot plants were in demand at good prices. "As we have been in the business only three years," Mr. Bower says, "we depend on the advertisers in the REVIEW for stock, but we are growing, and will add 1,000 feet of glass this summer."

HELLO! Here is a chance for

CHEAP SPRING STOCK

Geraniums, Heliotropes; Ageratums, new varieties; **Fuchsias and Salvia Splendens,** in 4-in. pots at $6.00 per 100, and **Begonias, Stocks and Calendulas.**

Hello, Busy Bee! Can you wait on me? Certainly I can, and this time with stinging prices. We want room to place our importation of **palms, araucarias, ficus, ferns,** etc., therefore our bedding stock must go—no matter what people say about our prices. Our surplus stock is in fine condition, and we can give our customers more for their money than ever before.

We have plants to sell, so have thousands of other florists.

But we have quantity, quality and prices that few can offer.

Our immense stock of bedding plants is now ready, every hole and corner full for immediate shipment.

Geraniums, Jean Viaud (pink), Beaute Poitevine, Albion (single white), Alphonse Ricard, Alliance and Ivy geraniums, 4-in. pots, $7.00 per 100.

Scarlet Sage (salvia). The true Clara Bedman or Bonfire variety. Ours is the true, medium tall, genuine variety, an immense bloomer, with deep red, brilliant flowers, so well-known and admired in the capitals of Europe and America. The seeds of this famous variety were gathered by me in Zurich, Switzerland, the home of Salvias. Price, 4-in. pots, in bloom, $7.00 per 100.

Ageratums, best of the blue dwarf, 4-in. pots, in bloom. $6.00 per 100.

Heliotropes, best of blue dwarf variety, 4-in. pots, in bloom, $7.00 per 100.

Begonia Vernon, newest strain, the well-known dark variety. Our own importation, the seeds having been gathered from the best specimen plants by me on my trip to Switzerland and France. It does well in either warm or cold climate and blooms profusely in July and August, even when fully exposed to the sun, and is very valuable for bedding purposes, in many instances taking the place of Geraniums and other plants. Price, 4-in. pots, in bloom, $8.00 per 100.

Begonia Flambeau, on account of its waxy foliage (pink flowers in summer), is valuable for window boxes, vases, and makes a striking appearance, 5¼-in. pots, $2.00 per doz.

Fuchsias, assorted, in bud and bloom, 4-in. pots, $6.00 per 100, worth $10.00.

Lantanas, assorted, 4-in. pots, in bloom, $7.00 per 100.

Mignonette, 4-in., $7.00 per 100.

Nasturtiums, dwarf, assorted, 4-in. pots, $6.00 per 100.

Stocks, German, six weeks, 4-in. pots, $7.00 per 100.

Vincas, variegata and periwinkle, 4-in. pots, $10.00 per 100.

Cannas, 4-in. pots. Henderson, Poitevine, Bismarck, Mlle. Berat, Black Beauty, Austria, etc., $8.00 per 100. King Humbert, 4-in., $10.00.

Aster Victoria, German, 5 best sorts, $3.00 per 100.

Honeysuckle, large, 6-in., 50c; 10 plants sold at 100 rates.

Ampelopsis Veitchii, 4-in., 10c.

Dracaena indivisa, imported, broad-leaved, big plants, 50c to 75c.

SMALL PLANTS

Petunia California Giant, 3-in. pots, $4.00 per 100.

Petunia Inimitable, 2½-in. pots, $3.00 per 100.

Verbenas, assorted, in bud, 2½-in. pots, $3.00 per 100.

Coleus, Verschaffeltii, Golden Bedder and Queen Victoria, $3.00 per 100.

Coleus, fancy leaved, 2½-in. pots, $4 00 per 100.

Marigold, Tagete's or French dwarf, 3-in. pots, $3 00 per 100.

Centaurea Gymnocarpa (Dusty Miller), 2½-in. pots, $3.00 per 100.

Parlor or German Ivy, 2½-in. pots, $3.00 per 100.

Salpiglossis, assorted, 2½-in. to 3-in. pots, $3.00 per 100. 1 dozen plants sold at 100 rates.

Lobelia Crystal Palace (blue), 2½-in. pots, $3.00 per 100.

Tradescantia, green and variegated, 2½-in. pots, $3.00 per 100.

Kenilworth Ivy, 2½-in. pots. $3.00 per 100.

Thunbergia, or Black Eyed Susan, 2½-in. pots, $3.00 per 100.

Cuphea, or cigar plant, 2½-in. pots, $3.00 per 100.

Vinca variegata, 3-in., $4.00 to $5.00 per 100.

Ageratum, blue, dwarf, 3-in. pots, $4.00 per 100.

Asparagus Plumosus Nanus, 2¼-in., bushy stock, $3.00 per 100; $25.00 per 1000; 3-in. pots, $4.00 per 100.

Cosmos, 4 early varieties, separate colors, made up 3 plants in a pot, $3.00 per 100 pots.

Summer Chrysanthemums, best varieties, 3-in. pots, $4.00 per 100; 4-in., $7.00 per 100.

Pyrethrum Aureum (Golden Feather), 2½-in. pots, $3.00 per 100.

Roses, Climbing Lady Gay, Crimson Rambler, D. Perkins, 5½-in. to 6-in. pots, 25c, 30c to 40c.

REMEMBER

We are one of the largest importers of these well-known and beautiful evergreen decorative plants, the **Araucaria Robusta Compacta, Excelsa Glauca and Excelsa,** and those we offer were imported the Spring of 1908.

Florists should bear in mind that no garden, lawn, etc., is complete without the Araucaria; therefore, if you wish to make money, recommend the Araucaria to your customers. Introduce this noble plant to your trade. We give you a special price, and it will pay you to handle them.

Araucaria Robusta Compacta, Glauca and Excelsa. Our reputation of being one of the largest importers and shippers of this beautiful evergreen decorative plant is so well known, dating far back into the 18th century, that our name, as well as the Araucaria itself, shall never die out, and is still fresh in people's minds, same as when we first started. Why the Araucaria is so popular is because it is an ancient plant, kept by Greeks and Romans as a special favorite in their household, as a good omen.

Araucaria Robusta Compacta, specimen plants, 7 to 8-in. pots, 4 to 5 years old, 3, 4 and 5 tiers, 20, 25 and 30 inches high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa Glauca. This is a beautiful blue variety, very graceful and beautiful. Specimen plants, 6-in., 7-in., 8-in. pots, 4 and 5 years old, 4, 5 and 6 tiers, 20, 25, 30 and 32 in. high, same in width, $1.50, $1.75, $2.00, $2.50 to $3.00 each.

Araucaria Excelsa, 3, 4 and 5 years old, 4, 5, 6 and 7 tiers, 6-in. pots, 20, 25, 30 and 35 in. high, an Elephant for only 75c; a Jumbo for $1.00 and a Holy Terror for $1.25 to $1.50.

Araucaria Excelsa, a consignment of small sizes just in, per Steamer Manitou, 35c, 40c, 50c and 60c.

Kentia Forsteriana and **Belmoreana,** just arrived, per Steamer Manitou, from Antwerp. Price for good stuff, 75c, $1.00, $1.25, $1.50, $2.00 each.

"Mein Haeuschen steht im Gruenen."

Look! look! look! Godfrey Aschmann's world-wide-known, pure white, fragrant moonvine, **Ipomoea Noctiflora,** with flowers as big as a saucer, 4-in pots, staked up, $12.00 per 100; 3-in., $8 00, and 2½-in., 5c in dozen or 100 lots.

All goods must travel at purchaser's risk. Cash with order, please.

Please state if you want stock shipped in or out of pots.

Godfrey Aschmann, West 1012 Ontario St. **Philadelphia, Pa.**

ASTERS.

Crego asters in mixture of shell-pink, white, and rose; Rosbach's Selected, purple and lavender mixed, white separate, $2.50 per 1000. We have tried most of the varieties of asters, offered the last several years, with the view of securing an ideal florists' strain. Last year we acquired the Crego and found it the most satisfactory of any we ever tried.
A. & G. Rosbach, Pemberton, N. J.

100,000 aster plants. Late Branching, in white, pink and lavender, Queen of the Market, Ostrich Feather, Comet and Victoria, in best mixed colors. Good, strong plants, ready to plant out, at $2.50 per 1000; 5000 lots, $2.00 per 1000. Seed saved from the largest and most double flowers only.
Gustave Pitzonka, Bristol, Pa.

Asters, hardy, open-grown plants. New strain of pink aster; Lady Roosevelt, $5.00 per 1000; in 5000 lots, $3.50 per 1000. Semple's deep crimson, and violet and purple, $3.00 per 1000; in lots of 5000, $2.00 per 1000. All late branching varieties, extra large stems.
GLEN MAWR SEED FARMS.
John S. Weaver, Kinzers, Pa.

Transplanted asters, 50c per 100. Vick's Purity and Daybreak; Early Branching, white and rose and purple; Queen of the Market, white, lavender, purple; Late Branching, white pink, purple and lavender; Lavender Daybreak and Upright White Branching.
John Dieckmann & Co., Wheeling, W. Va.

Asters. Fine, large plants, ready to plant out. Queen of the Market, Giant Comet, Semple's and Carlson's, separate colors, 50c per 100; $3.50 per 1000, prepaid; $3.00, not prepaid. S. W. Pike, St. Charles, Ill.

Horticultural Books

We can supply any of the following books at the prices noted, postpaid, and any other book at publishers' price:

Pronouncing Dictionary.
A list of plant names and the botanical terms most frequently met with in articles on trade topics, with the correct pronunciation for each. **35 cents**

The Florists' Manual.
By WILLIAM SCOTT. Covers the whole field of commercial floriculture. Articles are arranged alphabetically so that reference is quick and easy. It tells you just what you want to know in just the way you want to be told. **$5.00**

Commercial Violet Culture.
By B. T. GALLOWAY. An illustrated, comprehensive and complete treatise on the commercial culture, growing and marketing of violets for profit. Of interest to the amateur as well as the commercial grower. Cloth. 224 pages. **$1.50**

The Propagation of Plants.
By ANDREW S. FULLER. Illustrated with numerous engravings. Describing the process of hybridizing and crossing and also the many different modes by which cultivated plants may be propagated and multiplied. Cloth. 359 pages. **$1.50**

The Rose—Its Cultivation, Varieties, etc.
By H. B. ELLWANGER. Directions for cultivation—for planting, pruning, propagation, the treatment of diseases and insect enemies—particularly valuable for its classification. Alphabetical and descriptive list of nine hundred and fifty-six varieties. Cloth. **$1.25**

Practical Floriculture.
By PETER HENDERSON. An illustrated guide to the successful propagation of florists' plants. A detailed account of the requisites to success and a clear explanation of imoroved methods. For the amateur and professional florist. 325 pages. Cloth. Postpaid. **$1.50**

Mushrooms—How to Grow Them.
By WM. FALCONER. This is the most practical work on the subject ever written, and the only book on growing mushrooms published in America. The author describes how he grows mushrooms and how they are grown for profit by the leading market gardeners, and for home use by the most successful private growers. Engravings drawn from nature expressly for this work. Cloth. **$1.00**

The Nursery Book.
By L. H. BAILEY. A complete guide to the multiplication of plants. The book comprises full practical directions for sowing, the making of all kinds of layers, stools, cuttings, propagation by bulbs and tubers, and very complete accounts of all the leading kinds of budding, grafting and inarching. An alphabetical catalog of about 1500 plants—of fruit, kitchen-garden, ornamental and greenhouse species—with directions for their multiplication. Cloth. **$1.25**

The Pruning Book.
By L. H. BAILEY. This is the first American work exclusively devoted to pruning. It differs from most other treatises on this subject in that the author takes particular pains to explain the principles of each operation in every detail. Specific advice is given on the pruning of the various kinds of fruits and ornamental trees, shrubs and hedges. Considerable space is devoted to the pruning and training of grape vines, both American and foreign. Cloth. 530 pages. Illustrated. **$1.50**

Insects and Insecticides.
By CLARENCE M. WEED, D. SC. A practical manual concerning noxious insects and the methods of preventing their injuries. Profusely illustrated. A generally useful handbook on noxious insects. It covers the whole field of insect pests very thoroughly and is especially valuable for its complete and up-to-date methods of fighting insects. The work is intensely practical. All the important insect pests are described and remedies for them, and methods of preventing their injuries described in detail. Cloth. **$1.50**

Handbook of Plants and General Horticulture.
By PETER HENDERSON. This new edition comprises about 50 per cent more genera than the former one, and embraces the botanical name, derivation, natural order, etc., together with a short history of the different genera, concise instructions for their propagation and culture, and all the leading local or common English names, together with a comprehensive glossary of botanical and technical terms. Plain instructions are also given for the cultivation of the principal vegetables, fruits and flowers. Cloth. **$3.00**

Florists' Publishing Co.

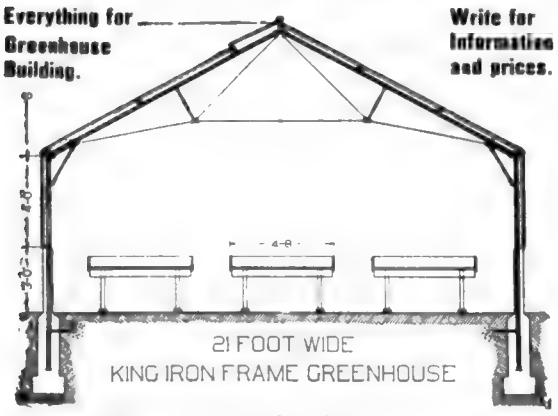
530-560 Caxton Building
334 Dearborn St. CHICAGO

NEW ORLEANS.

The weather so far has been quite favorable to the planting of chrysanthemums. It is too soon yet to form an idea of what will be this next important crop, but the quantity planted seems to be large.

At M. Cook's Sons a new, fresh piece of ground has been broken for a variety of chrysanthemums, which look strong and promising.

Asters are coming into bloom everywhere, as well as other summer flowers. The demand for them is not brisk, the town gardens being abundantly supplied with all sorts. In anticipation of a heavy sale, thousands of hardy palms have been set out in and around New Orleans. Even private people, out of the nursery business, are heard to have devoted some land to their culture. It is certainly a good move, but growers must not lose sight that an excess in planting will create in due time a great falling off in prices. Phœnix Canariensis, which is no doubt a nicer palm than washingtonia, seems to be overlooked in proportion.



M. M. L.

CROWN GALL OF THE APPLE.

Recently Dr. Erwin F. Smith and his associates in the Bureau of Plant Industry, U. S. Department of Agriculture, have demonstrated quite conclusively that crown gall is caused by a specific bacterial parasite. Moreover, they have shown that it is omnivorous in its tastes, being able to cause warty outgrowths or galls on a surprising number of different and unrelated species of plants when these plants are inoculated with pure cultures of the organism. Galls have been produced in this way upon the following named plants: Peaches, almonds, apples, hops, Paris daisy, walnut, grape, radish, tomato, raspberry, etc.

Not long ago the Maine Experiment Station purchased sixty apple trees from a leading New York nurseryman. The package in which they were shipped bore a tag stating that the orchard from which they came had been officially inspected and found free from disease. Three out of the sixty trees, or five per cent of the shipment, had well developed crown galls upon them. Under no condition should trees be planted which show growths of this kind upon the roots, for not only will it result in an unthrifty and unprofitable tree, but it will also infect the soil with the crown gall organism and endanger other plants.

WILSON PLANT OIL AND FERTILIZER CO., Chatham, N. J.

COLUMBUS, OHIO.

The Market.

Trade has been rushing here for the last two weeks, especially in bedding plants, and it is doubtful if there ever was the same amount of work done in the same length of time. All the florists give the same report.

Decoration day cleaned up everything in the way of blooming plants, and a great many people would even take them out of bloom.

Cut flower trade was heavy for Decoration day, and stock scarce. Peonies, which are generally in full bloom here at that time, were all backward, and few were out for Saturday, but as a result of the warm weather and rain on Sunday, they popped out by the thousands, when it was too late for the big rush.

Funeral work has been heavy, along with the other work, which has made it the busiest time of the year. Roses and carnations are showing the effects of the warm weather, and are of rather poor grade.

Various Notes.

The Florists' Club has held no meeting for the last month, owing to the rush. So the next meeting will be held on Tuesday evening, June 8.

The Munk Floral Co. is still cutting some good roses and some extra fine sweet peas.

The Fifth Avenue Floral Co. reports heavy business on geraniums and all bedding work. J. M.

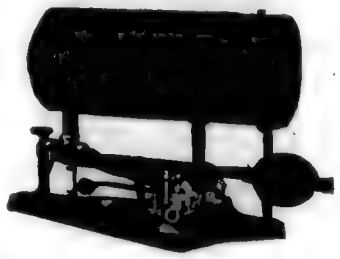
Greenhouse Heating.

CARLESSNESS EXPENSIVE.



I think a few words about care and carelessness in the boiler-room most opportune. By the paper I see about an explosion in Canada of a boiler, and the loss several thousand dollars. I also read a few years ago of the same thing in Missouri. Now, each grower who has been sufficiently impressed by these accidents will hereafter take care to see that his boiler does not blow the roof off the boiler-room. He will make sure that the valves all are properly set. He will see that the safety valve works easily and will put a little oil on it so as to be sure. He will keep his water column clean and wash his whole system, boiler and all, at least once a year, and oftener if he gets a chance. The last and best thing he will do is to have a good, sober, reliable man to run his boilers. Now, friends, do not wait until your boiler takes a move over into the next lot and you have to send out a C. Q. D. for glass, but just look your boilers over carefully and give them a good washing out and grease the safety valve and, if the tubes or sections are scaly, put in a couple of quarts of kerosene or some soda ash. Hire a reliable man and you can sleep like a child instead of worrying whether the boiler is all right or not. Do not be careless in these things; it always costs money. Do it now. G. T. E.

NUMBER OF PIPES.

Kindly advise the number of 4-inch pipes, hot water, that will be required to give proper heat for sweet peas. The dimensions of the house are as follows: Thirty-two feet long by nineteen feet wide, ten and one-half feet to the ridge, four feet at the eaves, double boarded three feet high all around, with twelve inches of glass under eaves, south gable glass above the three feet of double boards. The north end is protected by boiler shed. The outside temperature rarely goes below zero in the most severe weather.

Also, how many 4-inch pipes, hot water, would be required to heat a house thirty-

little, but it is getting better each year. The florists adjacent to the cities of the dead all report a big increase in business. The shops in the heart of the city were not quite so busy. The wholesalers all report a good demand in both local and shipping orders and they had plenty of flowers on hand to fill all orders, especially roses. Carnations were limited in the colored varieties.

Quite a fine lot of gladioli were seen and peonies were plentiful, also cape jasmines. A great lot of common outdoor flowers were sent in and disposed of cheaply. All greens, too, had a good demand.

Various Notes.

A. G. Fehr, of Belleville, spent a day last week in the wholesale district. Mr. Fehr is sending to this market a fine lot of Gladiolus America and peonies, which sold well for Decoration day.

Mrs. Marie M. Corneli, mother of Ben P. and Adolph Corneli, of the Schisler-Corneli Seed Co., died Wednesday, May 26, after a short illness, at the age of 78. The funeral took place from the family residence, 3027 Easton avenue, Friday, May 28.

Adolph Brix reports that he will make extensive alterations at his greenhouse plant, including a new boiler and heating system. The work will begin at once.

The Riessen Floral Co. says that it was never so busy with Decoration day orders as this year. It also put in a busy week with large funeral designs.

George T. Waldbart, son of Alexander Waldbart, died at the home of his parents Friday, May 28, at 1:30 a. m., after a long illness. The funeral took place Saturday, May 29.

Mr. and Mrs. Fred C. Weber are making preparations for an extended trip to Europe. They will be accompanied by their daughter, Adele. They expect to leave St. Louis next week.

Mr. and Mrs. Ed. Kalisch are contemplating a northern trip after June 15, to be gone the greater part of the summer.

Among the west end florists who had pretty window decorations last week were: Miss Newman, Fred C. Weber, Fred H. Weber and the Ellison Floral Co.

A. G. Greiner, our cactus grower, received a large shipment of new cacti from Mexico last week. He says his shipping trade has started in well and he is busy shipping to all parts of the country.

Mr. and Mrs. Theo. Miller and their daughter, Dora, will leave this month for a trip to Europe, to be gone until September.

Carl Beyer says they had an exceptionally busy plant season, also in decorating work. Mr. Beyer expects to go with the Turners to Cincinnati this month.

R. J. Windler and C. Bergsterman are showing some extra fine blooming plants in their show windows at their South Grand avenue stores.

Next Thursday afternoon, June 10, the Florists' Club will hold its regular monthly meeting in Bowman's hall at 2 o'clock. President Young would like to see a large attendance. Final arrangements will be made for the picnic. There is also a lot of other important business to transact, left over from the last meeting.

Martin Reukauf, of Bayersdorfer & Co., was a visitor last week.

The Florists' Bowling Club has not been having its weekly bowling lately, but will soon start in again. In the meantime Messrs. Kuehn and Beneke are practicing once a week at our old alleys at Park and Compton avenues. They bowled four games Friday night, May 28, as follows:

Player.	1st.	2d.	3d.	4th.	Total.
Kuehn	179	196	189	206	770
Beneke	172	173	197	219	761

LEXINGTON, KY.

The Market.

Business is still on the boom and the indications are that this month will be the best May for several years. Hardy outdoor flowers are abundant, such as lily of the valley, sweet williams, irises, peonies and roses. Some good sweet peas are coming into this market. Carnations and roses are good for the time of year and meet with an excellent demand. Funeral work is cleaning out quantities of cut flowers. Much stock is being shipped to the small neighboring towns at present.

The florists have about finished planting out beds, vases and window boxes for this year. Some of the downtown stores cleaned out thousands of plants in the last two or three weeks by advertising heavily in the local papers. The mum growers are getting things in shape for planting.

We have had an abundance of rain in this section in the last two or three weeks.

Various Notes.

The boys are about ready to begin on the new carnation house at the J. A. Keller estate.

Honaker the Florist has finished three new houses, which will be used for violets and carnations. He will discontinue the growing of bedding plants and will grow cut flowers and decorative plants exclusively.

Anderson & White have been particularly busy with bedding stock. They are about cleaned out.

Lucien LeClere, of the South Broadway Greenhouses, has finished planting the flower beds at the Q. and C. park, of which he has charge.

The Michler Bros. Co. and S. S. Kelley lost some good horses recently.

The carnation growers have about finished planting out young stock in the field.

BLUE GRASS.

CHEYENNE, WYO.—C. H. Garwood will build a greenhouse at the rear of his store on Ferguson street.

LOUISVILLE, KY.

The Market.

Last week opened with a rush in the cut flower line, which has kept up pretty well. Although it rained every day but Friday and Saturday and very little planting was done, the florists are satisfied. Everybody had a good deal of funeral work, and a few commencements helped some.

Beauties sold well the first part of the week, but slacked up a little the latter part. Peonies sold well. Roses and carnations moved nicely. The first shipment of cape jasmine arrived from the south about Thursday and was quite welcome. Outside sweet peas are starting to come in, and are selling fairly well. Other stock is moving nicely. Green goods continue to be scarce, fancy ferns especially.

Various Notes.

William Walker has a new wagon, to replace the one smashed by a street car shortly before Easter.

Herman Kleinstarink has planted all of his mums. Mums are his specialty.

Jacob Schulz has about 800 Golden Glow chrysanthemums planted in a frame outside, which are about two and a half feet high and have been showing buds for the last two weeks.

J. V. Bohrman reports business good. He says he sold most of his geraniums in 4-inch pots at $1.50 per dozen.

August R. Baumer had a good share of funeral orders and other work.

George Stark is again cutting some good Kaiserin roses. He is also busy planting in Cave Hill cemetery.

J. E. Marrett is planting quite a lot of palm beds in Cave Hill cemetery.

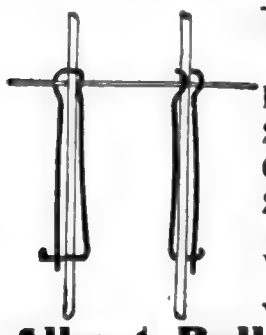
Henry Fuchs reports business good.

Nanz & Neuner have finished planting the courthouse yard. They planted some nice carpet beds, using the Shriners' emblems as designs.

Adam Heitz took advantage of the rainy days by putting in concrete borders in his early mum house. K. R.

DAVENPORT, IA.—The Tri-City Florists' Club met Thursday evening, May 13, with Henry Pauli, and transacted routine business. Later refreshments were served. The next meeting of the club will be held with Ewoldt Bros., also of this city, when the strawberries are ripe.

BLAKE'S LEVER CLIP



For Roses, Carnations, etc. Fasten stakes, cross wires, etc.

They never slip and are a great saving of both time and money.

It's the Busy Season Now!

The florist who is thinking of building a greenhouse this summer, will do well to send in his order early. All records for building will be broken during 1909, and all the construction firms will be crowded with work later on. Get your figures now and order early if you do not want to be delayed. Delay means loss of money, and in these days every dollar counts. Send for our new 1909 catalogue—sent anywhere free on request.

THE RETAIL FLORIST.....

A LIGHT BOUQUET.

There has been steady progress in floral arrangement in the direction of lightness and grace. By contrast with the bouquets carried by the brides of today, those of the bride's mother's wedding now seem stiff, heavy and clumsy. The progress toward the airy lightness in the treatment of flowers has been steady, but there yet remains some room for advancement. Many leading retailers still make their brides' bouquets so round and full of flowers that they have the appearance of a set piece; the kind that suggests the hope that the bride may be a buxom lady. The accompanying illustration is, at least in Montreal, considered a long step in advance, for brides' bouquets of this character are in much demand at the capital of the Dominion. This bouquet was made by Hall & Robinson. The lilies of the valley were denuded of most of their foliage and, with a little adiantum, were set so far above the green that a light effect is produced. Sometimes to such an arrangement one of the popular bouquet scarfs is added, but it must be light in texture, in harmony with the arrangement of the flowers. In the present instance white satin ribbon was used. The shower is light, to be in keeping with the general arrangement. Only long-stemmed valley can be used for such a purpose. For this bouquet Hall & Robinson are accustomed to receive from $12 to $15, but they make many of them.

ADVERTISING AND THE WINDOW

August Lange's flower store at 44 East Madison street is near one of the busiest corners in Chicago, a location where the majority of retail florists would depend wholly upon the show window for advertising, but Mr. Lange makes a strong combination of show window and newspaper publicity. Ever since Mr. Lange located on Madison street, he has employed printers' ink more freely than any of the downtown retailers in his city (he has practically confined his advertising to the best paper, using large space) and he always sees to it that the window and the advertisement are in harmony. For instance, when the advertisement Saturday morning tells of the dollar boxes for that day's sale, the window also has dollar boxes for its principal feature, witn some other things in the background to show what $2 will buy.

This week is brides' week, so Lange's window shows brides' bouquets, and those for the bridesmaids, the flower girls and even boutonnieres for groom and ushers. Attention is attracted by a display contrasting the styles of twenty-five years ago and those in vogue today. It will be remembered that one of the novel features of the national flower show was Lange's exhibit of these bouquets of long ago, of rosebuds tight and even. The newspaper advertisements this week call attention to this window display and there is a throng constantly before the glass.

RETAILERS AND OUTDOOR WORK

An Important Branch.

Many of the thoughtful men among the retail florists have seen that their like must needs turn attention to the outdoor business, and others have been impelled toward this branch of the work without thought whither they were drifting, following the line of least resistance, which, in this case, was the line of most insist-

RETAILERS AND OUTDOOR WORK

An Important Branch.

Many of the thoughtful men among the retail florists have seen that their like must needs turn attention to the outdoor business, and others have been impelled toward this branch of the work without thought whither they were drifting, following the line of least resistance, which, in this case, was the line of most insist-

Bride's Bouquet of Valley, Loosely Arranged.

ent demand on the part of customers whose cut flower business was likely to be lost if they were compelled to go elsewhere with their outdoor work. Also, the retail flower business begins to fall off about the time the outdoor work begins. Last February E. MacMulkin, one of the progressive Boston retailers, told the class in floriculture at the Amherst college:

Work for the Dull Season.

"The outdoor work of the florist is gradually assuming large proportions and is deserving of his best efforts. It is a well-known fact that what is called the store business of the florist is good only from about the first part of October until the first part of May; the rest of the year the florist who does nothing but a store business has hard work to make both ends meet, generally using up his profits to pay necessary expenses during the summer. Many years ago I saw the necessity of making the dull months profitable instead of a source of expense and, much to my surprise, found conditions were such that I would find no difficulty in providing work for men who would otherwise have to remain idle. It is necessary to say here that experienced labor is difficult to obtain, and when you get a man who knows his business it is more profitable to keep him than to let him go for a couple of months or so when you really have nothing for him to do.

"I found upon investigation that there were a great many men, say men who had a small, profitable business, men who filled good positions in large establishments, superintendents of manufactories, etc., who were purchasing small places within a short distance of their work, places of one to ten acres, which they were gradually improving at an expense of $100 or so a year, each with the expectation of making in the end a little paradise of his especial property, and I have today on my books a number of such people who not only keep my men busy in the dull months and have given me a fair profit on the goods and work done, but have become buyers of flowers in the winter months, when I have practically nothing to do outside.

Fascination in Landscape Work.

"Putting aside the financial question involved, there is a certain fascination in the work that appeals to any one interested in it. Everyone likes to be successful and, although the worries are many, the desired result achieved is a source of gratification that overbalances anything else. The satisfactory execution of the comparatively small orders always leads to larger ones, and while we all may not have the financial responsibility to attempt larger and more important work, we have the feeling that sometime we will have it, and know that when we do reach that condition we have the ability to carry the work to successful completion. I cannot impress too thoroughly on your minds the necessity of being prepared to attach this department to your business. The percentage of profit is good and the percentage of loss practically nothing. It, of course, necessitates the carrying of a nursery stock for a year or so, but even that grows into profit for you and, if you have a greenhouse, can be taken care of without additional expense other than the interest on the investment. That should not be an outlay, as I know of nothing that will improve in value as much in a year as a shrub, tree or plant that you put in the ground."

Retinospora Squarrosa Veitchii at Woodside Nurseries.

Some years ago Alex. McConnell, New York, felt in his Fifth avenue store the call of the outdoors and started a nursery at New Rochelle—Woodside Nurseries he calls it. Here he has built up an adjunct to his retail business. His place is along a main traveled street at New Rochelle and is an advertisement in itself, with its neatly trimmed hedge, its close-clipped lawns, its flower beds and its rank upon rank of specimen trees and shrubs. No effort is made to grow stock for price competition—the competition is alone on quality of stock and character of service. Specimen evergreens are a feature. Greenhouses at the nursery are used to provide the store with those items not regularly to be had in the New York wholesale market.

THE PLATEAU.

The plateau of roses and orchids is an arrangement by Charles Henry Fox, of the Sign of the Rose, Philadelphia, sometimes used on sad occasions where variety is demanded. The form is suitable, yet by no means commonplace. The material may be either in colors or in white, with the rich purple of the cattleyas by way of contrast. Narcissi, lily of the valley and gardenias have been used in smaller numbers for variety's sake. PHIL.

Specimen Evergreens at Woodside Nurseries of Alex. McConnell.

A Plateau of Roses, Sweet Peas and Valley.

ANCHUSA ITALICA DROPMORE.

As stated in the REVIEW of May 27, the easiest method of propagating this new variety of the old Anchusa Italica is from seed. Another method, however, which experience has proved to me to be better in some respects, is the propagating from root cuttings. This method, if not quicker, certainly produces stronger plants in the same period of time.

Although root cuttings can be made at almost any time of the year, the best time, I think, is in February. They should be made three inches long, and placed almost side by side in boxes containing a mixture of leaf-mold and sand, and about half an inch on the top. Care should be taken to cut the top straight and the bottom end with a slant, as otherwise, when a large number of cuttings are made at once, many of them may perhaps be put upside down in the boxes.

When kept inside, these cuttings will be ready to be potted in a month. Or, when to be sold as field-grown plants, they may be planted out in the last part of April, if the weather is favorable.

The writer at one time had charge of the propagating department at the nursery of Amos Perry, at Enfield, England. This nurseryman occupies a leading place among the growers of herbaceous and Alpine plants and was one of the first to bring Anchusa Dropmore into commerce. It was he, also, who introduced the still better variety, after the Dropmore came out, called Anchusa Italica, Perry's variety. This variety, although at first sight it may appear to be much the same as Dropmore, is a much larger form and of a rich gentian blue. The individual flowers are fully an inch and over across, with handsome, spreading, well formed spikes. I believe that this variety is not yet known in this country, as it is not even contained in the stock of Henry A. Dreer, by whom I am now employed. C. GRONLOH.

VIOLET PRINCESS OF WALES.

Can you tell me where I can buy some Princes of Wales violets and what treatment they would require here, in South Carolina, to give good results? I am going to plant several thousand violets this season and it will be my first experience in this line of the florists' business, for I have in the past bought my violets and had them shipped in. This is very unsatisfactory for many reasons, chiefly because they do not last so well after being shipped so far.

I have a small house which I have been using to start early vegetable plants in. It is low and is in need of repairs, but I thought that I might grow violets in it this year without spending much money for repairs, as I expect to remove it next summer and replace it with a modern greenhouse. How will it do to plant them in beds on the ground and not in benches? F. B. H.

Consult the advertising columns of the REVIEW, where in season you will find offers of Princess of Wales violets. You can procure these in a rooted state at once and plant outdoors, or you can buy field-grown stock in the autumn.

The violets will do just as well on the ground as in benches, better in many respects. Use a generous soil, adding a good quantity of decayed cow manure to it. Of course, the more light the plants get the better they will grow. A winter minimum temperature of 40 degrees is sufficient. Afford plenty of air on every possible occasion. The idea, once common, that violets succeed better in small, narrow, low houses, is now thoroughly exploded. The most successful specialists use houses 200 to 300 feet long and twenty-five to forty feet wide, planting in the ground. C. W.

NEW AZALEAS AT BERLIN.

Among the first and most noteworthy novelties exhibited in the International Exhibition in Berlin were those of azaleas. J. B. Haerens & Wille, Somergem, Belgium, exhibited a group which was awarded a silver medal. The chief varieties exhibited by them were: Somergem White, New York Pearl, Ellen Blossfeld, Winfried Haerens, Haerewills alba, Mme. John Haerens, White Pearl, Snowflake, Brooklyn Perfection, Robert Blossfeld, Excelsior, Centenaire, Mlle. Marie Antoinette and Mme. Auguste Haerens. Of these the following three novelties attracted the most attention: Winfried Haerens, a glossy cherry red; flowers are very large and so numerous that they verily cover up the foliage. Haerewills alba, a counterpart in white of the foregoing variety. Mme. John Haerens, large and profuse flowering, of a fresh carmine color.

ent demand on the part of customers whose cut flower business was likely to be lost if they were compelled to go elsewhere with their outdoor work. Also, the retail flower business begins to fall off about the time the outdoor work begins. Last February E. MacMulkin, one of the progressive Boston retailers, told the class in floriculture at the Amherst college:

The writer at one time had charge of the propagating department at the nursery of Amos Perry, at Enfield, England. This nurseryman occupies a leading place among the growers of herbaceous and Alpine plants and was one of the first to bring Anchusa Dropmore into commerce. It was he, also, who introduced the still better variety, after the Dropmore came out, called Anchusa Italica, Perry's variety. This variety, although at first sight it may appear to be much the same as Dropmore, is a much larger form and of a rich gentian blue. The individual flowers are fully an inch and over across, with handsome, spreading, well formed spikes. I believe that this variety is not yet known in this country, as it is not even contained in the stock of Henry A. Dreer, by whom I am now employed. C. GRONLOH.

VIOLET PRINCESS OF WALES.

Can you tell me where I can buy some Princes of Wales violets and what treatment they would require here, in South Carolina, to give good results? I am going to plant several thousand violets this season and it will be my first experience in this line of the florists' business, for I have in the past bought my violets and had them shipped in. This is very unsatisfactory for many reasons, chiefly because they do not last so well after being shipped so far.

I have a small house which I have been using to start early vegetable plants in. It is low and is in need of repairs, but I thought that I might grow violets in it this year without spending much money for repairs, as I expect to remove it next summer and replace it with a modern greenhouse. How will it do to plant them in beds on the ground and not in benches? F. B. H.

Consult the advertising columns of the REVIEW, where in season you will find offers of Princess of Wales violets. You can procure these in a rooted state at once and plant outdoors, or you can buy field grown stock in the autumn.

The violets will do just as well on the ground as in benches, better in many respects. Use a generous soil, adding a good quantity of decayed cow manure to it. Of course, the more light the plants get the better they will grow. A winter minimum temperature of 40 degrees is sufficient. Afford plenty of air on every possible occasion. The idea, once common, that violets succeed better in small, narrow, low houses, is now thoroughly exploded. The most successful specialists use houses 200 to 300 feet long and twenty-five to forty feet wide, planting in the ground. C. W.

NEW AZALEAS AT BERLIN.

Among the first and most noteworthy novelties exhibited in the International Exhibition in Berlin were those of azaleas. J. B. Haerens & Wille, Somergem, Belgium, exhibited a group which was awarded a silver medal. The chief varieties exhibited by them were: Somergem White, New York Pearl, Ellen Blossfeld, Winfried Haerens, Haerewills alba, Mme. John Haerens, White Pearl, Snowflake, Brooklyn Perfection, Robert Blossfeld, Excelsior, Centenaire, Mlle. Marie Antoinette and Mme. Auguste Haerens. Of these the following three novelties attracted the most attention: Winfried Haerens, a glossy cherry red; flowers are very large and so numerous that they verily cover up the foliage. Haerewills alba, a counterpart in white of the foregoing variety. Mme. John Haerens, large and profuse flowering, of a fresh carmine color.

ORCHIDS

CATTLEYA CULTURE.

Commonest Varieties.

The time to overhaul cattleyas is as soon after the flowers are cut as possible. May and June give quite a wealth of cattleya bloom. Most common of all is C. Mossiæ, perhaps the most easily grown and freest blooming of the whole genus. Others are C. Mendellii, C. Skinneri, C. Gaskelliana and C. gigas. The last named usually blooms a little later than the other sorts named. It is the largest and most showy of all cattleyas, carrying quite commonly four or five of its immense blooms per sheath, and occasionally six to eight. As many as nine and ten have been produced on one or two occasions. C. gigas, while big and showy, lacks the substance of other varieties and the flowers are easily scorched, burning through even a shading of whitewash if stood too near the glass. It should, therefore, be given a shadier spot when expanding and in full flower. Similar treatment should be given C. Hardyana, the beautiful natural hybrid between C. gigas and C. aurea.

Freshly Imported Plants.

The prices at which all cattleyas are now being offered should tempt many to try a case or two. As a rule, the first crop of flowers will more than pay for the plants, while the possibility of getting one or two extra good forms will add zest to the pleasure of handling them. When received, the cases should be unpacked and the plants well cleaned, later laying them on a vacant bench, or, better still, hanging them under one until they start to emit roots. For potting compost, osmunda fern fiber cannot be beaten. Drain the pots well. Keep the plants well in the centers of the pots and be sure to pot firmly. It will not do to trust to the fingers to do this firming. Use a pointed stick of hard wood. No orchid, or, for that matter, any other plant, will thrive if loosely potted. If the growths are inclined to be sprawly, use one or two short stakes and tie in the overhanging bulbs to them.

As a general thing pots and pans are better than baskets for cattleyas, as they hold the roots better, but fine specimens can be grown in any of these receptacles. Many expert growers think the plants are better under control in pots or pans.

To those who have a fear that orchids are hard subjects to tackle, it may be said that any person who can grow good roses, carnations, mums or pot plants of any kind, can readily learn to grow orchids. It is not necessary to go to establishments with special houses and expert growers to see splendidly grown plants. For cattleyas the end of a rose house, where some shade can be given, is ideal. The plants, if on the bench, should be raised a little to allow the air to circulate freely about them. The roof can be utilized to excellent advantage. If every cattleya could be grown within two feet of the glass, they should give a far heavier crop of flowers than are usually seen.

Newly imported plants want little water until they start to grow. A light, occasional spraying is ample. Gradually increase the supply as growths progress, but it is always safer to underwater, rather than to overwater.

Varieties for a Start.

For those wishful of embarking in orchid culture on a small scale the following cattleyas can be recommended: C. labiata, blooming in October and November; C. Trianæ, the most useful of all cattleyas, flowering from January to March; C. Percivaliana, small but free blooming, usually just preceding C. Trianæ; C. Schroederæ, March and April; C. Mossiæ and C. Mendellii, May and June; C. gigas, June and July. If restricted to three sorts, grow C. labiata, C. Trianæ and C. Mossiæ.

Now that the weather has become more summer-like, a syringing overhead early in the afternoons of clear, hot days will be found beneficial. The plants should always have the foliage dry before nightfall. Coddling is not to be recommended. There will be few nights between now and the end of September when some ventilation cannot be left on.

To those meditating a modest start in cattleya culture, experienced growers sometimes say, do not buy established plants. All good types are marked by the growers and higher prices will be asked for these. Get newly imported stock and the variety of types will please you. Keep your plants well up to the light. Water sparingly until well established. Even when established, cattleyas do not need over two or three waterings a week, and half that suffices in winter. Air freely on every possible occasion. Do not use any stimulants. These rarely do good and are likely to cause injury. A winter minimum of 55 to 60 degrees is ample. In summer 10 degrees more will be about right, although on hot nights the thermometer will be higher than this, but if you air freely the plants will not mind the extra warmth.

CALANTHES.

Calanthes are among the most beautiful of winter blooming orchids. The spikes produced at midwinter have a high commercial value in the big flower markets, and it is a little surprising that more of them are not grown. Calanthe Veitchii is the most generally useful of the genus, producing spikes two to four feet in length. There are a number of other fine hybrids raised by the late Norman C. Cookson, which are likely to be

Freshly Imported Cattleyas.

Laelia Acuminata.

quite widely grown a few years hence. Calanthes must have a hot, moist house to make their growth in. One grower of these orchids attributes his success to giving them a little fire heat during the whole summer, just enough to prevent the atmosphere becoming heavy or clammy at night.

Calanthes grow best in a mixture of fibrous loam and dried cow manure. The pots are now becoming well filled with roots and a little weak cow manure once a week can be given. Later, as growth progresses, it can be given in stronger doses. Shut up the house about 3:30 o'clock each afternoon with abundant moisture, but avoid much damping over of the foliage, which easily rots or spots from an excess of moisture. The best calanthes we ever saw were grown in low, sunken lean-to houses. The plants were close to the glass and protected by thin blinds during sunshine, there being no shade on the glass. A group of calanthes arranged with adiantums make a most glorious show. It is a pity that the plants lose their leaves before flowering, but the cut spikes arranged with suitable greenery are fine for vase or decorative work of any kind.

INTERESTING ORCHIDS.

Coelogyne Barbata.

Cœlogyne barbata is an old species, introduced seventy years ago from Assam. The flower spikes are erect, attaining a height of twelve to eighteen inches. The flowers are snowy white in color. The sepia brown of the top makes a striking contrast to the white color of the sepals and petals. Pans or baskets containing fern fiber, in which there is abundant drainage, grow this orchid satisfactorily. It needs copious supplies of water while growing and succeeds best in a cattleya-house temperature.

Laelia Acuminata.

The interesting, early winter blooming lælia, L. acuminata, is a native of Mexico and has been in cultivation over sixty years. While less imposing than L. anceps, which its smaller flowers somewhat resemble in form, it is well worthy of cultivation. The individual flowers are one and one-half to two inches in diameter and are produced on spikes twelve to twenty-four inches in height, which carry anywhere from six to twenty-five flowers. There are two forms of this lælia, one carrying flowers with pure white sepals and petals, the other with delicate rosy-violet flowers. The bulbs are roundish, flat and shiny. The solitary leaves are oblong and tough.

L. acuminata grows well at the cool end of the cattleya house and requires plenty of light and water during the growing season. Only a very thin shade, to break the intensity of the sun's rays, should be given. Pans containing fern fiber are preferable to baskets to grow it in. W. N. CRAIG.

NARCISSI AND TULIPS.

You will find some buds of poeticus ornatus. They get so far advanced and no farther. Can you tell me what the trouble is? They were replanted last fall. Can you also tell me what is the trouble with my tulips? I had about 2,000 tulips that did not bud at all. When they came up the leaves looked as though they had been eaten by some insect and they looked ragged. What is the trouble with them and what shall I do with the bed? They have only been planted two years this fall. J. E.

The double white gardenia-scented narcissus, N. alba plena odorata, is commonly affected in this way, but N. poeticus ornatus is usually free from it. It is not uncommon when bulbs have become much matted, the heavy foliage preventing a sufficiency of moisture reaching the roots. I would suggest that you take up the narcissi as soon as the foliage matures and store in a shed over summer, replanting in well enriched ground in October. Do not plant on a dry bank. The poeticus section enjoys rather moist ground.

With the exception of the Darwin and other late blooming varieties, tulips are better lifted soon after flowering, heeled in moderately thickly in shallow trenches in partial shade, and when the tops die down store them away in a cool, dry shed or cellar for the summer. Possibly cut worms had been eating the foliage of your tulips, but usually they are immune from the attacks of these creatures, which commence operations a little later in the season. Choose fresh ground for your bulbs next season and you will probably have no further trouble. W. N. C.

NAMES OF PLANTS.

Kindly give me the names of the enclosed plants. The one in blossom is a hardy shrub or tree; the other is a trailing plant, with white, star-shaped flowers. F. J.

The shrub is Malus Ioensis flore pleno, better known as Bechtel's double flowering crabapple.

The trailing plant appears to be a species of campanula, but I cannot be sure of the exact variety from specimen received. W. N. C.

LEWISTOWN, PA.—Herbert Bratton will open a large greenhouse here, which will be a branch of his father's greenhouses in Huntingdon, Pa.

Coelogyne Sanderae.

Coelogyne Sanderae.

CULTURE OF TEA ROSES.

[A paper by Isaac Kennedy, of West Park, O., read before the Detroit Florists' Club, June 7, 1909.]

When your honorable fellow member, M. Bloy, informed me a few days ago that I was scheduled for a paper on rose culture, for June 7, it nearly took my breath away. I was under the impression that the question of rose culture had been thrashed out so thoroughly by our most expert growers that there was little left unsaid.

However, I will do my best and endeavor to point out a few little items on growing tea roses that have come under my observation within the last few years, particularly with reference to blooming tea roses continuously on benches for a number of years without drying off or resting. Mine have been growing and blooming continuously for over six years, practically without rest, and they are better this year than they were the first year planted. We get along so well together that I intend to keep them in at least one year more, which means a few more extra strips under the benches; as it is, we have the braces now about a foot apart.

The Small Grower of Teas.

These few remarks about rose growing, as above stated, are not intended for culture on a large scale, except in regard to the cuttings; furthermore, they are not intended for those who grow American Beauty, Richmond and other hybrid teas, as the method of culture differs from that of the tea variety. These remarks are intended for the small grower who grows a few teas for his own use or wholesales in a small way and cannot afford to plant every year.

The first and most important item is the selection of the cuttings. Most growers select cuttings from flowering wood; I do not. I prefer the little blind shoots that spring out from the flowering wood, commonly called heel cuttings, or, as a friend of mine once remarked, "Those little devils with the hundred eyes."

Starting the Cuttings.

When taking the cuttings, trim the foliage off a little and cut away the jagged end that still adheres to the shoot, as nearly square as possible; put them in the cutting bed (any good bank sand will do), give them plenty of water, with a bottom heat of about 60 degrees and top heat a few degrees less, and in three or four weeks you will have as fine a bunch of cuttings as you would wish to look at, with roots standing out like an open parachute, and as stiff as the ribs in a ten-dollar umbrella. Be sure you get the cut as square as possible; in no case should tea rose cuttings be cut on a slant.

The cuttings ought to be put in the sand not later than December for use the following year. When rooted, pot into 2½-inch pots and keep on the cool side until spring, by which time the plants will have become almost potbound. Instead of giving them a shift into a larger pot, plant them out in the open ground, taking care not to disturb the ball, and in a short while you will see those little "lads with the hundred eyes" assert themselves and make splendid, stocky, hardy plants, which, when lifted and planted in the houses in July or August, will be a thing of beauty and a joy all winter.

The First Season's Forcing.

The outdoor treatment has built up a good, strong constitution, which will better stand the forcing treatment during the dull months than those grown inside entirely. The idea in keeping the ball intact when planting out is to obviate the danger of serious shriveling when transplanting into the benches. When planted they will require frequent syringing until established. The question of soil, to my way of thinking, does not cut so much of a figure as formerly; any good, strong soil will do, not necessarily sod. It is the after treatment that counts. My reason for making the above assertion is the fact that my roses have not had a change of soil for six years, with the exception of an inch or so of top-dressing every fall.

In regard to watering, I would say the plants should never suffer at any time for the want of it. If you would know when they have enough, it is when the water runs through the bench as through a sieve. It is the continual little dabs that sour the soil, not the thorough waterings.

Feeding and Syringing.

The question of feeding comes next. We apply nothing but blood, pure bone (not the steamed variety), and liquid manure. The blood we apply in liquid form along with the cow manure, but always after the beds have received a thorough watering with clear water. We also add a little lime about once a month to the water, which has a tendency to keep down eel worms, if there are any indications of them in the soil. In regard to temperature: If the soil is very heavy the plants will stand a night temperature of 60 degrees and a day temperature of a few degrees higher. If the soil is inclined to be light or gravelly, I would not advise higher than 56 degrees at night, as the constitution is more liable to weaken in a light soil than in a heavy one. The bone meal we apply about once every two weeks and work it into the soil. We never use a mulch of any kind on the beds, as it is impossible to determine what part of the bed is dry or wet, when a heavy mulch is used.

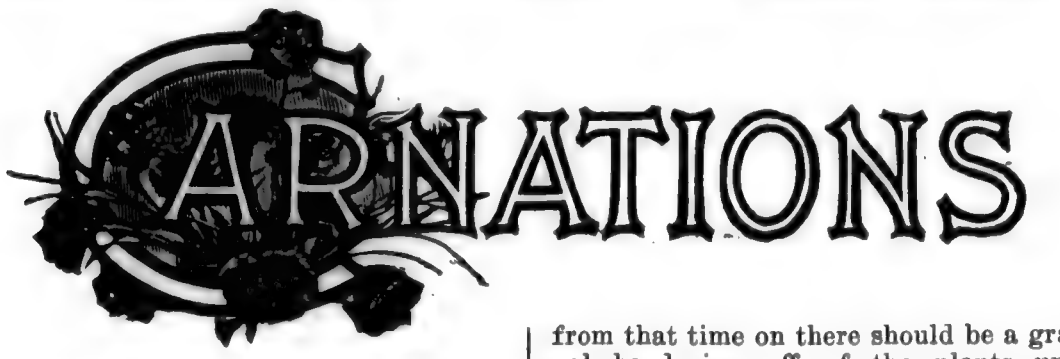
Be sure to keep down greenfly and spider. Syringe the plants when they need it, even if the day should be cloudy. Syringe early and the plants will be all right by evening, with a little extra steam heat and air. Do not wait for a bright day and let the spider get the best of you.

The Second Summer's Treatment.

Keep the above treatment up all winter and when April comes you must begin to prepare your plants for their summer siege. The following is the way we do: We gradually lower the night temperature in the houses until the plants will stand 10 degrees below the normal without danger to the proper development of the flowers. Then we cut away all surplus wood and keep them a shade on the dry side until the new breaks appear, after which we give a thorough watering, with an application of blood liquid, and off they go again on their summer cruise. During the summer months we apply less blood and more bone meal; about August we rest them up for about ten days, go over the thinning out process, and, as I said before, apply about an inch or so of fresh soil, tie them down and start them off again for the winter.

The shoots that come from the bottom of the heel cuttings will make practically a new plant each year.

The culture of American Beauty, Richmond and other hybrid teas requires different methods.



In conclusion I would say that it is absolutely necessary to keep a little sulphur on the pipes at all times during the winter months, and be careful of drafts on the plants during summer.

MULCHING BENCHED ROSES.

In about two weeks I will plant a house of Bride roses. They have small tops, but fine roots. Here, in North Carolina, we have very hot weather in the summer, and the temperature in the house, with everything open, often gets up to 120 degrees. Should I mulch these plants on the benches, or just depend on frequent watering? R. E. G.

Your young roses will enjoy a mulch of loose material after they have taken hold of the soil. By the time you have gotten rid of the crop of weeds which always follows the planting, the roses have taken hold. Up to that time you must keep the soil loose on the surface by frequent scratching. This mulch should not be heavy, but just enough to keep the soil from baking, and the rest must be done by watering. A good idea is to put on about one-half inch of manure and work it into the top soil of equal depth. This material will allow the air to penetrate, and at the same time will prevent baking. Later, when the roots have worked through the soil, a heavier mulch will be required to protect them from the sun. A. F. J. B.

Jamestown, O.—H. C. Fenker reports trade as excellent. For Memorial day he sold every plant in bloom and many were sold that showed no flower. He is more than satisfied with the way bedding stock has cleaned up.

CARNATION NOTES.—EAST.

Topping in the Field.

Early propagated plants, which, of necessity, were topped some time before being planted out, will be making rapid growth in several shoots. These will, in all probability, be the first to be housed, and during the next three or four weeks the most must be made of the time to build a strong, bushy plant.

Size is of secondary importance when housing in July; that is, the relatively small plant is to be preferred, while too much attention cannot be paid to conditions of health, habit and firmness in growth.

Frequent trips over the field, cutting back a shoot or two on such plants as require it, are more conducive to that desirable quality, continuous blooming, than the practice of appointing one day each week, or waiting until the plants are a mass of buds and then calling all hands for a general massacre. The removal at one time of a large quantity of foliage not only promotes croppiness, but the plant undergoes a severe check, from which it never fully recovers.

The oft repeated advice, to use a sharp knife in topping, still holds good, and allow me to add the injunction not to leave the severed tops in the field; remove and destroy them with the same care as would be exercised in the case of diseased plants.

Should rust appear on some varieties, encourage them by extra cultivation to outgrow the trouble. We have seen plants which, though badly affected when planted out, were by this means brought in without a sign of rust.

GEO. S. OSBORN.

MULCHING FIELD CARNATIONS.

I have my carnations planted out on a piece of ground that dries out very quickly, and wish to mulch them. What should I use? I have seen a great deal about frequent cultivation of the young plants. Should I rake off the mulch to cultivate them, or how shall I do? I am located in North Carolina. R. E. G.

If you mulch your young carnation plants in the field, it will eliminate the necessity of cultivating. The cultivating is intended largely to produce a kind of soil mulch by loosening up the surface soil, and this performs the same functions as a manure mulch. All you will need to do after applying this mulch will be to keep the weeds down with the hoe. Under certain conditions, a manure mulch should be far superior to cultivating, because it saves much labor, which in some cases does little other good than to preserve the moisture in the soil.

In this locality we would not care to mulch our carnations in the field, on account of the danger of producing rank, soft growth at a time when it is not desired. While we do want a strong growth at this time and up to the middle of July, from that time on there should be a gradual hardening off of the plants until housing time. With a heavy mulch on, this would in many cases be impossible, as, instead of being on the dry side, the soil would be kept moist by the manure and the growth would continue soft throughout the summer. If your climatic conditions are such that a manure mulch will not prevent this hardening of the plants, then you will do well to put it on. Otherwise, you will do better to depend on frequent cultivating to hold the moisture in the soil. A. F. J. B.

CHRISTMAS PEPPERS.

What is the best way to raise Peruvian peppers? I have some small seedlings, and would like to have some cultural instructions. G. H. P.

By Peruvian peppers I presume you mean what are commonly known as Christmas peppers. These can either be grown in pots all the time or planted in the open ground in rich soil and lifted about the end of August. This latter plan entails the least labor, and will give you finer plants than continuous pot culture. Plant out in rows eighteen inches between the plants and thirty inches between the rows, to allow of cultivation. In lifting them select, if possible, a time when the ground is fairly moist, and endeavor to keep as many roots intact as possible. It is immaterial whether you get a ball of earth, so long as you have plenty of roots. Pot firmly, soak thoroughly, place for a few days where they can have shade, and spray frequently. They will soon stiffen up. Keep outdoors until danger from frost necessitates their removal to a cool, airy and sunny house.

C. W.

BEGONIA GILSONI.

I should be pleased to receive a few hints on the culture of the Gilsoni begonia. I have treated it the same as I have Otto Hacker. The cuttings root fairly well, but the stock plants nearly die every time. Please give the names, also, of some other good begonias.

C. W. A. W.

To keep this double flowering, fibrous rooted begonia in good shape, it is much better to root fresh stock each season and discard the old plants, which become too large and coarse to be of much value. Use for compost one-half fibrous loam, and one-fourth each of leaf-mold and decayed manure, with a good addition of sand, and the plants will thrive in it. Keep your plants outdoors from June to the end of September, rather than indoors.

A few other desirable fibrous rooted begonias are: B. nitida rosea, nitida alba, gigantea rosea, incarnata, Scharffiana, Haageana, metallica, argenteoguttata, Dregei, Verschaffeltiana, Carrierei, Thurstoni, Gloire de Sceaux, President Carnot, Ingrami, Weltoniensis, semperflorens, Schmidtiana and Duchartrei. About all are of easy culture.

C. W.

MUMS IN AUSTRALIA.

The following notes on an exhibition held in Melbourne, Australia, April 22, show us that T. W. Pockett is still in the van with his seedling mums. The reader will, of course, remember that the fall in Australia corresponds with our spring, and the end of April corresponds with the end of October with us, so far as climatic conditions go.

The yellow, R. F. Felton, spoken of so highly, I had under trial last year in limited quantity, and everyone who saw it was delighted with it. The color is the splendid shimmering yellow of Golden Wedding, combined with an ideal habit, and, if it holds up, this will be the king pin in yellows for 1910. Most of the other kinds mentioned are under trial now, with other seedlings not named, and I have no doubt will be up to the usual high standard of this remarkable hybridist. CHARLES H. TOTTY.

"As the leading raiser of seedling chrysanthemums, it was appropriate that the most conspicuous exhibit in the show should be a collection of cut blooms from the private garden of Thomas Pockett. There were about three dozen unnamed varieties, ranging in color from pure white through all shades of bronze, gold, pink and crimson. In the center of this beautiful mass, in which old gold seemed to be the dominant color, there was a bunch of R. F. Felton blooms. This variety is one of Mr. Pockett's seedlings, and was named after the king's florist by Mr. Wells, the English nurseryman, who handles the Malvern grower's chrysanthemums. It is a pure yellow, of the decorative type, and it will be about three years before enough stock is obtained to supply the demands of the European and American growers. The gold medal offered by Messrs. W. Wells & Co., of Surrey, England, was won by Mr. Pockett's son, W. T. Pockett, with three blooms of a new seedling which has been named after Mrs. David Syme. It is a pure white, and promises to become a leading exhibition variety. Another new seedling, Alice Lemon, a pale pink chrysanthemum, won the award for the best bloom in the show."

Three features of the show impressed visitors at once—the magnificent new chrysanthemums, in the hybridizing of which Thomas Pockett stands in the front rank of the great growers of the world; the artistic dinner tables; the rich colors and fine size of the autumn apples.

Mr. Pockett had a stand entirely composed of new chrysanthemums, his own seedlings, and many of which were unnamed until yesterday. Others will be sent to England with, beyond their own merits, nothing more distinctive than a number. Among them are two splendid decorative chrysanthemums—one a distinctive golden yellow, R. F. Felton, named in England after the king's forester; another, old gold in color, shaded with apricot, called Freda Bedford. A pale pink, Alice Lemon, was raised by Mr. Pockett, and successfully shown for the medal yesterday by Mr. Neill. His blooms were voted the champions of the show. A column of space might be devoted with profit to Mr. Pockett's chrysanthemums alone. Two notable blooms among his seedlings are Kara Dow and W. Woodmason, the last named in honor of an old friend. Among the attractive seedlings is Mrs. J. C. Neill, a noble yellow, raised at Malvern. It is interesting, too, to find W. T. Pockett successfully challenging his father as a grower and shower of glorious chrysanthemums. His Japanese novelties were an interesting stand.

"It is Mr. Pockett's intention to endeavor to raise during the next two years varieties in which the lighter colors will predominate. Good whites and yellows are always wanted, and the Malvern grower has every confidence in raising the standard of the lighter colored types. The dark colors were scarce a few years ago, but there is now a greater number, and there should be no lack in this class for some time to come.

"The three most prominent Victorian raised seedlings being distributed in Great Britain this year are R. F. Felton, yellow, decorative; Mrs. W. H. Lewis, golden amber, shaded rose; and Gladys Blackburne, a buff-colored variety of the Mme. Carnot build. In Great Britain and the United States, Pockett's Crimson is classed as the best deep crimson at present being cultivated. The flowers are fully seven inches, and when half out every petal reflexes and shows nothing but deep rich crimson. The habit is exceptionally good, and the flower needs no artificial support. The above varieties were conspicuous at last week's show, and six others, newly named seedlings, may be distributed in England and America next year. These comprise Mrs. David Syme, large, pure white; Alice Lemon, another variety, heliotrope, with silvery reverse; John West, rich dark crimson, suitable for garden or decorative, a very full and good keeper; Kara Dow, golden bronze of strong constitution; Mrs. A. J. Weller, large, salmon terra cotta; and Rose Ellis, best described as a mauve pink of the Mrs. Wm. Knox type. The Alice Lemon variety won for J. C. Neill, of Williamstown, the award for the best chrysanthemum in the show."

FLOWER SHOW IN PARIS.

Excelled in Artistic Arrangement.

The annual flower show of the Royal Horticultural Society of France, opened May 17 in the Tuileries gardens, was in every respect equal to the shows held in former years in the more spacious buildings on the Cours la Reine, for many years the home of horticulture in Paris, but now demolished. The fine artistic touches, the skillful blending of colors and the perfect harmony of the exhibition were features deserving of the highest praise.

There was a grand wealth of color in the rhododendrons and azaleas from the nurseries of Moser & Sons and Croux & Sons. Roses were a show in themselves. A spacious annex was transformed into a rose garden, with beds and bowers of roses, dwarfs, standards, climbers, etc., all in pots, principally from the nurseries of Honore Defresne, of Vitry, Leveque & Son, of Ivry, and A. Nonin, of Chatillon-sous-Bagneux. Although all recent introductions were in evidence, I failed to discover anything quite new.

The Peony Exhibit.

Peonies were the next prominent flower to catch the eye, on account of their rich coloring and numerous exhibits. A considerable amount of interest was centered in the group from A. Dessert, Chenonceaux, which contained 118 tree varieties, thirty-six Japanese varieties and sixteen new varieties. Favorite, of a salmon-rose color, with large single flowers, was one of the most striking. In doubles, Balzac, rose, and Chantecler, blush, were much admired. Lemoine & Sons, Nancy, exhibited plants in bloom of a charming, yellow flowered variety, quite a unique shade, named Pæonia hybrida La Lorraine; a most distinct and beautiful flower. Moser & Sons also specialized in peonies, the most conspicuous in their collection being a grand group of Reine Elizabeth.

Vilmorin-Andrieux & Co., Paris, exhibited on an extensive scale, principally hardy annuals grown in pots. Of these the stocks and petunias were magnificent. L. Ferard, Paris, and Cayeux & Le Clerc, Paris, were also strong in stocks, petunias, mignonette, verbenas, etc. Sweet peas were also shown by these firms, but the best exhibit of sweet peas was from an English firm, G. & A. Clark, Ltd., Dover.

Carnations Not Conspicuous.

Carnations were not very numerous. The French growers, as yet, do but little in American varieties. To their credit, however, they are improving the French strain, and B. Carriat, Antibes, had a fine and extensive display, principally seedlings of his own raising, with remarkably brilliant colors.

Gerberas from R. Adnet, Cap d'Antibes, the new hybrids as exhibited at Berlin International, made a charming show, on account of the many varied and rich hues. The flowers travel well and will probably become popular in the Paris and London flower markets.

Only a few novelties were in evidence. A certificate of merit was awarded to Dimorphotheca aurantiaca, exhibited by L. Ferard, Paris, and to Hydrangea hortensis Mme. E. Mouillere, a fine, large, pure white head of bloom, exhibited by E. Mouillere, Vendome. The same exhibitor had at least half a dozen new hydrangeas, but the above was the only one recognized by an award.

Zonal pelargoniums from E. Porrier, Versailles, were creditably shown, especially Buffalo, Michael Crozy, Mlle. F. Laborde, Mme. Boursin and M. Louis Chauvin.

BEE.

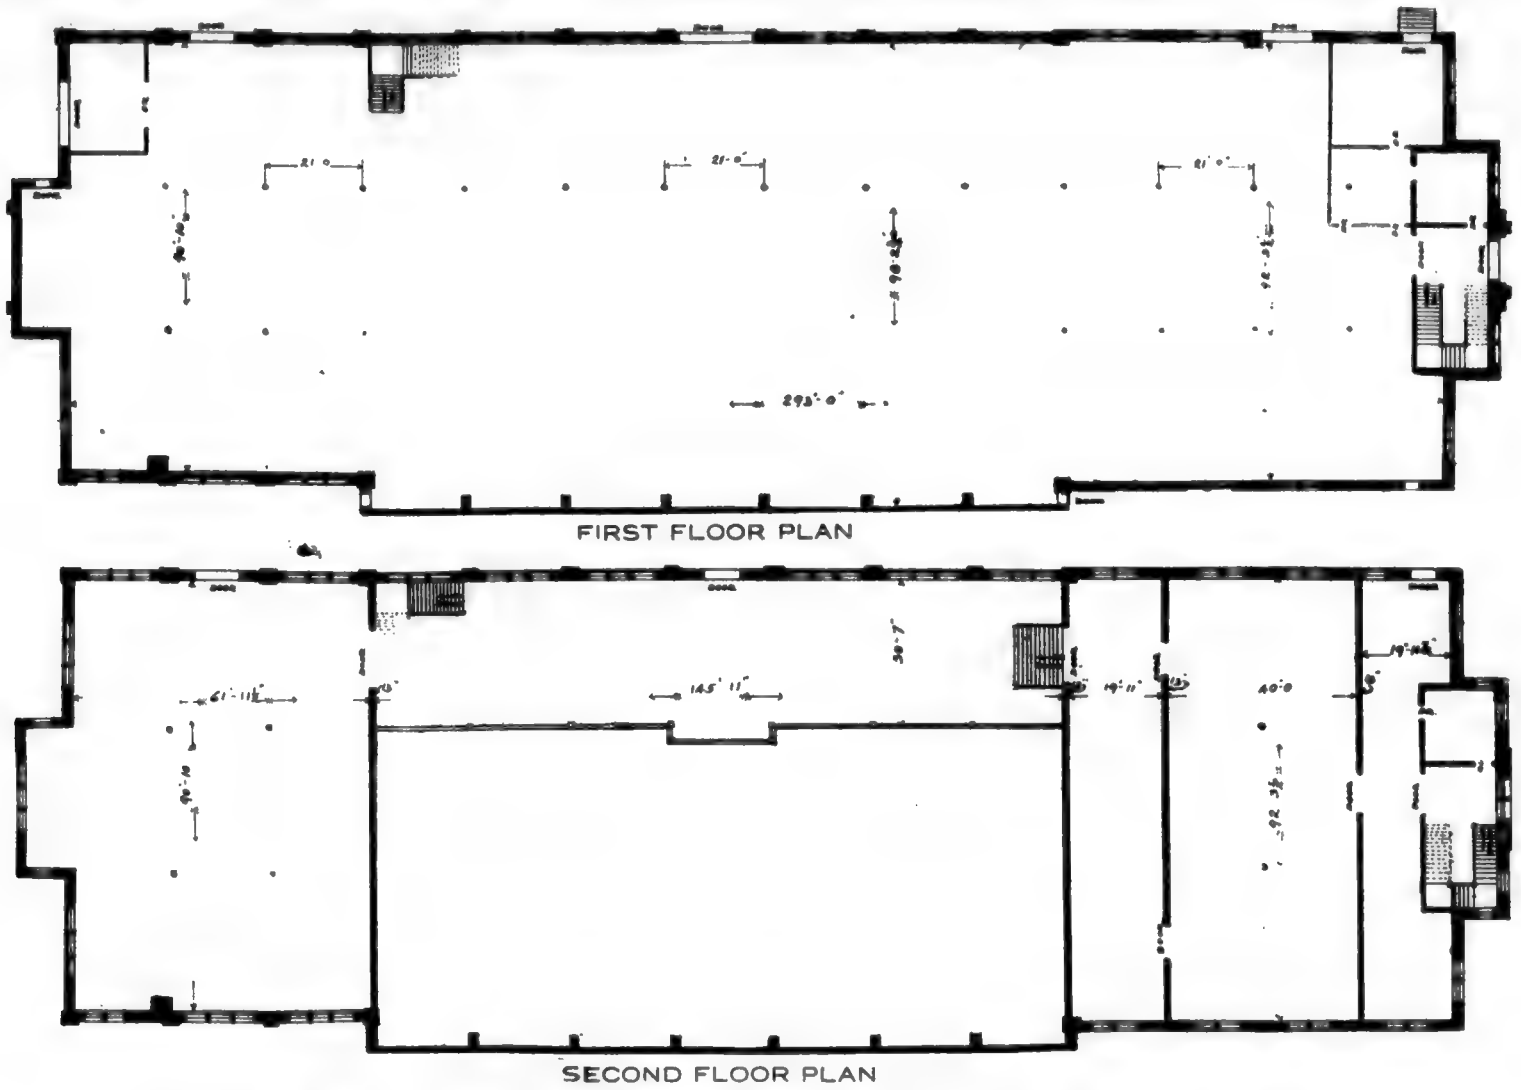
Establishment of C. L. Humphrey, Zanesville, Ohio.

HUMPHREY'S HOUSES.

Like so many owners of greenhouse establishments, C. L. Humphrey, of Zanesville, O., combines the growing of vegetables with cut flower crops. Lettuce, cucumbers and tomatoes are profitable crops in their seasons, but to keep the houses employed all the time—and it is by never having space idle that profits are made—Mr. Humphrey grows chrysanthemums in the fall and geraniums and bulb stock in the spring. His present establishment, as shown in the accompanying illustration, consists of three houses, one of them 23x60 and two 27x100. He will this spring add two more houses, each 27x75. In addition to the greenhouse crops, he grows asters and other outdoor flowers in summer.

SWEET PEA SOCIETY.

Harry A. Bunyard, secretary pro tem. of the proposed National Sweet Pea Society of America, is in high hopes for the success of the organization. He has just addressed the following letter to the seed trade:



The above proposed society is now taking concrete form. The exhibition will be held in New York city about the middle of July, exact time and place to be stated later.

The schedule is now in process of preparation. The following firms have already offered prizes to be competed for at the first annual exhibition, as follows:

The Arthur T. Boddington cup, Class A, for the largest collection of sweet peas.

The W. Atlee Burpee cup, Class B, for the largest collection of sweet peas.

The Peter Henderson & Co. cup or its value, Class C, for the best twenty-five vases, distinct varieties.

Plan of South Wing of Music Hall, Cincinnati, Where the S. A. F. Trade Exhibit will be Placed.

The W. W. Rawson silver medal, Class D, for the best twelve vases, distinct varieties.

The Stumpp & Walter prize, Class E, $10 in gold, for the best six vases, distinct varieties.

We would also suggest other classes, as follows: For the best single vases, distinct varieties and colors, first prize, $5; second prize, $3; third prize, $2.

Perhaps you would like to offer a prize along these lines or make other suggestions.

Great interest is being taken in the vicinity and it will be a great boom for the sweet pea in this country, and an organization of this kind is essential to promote the love for and interest in this popular flower.

I shall be glad to write you further and answer any questions.

The following letter has been sent to all the horticultural societies in the United States and Canada:

The above proposed society is now taking concrete form. You have doubtless seen in the horticultural press mention of this organization. The objects of the society, briefly stated, are to promote the love for the sweet pea (the poor man's orchid) among amateurs, to discard old and superseded varieties, to attend to nomenclature, and advance and educate the public to newer and more advanced types and varieties of this valuable flower, also to hold annual exhibitions.

We expect to hold our first annual exhibition in New York city about July 7 and 8, place to be stated hereafter, where a convention will be held to further organize and elect permanent officers and transact such business as may come before the convention. Several prominent seed houses have offered cups and contributions to be competed for at the exhibition, and many horticultural societies and amateurs have promised moral support.

We write to ask if your society will give its support to this society and send a delegate to the convention with power to act on your society's behalf.

The schedule of prizes to be competed for at the exhibition will be ready about the middle of June.

If you will kindly send me a list of your members, I will send each a copy.

Kindly let me know the date of your next meeting and I will endeavor to be on hand.

GREENFIELD, MASS.—A brick store, 22 x30 feet, with show windows on two sides, will be built on Davis street, at the rear of the Colonnade block, and a five-year lease on the new building has already been secured by P. E. Burtt, the florist who is now in business on Chapman street.

CINCINNATI TRADE EXHIBIT.

The S. A. F. never had a better place for the trade exhibition, which is one of the principal features of the convention, than will be afforded by the south wing of Music Hall. It is 100x320. Two floors are available, as shown in the accompanying diagram. The charges for space are slightly different from those heretofore in force. The smallest amount of space will be $4; fifty square feet, $10; 100 feet, $17; 150 square feet, $23; 200 feet, $29; 250 feet, $35; 300 feet, $41; 350 feet, $47; 400 feet, $53; 500 feet, $63. Wall space for signs will cost at the same rate. Exhibitors must furnish at their own expense all tables, cloth, signs and other accessories. The superintendent, William Murphy, 311 Main stret, Cincinnati, will make arrangements in advance so that these may be ready when exhibitors arrive. He also will supply printed copies of the rules, which it is important exhibitors observe.

OBITUARY.

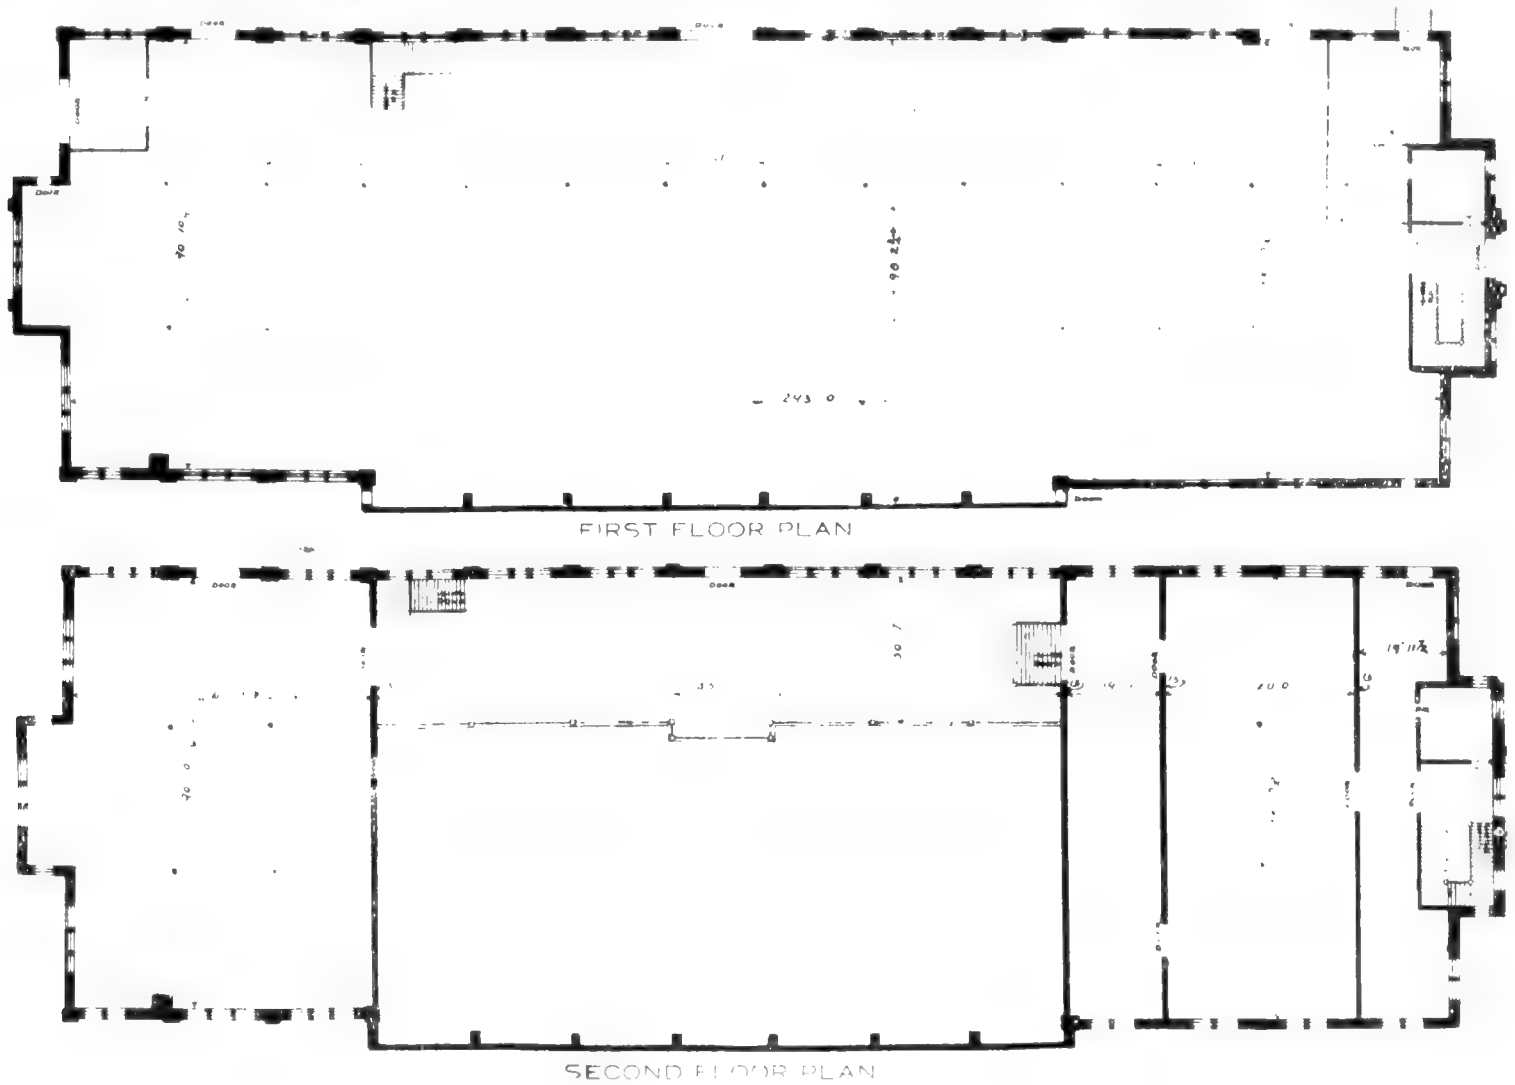
W. D. Chase.

Watson D. Chase, senior member of the firm of W. D. Chase & Son, of New London, O., died May 30, at the age of 61 years. He was born August 21, 1847. His early life was spent in Fitchville township. At the last call for volunteers in '64 he enlisted in the 196th regiment, O. V. I., serving under Sheridan until the close of the war. December 31, 1868, he was united in marriage to Miss Josephine Low. To this union were born two sons, one dying in infancy, and Clifton, who is living.

All but three years of Mr. Chase's life was lived in Huron county, Ohio, mostly in Fitchville and New London. His last residence in New London dates from the autumn of 1895. For thirty years he was engaged in the nursery and florists' business, which gave him opportunity for a wide acquaintance. Because of his honesty, integrity, fairness in business transactions and uniform courtesy to all, he won to himself a wide circle of admiring friends. While serving his country he contracted the disease which caused his death. He leaves a wife, one sister, one son, and four grandchildren.

Charles Zuber.

Charles Zuber, the youngest son of Vincent Zuber, the largest and best known grower of Brunner roses for the New York market, died at the family home at Whitestone, L. I., June 4, after only one week's illness. The young man was 22 years of age and was associated with his father, who had been a rose grower at this place for over forty years. The funeral was held Sunday, June 6, and was largely attended. Interment was at Flushing, L. I., in St. Mary's cemetery.



Norman C. Cookson.

All orchid growers, of whatever country, will regret the news of the death May 15 of Norman C. Cookson, one of the most successful of English hybridizers. He raised many good cattleya and odontoglossum seedings, but was especially successful with calanthes, phaius and dendrobium. He also reproduced from home-raised seeds the coveted Cypripedium Lawrenceanum variety Hyeanum.

BRISTOL, R. I.—For the last eight years S. L. Booth has had charge of the grounds surrounding the residence of ex-Governor A. O. Bourne. Mr. Booth has sent to the REVIEW a postal card showing a beautiful view of the gateway of the residence.

Establishment of C. L. Humphrey, Zanesville, Ohio.

RESULTS.
We give them. You get them.
We both have them.

YOUNG stock of the Virginia Poehlmann chrysanthemum is in special demand.

AT the recent Berlin international flower show the pots of the plants shown in groups were covered with waterproof crepe paper.

P. L. MCKEE, of the Moninger Co., Chicago, says that from all appearances 1909 will be the banner year for greenhouse building.

JUNE is the month to push the collections; leave them till July and you will find many of your customers on vacations and will have to wait till autumn for your money.

THE week's installment of the press service of the National Council of Horticulture consists of articles as follows: "Hardy Chrysanthemums," "Tea Roses," "Brussels Sprouts," "Dogwoods."

THE American Peony Society will meet at the Cottage Gardens, Queens, N. Y., June 11 and 12, instead of on the dates originally set. The postponement was due to cold weather retarding the peonies.

IN England they have devised a new way of recognizing men's merit. A sum is to be raised by subscription to pay a leading artist for painting a portrait of Harry J. Veitch to hang in the rooms of the Royal Horticultural Society.

CHARLES W. JOHNSON, secretary of the Chrysanthemum Society of America, has mailed to members the annual report of that organization, including minutes of the meeting held at Chicago, November 7, 1908, the review of the work of the committee on seedlings for the season, a list of varieties disseminated in 1908, numbering 139, and the list of members, numbering 128. The report shows there are two affiliated societies, the Massachusetts Horticultural Society and the Lenox Horticultural Society.

THURSDAY MORNING'S MAIL.

The REVIEW is printed Wednesday evening, but the mail on Thursday morning is frequently among the most interesting of the week. Usually there are some good sized advertisements in it, that missed connections by twenty-four hours. Frequently there is a choice news item, that the editor would gladly have paid "press rate" telegraph charges on to have got it Wednesday noon. Then, again, there is the letter of the man who says, "Stop my advertisement; the plants are all sold." A wire, sent at the time the letter was written, would have stopped the advertisement; it would have saved subscribers the disappointment of ordering stock already sold, and it would have saved the advertiser the trouble of replying to those who order stock he can no longer supply—for no man with regard for his reputation will neglect to reply promptly to such orders.

Anxious as the REVIEW is to secure advertisements to go in, it is even more anxious to cut out those that have served their purpose. But advertisers should speak in time. The REVIEW is printed Wednesday evening. Attention will be given all orders received up to the hour of going to press, but, with from eighty to 100 pages each week, the actual hour of going to press with different forms is spread over half a day; it frequently is possible to insert an advertisement in a form not closed, after it has become impossible to drop one from a form closed up. Advertisers should make it a point to see that any instructions reach the REVIEW Monday or Tuesday, if possible. At a pinch, Wednesday morning will do, but there is nothing more futile than a letter that gets delivery Thursday.

WAY DOWN EAST.

There are many factors which may influence an advertiser part of the time, but it is actual results which influence him most of the time.

Please discontinue our advertisements in the Review. We are sold out and had to refuse orders.—A. H. Craig & Son, Strantham, N. H.

We were pleased to receive some good orders the first week our advertisement appeared in the Review.—W. G. Moulton & Son, York Village, Maine.

DUTY ON ROSE PLANTS.

At the annual convention of the American Association of Nurserymen at Rochester, June 9, Irving Rouse, chairman of the nurserymen's committee on tariff, having just returned from Washington, reported that certain rates of duty had "practically been agreed upon." Among these he stated to be a duty of 4 cents each on rose plants, whether budded, grafted or grown on their own roots.

CHICAGO.

The Great Central Market.

Last week and the first part of the present one afforded a striking contrast to the conditions which prevailed in the three days preceding Memorial day. After a rush which overtaxes the market, there almost always is a reaction, and this time it has been much more severe than usual. In fact, last week will go on record as an exceptionally dull one for the first week of June, ordinarily one of the best months of the year. The carnation growers, especially, will grumble, with reason. So precipitate a decline in carnations has never been known in this market, and seldom have averages been lower than they were for the week which ended June 6. It only is to be hoped that this week's average may not be worse; the early days of the week afforded little hope of improvement, for the buyers who would clean up a lot have been making their own prices; they did not hesitate to offer 5 cents a bunch for stock they gladly paid $4 per hundred for May 28. For ten days it has been impossible to clean up all the carnations at any price, and there has been considerable waste; even the street fakers refused anything but a pretty fair grade of goods.

The rose market has fared slightly better, though, of course, prices have been low. The wedding and commencement business has caused something of an increase in the demand for Beauty and Richmond. The price of the best Beauties even has advanced, and good Richmonds hold the regular value. Killarney is the most abundant of other roses, and is in excellent shape, but selling cheaply if the buyer takes a quantity. Bride shows the effects of a few warm days, and with some growers is so poor as to be entirely unsalable. Kaiserin is now being cut by many, and is much the better rose. Maid is better than Bride, but Killarney is preferred to it. A reduction in supply of both carnations and roses is

Peonies

For June Weddings and Commencements

There is no more satisfactory flower for decorations or for presentation baskets and bouquets—fine, showy, inexpensive. Besides, Peonies rightly handled will ship long distances, no matter what the weather is, and arrive in perfect condition. OUR Peonies are put up by the oldest and most successful shipper—

They give satisfaction, not sometimes, but every time.

Beauties

Really good Beauties are scarce, but we have a fine cut of excellent quality—our regular summer crop. Splendid heads, fine foliage, all lengths of stem. A trial order will make you a regular buyer of these.

Sweet Peas

We lead the West on Peas. Can supply any quantity—far the largest and finest lot on this market. Fancy, long-stemmed stock in all the leading colors.

For all orders on file at 12 o'clock for evening shipment, we pick the stock specially each afternoon.

Carnations

We have been headquarters for fancy Carnations all winter—and the best stock of winter will be far the best stock in hot weather, when poor stock can't be sold at all. Prices are low. Order freely.

Kaiserin

Far better than Bride in hot weather—the best summer white rose. Our cut is large.

Killarney

This has become the leading pink rose, especially in summer. Ours are fine. The cut is large.

Richmond, Maid, Bride and other sorts in good supply.

Green Goods

We are headquarters for Asparagus and Smilax Strings and all other greens. New crop fancy Ferns, the best Berkshire stock.

Fancy Valley Always on Hand

expected to result from two weeks of unprofitable returns; replanting will be prosecuted.

Peonies have been in only moderate supply this week. There are innumerable small consignments, but the big crops to the south are cut off, and the big growers locally are only now beginning. The dependable shipping stock has made from 50 cents to 75 cents per dozen, but the great majority have been well sold at three bunches for $1, and plenty of peonies are to be had at the buyer's own figure. With ordinary weather conditions, next week will be peony week in this market. Local lilac has about passed; that now coming in is mostly from Wisconsin, and is both fine and cheap.

Sweet peas continue in large supply. A good proportion of the stock is of fine quality and brings excellent prices, when the general state of the market is considered, but the short peas have at no time had much value. The sweet pea has been an extremely popular flower this season. It is to be regretted that it is not a first-class shipper in warm weather; there have been many complaints during the last few days. No one is at fault.

Gladioli are abundant, and the miniature varieties are a glut. They are shown in more colors than ever before, and are much more plentiful. Callas are over, but there are large supplies of Easter lilies, which, with peonies so abundant and popular for wedding decoration, sell slowly, and prices are down. There are a few candidum lilies seen in most of the wholesale houses, but they are practically unsalable under present conditions. Valley is in good demand for wedding bouquets, but the miscellaneous flowers have little sale.

There is a good demand for asparagus strings and for smilax. The former are not abundant, but smilax is easier. The woods ferns (almost every house has a different variety) are abundant, and the Massachusetts stock is expected this week. Ferns are no longer high in price.

Carnation Growers Complain.

There is discontent and unrest among the carnation growers as a result of the returns for the last week in May. It always makes trouble for the commission houses when there is a period of loud calls for stock; the growers get a false idea of the situation. In their need for stock many houses call on consignors to their competitors and, even in the case of their own growers, the frequent telephoning for shipments gives the idea that the market really is stronger than actually is the case. Then, too, the shortage never lasts more than a few days; at Decoration day there were three days of ordinary business, three days of special demand and a Sunday to make up the average. The holiday three days would make a fine showing for any grower who sent in fresh stock, but the average was reduced considerably by the prices received the other four days in the week. Too many growers fail to take all the factors into account.

The question naturally arises: If any carnation grower was dissatisfied with his average for the last week in May, what did he say when he saw his returns for the first week in June?

Is Your Wagon an Expense?

That depends on what kind it is—the design, finish, lettering, amount of repairs, etc.

ARMLEDER WAGONS FOR FLORISTS

Club Meeting.

There was an attendance of thirty members at the club meeting June 3, when Albert T. Hey's draft of the new constitution and by-laws was adopted with minor changes. The new laws consolidate the offices of recording secretary and financial secretary and reduce the number of trustees from five to three. In order to facilitate reorganization on this basis L. H. Winterson, recording secretary, and Frank Johnson, financial secretary, and the entire board of trustees were invited to tender their resignations. Mr. Winterson and Mr. Johnson were nominated for secretary and F. F. Benthey and E. C. Amling for trustees, in addition to the former five: Leonard Kill, J. F. Klimmer, August Poehlmann, C. H. Fisk and H. N. Bruns. The election will take place at the next meeting of the club.

Ed Enders, chairman of the entertainment committee, was directed to report at the next meeting on arrangements for the club's annual picnic, and the transportation committee, of which P. J. Foley is chairman, was directed to get busy on arrangements for the club's trip to Cincinnati in August. There were two proposals for membership.

One Block's Difference.

been located in the University Club the sales have fallen off in number, but they have averaged three times as large. The location is only one block from the former store. And yet there are those who think location makes little difference.

Various Notes.

An illustration showing Randall's Seed and Poultry Annex at 98 Lake street appears on another page of this week's REVIEW.

Mike Fink, of Kennicott Bros. Co., lost most of his household effects June 1, in a fire which destroyed the flat building at 48 Osgood street and cost one life.

Vaughan & Sperry say that in the three days following Memorial day they put 5,000 dozens of peonies in cold storage. It was a crop which missed Decoration day by not more than four or five days. Beginning June 4, the receipts had so lightened that they were able to begin marketing the stock from storage.

The E. F. Winterson Co. reports having sold 65,000 canna roots during May.

Several of the wholesalers have so little use for cape jasmines under present market conditions that they are instructing would-be consignors not to ship, and are refusing to receive from the express companies shipments sent without previous correspondence, declining to risk express charges on them. But at the same time John Kruchten says that last week he was able to move about 6,000 at from 75 cents to $1, dealing them out a few to a customer.

Some time ago Wietor Bros. determined to drop Kate Moulton from their list of roses for next season, and have been steadily throwing out the plants to make room for young stock of Killarney. At the store it is said the fewer Moultons there are left at the greenhouses, the more flowers are cut. The variety has only one weakness, its neck.

At Peter Reinberg's store it is said no reduction in the supplies of Beauty are yet apparent, but the demand has shown considerable increase.

C. L. Washburn says it has been amply demonstrated by the week's business that the carnation is not a bride's flower, nor is it any more the graduates' favorite. Bassett & Washburn have had excellent business on roses, but have found almost no demand for carnations.

C. W. McKellar is handling some especially nice Red Lawson, a variety not often seen in any quantity.

The Benthey-Coatsworth Co. is this week receiving its annual crop of peonies from Batavia.

E. C. Amling reports having taken his last case of ferns out of cold storage June 7. With him this has been the most successful season on record for ferns.

J. A. Budlong is cutting a few hundreds of short My Maryland daily.

Percy Jones reports that Klehm's Nurseries has cleaned up the cut of peonies from their new Indiana place, possibly 1,500 dozens, and about the time the last blooms were cut in Indiana they began cutting Old Red at Arlington Heights. Kennicott & Co. cut Old Red at The Grove June 7.

Kring Bros., Fairbury, Ill., are sending E. C. Amling a cut of long-stemmed peonies.

George Reinberg has ordered four large traps of the Taylor Steam Trap Co., for returning condensation to his boilers.

The George Wittbold Co. reports May as having been the largest month in total sales in the history of the firm. They regard the continued cool weather as in their favor.

Poehlmann Bros. Co. is cutting a big crop of Easter lilies. The call for the best grades of roses is reported good and carnations are cleaning up fairly well with them.

E. H. Hunt reports the supply department unusually busy for this date. The cut flower department also is busier than a year ago.

E. E. Pieser, of Kennicott Bros. Co., says that every spring there comes a time when carnations are abundant everywhere and when peonies are in local supply with a good many of the best buyers. This always cuts down the calls on this market, but he does not expect the condition to last long this season. When the peony season is late it is apt to be short.

B. E. Gage, of the Peterson Nursery,

We Advised Correctly

For Decoration Day

We always give the Trade the benefit of our best judgment on the market. It is as much to the interest of the Grower as it is to the interest of the Buyer to have correct information—and the interests of Growers and Buyers are the interests of this House. See attached full page adv. from the REVIEW of April 29.

We knew we were right when we advised all buyers to order **early** and **heavy** on

PEONIES

for Decoration Day. And we still advise using Peonies for all June Weddings and Commencements.

The best flower for the purpose.
The cheapest flower for the money.
The showiest flower at any price.
The most satisfactory flower you can use.

This is the Peony House of America

$2.00 to $4.00 per 100; fancy, $5.00 to $6.00 per 100

GRAND RAPIDS, MICH., Mar. 31, 1909.

Kennicott Bros. Co.,
48-50 Wabash Ave., Chicago.
Dear Sirs.--Now that the sweet pea season is closed for us, I wish to express my thanks to your firm, its management and employees, for the very satisfactory results you have attained for us.
I expect to plant three large houses next season, and will try to arrange a longer season by planting at different times, running from Oct. 15 to Easter.
I shall plant largely of pink and white, also white, and would like to know if you think it advisable to plant lavender; if you have a market for a small amount I will grow them.
I have recently had a request from your neighbor for regular shipments but I shall ship to you exclusively, as I do not consider it justice to you to give them to competing firms, at least without your consent.
I hope to be able to come to Chicago this summer and get acquainted with you people and get in touch with your requirements so I can take better care of you in the future. Yours very truly,
John F. Nellist.

Kennicott Bros. Co. Grand Rapids, Mich., Apr. 5, 1909.
Chicago.
Dear Sirs:--In reply to your letter of the 2d will say you are at liberty to use any part of my letter for your adv.
I shall be glad to furnish you with an agreement next season to ship to your firm all our stock that goes to Chicago so that you can advertise to handle my stock exclusively Yours very truly,
John F. Nellist.

We shall have a large supply of fine **Peonies for Decoration Day**
NOW BOOKING ORDERS

and Frank Kadlec are Chicago's representatives at the nurserymen's convention at Rochester this week.

In Rogers Park, Peter Rolling is putting up four houses 25x150, using Moninger material.

H. R. Hughes has been at Detroit this week.

A stranger called on A. W. Morgan, 588 Forty-third street, June 8 and ordered some flowers delivered a few blocks away, with change for $5. When the messenger arrived with the flowers he was met in the hall of the building and gave $3.50 change for a 5-dollar bill that proved to be bad. Mr. Morgan recently succeeded Iralson.

Visitors: B. F. Vandervate, Galena, Ill.; John Evans, Richmond, Ind.; Mr. and Mrs. J. E. Watts, Meridian, Miss.; Martin Reukauf, with Bayersdorfer & Co., Philadelphia; Louis Bauscher, Freeport, Ill.

Bowling.

The bowlers had a good session June 4. John Zech, who has been making the best scores weekly since the practice began, eclipsed his best record by rolling 237, but his son, A. Zech, made 200 and 203. Victor Bergman made 225 and W. Wolf 203. It was the first match of ten that are to determine who represents Chicago at Cincinnati in August. The complete scores were:

Player.	1st.	2d.	3d.
O. Goerisch	144	124	145
J. Kruchten	118	142	127
G. Pieser	100	153	104

These scores also counted in the monthly prize handicap, won by Ed Schultz, with John Zech second and H. Kruchten third.

NEW YORK.

The Market.

Fast-increasing supplies, with a limited demand, describes the condition Monday morning, June 7. The outlook for profitable returns, therefore, is clouded, and the summer schedule may be safely issued. The June weddings may keep the retailers good-natured for a while, for they are many and some of them elaborate, but love will soon fly out of the windows. The exodus of the best flower buyers to their country places or to Europe has begun. The theaters are rapidly closing. The days of innocuous desuetude are coming fast.

Roses and carnations are overabundant, and prices are about at the summer level. Peonies now dominate the market. Some grand stock is coming in, and samples of it added greatly to the interest of the flower show at Bronx park, where, Sunday, June 6, large numbers visited the fine display. Prices for peonies, however, are low, and there is much of the common grade reaching the street that cheapens this splendid seasonable specialty, as the experts now grow it in this vicinity.

Of lilies, snapdragons, sweet peas and irises, there are more than the market can digest and prices are correspondingly low. Lilacs, tulips and snowballs have departed. Branches from the scarlet weigelas, spiræas and other garden shrubs make the retail windows attractive. Orchids add caste and brilliancy to the display. Summer travel to Europe in the floating palaces grows apace, and great quantities of flowers in baskets go out on every steamer.

Horticultural Society's Show.

Saturday and Sunday, June 5 and 6, the summer exhibition of the Horticultural Society of New York was held in the Museum building, Bronx park, and the show and the attendance, especially on Sunday, was most encouraging. The lecture on Saturday afternoon, with stereopticon, drew a good and well pleased audience. The subject was "The Selection and Care of Shade Trees," and Dr. Wm. A. Murrill drew upon views from every part of the country in illustration. Several visitors walked a half mile through the hemlock woods to view the new greenhouses under construction.

Theo. Havermeyer, of Hempstead, Albert Hodney, gardener, exhibited hardy rhododendrons and azaleas, irises and herbaceous plants. E. S. Miller, of Wading River, L. I., had a collection of irises, unfortunately heated in transit. Bobbink & Atkins, of Rutherford, showed a collection of irises and hardy herbaceous plants. George H. Peterson, of Fair Lawn, had a collection of peonies. Joseph A. Manda exhibited a collection of orchids of twenty different varieties. Lager & Hurrell had some twenty varieties of orchid plants, the best being a Cattleya gigas Sanderiana of great size and with many blooms.

Miss B. Potter, of Ossining, G. Wattlinger, gardener, showed cut blooms of Gladiolus Peach Blossom and plants of Crassula rosea. James Wood, of Mount Kisco, displayed sweet peas, Cytisus Laburnum and Scotch eglantine. Julius Roehrs Co. sent several vases of cut orchids and a grand plant of Cattleya gigas with fifteen flowers. The Blue Hill Nurseries, of South Braintree, Mass., had a bench of well-staged hardy herbaceous plants in 120 varieties, also a large collection of branches of hardy conifers. The Palisades Nurseries, of Sparkill, N. Y., showed a fine collection of hardy herbaceous plants, some 100 varieties, a striking vase of Iris Susiana and a grand plant of Lychnis Flos-cuculi fl. pl. E. H. Weatherbee, of Mamaroneck, N. Y., Francis Nielne, gardener, had rhododendrons, azaleas, irises and a splendid lot of hardy herbaceous plants, twenty-five varieties, also a display of hardy flowering shrubs and trees. The F. R. Pierson Co., as usual, had a grand collection of hardy rhododendrons and azaleas. Among the peonies, their best flowers were: Rewesiana, Princess Mathilde, Edulis superba, Festiva Maxima, Boule de Neige, Candidissima, officinalis, Rubra, Reubens Annemona, Flora Rubra, Achille, Pulcherrima, Reine des Francais. This firm also had a collection of single peonies and hardy herbaceous plants and flowering shrubs and trees.

The judges were Messrs. O'Mara, Lager and Manda; and of the orchids, Messrs. O'Mara, Bunyard and Pierson. The following were the prize winners:

Three white varieties of peonies, F. R. Pierson Co., first.

J. E. Lager, J. A. Manda, P. O'Mara, F. H. Traendly, John Young.

Various Notes.

July 1, about everyone will be at the club's outing at Whitestone Landing. Everything indicates the greatest holiday the club ever has had. Over $800 has been subscribed for the souvenir book and prizes. The boat leaves at 10:30 sharp. Breakfast will be served on the grounds at 11:30 and dinner at 6 o'clock. There will be two ball games, bowling on four alleys, thirty racing and novelty events and prizes for all. Tickets are $5 a couple, $3.50 for men unaccompanied, $2 for ladies, $1 for children, and babies under 2 years free. There will be prizes for every baby, for the largest families and for old and young, with specials for the youngest baby and the oldest lady there. Music and dancing all the afternoon and a moonlight sail in the evening.

The meeting of the Florists' Club at the Grand Opera House Monday evening, June 15, will be the final one of the season. There should be a fine exhibit and a large attendance.

E. S. Miller, of Wading River, was in the city June 5. He reports the fishing quite equal to the gladiolus promise in numbers, and this week George Stumpp, of the Stumpp & Walter Co., has gone down to test it.

All the orchid houses are now receiving large importations of all the popular varieties. That big orchid show next year in Boston, with its $1,000 prize, is already demonstrating its inspiration.

Secretary Bunyard, of the new sweet pea society, has had great encouragement from all directions as to the coming exhibition, and the formation of a permanent organization. He has done an enormous amount of missionary work in its behalf, and is greatly enthused at the prospect of its success. It has not yet been definitely decided where the exhibit will be held, but a large hall will be a necessity.

Kessler Bros. have the greenhouse bee buzzing in their bonnets. They are ambitious young men, and have worked hard.

Mr. and Mrs. Newman, the retail florists of 202 Fifth avenue, have been enjoying a short holiday among their Boston friends.

The auctions continue to draw crowded houses. The sales are likely to continue into July.

The outing July 1 will be an excellent day on which to inaugurate the holiday season for all.

This is convention season. June 5 and 6 the summer exhibition of the Horticultural Society of New York was held, from June 9 to June 11 the nurserymen's convention is on at Rochester, and Friday and Saturday, June 11 and 12, at Queens, L. I., the Peony Society's convention will be held. A goodly number of the nurserymen go from here to the Flower City, and the peony exhibition at Cottage Gardens will attract many here at the close of the week.

Mr. Russin, of Russin & Hanfling, is doing jury duty.

J. J. Fellouris says that his business as compared with last season to date shows an increase of over 100 per cent.

George V. Nash, secretary of the Horticultural Society, says: "The success which attended the fall show of last year leads us to hope that the one proposed for this fall will be even more successful. We wish to get the matter before those interested at as early a date as possible, so that all may have time to properly prepare. I will be pleased to send sched-

ules to any one who may desire them, and would appreciate a note to this effect in the columns of your paper."

C. W. Ward is in Michigan, and will not be present at the Peony Society's meeting at Queens this week.

The ball game Sunday afternoon, June 6, at Jasper Oval, New York, between the wholesale and retail employees, took place as advertised and lasted over two hours. There was a good audience and the park holds 4,000 when it is full. Of the wholesalers John Egenbrod was on first base; Hale, catcher; Lawler, third base; Tompkins, center fielder; all from Guttman's; Matthews, of Horan's, short stop; Jacobs, of Saltford's, right fielder and manager; Golsner, of C. Millang's, second base; Foley, of Lecakes & Co., pitcher, and George Allen, son of J. K. Allen, left fielder. Nic Schreiner and O'Day were umpires. Of the retailers, Wolf, with Jacobs, was pitcher, and Clark and Koehler, of Wadley & Smythe's, proved to be the best batters for their side. The balance of the retailers were not known to the wholesale contingent. The retailers won, with the score closing 15 to 30. Teddy Hale made three home runs, with three men on bases each time, but even with this handicap against them the retailers got their goat, cleaning up thirteen runs in one inning. "Too many outside professionals" is the excuse the wholesale boys give for their defeat. None but bona fide employees of the wholesale and retail houses will be allowed to compete at the club's outing, July 1.

Charles Thorley has in his Fifth avenue window a large painting of his "House of Flowers," which he expects to open in October. It shows four large show windows, bay trees on first balcony, box trees on the second and vines and flowering plants all the way to the top of the fourth story. If the reality is anything like the architect's conception, it will be a thing of beauty.

Emil Schloss, the ribbon expert; A. J. Guttman, William Ford and Peter Okkerse are all serving their country as jurymen this week.

Mr. Kather, with Wadley & Smythe, left Monday evening, June 7, for East Greenwich to decorate for the ladies' school commencement there this week.

Charles Zuber, son of Vincent Zuber, of Whitestone, L. I., was buried Sunday, a large circle of his friends manifesting their sympathy. His father has been in the florists' business for over forty years and is known in the east as the best Brunner grower, his stock being handled by Alex. J. Guttman.

At the National Bowling Tournament here Mr. Duckham, of Madison, and Mr. Chadwick, of New York, are distinguishing themselves and also some of the florist bowlers from Baltimore.

Sigmund Geller, of the Geller Florist Supply Co., leaves for Europe Saturday, June 12, on the Cincinnati, and will visit Germany and Austria, returning July 13. Mrs. Geller, as usual, will manage the business in his absence.

Bowling.

Bowling seems to receive more attention at Astoria and Flatbush than in New York itself, where Friday, June 4, only a quartette gathered. The Friday night opportunities are open to all until time to start for Cincinnati, and a few of the faithful can always be depended on. Last Friday Robert Berry had the high score, 164. At Flatbush every Thursday evening the bowling club meets, with always a quorum. June 3 several visitors shared the honors with the locals, as the following scores indicate:

Player.	1st.	2d.	3d.
Riley	188	189	201
Chadwick	160	165	208
Schmutz	117	158	136
Scott	145	154	122
Wocker	143	162	130
P. Dailledouze	154	155	116
H. Dailledouze	178	162	130

Unless the Dailledouze boys go to Europe, Flatbush will have a team at the August convention. J. Austin Shaw.

Secretary John Young announces that there will be an exhibition of peonies and outdoor roses at the Florists' Club meeting June 14.

CINCINNATI.

The Market.

Summer has arrived, and with it a taste of summer business. I suppose the total sales figure up fairly well, but the prices are down to rock bottom. Some good commencement business last week helped things out a great deal, but outside of that there was nothing doing. We now have to rely on June weddings. If the present hot weather continues for ten days, stock of all kinds will be scarce. This will enable us to get something like a fair price for what we can get hold of.

Roses are coming in by the wagonload. The greater portion of the stock is poor, and is sold for next to nothing. Carnations are almost as bad, only they do not look quite as poorly as the roses.

WIETOR BROS.

Wholesale Cut Flowers

Mention The Review when you write

The price is away down, and it is hard to move the bulk of the stock at that. Peonies are with us in force, and it is hard to get anything like a fair price for them. A great many are being put in cold storage, and they will probably come in handy in a couple of weeks. Some early candidum lilies are selling fairly well, but with the glut of other stock they do not have much show. Some fancy gladioli are meeting with a good demand and bringing a fair price. Longiflorum lilies are good property, and valley is also meeting with a brisk sale. Sweet peas sell well, and there are none too many of the better sorts.

Ferns are still selling rapidly, and it is hard to get sufficient stock to take care of the demand. The quality is improving with every shipment. The eastern stock ought to be here soon, and then the fern question will be settled for another season. Smilax, asparagus and Sprengeri are all selling well.

Various Notes.

The regular monthly meeting of the Florists' Society will be held Saturday evening, June 12. It is expected that there will be a large attendance.

George & Allan are sending into this market some of the finest valley they have ever grown. They report a heavy demand for bedding plants.

Ernst Mack has been cutting some extra fine longiflorum lilies, and they find a ready market.

Wm. Murphy, superintendent of the trade exhibition for the S. A. F. convention, is now all ready to talk business with those who want space. Diagrams of the exhibition hall are now ready for the mail, together with a list of the rules and the cost of space. All those who intend to send an exhibit to this city for the S. A. F. convention had better get busy right away, as there is no time like the present in which to make reservations. Let me say, though, that there is lots and lots of space in the hall, and that there will be plenty of room for all who wish to come; but even at that it pays not to wait till the last moment on occasions like this. That this will be the largest trade exhibition ever held goes without saying.

Whatever You Want We Can Supply

Choice Stock

for the **June Wedding** work and **School Closings.** The following are some of our leading specialties:

BEAUTIES Best on the market.

We have a range of Beauties grown specially for a cut in June and later. These have much better substance, color, stem and foliage than from plants that were cut from all winter. Try them; they're good.

ROSES

Our Maids, Brides, Killarney, Kaiserin and Richmond are all grafted stock. Much better size and substance than own-root stock at this season.

CARNATIONS None Better

We grow the fancy sorts, like Aristocrat, Victory, Winsor, White Perfection, Enchantress, etc., and will not take a back seat for anybody on quality. They can't be beat.

PEONIES

We can supply these in white and pink—in any quantity. The best sorts and plenty of them. Prices right.

SWEET PEAS

Fancy stock in the fancy colors. Enchantress-pink, lavender, pink, blue and red. You will say these Peas are all right.

GREEN GOODS OF ALL KINDS

You can order of Us

with every certainty that you are calling on as good a source of supply as there is in Chicago.

PHILADELPHIA.

The Rising Eastern Market.

I dislike high sounding, many-syllabled words that seem to imply the writer's inability to express himself clearly in good English, but there is one word that expresses a meaning that no dozen small words can convey; I mean the word eleemosynary. When this word was first used in a group of business men it was Greek to most of us. The man who used it (I think it was Herbert G. Tull) explained with a laugh that he had learned what it meant by sad experience. A man was making out a bill for professional services and consulted a friend as to whether he had asked enough. The friend took a pen and added a cipher on the right of the bill, remarking that he did not believe in eleemosynary work.

Eleemosynary is the only word properly describing the market conditions today—a great deal of work is being done for nothing. This is the more aggravating because preparations had been made for a particularly active week during the early part of June. The weddings, school commencements, and social festivities were relied upon to more than consume all the good flowers produced. This they have signally failed to do. Oak Lane, Bryn Mawr and Ogontz have had their commencements, the pretty girls have been married, or at least all who have so far made up their minds have been, and the local market remains dull. The south has done nobly, the west has added its quota and that section of the country, fondly described as down east, has also contributed something to the shipping demand. Yet all these combined have failed to make business as it should be, with the drag of local dullness. Various reasons are given in explanation: There is less doing, the car-strike, happily ended now; the peony avalanche, the warm weather following the cool, cloudy period; you can take your choice, the result remains.

I have devoted much space to the above preamble, believing that a thing so unaccountable should be brought home to those interested in the Philadelphia market in a way that would impress them. The demand out of town has been largely for Beauties, valley, choice roses and choice orchids, while in town sweet peas, daisies and peonies were favored. The peony certainly carried out the American idea of getting the most for your money to a marked degree. Peonies could be bought at your own price in the wholesale market, especially where selection was not required. They afforded the retailers a great opportunity to furnish a handsome commencement bunch for a moderate number of shekels.

Cattleya Gaskelliana has appeared as an aid to Cattleya Mossiæ and is favored by those desiring a less expensive orchid. The greenhouse grown gardenias are so scarce that the best of the southern are welcomed even by the critical. Outdoor sweet peas are becoming more plentiful; the price is gradually declining. Easter lilies have not sold well this week (ending June 9). There are still some nice callas about. Good spikes of Gladiolus America are seen. The green market is rather dull.

The Beauty Situation.

A curious change has come over the scene. Philadelphia's most important cut flower, the American Beauty rose, for so long the leader, now has its leadership questioned. Not by the buyers, nor by the flower-loving public — they continue loyal. The immense amount of advertising, as Mr. Cartledge puts it, given the American Beauty rose, makes its following formidable, far more formidable than that of any other variety of rose, or of any other flower. But the growers are wavering, and without the growers even the most enthusiastic must admit that the Beauty cannot hold supremacy. There is not a rose grower whose flowers come into the Philadelphia market, admittedly a Beauty market, who has not tried to grow the queen of roses. They have all assured their friends with a smile that they could grow Beauties, and they have all dropped out until the number continuing to grow the queen of roses

could be counted on the fingers of your two hands. These favored few continued to prosper and wax strong, so much so that Mr. Battles was heard to say that the Beauty growers received too much money. They certainly increased their places enormously. Adverse winds overtook one after another until a majority even of these favored few either forsook the Beauty partially or entirely, remarking that too much time was wasted tying, or something of that sort, or else they added important side lines, indicating a disposition to retire gracefully. That is the situation today. Personally I am inclined to think that more American Beauty roses can be grown profitably than are coming into the Philadelphia market at present. In evidence of this I would call attention to the fact that prices were higher this season for a longer period than usual and that during every time of overproduction the Beauty is favored. There is no rival in sight.

Various Notes.

The peony show of the Pennsylvania Horticultural Society was held in Horticultural hall June 3.

When H. H. Battles heard of the damage done to his shop by the water used in the extinguishing of a Chestnut street fire last week he only asked whether the orders had gone out on time, and when assured that they had Mr. Battles was entirely satisfied.

August H. Schaeffer, of York, Pa., spent part of his honeymoon in this city.

W. W. Foster has been sending some splendid spikes of Gladiolus America from his Riverside Greenhouses, Westerly, R. I., to the S. S. Pennock-Meehan Co. Mr. Foster's Killarneys are also pets of Wesley Clark, one of the crack P. M. salesmen.

William Swayne, of Kennett Square, is motoring in the Pocono mountains.

Victor Groshens, of Roslyn, Pa., is planting 4,000 White Killarney this season. Mr. Groshens' cut is handled by the Leo Niessen Co.

O. Paul Paefke, of Easton, Pa., was looking over the rising eastern market with a view to starting a store in his home town.

The sweet pea wreath of Charles Henry Fox, that appeared in the REVIEW a fortnight ago, is considered one of the

most beautiful floral designs ever photographed.

The rose show of the Pennsylvania Horticultural Society was held in Horticultural hall June 8.

Alexander B. Scott will plant Duchess of Wellington for his novelty rose this season. Mr. Scott has some promising debutantes to bring out in the near future.

Edward Reid has been shipping heavily to the south.

The Floral Exchange is making improvements at Edgely.

The rose show of the Germantown Horticultural Society was held in Association hall June 7. The competition was keen.

Easter lilac brought here for Memorial day did not take.

Berger Bros. are strong factors in peonies.

Robert A. Craig reports a heavy demand for Pandanus Veitchii.

Wallace W. Faust says that the new flower store which he and Charles W. Moorby are interested in will be opened June 10.

The genial Frederick J. Michell is one of the most popular men in Ridley Park.

William J. Muth has an unfailing way of conveying to the newspaper correspondents whether the market is brisk or dull by wordless telegraphy. When it is dull his greeting is quiet; genial, with possibly a shade of sadness, if things are bad. When it is brisk, buoyant geniality makes it clear that things are coming to the Philadelphia Cut.

Myers & Samtman are sending flowers of My Maryland to Leo Niessen Co. The propagating season is over.

The place of the late John E. Andre will be sold.

The announcement that Edwin Lonsdale addressed the June meeting of the Florists' Club was an error. PHIL.

BOSTON.

The Market.

Conditions in the flower market show a marked change from the week before Memorial day. Plenty of stock of all kinds is arriving and business is only moderate, but still as good as can be expected. There seems to be an unusually heavy crop of June brides and this helps to relieve the market; school graduations and class days will relieve the burden a little later. Roses are abundant and extra good for the season, but sell slowly now. Beauties, Killarneys and Kaiserins are noteworthy. Carnations are getting smaller and with some are evidently nearing the end. Sweet peas continue to grow short-stemmed, but are about the best selling flower in the market.

Of gladioli there is a good supply of both the Gandavensis and nanus types. Spanish iris are less plentiful. Peonies are hardly noticeable yet, beyond some of the old officinalis. Some singles will appear this week, but it will be a week later before doubles are out in force. There are such perennials as German iris, but these do not sell as well as the Spanish. Callas are practically over. Marguerites are getting scarce and poor. Valley grown outdoors is still good. Lili are a slow sale and there is simply n demand for such flowers as ten weeks stocks, antirrhinum, candytuft an feverfew.

The Best Plant Stand

On the market today. Comes in three sizes; is adjustable, and is made of Galvanized Iron or Oxidized Copper. With its aid you can place a plant from 6 to 48 inches from the floor. See illustration. Wire, write or phone us, and we will tell you our nearest agent.

five summer shows. Palms were used as a background for this group of shrubs.

T. C. Thurlow showed tree peonies, azaleas and iris in excellent shape. F. J. Rea contributed a collection of herbaceous plants, as did the Bellevue Nurseries. Mrs. E. M. Gill had a display of carnations, aquilegias, cosmos, deutzias and other flowers. W. C. Rust, gardener to Dr. C. G. Weld, received a cultural certificate for specimen hydrangeas. R. & J. Farquhar & Co. had a good group of Araucaria exersa. Francis Skinner showed a nice collection of rhododendrons.

Walter Hunnewell had the largest and best collection of hardy rhododendrons, William Whitman leading for azaleas. Mrs. F. Ayer, George Page gardener, had tree ferns, fuchsias and irises. Bronze medals went to W. C. Rust for Cypripedium Lawrenceanum and W. Whitman for German iris. W. C. Clemson, J. O. Christensen gardener, was the most successful exhibitor of forced vegetables.

Various Notes.

Official figures of May weather shatter some popular impressions. Rainfall is given as 2.33 inches, or 1.07 below the yearly average. Mean temperature was 56 degrees, against 57 degrees for a thirty-nine year period. We had six clear days only, fifteen cloudy and ten partly cloudy. Rain fell on fourteen days. On the night of June 5 we had a rainfall of 1.54 inches, which gave the ground a fine soaking.

Remember the meeting of the Gardeners' and Florists' Club, June 15. The question box will occupy most of the evening and some pertinent queries are down. Arrangements for picnic, etc., will also come up for discussion, also field day at E. J. Shaylor's, June 17.

R. & J. Farquhar & Co. have bought twenty-seven acres of land at the corner of Washington and Elm streets, Dedham, Mass., which they will use for nursery purposes.

The annual peony show of the Massachusetts Horticultural Society occurs June 19 and 20 and will undoubtedly eclipse all its predecessors. Peonies never looked more luxuriant and promising than at present. W. N. CRAIG.

ST. LOUIS.

The Market.

Business last week was much quieter than the week previous, the weather being summer-like, with lots of rain, which had a bad effect on the quality of stock in general.

There is only one week more left before the closing of the schools, and then the summer stillness will be upon us for good. There are plenty of June weddings, but nothing worthy of comment. With one exception, they were all small affairs in the cut flower line.

The wholesalers are receiving great consignments of roses, carnations, sweet peas, peonies and cape jasmines; in fact, everything in season is abundant just

FOR JUNE WEDDINGS we offer extra select Lily of the Valley, Bride, Killarney, American Beauties and Bridesmaid Roses, and of course a full line of all seasonable Cut Flowers and Greens. Try us. We have the stock and can take care of all orders.

now, and the wholesalers would have little trouble in filling any size of order at almost any price. Lily of the valley is having a good call, and roses and carnations sell fairly well every day; that is, the best quality of stock. The lighter shades of sweet peas meet with some demand. There are now plenty of dagger ferns in the market, also asparagus and smilax.

Various Notes.

Mr. and Mrs. J. E. Watts, of Meridian, Miss., spent a few days here last week, calling on the trade and buying supplies.

D. Augspurger, of D. U. Augspurger & Sons, Peoria, Ill., called on the trade last week, and he says he had an excellent trade.

G. Edwards is building four new greenhouses in Kirkwood, near Ahner's place. He will grow carnations and violets for the local market. Mr. Edwards is a new man in the business, and we wish him success.

The trade extends its sympathy to Alfred Werner, of Werner Bros., in the loss of his young wife, who died Thursday, June 3, after a short illness. Mr. Werner was married less than a year ago. The funeral was held from her late residence in Clayton.

During the big storm Thursday, June 3, a gang of street workers in front of the flower store of John F. Quinn, on North Grand avenue, rushed into Mr. Quinn's place. He did not accord them a hearty welcome, but tried to eject them from his place. A riot call for the police over the 'phone caused a stampede which did considerable damage to the appearance of Mr. Quinn's place.

At H. G. Berning's wholesale house one day last week a girl caused considerable excitement by trying to buy flowers in the name of one of the retail stores and have them charged, which she did successfully at some of the other wholesale houses early in the week. Mr. Berning called in the police, who arrested her. On promise to behave, the girl was let off with a small fine.

Park Commissioner Scanlan has arranged for 138 concerts in the different public parks for this summer. The appropriation for music in the parks this year amounts to $15,000.

Phil Gieble, head of Compton Hill Reservoir park, is proud of his fine park, which is now at its height of beauty. Three large beds of Gruss an Teplitz are now in full bloom, and are a great attraction to all visitors.

Fred Foster narrowly escaped losing his eyes last week while decorating for a banquet at McTague's. He was struck in both eyes with an electric fan. The wounds are healing nicely, and Mr. Foster was about the wholesale houses with a badly discolored eye.

Robert Scott, the Schreve avenue florist, says he has had a busy planting season, much better than last year.

Mr. and Mrs. Hugo Gross, of Kirkwood, will leave next week, June 15, for an extensive western trip as far as California. They will visit Yellowstone park and other points of interest in the far western country.

George Waldbart had bad luck last week. His fine delivery horse dropped dead and his large, fine dog suffered the same fate. Mr. Waldbart is contemplating a trip to Europe this summer.

W. C. Young, president of the Florists' Club, celebrated his fifty-third birthday June 1 with a garden party at Delmar Garden. His family and relatives only were present.

Mr. Carr, the Union market florist, who handles all of William Schray & Sons' stock at his stand, says that he has had

an excellent season in bedding stock. Seeds and bulbs, too, sold well.

Henry Ostertag says that the opening of the Coliseum Palm Garden, which is near his place of business, has brought him a fine evening trade, as the garden is drawing great crowds of the best class of people.

The younger folks among the retail and wholesale florists are making advance preparations for the Florists' Club picnic next month, and are looking forward to a great time. The two rival baseball teams, made up one of wholesalers and the other of retailers, will play. Fred Alves and R. Schriefer will make up the wholesale team and John Bentzen and Oscar Huetteman the retail team. The trustees of the club are now at work on the picnic program. The place for holding this outing will be made known by them at the club's meeting, Thursday, June 10.

Sunday, June 6, was the first Sunday opening of the year, to the public, of the Missouri Botanical Garden, known all over the world as Shaw's Garden. The day was most beautiful, and the public took advantage of it, as an attendance of 25,000 was reported by the gatekeeper. Superintendent Irish, H. C. Pring, Mr. Thompson and a host of students took charge in squads, and showed the visitors everything that was to be seen. Everything was in splendid condition, and an interesting day was spent by those who have not the time to see this beautiful garden during week days. J. J. B.

HERRINGTON'S Mum Book sent by the REVIEW for 50 cents.

ARNOLD'S TELEGRAPH CODE NO. 16 :: for **FLORISTS and NURSERYMEN**

This Code is a great MONEY SAVER in correspondence between the Jobber and Retailer and is INVALUABLE in the DELIVERY OF FLOWERS BY TELEGRAPH.

This Code in the hands of a chain of houses throughout this and foreign countries would enable the Florist to wire full directions at very small expense. Here is a sample order: "Deliver to Miss Watson, No. 395 Sixth avenue, with card of her brother, floral design representing a ball, and a few fancy chrysanthemums. Deliver at 6 p. m. Answer as soon as delivered." Here are 34 words; in Code would be 11 words, thus: **"Sprawl Watson Cabalist Sixth Spread Brother Tangling Few Unware Stalking Survival."**

$3.50 per copy; $25.00 per dozen.

FLORISTS' PUBLISHING CO., Caxton Bldg., 334 Dearborn Street, CHICAGO, ILL.

MILWAUKEE, WIS.—C. C. Pollworth, secretary of the general committee having the matter in charge, is confident that this year's flower show will surpass anything heretofore achieved in the "famous" city. The exhibition will be held in the auditorium.

BETHLEHEM, PA.—At a recent meeting of the floral committee of the Industrial Commission, it was decided that the second annual flower show or rose festival be held on the afternoon and evening of June 9, in the Market house. It was announced that $100 would be awarded in prizes. Three of the local florists had already signified their intention of making exhibits and there were hopes that all the florists would be "brought into line."

WANT ADVERTISEMENTS.

Advertisements under this head one cent a word. CASH WITH ORDER. When answers are to be addressed in our care, add 10 cents for forwarding.

A GOOD INVESTMENT.

Enclosed please find my check for $1.40 in payment for my half-inch card one month in the department for Leading Retail Florists in the Review. This has been a good investment for me ever since I made the yearly contract, and is getting better right along.

George C. Baker.

San Antonio, Tex.

PROVIDENCE, R. I.

The Market.

Last week was a fairly busy one. Usually the week following Decoration day is rather dull, but this year has been an exception. Funeral work has been brisk, while social functions have been numerous, calling for large numbers of bouquets and cut flowers.

Growers and florists who combine landscape and garden work have their hands full with trimming up and laying out estates, and the amount of bedding work far exceeds that of any previous year.

Various Notes.

Joseph Kopelman, of J. Kopelman & Co., has purchased from the Industrial Trust Co. the greenhouses which that institution recently bid in at the auction sale. There are twelve of these houses, containing about 50,000 square feet of glass. They are to be removed from their present location on North Main street, Pawtucket, to Oaklawn, where they will be put up on the 100-acre farm purchased some months ago by Mr. Kopelman. Mr. Barclay, who was formerly connected with the Rhode Island Greenhouses, which operated the range, will have charge of the houses when they are up. Mr. Kopelman intends putting the entire range to carnations, roses and general stock.

William Coultas, a former Newport gardener, who has been visiting John Gibson, of Gibson Bros., Newport, has returned to New Haven, where he is superintendent of the grounds in connection with Yale College.

John J. Dunn, of Westerly, has been reëlected secretary of the State Board of Agriculture, and Prof. A. E. Stene, of

the Rhode Island College, has been re-elected State Entomologist.

The table and place flowers for the shore banquet of the Rhode Island Bar Association at the Pomham Club June 5 were furnished by Johnston Bros.

At the dramatic and dancing recital by pupils of William Lynn at the Imperial Theater, June 2, there were fifty-three bouquets, baskets and other offerings. Among those furnishing were: Macnair, 13 pieces; Williams, 9; Kopelman, 8; Wood, 11; Hazard, 5.

Vose & Son, Woonsocket, handled nearly 20,000 aster plants last week. They report brisk business on all kinds of bedding stock.

A fine list of prizes to be awarded at the June, September and November exhibitions by the Rhode Island Horticultural Society in this city is announced by Secretary Charles W. Smith.

Johnston Bros. had the decorations for the Seabury-Goff wedding June 1.

Matthew Macnair was one of the guests at the banquet of the Rhode

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., Watson S. Woodruff, Orange, Conn.; First Vice-pres., J. C. Robinson, Waterloo, Neb.; Sec'y and Treas., C. E. Kendel, Cleveland. Twenty-seventh annual convention, Niagara Falls, Ont., June 22 to 24, 1909.

THE Cottage tulips will be the feature of many of the fall bulb catalogues.

THE turnip seed lists so far at hand show better prices than those of last year.

VISITED CHICAGO.—Charles P. Braslan, of Braslan Seed Growers' Co., San Jose, Cal.

THE radish seed crops of Michigan are said to be looking well. Conditions so far have been favorable.

THE California growers report crops in general to be in good condition, but they qualify their reports by saying that the critical period is yet to come.

PEAS are reported to show a good stand; the crops are somewhat behind what they were at this time last year, but there is every reason to think that the harvest will be as good as usual.

THE bean growers have now got what acreages they need, according to reports. Planting is progressing at some places and the outlook for a normal crop is as good as it has been at this date for some years back.

OUTSIDE of the Nebraska district, the growers of the central west are not looking for any great increase in vine seed product. In most cases it looks as though a considerable decrease in the acreage will be the rule. The Nebraska district is excepted because of lack of news from that region.

TRADE in general for the week has been normal, according to reports from the wholesalers. The market garden seedsmen, on the other hand, report sales far in excess of last year's at even date. The mail order business counts for little and counter trade outside of the market garden department is only a trifle better than normal.

THERE is an old saying that "politics makes strange bed-fellows," and so do the exigencies of that modern occupation, being a press agent. Not long ago one William Wolff Smith, a Washington press agent, was conducting a campaign for the Wholesale Seedsmen's League against the congressional seed distribution; now Mr. Smith is engaged by interests attacking the packers who use benzoate of soda, while a number of wholesale seedsmen are contributing to a fund being raised by canners to advertise the purity of canned goods.

THE weather continues to cause much uneasiness to the onion set growers in the Chicago district. Continued rains give no chance to do the much needed weeding. The cultivators are being run between showers, but it has been impossible to get the hand weeding done. The long delay in getting the seed into the ground gave the onion plants no chance to get ahead of the weeds, so that both the plants and the weeds stand an equal chance at present, as to growth, with conditions favoring the weeds. The acreage at Chicago is no larger than it was last year and the adverse conditions point to a considerably shorter crop.

THE peas this year will not be ready to rogue by the usual date. It is likely to be July before much of this work can be done.

THE Sluis Seed Store, established last season at 644 West Sixty-third street, Chicago, has opened a market gardeners' branch store at 21 South Halsted street, near the Haymarket square.

HOWARD W. EARL left Philadelphia June 3 via New Orleans and the Southern Pacific for California, and next week will be joined by W. Atlee Burpee and his son, David Burpee, in looking over the contract crops there.

AT Knoxville, Tenn., June 1, Commissioner of Agriculture J. W. Thompson had a meeting with local seedsmen for consideration of the administration of the new seed law in Tennessee. The following seedsmen were present: Joe Broyles, of the Broyles-Hackney Co.; S. Kaiser, of Kaiser Bros.; W. W. Scarborough, of W. W. Scarborough & Co.; F. S. Reap and George Ketchen, of C. W. Henderson & Co., and a representative of Ross Bros., Louisville. Prof. H. A. Morgan, of the University of Tennessee, represented the agricultural experiment station at the meeting.

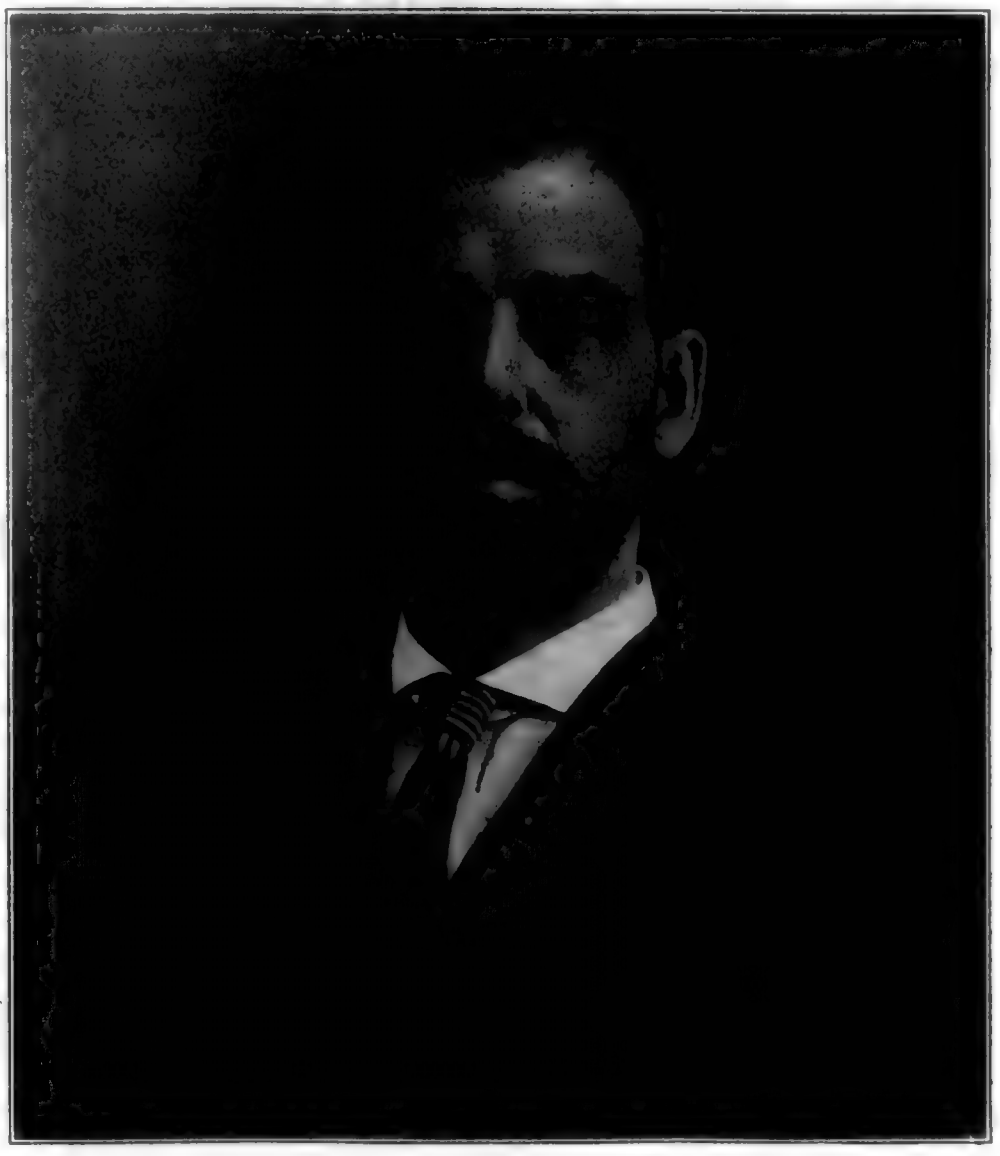
Seed and Poultry Annex of the A. L. Randall Co., Chicago.

RANDALL'S SEED STORE.



The A. L. Randall Co., Chicago, has been enlarging its field of operations in the last few years. Having built up a large wholesale cut flower business, a department for florists' supplies was added, and the combined departments occupy all except the street floor of the deep double five-story building at 19 and 21 Randolph street. A few months ago, having already added grass seeds in cartons, and a few other specialties for sale through retailers, it was decided to add poultry supplies. A few months' experience demonstrated that a good business could be done in this line, but that it would be desirable to locate it elsewhere than in the wholesale cut flower and supply building. Consequently the store at 98 Lake street was leased and an opening there took place a few weeks ago. The accompanying illustration gives an idea of the showing made to passers-by by "Randall's Seed and Poultry Annex." Plants, a general line of seeds, shrubs, goldfish, fertilizers, insecticides, poultry and poultry supplies will be carried. It is stated that the business in the annex has been profitable from the first day the doors were opened. A catalogue of poultry, poultry supplies, etc., is now on the press.

The 98 Lake street interests of the A. L. Randall Co. are in charge of Harry Sherman Seeley. The name appears in full, together with that of Miss Evelyn Helen Long, upon an announcement of a wedding which took place Wednesday, June 2. Mrs. Seeley is the daughter of a well known family at Winnetka. Frank Johnson, also of the Randall Co., was Mr. Seeley's best man. One of those at the wedding was former Vice-President Stevenson.

CLARK'S WISCONSIN BRANCH.

The Everett B. Clark Seed Co., of Milford, Conn., one of the pioneer seed growing concerns of New England, has recently purchased a site at Green Bay, Wis., upon which the company is now erecting a first-class plant for the handling of seed peas and beans, including a seed warehouse, dock, etc. The warehouse is to be a modern, three-story fireproof building of concrete construction and will contain an up-to-date and practical equipment for the handling of seed peas and beans, including hand picking equipment for eighty to 100 pickers, Clipper cleaning and Otis elevating machinery and electric power.

The site secured for the building affords excellent shipping facilities. The main tracks of the Chicago & North-Western railway are at one end of the site, on a siding from which cars may be received or dispatched over four railroads which come into Green Bay. Two of these railroads will bring crops from the growing sections. Two are trunk lines over which out-bound shipments may be moved. At the opposite end of the site is the harbor of Green Bay. The company is building on its property first-class docking facilities to accommodate steamers of the Green Bay Transportation Co., which will bring in the crop from several of the growing sections;

E. L. Olmsted.

Seed Trade News.

AMERICAN SEED TRADE ASSOCIATION.

Pres., Watson S. Woodruff, Orange, Conn.; First Vice-pres., J. C. Robinson, Waterloo, Neb.; Sec'y and Treas., C. E. Kendel, Cleveland. Twenty-seventh annual convention, Niagara Falls, Ont., June 22 to 24, 1909.

THE Cottage tulips will be the feature of many of the fall bulb catalogues.

THE turnip seed lists so far at hand show better prices than those of last year.

VISITORS CHICAGO: Charles P. Braslan, of Braslan Seed Growers' Co., San Jose, Cal.

THE tomato seed crops of Michigan are said to be looking well. Conditions so far have been favorable.

THE California growers report crops in general to be in good condition, but they qualify their reports by saying that the critical period is yet to come.

PEAS are reported to show a good stand; the crops are somewhat behind what they were at this time last year, but there is every reason to think that the harvest will be as good as usual.

THE bean growers have now got what acreages they need, according to reports. Planting is progressing at some places and the outlook for a normal crop is as good as it has been at this date for some years back.

OUTSIDE of the Nebraska district, the growers of the central west are not looking for any great increase in vine seed product. In most cases it looks as though a considerable decrease in the acreage will be the rule. The Nebraska district is excepted because of lack of news from that region.

TRADE in general for the week has been normal, according to reports from the wholesalers. The market garden seedsmen, on the other hand, report sales far in excess of last year's at even date. The mail order business counts for little and counter trade outside of the market garden department is only a trifle better than normal.

THAT is an old saying that "politics makes strange bed fellows," and so do the exigencies of that modern occupation, being a press agent. Not long ago one William Wolff Smith, a Washington press agent, was conducting a campaign for the Wholesale Seedsmen's League against bo congressional seed distribution; now Mr. Smith is engaged by interests attacking the packers who use benzoate of soda, while a number of wholesale seedsmen are contributing to a fund being raised by canners to advertise the purity of canned goods.

THE weather continues to cause much uneasiness to the onion set growers in the Chicago district. Continued rains give no chance to do the much needed weeding. The cultivators are being run between showers, but it has been impossible to get the entire weeding done. The long delay in getting the seed into the ground gave the onion plants no chance to get ahead of the weeds, so that both the plants and the weeds stand an equal chance at present, as to growth, with conditions favoring the weeds. The acreage at Chicago is no larger than it was last year and the adverse conditions point to a considerably shorter crop.

THE peas this year will not be ready to rogue by the usual date. It is likely to be July before much of this work can be done.

THE Sluis Seed Store, established last season at 644 West Sixty-third street, Chicago, has opened a market gardeners' branch store at 21 South Halsted street near the Haymarket square.

HOWARD W. EVATT left Philadelphia June 3 via New Orleans and the Southern Pacific for California, and next week will be joined by W. Atlee Burpee and his son, David Burpee, in looking over the contract crops there.

AT Knoxville, Tenn., June 1 Commissioner of Agriculture J. W. Thompson had a meeting with local seedsmen for consideration of the administration of the new seed law in Tennessee. The following seedsmen were present: Joe Broyles of the Broyles Hackney Co., S. Kaiser, of Kaiser Bros.; W. W. Scarborough, of W. W. Scarborough & Co.; F. S. Reap and George Ketchen, of C. W. Henderson & Co., and a representative of Ross Bros., Louisville. Prof. H. A. Morgan, of the University of Tennessee, represented the agricultural experiment station at the meeting.

Seed and Poultry Annex of the A. L. Randall Co., Chicago.

RANDALL'S SEED STORE.

The A. L. Randall Co., Chicago, has been enlarging its field of operations in the last few years. Having built up a large wholesale cut flower business, a department for florists' supplies was added, and the combined departments occupy all except the street floor of the deep double five story building at 19 and 21 Randolph street. A few months ago, having already added grass seeds in cartons, and a few other specialties for sale through retailers, it was decided to add poultry supplies. the Goodrich Transit Co., and, particularly, the Mutual Transit Co., which operates steamers direct from Green Bay to Buffalo on very reasonable rates. The freight rates out of Green Bay were largely the cause for selecting that point for this new branch, as Green Bay enjoys the 100 per cent or Chicago basis of rates on east-bound business.

The Clark Seed Co. has arranged with E. L. Olmsted, of St. Louis, to take charge at Green Bay as superintendent of its Wisconsin branch. Mr. Olmsted brings to this work an experience of twenty-one years in the seed business, particularly in the production of seed peas and beans. From 1888 to 1893 he was with N. B. Keeney & Son, Le Roy, N. Y.; from 1893 to the present time with the Plant Seed Co., St. Louis, during a portion of which time he managed the Plant company's growing business in Michigan. Latterly he has been located at St. Louis, sharing with Mr. Plant the management of the garden seed department of the Plant Seed Co.

Mr. Olmsted enters upon his new duties at Green Bay June 15, at the beginning of the roguing season. The warehouse will be completed July 1.

The Wisconsin business of the Clark Seed Co. has heretofore been handled from Sister Bay, but as the business has enjoyed a great increase, the labor and shipping facilities of that point have proved inadequate. The establishment at Sister Bay, owned by the company, will still be operated as a sub-station in connection with the Green Bay house.

The concern's business in Michigan is handled from East Jordan, under A. E. Cross, as superintendent of the Michigan branch. Mr. Cross has had about the same experience in the growing of peas and beans as has Mr. Olmsted, Mr. Cross having previously been with N. B. Keeney & Son and for many years with D. M. Ferry & Co., at one time superintendent of Ferry's Charlevoix branch.

IMPORTS.

The imports of seed through the port of New York for the week ending May 29 were as follows:

Kind.	Pkgs.	Val.	Kind.	Pkgs.	Val.
Annatto...	9	$ 120	Fennel	12	$ 168
Caraway .	500	4040	Grass	80	496
Card'mom .	62	1802	Poppy 150		666
Castor ...5448		18246	Other		4211

In the same period the imports of bulbs, trees and plants were valued at $11,380.

PEAS IN SOUTH DAKOTA.

The peas have obtained a good start in the new growing district in Lake and Minnehaha counties in spite of the late season. The O. S. Jones Seed Co., of Madison, S. D., which has out over 3,000 acres in this new field, wrote the Review June 3 as follows:

"We have been reading with much interest the reports from pea growing districts in the Review. This is our first season that we have out such a large acreage in this locality. We have seventy-four contracts among the farmers, amounting to 3,100 acres. We commenced seeding April 20 and finished the last week in May. This has been a very cool, backward spring, but our first seeding is from eight to twelve inches high and is looking fine. Farmers are very much pleased with the prospects and are looking for an average yield."

SEED SEASON NOT CLOSED.

Maurice Fuld, of W. W. Rawson & Co., Boston, takes exception to the statement that the seed season is closed. Not in Boston, he asserts. June 1 Mr. Fuld said:

"We note some people think the seed season is over. We do not agree at all on this point, for our mail this morning has been heavier than on any one day during the season.

"Of special features during this season, we could report as follows: The months of March and April were to a

great extent disappointing, because the usual advance rush which is experienced after a spell of a few days of spring weather did not take place. The cold continuously kept on until May. Counter trade was exceedingly slow during the preceding months, until the warm days in May, and then the rush started which has never abated until this present day.

"The season this year is later than we have ever experienced it, and we believe that the month of June will be a better one than the month of April was, so far as counter trade is concerned.

"The demand for certain articles this year has been a great surprise to us. Dahlias, for instance, are now at a premium. Our stock consisted of 75,000 roots and these have been cleaned up to the very limit. Some of the late comers are willing to pay from $5 to $8 for a dozen good dahlias, regardless of variety.

"The choicer varieties of gladiolus are much in demand, and what surprises us most is that such high-priced varieties at $1 each can be sold so readily. In our opinion the gardening public of America is only now awakening to the beauties in the newer and more improved forms of flowers and is willing for the sake of possession to pay any price asked for them, provided it is fairly reasonable.

"The demand for tomato plants has been phenomenal this season, and there must be a regular famine for them in this city within a few days, for all the large growers are entirely cleaned up and what the small growers possess does not amount to anything.

"We are confident that when the season closes, this year will be the banner year of any so far in the seed business in Boston."

A GOOD SEASON.

The catalogue houses, and those doing a large counter trade in seeds, all report a good season, some of them an increase over 1908, which was generally the best ever. March with many fell below last year, due to the unfavorable weather conditions, and April was off with some, but the aggregate is satisfactory. Here is what a few leading houses say:

Paul F. Richter, of the Henry F.

Michell Co., Philadelphia: "We are glad to say that we have had an exceptionally good season. We have had very large demands for everything, particularly in the vegetable seed line, where we think our season has been a better one than we have ever before experienced. In general, it has probably been the best season of our experience, and we are still quite busy, having reduced our force very little. Our season runs up into the early summer."

F. G. Johnson, of S. M. Isbell & Co., Jackson, Mich.: "We certainly have no cause to complain of the business season of 1909. Our catalogue trade in January and February showed an increase of twenty-five per cent over 1908. March, however, went slightly under last year, although since April 1 we have had about the same increase as in January and February. This gives us a net increase over 1908 of just about twenty per cent."

J. M. Thorburn & Co., New York: "The nature of our business is such that it varies little from year to year. The past season has been no exception to this general rule."

W. Atlee Burpee, Philadelphia: "With us the seed season of 1909 even broke the record of 1908, which we did not expect to surpass for some years to come. The increase in trade was due not only to a greater number of orders received, but also to the fact that the orders averaged better."

C. R. Root, manager of the Barteldes Seed Co., Denver: "This season the seed trade has been prolonged much later than usual. We consider it three to four weeks later than usual in this locality. The demand for field seeds has exceeded

previous seasons in our history. The probabilities are that Colorado has the largest acreage of grain and field seeds ever experienced. We are impressed with the demands from purchasers for high grade seeds. They are being rapidly educated to want the best procurable. We consider this is progress in general intelligence with planters and we hope for the day when the planters will insist on using nothing but clean, pure, first-grade seeds of whatever they plant. The cheap, trashy seed stock is being eliminated by our western planters rapidly. The best is never too good for our western people."

H. A. Bunyard, with Arthur T. Boddington, New York: "We can say that our business shows an increase of about twenty per cent over last year. All stock has sold well, with few exceptions, and we have comparatively small surpluses on hand. Tuberoses seem to be selling less every year. There is less demand for Lilium auratum, but an increased demand for cannas, gladioli, tuberous-rooted begonias and speciosum lilies. Hybrid roses have sold well, but there has been a great scarcity of hybrid teas, owing to the early frost in Europe last season. Miscellaneous bulbs have sold well on the average and there seems to be an increased demand for the gloxinia. We handled this season over 400,000 cannas. We are comparatively young in the seed business and, while our business has increased tremendously this season, it is not really a criterion generally of the trade conditions, although stocks of corn and lima beans and some peas are cleaned up very close."

THE LARGEST ADVERTISEMENT.

J. W. Ross, a seedsman and florist at Centralia, Ill., claims the honor of having published the largest advertisement ever printed by a seedsman in a newspaper of general circulation. The advertisement appeared in a special Easter edition of the Centralia Evening Sentinel. It occupied five full pages, and contained a fairly complete catalogue of seeds and plants, freely illustrated with the general run of catalogue cuts. Mr. Ross says the advertisement was equivalent to a special edition of his catalogue, and that trade with him this season has considerably exceeded the best previous records. He asserts that the progress of the big catalogue houses in the mail seed trade is not impairing the success of the smaller seedsmen doing a comparatively localized trade, and believes that many others, like himself, are growing faster than are the big catalogue houses.

CATALOGUES RECEIVED.

Searl & Sons, Sydney, Australia, seeds, plants, trees and flowers; John S. Weaver, Kinzers, Pa., tobacco seed; King Construction Co., North Tonawanda, N. Y., circular on King iron frame greenhouses; McHutchison & Co., New York, N. Y., agents for H. W. Van Der Bom, Oudenbosch, Holland, nursery stock.

NEENAH, WIS.—Louis Otto's season's addition will consist of three houses 23x130. He has ordered the material of the Moninger Co., Chicago.

PITTSBURG, PA.—The remains of the man killed June 1 by a Pittsburg & Butler trolley car at Elfinwild were identified as those of Ernest Winkler, a grower at F. Burki's Crystal Farm, Gibsonia.
